
U. S. 10-40 BONDS.

These Bonds are issued under the Act of Congress of March 8th, 1864, which provides that all Bonds issued under this Act SHALL BE REDEEMED IN COIN, at the pleasure of the Government, at any period NOT LESS THAN TEN NOR MORE THAN FORTY YEARS from their date, and until their redemption FIVE PER CENT. INTEREST WILL BE PAID IN COIN, on Bonds of not over one hundred dollars annually and on all other Bonds semi-annually. The interest is payable on the first days of March and September in each year.

As these Bonds, by Act of Congress, are

Exempt from Municipal or State Taxation,

their value is increased from one to three per cent. per annum, according to the rate of tax levies in various parts of the country.

At the present rate of premium on gold they pay

Over Eight Per Cent. Interest

in currency, and are of equal convenience as a permanent or temporary investment.

It is believed that no securities offer so great inducements to lenders as the various descriptions of U. S. Bonds. In all other forms of indebtedness, the faith or ability of private parties or stock companies or separate communities only is pledged for payment, while for the debts of the United States the whole property of the country is holden to secure the payment of both principal and interest in coin.

These Bonds may be subscribed for in sums from $50 up to any magnitude, on the same terms, and are thus made equally available to the smallest lender and the largest capitalist. They can be converted into money at any moment, and the holder will have the benefit of the interest.

The Funded Debt of the United States on which interest is payable in gold, on the 3d day of March, 1864, was $708,965,000. The interest on this debt for the coming fiscal year will be $45,937,126, while the customs revenue in gold for the current fiscal year, ending June 30th, 1864, has been so far at the rate of over $100,000,000 per annum.

It will be seen that even the present gold revenues of the Government are largely in excess of the wants of the Treasury for the payment of gold interest, while the recent increase of the tariff will doubtless raise the annual receipts from customs on the same amount of importations, to $150,000,000 per annum.

The authorized amount of this loan is Two Hundred Million Dollars. Instructions to the National Banks acting as loan agents were not issued until March 29, but the amount of Bonds reported sold at the United States Treasury up to May 14th was

$48,964,900.

Subscriptions will be received by the TREASURER OF THE UNITED STATES at Washington, and the ASSISTANT TREASURERS at New York, Boston and Philadelphia, and by the

First National Bank of New York, No. 4 Wall Street.
Second National Bank of New York, 23d St. & Broadway.
Fourth National Bank of New York, Pine Street.
Fifth National Bank of New York, 238 Third Ave.
Sixth National Bank of New York, 6th Ave. & Broadway.
Ninth National Bank of New York, 363 Broadway.
Tenth National Bank of New York, 240 Broadway.
New York National Exchange Bank, 154 Greenwich St.

AND BY ALL NATIONAL BANKS

which are depositaries of Public money and all

RESPECTABLE BANKS AND BANKERS

throughout the country, (acting as agents of the Natio Depositary Banks,) will furnish further information application and

AFFORD EVERY FACILITY TO SUBSCRIBERS.

CAST STEEL.

MANUFACTURED BY

NAYLOR, VICKERS & CO., SHEFFIELD, ENGLAND.

CAST STEEL TYRES WITHOUT WELD,

Reversible Crossings and Frogs, Disc Wheels, Pistons and Piston Rods without weld, Crank and Straight

AXLES, AND EVERY DESCRIPTION OF STEEL FOR RAILWAY PURPOSES.

STEEL CROSSINGS have been in use more than three years with very little perceptible wear, in places where the ordinary ones had to be replaced every four months. They have been estimated to be good for ten years in the worst places.

THE "VICKERS" TYRES are in constant and extensive use on almost all the Railways in Great Britain, and also on many roads in other parts of Europe. Their chief advantages are:—1. Their Durability: they will outlast any Iron Tyre without being turned, and for this reason are cheaper than Iron Tyres (free of cost). 2. Their Safety: being without a weld they are not liable to break, and Steel is proved to be a stronger and tougher metal than any other. 3. Their Uniformity: they do not wear in flat places nor "laminate." 4. They are not injuriously affected by frost, and are guaranteed to stand the severest climate.

STEEL AXLES will be found economical, because they may with safety be made much lighter than those of Iron. They will wear longer and "smoother," and will consume much less oil; nor are they liable to granulate from constant use.

For CIRCULARS, GIVING FULL PARTICULARS AND TESTIMONIALS, PRICES, etc., apply to **NAYLOR & CO.,**

421 Commerce street, Philadelphia; 99 John street, New York; 80 State street, Boston.

New York, Saturday, June 18, 1864.

English and Continental Locomotives.

We have recently met in an English Railway Journal, with an interesting essay on the subject of Foreign locomotives, and the first remark made by the writer is that the exigencies of continental railway traffic, demand a greater variety of locomotive engines than have been found necessary in the United Kingdom. The reason is obvious. The islands of Great Britain offer grades almost as level as the ocean around them, while various lofty mountains series stand in the way of intercourse in most of the chief Countries of Europe, and up to this moment have in many instances prevented a continuation of the most important and indispensable lines. The Alps and the Appenines, the Italian, Swiss, German and Hungarian mountains present almost impassible obstructions to railway progress in comparison with what is found in England or in the Northern and Western States of our own Country. The improvements therefore now made in the Locomotives of the United States and Great Britain are generally on the early models with a view to speed, and an increased driving or adhesion weight.

There has been considerable difference of opinion abroad, more than here, as to the advantage of inside and outside cylinder engines, but the latter seem to have become most popular ever since 1851, when it was found they could be balanced or weighted so as to make the whole structure steadier on the rails than the inside cylinder engines. "The sinuous motion is remedied by placing a weight upon one side of the wheels, the momentum of which will just balance the momentum of the pistons and its connections. It is well enough to remark that this sinuous or rocking motion of locomotives is attributable to the arrested motion of the piston and its attachments at every stroke of the engine, and the effect of the pressure thus created will be more operative in inducing oscillation, the farther it is exerted from the central line of the Engine. If it were possible says an authority from which we make this quotation, to place the cylinders at right angles in the centre of the carriage, and the pistons were both attached to a central crank, there would be no oscillation produced, but it is not possible to couple a piston of an upright cylinder direct to the axle of a locomotive without causing the springs to work up and down with every stroke of the Engine. We believe that on some of the Pennsylvania roads and on the Baltimore and Ohio, there are locomotives in which the action of the piston rods is vertical, and the cylinders are of course upright. We are not able to state the estimation in which they are held at present by our most eminent Engineers.

The outside cylinder engines and no others are used on our own northern and western great lines. In England the inside cylinder is still retained for the six coupled, goods engine, and is likely to maintain its place for that kind of work is especially upon straight lines of railway. For lines with prevalent curves the four-coupled outside cylinder engines surpass all others in economy "running on curves with greater facility, utilising the adhesion weight better and being subject to less wear and tear." Hence says the Railway *Times* the six-coupled engine, with inside cylinders, is to be found chiefly on the southern and north-eastern divisions of the London and North Western, the Great Western, the Midland, the South Eastern, the London, Brighton, and South Coast, the Great Northern, the North Eastern, and the Edinburgh and Glasgow—in short, the older and straighter lines, (the Great Northern, though a newer, is one of the straighter lines). On the contrary, the outside cylinders, with single and with four-coupled wheels, are to be found on the northern division of the London and North Western, the Lancaster and Carlisle, Caledonian, Scottish Central, Scottish North Eastern, and Great North of Scotland, which are newer lines, and have many quick curves. The London and South Western and the Great Eastern, it is true, are of the older and straighter class, and are stocked or being stocked, with outside-cylinder engines and their correlatives, straight axles; but the former line was initiated with outside cylinders by the great apostle of straight axles, Joseph Locke, who was the engineer-in-chief of the line, and who imported his experience of the broken and short-lived cranked axles, and the durability of the straight axles on the original Grand Junction (London and North Western, northern division), and resolved, like a man of sense and experience, when he had a good thing, to keep it. The Eastern Counties, again, was originally stocked with inside cylinder engines; but the engines having passed into the care of Mr. J. V. Gooch, who brought from the London and South Western his experience of outside cylinders, the stock received an infusion of outside cylinder passenger engines; and having, at a later period, been placed under the care of Mr. R. Sinclair, who brought with him likewise his experience of outside cylinders—first from the Paris and Rouen, with Mr. Buddicom; secondly, from the Caledonian, as chief engineer and locomotist; the stock of the Great Eastern received an additional infusion of outside cylinders—mostly with four-coupled wheels, no six-coupled wheels. A prominent exception amongst the newer and more sinuous lines is the North British, where inside cylinders have been universal; but they were introduced by the chief engineer, who was also the engineer-in-chief of the Edinburgh and Glasgow—a first-class line for directness and flatness—where inside cylinders had answered perfectly well. It has, nevertheless, been found that on that railway—the North British—the wear of six-coupled engines is excessive; that the wear of four-coupled engines is much less; and that the latter do more work with more ease and less cost of maintenance; and, doubtless, the outside cylinder and straight axle will find their way on that line.

Those of our readers who would like to follow

the description of a first rate English locomotive especially with regard to its fire-box, boiler and tubing will find one at page 334 of Bourne's Catechism of the Steam Engine, a late republication by the Appletons. We have the promise of a full description of a first class American Locomotive from a competent hand, which will we believe prove conclusively that in the construction of these machines, we are as in that of passenger cars far in advance of all other Countries.

On the Continent where the grades are very heavy, it has been the principal object to get adhesion with speed. Engines combining these requisites are necessary for the long inclines which almost every where prevail. Thus a long wheel base while giving the traction and adhesion is impracticable with much curvature. We understand the American truck has not been generally adopted on the Continental roads, which would exactly meet the exigencies of their case and save both trouble and expenditure.

Another matter worthy of note is the foreign practice in boiler tubing. The greatest number of tubes known to have been applied in England are the 305 tubes of the Great Western express engines of the class of "The Lord of the Isles," exhibited in 1851. In these the tubes, 2 inches in diameter, are placed only ⅛ inch apart, and are not so effective for evaporation as the tubes of earlier engines on that line, which were fewer in number, but were placed at from 5/8 to 1 inch clear. In the English engines exhibited in 1862, the greatest number of tubes was 215, by Messrs. Beyer, Peacock, & Co., 9-16 inch clear; and the North Western applied 214 at ¼ inch clearance. The best English practice exhibited is to be found in the North Western engine, "The Lady of the Lake;" Mr. Connor's engine, by Messrs. Neilson & Co., and Mr. Sinclair's engine; all of which, singularly enough, have identically the same proportion—192 tubes, 1⅞ inch diameter, 5/8 inch clear, placed in a barrel 3 feet 10 inches inside diameter. The goodness of these proportions is proved by the very satisfactory performances of the engines, under very different circumstances. The greatest number of tubes in the foreign engines is 356 tubes, with 7-16 inch clearance, in the heavy-gradient engines on the Northern of France.

The Recent Steamboat Accident on the Hudson River.

It is really an extraordinary circumstance, that with all our experience in steam navigation upon rivers there should occur from time to time such lamentable accidents as that which recently befel the *Berkshire*. A large number of persons were suddenly deprived of life in the most heart-rending manner—victims of fire and flood, without a chance of escape. The accounts are by no means satisfactory as to the cause of the accident. If it is true that there was a large quantity of hay on board the steamer, the proprietors are greatly to blame. Such an inflammable article should have no place on board a steamer; it should be carried in barges or sailing vessels. It is also asserted that there were no life boats or life preservers at hand, although these are well known to be of the utmost importance in such cases; and that no alarm of the danger was given to the passengers by the officers of the boat. We believe there is some legislation existing in relation to these precautions, but we fear it is generally but little regarded. It is not yet ascertained who were lost on the occasion alluded to, as no list of passengers appears to have been kept—an omission but too common on our river boats, and which should no longer be tolerated.

In view of this appalling calamity, we wonder that the travelling public can hesitate between a night steamer and the Railway train. In the latter case few accidents occur to the enormous extent of those which are inseparable from burning steamers. The shock when it comes (and the reflection is not without weight) is brief, and not increased by approaching flames, or stifling waters; and the proportion of the sufferers is less than when engulfed in the waves.

We are happy to have it in our power to state, from recent personal experiences, that the Hudson River Railway offers all the security to travellers which the railway system is capable of extending; and that of late extraordinary vigilance and care are exercised by the company and its employees.

Milwaukee and Prairie du Chien Railway.

The following gentlemen have been elected directors of this company for the ensuing year:—L. H. Meyer, John Catlin, Wm. P. Lynde, Chas. F. Ilsley, Allan Campbell, G. M. Harwood, W. Schall, H. L. Dousman, Louis A. VonHoffmann.

Chicago and Rock Island Railroad.

The earnings and expenses of this road for the years ending March 31, 1862 and 1863, were,

	1862.	1863.

Extraordinary repairs....	67,754 00	
Balance of interest on bridge bonds....	22,934 39	
		721,271 46
		$382,141 79

Compared with the preceding year the gross earnings show an increase of $614,733 76; with an increase in operation expenses of $239,474 41—making the increase in net earnings $375,259 35. The increase in gross expenditures over the preceding year was $307,317 78.

The total receipts for the year, from all sources, were as follows:

Earnings of the road.	$2,143,874 78
Interest on deposits and loans.....	10,447 64
Avails of 4,985 shares of stock sold.	609,610 62
	$2,763,933 04

Total amount expended, as follows:

Real estate and equipment....	$359,905 40
Expenses, as above stated....	1,761,732 99
	$2,121,638 39

The capital stock of the company has been increased in the sum of 3,970 shares during the past year, making the capital stock $6,000,000, at which sum it now stands. This additional stock, together with the 1,015 shares on hand at the date of the last report, has been sold for the sum of $609,610 62, being a premium of $111,110 62 over the par value of the shares.

The increased business of the road required an additional amount of land in the city of Chicago, and the directors have purchased the property owned by Messrs. Flint & Thompson adjoining the grain house owned by this company, for the sum of $296,000. This purchase was not made as an investment, but was rendered absolutely necessary, in order to give the company control of greater facilities for loading and unloading freight, additional front of dockage on the Chicago river, and land for side-tracks, turn-outs, &c. This property contains one of the largest elevators in the city of Chicago, capable of storing 1,250,000 bushels of grain, thus giving the company two large elevators, which have been leased to responsible parties for a term of years, at an annual rent which gives a fair return for the money's invested.

The early completion of the Mississippi and Missouri railroad to the Missouri river, where it connects with the Union Pacific railroad, being considered of special importance to the interests of this company, the directors have completed and executed a contract for a business connection with the Mississippi and Missouri company, extending over a period of twenty years, and, in consideration of the same, have agreed to advance the Mississippi and Missouri railroad company the sum of $500,000, to aid in the construction of their Road. The amount to be thus advanced is reimbursable by the Mississippi and Missouri railroad company in three years, with interest semi-annually at the rate of seven per cent., and secured by $800,000 of their Land Grant Bonds. The sum advanced on this loan, at the date of this report, was $116,250. Since then, and during the months of April and May, a further sum of $74,375 has been advanced, leaving $309,375 yet due and to be paid during the next four months.

The company will have the means on hand to meet this liability, after paying the 3 per cent. dividend, which was declared free of United States Tax, payable 11th April, 1864.

The Directors, in view of the large earnings of the road during the past year, have thought it for the best interests of the stockholders to declare moderate dividends, and expend the surplus earnings in obtaining increased and absolutely necessary facilities for an increasing traffic, and in every way improving the road and its appurtenances; and, they can safely say that the road with all its rolling stock, is now in better condition than at any previous time, as will be seen by reference to the Report of the Superintendent.

There has been expended on the road, properly chargeable to construction, $104,459 55; of this amount, $36,705 55 is included in the items of repairs; the balance, $67,754, is charged to construction repairs. In addition to the above there have been 52 pile and trestle bridges rebuilt, of

an aggregate length of 2,419 feet, at a cost of $15,284 03.

INCOME ACCOUNT.

Balance	977,832 05
	$2,926,394 34

The new materials placed in the track during the year have been: 52,105 ties; 604 tons rails; 2,070 tons re-rolled rails; 164,800 lbs. spike at 5.89c.; 173,478 lbs. Fish Plates at 5.53c.; 30,580 lbs. bolts for do., at 8.7c.; 18,779 lbs., cast chairs at 2.62c.; and 37,038 lbs wrought chairs at 5.53c. The value of the above materials is put down at $171,122 82. There have been relaid with new rails 19.6 miles of track, and 2.59 miles new side tracks. There were 22,499 rails repaired in the company's shops, at a cost of $15,080 97; average cost per rail 66.80 cents.

The company have 61 engines, which are generally in good repair. Two of this number are in the service of the Illinois river railroad company.

The number of miles run by engines with passenger trains was 348,818; with freight trains, 724,008; with road and gravel trains, 90,054—total 1,162,880. The average cost per mile for each engine, including repairs, fuel, enginemen and firemen, oil, waste and tallow, is 12.15 cents—being 0.37 cents more than last year.

The entire cost per mile of operating the road, including new work, lands, new equipments, extraordinary repairs and taxes, is $5,165 79.

Gross earnings per mile of road.....	$9,402 97
Net " " " "	4,237 18

The proportion of expenses to earnings, including new works, lands, new equipments, extraordinary repairs and taxes, is 54.94. Less new works, etc., 45.74.

The total amount of freight transported over the road during the year was 885,020,690 lbs., an increase over last year of 125,270,880 lbs. The number of loaded cars was 52,400; going west, 20,811; east, 31,589. Tons carried one mile, 56,539,150.

The number of passengers carried over the road was 324,244, of which 321,482 were 1st class, 1,717 2d class and 1,045 emigrant. Number of through passengers, 45,130; way, 279,114. Number going east, 158,077; do., west, 166,176. Number carried one mile, 20,401,500. Number of soldiers, 32,618; of these, 14,902 went east and 17,716 west.

The number of pounds transported across the Mississippi bridge for the year was 293,310,600—going west, 113,482,650; east, 179,827,950. Number of car loads passing east, 10,116; do., west, 7,998—total, 18,114. Foot passengers going east, 69,932; do., west, 70,962—total 140,894. Number of boats passing the draw going north, 196; do., south, 202; Barges going north, 155; do., south, 129. Total number of rafts, 276.

President.—CHARLES W. DURANT.

Directors.—Thomas C. Durant, Francis H. Tows, David Dows, Charles W. Durant, E. W. Dunham, Thomas T. Sturgess, Geo. T. M. Davis, Harvey Kennedy, Clark Durant, B. P. Learned, John F. Tracy, Robert A. Forsyth, Ebenezer Cook.

Vice President and Sup't.—JOHN F. TRACY.

Treasurer.—E. W. DUNHAM.

Secretary.—FRANCIS H. TOWS.

Assistant Sup't.—W. H. WHITMAN.

Cashier.—FRANK D. SHERMAN.

Hudson River Railroad.

The following are the names of the new directors of the Hudson River Railroad:—John M. Tobin, Leonard W. Jerome, Francis Skiddy, Wm. R. Travers, James H. Banker, H. F. Clark, Cornelius Oakley, D. Thomas Vail, Joseph Harker, Augustus Schell, Oliver Charlick, Albert Havemeyer, Smith Barker.

At a subsequent meeting of the new Board, John M. Tobin, of New York, President, and D. Thomas Vail of Troy Vice-President. The following resolution was passed by the Board:

Resolved, That Mr. Charlick, Mr. Clark and Mr. Jerome be a Committee to report to this Board, at an adjourned meeting, resolutions containing a suitable expression of the estimation and regard in which Mr. Sloan, the late President of this company, is held by the Board, and of their appreciation of the valuable services he has rendered to the company.

☞ The Oswego *Times* contains a report of the proceedings of a meeting held in that city on Monday, to take the initiatory steps for a railroad from Lewiston, Niagara County, to Troy. "At first it had only been contemplated at present to build the railroad from Oswego to Rochester, and there was enough stock already offered to warrant the undertaking of that enterprise, and the organization of a company. But it was desirable that the road should extend to the Niagara River, and it was generally thought best to attempt the work of constructing the road from Oswego to Lewiston. It will then only remain to complete the work from Rome to tide-water."

Swiss Railway across the Alps.

The Federal Government at Berne has lately devoted several sittings to the discussion of various projects for a railway across the Alps. The three lines which have as yet been brought before the notice of the public are:—The Lukmanier to the East, the St. Gothard in the Centre, and the Simplon to the West. The two former have the advantage of uniting the canton of Ticino to the remainder of Switzerland, and of being easier to defend in a military point of view. The Simplon, though supported by many interests, is open to various objections. Generally speaking, the majority are for the St. Gothard line; and to counterbalance this the partisans of the Lukmanier and Simplon, whose interests are not in opposition to each other, have effected an amalgamation. M Schenk, the chief of the Home Department, has in his report declared himself in favor of the St. Gothard line, and of a considerable Federal subvention for its execution, proposing at the same time that negotiations be opened for the purpose both with the kingdom of Italy and with the Southern States of Germany. This proposal has not met with the approval of the Federal Executive, which has decided that, for the present at least, such negotiations would be premature.

Ogdensburg and Lake Champlain R. R. Co.

The holders of the second mortgage bonds of the Northern (Ogdensburg,) Railroad held a meeting at Malone, the 10th inst., and organized themselves into a corporation as the "Ogdensburg and Lake Champlain Railroad Company," agreeably to an act passed at the last session of the New York Legislature. The following named gentlemen were chosen directors: William A. Wheeler, Malone; William C. Brown, Ogdensburg; H. Hollis Hunnewell, George M. Barnard, John C. Pratt, Jacob W. Pierce, John S. Farlow, Isaac D. Farnsworth, Boston; Albert Andrus, Malone; Nathaniel G. Chapin, Ebenezer T. Farrington, Thomas Upham, Boston; James G. Averill, Ogdensburg.

At a meeting of the directors, subsequently held, William A. Wheeler, of Malone, was elected President of the Corporation, William C. Brown, of Ogdensburg, Treasurer, and Robert M. Pratt, of Boston, Secretary and Transfer Agent.

The meeting was harmonious and spirited, and gave every indication that this link in a great line of railroad and steamboat communication, so vitally important to the trade and business of Boston with the Western States and Canada, would soon be in a position to secure its full share of the freight moving East and West.

More than one third of the whole amount of outstanding bonds were handed in at the meeting for conversion into stock of the new corporation. —*Boston Journal.*

☞ At the annual meeting of the Portland Saco and Portsmouth Railroad, at South Berwick, there was a sharp contest on the question whether the stockholders should demand their dividends in coin, according to the contract made with the Eastern and Boston and Maine Railroads. The point was carried by the election of a board of directors favorable to it, but the question is likely to be carried into the courts.

☞ The Agricultural Branch Railroad Company (Framingham, Mass., to Northboro',) are taking active measures to complete their road from Northboro' to Pratt's corner in Sterling. Large purchases of real estate have been made in Clinton, which indicate that the route adopted is that last surveyed, viz: from Harrisville, due west, crossing the pond of the Lancaster Quilt Company.

Philadelphia and Erie Railroad.

The stockholders of this Company will meet at the office of the Company in Philadelphia on the 25th inst., to consider a resolution of the Board of Managers for aiding in the immediate construction of a branch railroad to the Pennsylvania oil region. At present the product of the wells has to be hauled over common roads until they reach intersections of the Philadelphia and Erie Railroad, the New York and Erie Railroad, and the Pittsburg and Erie Railroad. Most of the oil now brought to Philadelphia comes by way of the Pittsburg and Erie Railroad to Pittsburg, and thence over the Pennsylvania Central Railroad. Some is taken to stations on the Philadelphia and Erie Railroad.—*Phila. Ledger.*

Massachusetts Railways, 1863.

The following tabular statement of the details of operation of the railways of Massachusetts for the year 1863, is from the *American Railway Times.* A comparative statement of the gross amounts of the *whole* system for the past two years is seen in the following:

	1862.	1863.
Number of companies	52	51
Length of roads, miles	1,608	15,905
Aggregate capital	$59,487,752	$69,362,052
Amount paid in	49,287,517	57,546,563
Aggregate cost of roads	66,793,474	66,809,802
Total revenue	9,933,581	11,950,739
Funded and floating debt	18,411,221	18,121,108
Surplus earnings on hand	4,160,360	2,843,804

The result of *operation*, in detail, for the past and preceding year, may be found in the following abstract:

	1862.	1863.
Number of railways	38	38
Length of main lines	1,223.4	1,303.8
Length of branches	162.5	171.9
Double track and sidings	541.1	540.9
Cost of railways	60,010,348	$61,610,484
Capital paid in	45,403,456	45,988,956
Funded debt	14,659,640	14,510,061
Floating debt	877,197	1,282,444
Total debt	15,536,837	15,792,505
Interest paid on debt	852,554	902,212
Dividends paid	2,296,701	2,981,890
Surplus	3,999,040	5,392,661
Receipts from passengers	3,949,038	4,912,121
Receipts from freight	4,131,597	4,878,131
Receipts from mails, &c.	517,099	660,531
Total receipts	9,654,751	11,711,027
Expense of road bed	1,052,325	1,066,831
Expense of machinery	848,317	1,044,727
Other expenses	3,358,273	4,282,570
Total expenses	5,291,286	6,429,841
Net income	3,542,093	4,331,153
Per ct. of exp. to income	54.8	54.9
Net income per ct. on cost	5.9	70.3
Miles run by pass. trains	3,460,427	3,620,540
Miles run by freight trains	2,681,348	2,863,442
Miles run by other trains	153,089	238,622
Total miles run	6,294,864	6,890,306
Receipts per mile run, cts.	153.4	175.6
Expenses per mile run, cts.	84.1	96.1
Net income pr. m. run, cts.	69.3	64.7
Cost of fuel pr. m. run, cts.	10.9	18.2
Road rep'rs pr. m. run, cts.	13.0	11.8
Engine rep'rs p. m. run, cts.	5.3	5.9
Car rep'rs pr. mile run, cts.	6.6	7.4
Passengers carried	11,482,625	14,297,194
Passenger mileage	175,403,775	218,080,413
Tons of freight carried	3,671,885	4,366,685
Tonnage mileage	137,879,129	161,422,514

The *net income* is here taken, as the amount remaining after deducting operating expenses and interest paid on debt. The different roads have increased their earnings, and the expenses of operation have likewise increased. The different companies are in healthy financial condition. In the tabular statements only roads in operation are included:

Names of Railways.	Length. Main lines.	Branches.	Double track & sidings.	Cost.	Capital Stock paid in.	Funded Debt.	Floating Debt.	Total Debt.	Interest paid on Debt.	Dividends paid.	Surplus.	Receipts. From Passengers.	From Freight.	From Mails, etc.	Total.	Total Expenses.

(1) Owned and operated by the New Bedford and Taunton Railway.

(2) Operated under a lease to the Housatonic Railway Company.

(3) Leased to the Berkshire and Hudson and Boston Railway Company.

(4) Operated by the Boston and Providence Railway Company.

(5) Owned and operated by the Boston and Providence Railway.

(6) Operated by the Boston and Lowell Railway Company.

(7) Operated by the Boston and Lowell R. Co.

(8) Operated by the Nashua and Lowell R. Co.

(9) Operated under lease by the Boston and Maine Railway.

NOTE.—The Net Income, tabulated, is the gross revenue less operating expenses and interest paid.

Interest and Dividends.

The Illinois Central Railroad Company have declared a dividend of four per cent, free from Government tax, on the stock and canceled bonds scrip of the company, payable on the 1st of August next, to parties whose names are registered as holders on the books of the company at the close of business on the 15th day of July next, and that the transfer books close of that day and open on the 3d day of August.

The Boston and Worcester Railroad has declared a semi-annual dividend of 5 per cent, and the Boston and Lowell Railroad 3 per cent, both free of U. S. tax, and payable July 1st.

The Chemung Railroad will pay on demand a Quarterly Dividend of two per cent, free from Government tax, at the office of the Park Fire Ins. Co. 327 Broadway.

The Metropolitan horse railroad, Boston, has declared a dividend of 3 per cent ($1.50 per share) payable July 2d.

The directors of the Alleghany and Pittsburg Oil Company have declared a dividend of two per cent, for the month of May, on the capital stock of the company, clear of United States and State tax, payable on and after this date.

The First Mortgage Bonds of the Central Military Tract Railroad Company, payable July 1, 1864, with their coupons, will be paid at the Bank of Commerce, in New York. Bond holders can be paid there at once, by discounting interest at the rate of five per cent per annum for the unexpired time.

The Trustees of the Illinois and Michigan Canal, have ordered a Dividend of five per cent, to be paid on account of the principal of the Illinois and Michigan Canal Registered Bonds. The payment of the Dividend will be made by the Treasurer of the Board of Trustees, at his office, No. 54 Fulton st., in the city of New York, on and after the 1st day of July, 1864. The bonds must be presented to the Treasurer, the day before the time of payment, in order that said payment may be stamped thereon.

Atlantic and Great Western.

The Dayton *Journal* says: "We are inclined to believe that the assertion that the Atlantic and Great Western road will be completed to this city by the 20th inst., is not a vain boast. The track layers are now at work this side of Springfield, and Mr. Lee, the Superintendent of construction, is pushing his enterprise with vehement energy. We shall hail the completion of this great work as an auspicious event to the city of Dayton. It will bring wealth and stimulate industry."

Stock Exchange and Money Market.

One of the unfounded assertions of the day, which nevertheless finds credulous believers, and which to a certain extent produces the effect designed by those who make it, is that all other property is depreciating in the same ratio that gold advances in price, and therefore if the war continues much longer, and more paper money becomes necessary to meet its outlays, property owners are generally likely to be ruined. The intention of those who use this argument in the money market and stock exchange is a sinister one, and but is nevertheless "a weak invention of the enemy," designed to dishearten the loyal states in the prosecution of the contest, and is as without truth or basis, as the cause for which the deception is practised. Nothing is more untruthful or dishonest than to assert or even insinuate that the price of gold is the barometer of values. It is no more an indication of the capacity, property, wealth, resources or commerce of a nation than a yard measure is of the value of a railway. The actual possession of the article of gold no more enriches a country, than the possession of a fortune did the miser John Elwes. Its real value is in its universal reception as a medium of exchange, and standard of values, and even then not nearly so convenient or as safe as what are called Merchant's bills of Exchange, which do the same office, and if lost or mislaid can be replaced. The gold that "goes down in ships" never comes back again, but a bill of exchange is good for at least three any such mishaps, and as many more as are capable of explanation. But gold is not the standard of positive values in fixed properties, except when about to be exchanged, and this is practically seen in all the transactions of life. If a person has an estate which suits him and is adapted to his especial comfort or wants, it is a matter of indifference to him what the market value of it may be. It is a common, indeed proverbial expression, as well understood in the street as any where else that "no money can buy it." Nor is there money enough in the world to purchase the world, if such a thing were proposed. No country's wealth is measured by the amount of gold it contains. It is only as the counters in the game of life with which the players keep their tallies.

The actual amount of coin in the United States at the breaking out of the rebellion was variously estimated. Our most careful statisticians disagreed in relation to it. In some periodicals of authority it was estimated to have been as much as seven hundred millions of dollars, but on the other hand it was placed at as low a figure as two hundred and forty-three millions. Perhaps the estimate of three hundred and fifty millions adopted by other calculators of well known caution is nearest the truth. Adopting this sum therefore as the correct one, what do we find its relations to be with the sum of the actual wealth of the Country. We are fortunately not without ample means of ascertaining them. The census gives us precise information, with this exception, that it is below rather than above the truth, in its return of values. For it is a notorious fact that our taxation is always made on assessments below the value, and that no real estate can any where be purchased at a voluntary sale for the price at which it is assessed and taxed. Especially so in our commercial cities and agricultural districts. It appears then that by the census of 1860, the real and personal property of the United States was returned at $14,183,215,628 having increased 129 per cent. from the previous census of 1850. And this estimate made no account of the annual values produced per capita beyond the actual consumption of the people nor of the vast amount of mechanical products which fall below the annual value of five hundred dollars, nor of the paid labor which enters into the enhanced value of repaired buildings, railways, ships, canals, cleared lands, workings in the mines and forests, although it is counted in, in the final products of these industries, and makes in many instances the real price. We are therefore sure that we have not over-rated ourselves in this last census report. It appears that the total of the real and personal property in the Union, was something over fourteen thousand mil-

lions of dollars, of which the Loyal States held ten thousand seven hundred millions. And at the same time there were but three hundred and fifty four millions of coin in the whole country. In other words the coin was but about 2½ per cent of the real value of the whole property. No one will contend that this was all it was really worth. Would any sane man be willing to part with his own possessions at that rate?

We presume not, nor will any sane man contend that this 2½ per cent on gold was all that each dollar of property was worth in 1860. If so, the Country was bankrupt and rotten before the war broke out, and always has been bankrupt, and if we apply the same rule of valuation to France and England, they too are deplorably ruined, and pauperised beyond the hope of recovery. We doubt whether any of the philosophers or bullionists who have set afloat, and pretend at this moment to believe in this doctrine, that a thing is only worth what it will in any moment bring in gold, would be very willing to sell their possessions at any such rate as two and a half per cent of their taxable value. If they are willing to test the truth of their theories by their conduct, they can doubtless be accommodated at once with purchasers. We have no idea, however, that these theorists are ready to verify their theories in their own persons, and we hope no one will be deluded by the assertions of those who are operating in the gold market by such false pretences.

The gold bill as it is called has passed Congress by a decided majority and will undoubtedly become a law. It has been seriously debated whether it is wise to check by legislation the course of trade or business in any article of commerce, since it has been found that human ingenuity and selfishness will always circumvent the law, if it is their interest to do so. The transactions in gold or money generally are held to be beyond the reach of legislation and had better be let alone. Thus, too, usury finds in this argument one of its most usual supports. But the violation of law is no reason why there should be no more law making. Because men will evade the laws, it is no reason in favor of abolishing them altogether. Now the dealing in gold as it is improperly called, which is aimed at by this bill, is no real dealing at all. It is gambling of the worst and most demoralising description, not only founded on misrepresentation, false rumors, not only appealing to the ignorance and credulity of men, but founded upon treasonable successes, and rebel pertinacity for the greater part of its gains. It is a fraudulent traffic, carried on without real capital, without the article sold or purchased on hand, without delivery or the intention of delivery, and it is of a baser and meaner character than the lowest game which is played among the admirers of Hoyle, or the practitioners of the sweating cloth.

That we have laws against ordinary gambling is well-known, and that we should have even more stringent ones in regard to gold gambling, no one can doubt, when he reflects that a half crazed collection of boisterous operators, amounting to a hundred or more people, whether on the curbstone, or in their gold room are able by their combinations so to gull the public as to make them pay nearly 200 for gold which they do not want, treble the prices of food and clothing, double the cost to the Government of all that it requires to carry on the war, and afford thereby real encouragement and support to the rebel cause, otherwise in despair long ago. To dignify these false transactions in gold with the respectable, the honorable title of commercial, or the name of legitimate, is to abuse the English language. If small gamblers with ordinary dice or cards are offensive to the eye of the law, these men with loaded dice and marked cards whose purpose is to destroy the Union, are fit subjects for the law, and a very stringent law. Indeed the same day when the passage of the bill in the House was known in this city, the price fell several per cent. The restrictions are contained in six sections, and while they do not apply to any ordinary *bona fide* purchase or sale of gold they are prohibitory of all other kinds. Thus time sales either for money or foreign exchange, are forbidden in any form or manner, and no contract for gold or silver, or foreign exchange can be made between parties anywhere else than at the ordinary place of business of the seller or purchaser. Fines and imprisonment are declared to be incurred by the violators of the law. It is to be seen how far it can be evaded with impunity. If it creates distrust among the operators themselves, it may be quite effectual in its results. At all events as the business is carried on, it is doing infinite mischief to the country; it is purely speculative in its fluctuations and managements, it flourishes only by fraudulent exaggerations, and if moral evils and political wrongs come within the range of lawful legislature, we think that gambling in gold, and usurious contracts dependent on it, particularly at so critical a time as the present, may be very properly the subject of Congressional action.

The offers for the loan of seventy-five millions are understood to have been very large and at fair prices for the Government. The arrangements for the subscriptions were very liberal on the part of the Treasury. The 2 year 5's are receivable as par and interest, and thirty millions of these notes have already been withdrawn from circulation and cancelled. Depositors of temporary loans at the Sub-Treasury can use these certificates in payment of the instalments and without sacrificing the interest due, and those who wish to pay up in full, can do so at once and save the interest. Rumors are still rife that a large foreign loan has been tendered to Mr. Chase. The Albany *Evening Journal*, supposed to be in the confidence of the Secretary of the State announced a few days since as a fact, that a loan of one hundred millions had been offered from Holland and accepted. That some propositions of this kind are under consideration at Washington, we understand, but there is grave doubt expressed whether the United States should ever again make any of its interest payable abroad. It is an admission of the claim of Europe to be at the head of the world's finance, a proposition which one of these days we shall dispute if not now. It also creates a periodical demand for specie remittances as dividends, which are thought to affect the markets unfavorably, and it is a tribute to foreign capital which its recent shyness does not entitle it to receive.

On the other hand, it is considered that a foreign loan with the interest payable abroad is taking a bond against foreign intervention and future difficulty, and that the immediate realization of the proceeds in coin and its shipment to the United States, to the extent mentioned, would save our currency from farther depreciation, save the Government several millions of dollars in its expenditures, and the people millions more in the price of the cost of the necessaries of life.

Congress continues to delay its action on many important subjects, especially with regard to taxation. This cannot be enforced too soon. It is said Mr. Chase recommends a large increase of the income tax. This is the fairest, yet the most difficult of all taxes. It is really no tax on the poor, yet it is always felt most by those in middling circumstances. One thing is very certain. If by an income tax of 10 per cent., revenue enough could be ensured to allow a reduction of duties, for example, on sugar, tea and coffee, no greater boon could be granted to the people at large. And we must not forget another fact, that for all we pay in taxation, if it is sufficient to meet the Government wants, we shall gain in the fall of prices of necessities. The man who paid 10 per cent. income tax, might find he was after all saving 2 or 300 per cent. in food, clothing and labor. Congress is therefore greatly to be censured for so long delaying the passage of the important financial measures before it. The expedients of borrowing without providing the means of payment are not only unsound, but discreditable to the party which practises them, and will overthrow any system which has not the courage to avoid it.

Government stocks are a shade lower and will remain so till the new loan is accomplished. Other securities are dull for the same reasons. Railway shares are steady and bonds are firm. The money market is well supplied, but the rates are somewhat higher in consequence of the large absorption by the Treasury.

It is calculated that the product of the gold mines on the Pacific coast for the present year will be fully equal to sixty millions of dollars, and the calculation is based upon the yield already ascertained between the 1st of January to the 1st of May which amounts to $24,429,906, against $18,095,705 for the same period last year. The Government share of this arising from the Customs at San Francisco estimated at about $10,000,000 per annum will very soon be brought direct to New York in revenue cutters from Aspinwall.

Some important changes have occurred in the direction of the Hudson River Railroad. The prevailing interest now in charge is the same as that which controls the Harlem, and it is thought important measures favorable to both companies will follow the change. Thus in the three principal railways in this State material changes have taken place, tending we have no doubt to a greater unity than hitherto prevailed in their policy.

The balance in the Sub-Treasury on Tuesday was $45,340,327 87.

The last week's exports of domestic produce and miscellaneous goods (exclusive of specie) have been very heavy, amounting in value to $5,281,826, and including to Liverpool $1,503,645, and to London $1,186,826.

The total value of foreign exports from the port of Baltimore for last week was $234,681.

The total value of foreign goods imported of the port of Boston for the week ending June 10, was $437,604, against $411,388 for the corresponding week in 1863.

The total value of exports from Boston for the week ending June 10, were $348,311, against $253,489 for the same week in 1863.

Exchange sold on Tuesday at 216½ for currency.

The news from Europe shows great uncertainty as to a peaceful solution of the Danish difficulties. The Danes express no determination to submit to dismemberment.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Illinois War Loan, 98; Michigan 7s, War Loan, 104½; Illinois coupon bonds, 1879, 103; Indiana 5s, 90; North Carolina 6s, 58½; Indiana 2½s, 65; Marietta and Cincinnati 1st mort., 105; At. and Gt. Western (Ohio div.,) 99½; Buffalo, N. Y. and Erie 2d mort., 102½; Norwich and Worcester, 110; Ohio and Miss. pref. cer., 92; Nicaragua Transit, 6; Mariposa 1st mort., 98; Central Coal, 76; Wyoming Valley Coal, 64½; Ashburton Coal, 22; Copake Iron, 10; Bucks Co. Lead, 1¾; Quartz Hill gold, 12; Metropolitan Gas, 130; Saginaw Land and Mineral Co., 5; Rutland Marble, 19; St. Nicholas Bank, 103; Bank of Commerce, 112; 4th National Bank, 99½; Bank of New York, 117½; Hanover Bank, 109; Ocean Bank, 95; Bank of America, 133¼.

Philadelphia.—Huntingdon and Broad Top, 35⅛; do., 2d mort., 100; Tioga R. R. 7s, 110; Camden and Amboy mort. 6s, 109¾; North Penn. ☞ We invite attention to the advertisement of the Third National Bank in another column.

☞ By the terms of consolidation of the Chicago and Northwestern Railway Co., with the Galena and Chicago Union Railroad Co., the stock of the former is to be exchanged for that of the latter, as follows: One share of Chicago and Northwestern preferred stock, and one share of Chicago and Northwestern common stock, with three dollars in cash, for each share of the Galena and Chicago Union. Exchanges may now be made, and the money received at the office of the Chicago and Northwestern Railway Company, No. 8 Wall st.

St. Louis Alton and Terre Haute R. R.

At a meeting of the Stockholders of this company, held on the 6th inst., the following gentlemen were elected directors for the ensuing year: Charles Butler, Robert Bayard, Russel Sage, John G. Richardson, Samuel J. Tilden, New York; Hiram Sandford, Paris, Ill.; Levi Davis, Alton, Ill.; Charles S. Greeley, St. Louis; E. E. Gage, Charleston, Ill.; Anthony Thornton, Shelbyville, Ill.; Henry W. Phelps, Pana, Ill.; John S. Hayward, Hillsboro, Ill.; William H. Underwood, Belleville, Ill.

At a subsequent meeting of the Directors held at the office of the company in St. Louis, the following gentlemen were unanimously chosen officers for the ensuing year: President, Chas. Butler, New York; Secretary and Auditor, Jas. B. Ralston, St. Louis; General Superintendent, Henry C. Moore, St. Louis; Cashier, John W. Moore, St. Louis.

☞ Holders of the Cancelled Bonds scrip of the Illinois Central Railroad company are requested to present their certificates at the office of the company, No. 31 Nassau street, for conversion into the scrip stock of the company.

Railroad Earnings--Weekly.

The earnings of the Chicago and Alton Railroad Company for the week ending June 7, were:

	1864.	1863.
Passengers	$13,595 98	$14,251 71
Freight	26,594 98	21,732 99
Sundries	1,781 00	1,438 06
Total	$41,976 96	$37,422 76
Increase 1864		$4,554 20

The traffic of the Great Western Railroad for the week ending June 3, 1864, was as follows:

Passengers	$24,123 17
Freight and live stock	26,655 74
Mails and sundries	1,229 92
Total	$52,008 83
Corresponding week of 1863	48,887 85
Increase	$3,120 98

The earnings of the Grand Trunk Railway for the week ending June 4, 1864, were:

Passengers	$29,153 75
Express freight, mails and sundries	2,500 00
Freight and live stock	65,822 92
Total	$97,476 67
Corresponding week, 1863	80,183 02
Increase	$17,293 65

The earnings of the Chicago and Rock Island Railroad for the first week in June, 1864, were $56,989 00
Corresponding week of previous year 44,857 55
Increase $12,131 45

The earnings of the Michigan Central Railroad for the 1st week in June, 1864, were $62,236 23
Corresponding week of previous year 49,841 48
Increase $12,394 75

The earnings of the Racine and Mississippi and Northern Illinois Railroad for the nine days ending May 31, 1864, were $20,940 14
1863 11,991 81
Increase $8,948 33

Receipts from 1st January to 31st May:

1864 $200,176 08
1863 125,998 00
Increase $74,178 08

The earnings of the Dubuque and Sioux City Railroad for the week ending June 4, 1864, were $10,253 27
Corresponding week in 1863 4,479 98
Increase $5,773 29

The earnings of the Chicago and Northwestern Railway for the week ending June 7, 1864, are as follows (including what was formerly Galena and Chicago Union Railroad):

Passengers	$28,695 61
Freight	84,672 90
Mail, express and miscellaneous	2,268 84
Total	$115,637 05
Same period last year	71,314 06
Increase 62 per cent.	$44,322 99

The earnings of the Marietta and Cincinnati Railroad for the 1st week of June, were:

	1864.	1863.
Passengers	$5,672 64	$3,416 12
Freight	8,122 81	3,456 18
Mail, express & telegraph	1,190 58	815 00
Total	$14,986 03	$7,687 30
This month to date	$14,986 03	$7,687 30

The earnings of the Michigan Southern and Northern Indiana Railroad for the 1st week of June, 1864, were $67,193 00
Corresponding week of previous year 56,129 00
Increase $11,064 00

The earnings of the Milwaukee and Prairie du Chien Railroad for the 1st week in June, 1864, were $57,608 00
Corresponding week of previous year 33,324 00
Increase, 73 per cent $24,884 00

The increase since Jan. 1, 1864, is $273,223, or 65½ per cent.

Railroad Earnings--Monthly.

The business of the Illinois Central Railroad for the month of May, 1864:

LAND DEPARTMENT.

Acres construction lands sold	12,809.14	for	$137,556 68
Acres Interest Fund Land sold	728.81	"	8,207 94
Acres Free Lands sold	3,911.15	"	39,512 06
Total sales during month of May, 1864	17,449 10	for	$185,276 68
To which add town lot sales			6,476 84
Total of all			$191,753 52
Acres sold since Jan. 1, 1864	127,622.49	for	$1,344,572.20
Cash collected in May			$123,131 91

TRAFFIC DEPARTMENT.

Receipts from passengers	$170,953 49
" freight	227,418 95
" mails	6,358 33
" rent of road	4,000 00
" other sources	6,000 00
Total receipts in month of May, 1864	$414,730 77
Total receipts in month of May, 1863	334,686 77

The approximate earnings of the Pittsburg, Ft. Wayne and Chicago Railway Company during the month of May, compared with the same period last year, were as follows, viz:

	1864.	1863.
Freight	$326,778 38	$285,091 11
Passengers	150,664 79	123,386 28
Express matter	5,200 00	2,757 50
Mails	7,825 00	7,825 00
Rent of railway	7,083 33	7,083 33
Miscellaneous	1,995 16	951 09
Total	$499,546 66	$427,094 31
Increase		$72,452 35
En'gs fr. Jan. 1 to May 31	$2,424,718 47	$2,055,998 83
Increase for four months		$368,724 64

Increase for May, 17 per cent.; average increase to May 31, 18 per cent.

The earnings of the Galena and Chicago Union Railroad Company for the month of May, 1864, were $220,825 36
Corresponding month of previous year 172,343 00
Increase $48,482 36

The traffic of the Cincinnati and Chicago Air-Line Railroad for the month of May was:

1864 $58,644 99
1863 37,588 18
Increase $21,056 81

First five months of the year:

1864 $291,430 74
1863 184,167 88
Increase $107,262 86

The earnings of the Rome, Watertown and Ogdensburgh Railroad for the month of May, 1864, were:

	1863.	1864.
From passengers	$20,096 36	$30,964 20
" freight	23,169 39	36,141 09

Comparative earnings from Jan. 1 to May 31, 1863 and 1864:

	Gross Earnings.
1864	$228,646 80
1863	166,091 34
Increase	$62,555 46

The earnings of the Chicago and Northwestern Railroad for the month of May, were:

1864 $409,454 07
1863 282,001 62
Increase (45 per cent.) $127,452 45

The earnings of the Michigan Central Railroad for the month of May, 1864, were $271,552 00
Corresponding month of previous year 236,453 00
Increase $35,099 00

The earnings of the Michigan Southern and Northern Indiana Railroad for the month of May, 1864, were $264,818 00
Corresponding month of previous year 263,981 00
Increase $837 00

The earnings of the Chicago and Rock Island Railroad Company for the month of May, 1864, were $188,566 00
Corresponding month of previous year 144,397 00
Increase $44,169 00

The earnings of the Toledo and Wabash Railroad Company for the month of May, 1864, were $127,009 00
Corresponding month of previous year 134,271 00
Decrease $7,262 00

The following table shows the earnings of the Milwaukee and St. Paul Railway Company inclusive of the Eastern Division of La Crosse Railroad:

	1863.	1864.
January to May, 4 months	$378,911	$473,953
May	176,583	237,487
Total, 5 months	$555,494	$711,440
Increase in 1864		$155,946

The earnings of the Cleveland and Pittsburg Railroad Company for the month of May, 1864, were $203,514
Corresponding month of previous year 152,661
Increase $50,853

The earnings of the Milwaukee and Prairie du Chien Railroad for the month of May, 1864, were $186,747 00
Corresponding month of previous year 106,967 00
Increase, 74½ per cent $79,780 00

The increase since Jan. 1, 1864, is $248,939, or 65 per cent.

The traffic returns of the Atlantic and Great Western Railway for the months of January, February, March, April and May, 1864, were respectively as follows:

	Passengers, &c.	Freight.	Total.
January.....	$38,615	$168,683	$207,298
February.....	50,189	178,852	229,041
March.....	60,518	166,215	226,733
April.....	58,992	138,275	197,267
May.....	57,198	157,486	214,679

Common Carriers.--Way Bill.--Consigned.

The recent case of the Northern Railroad Company *vs.* the Fitchburg Railroad Company, was an action on contract for a failure to forward and deliver to the plaintiffs at Burlington, Vermont, certain iron rails. The declaration contained several accounts.

The case was heard without a jury, and reported for the opinion of the whole Court. The following facts appeared:

The iron, for the loss of which the suit was brought, was part of a lot delivered to the defendants at Charlestown, in 1852, to be carried over their railroad, and forwarded by connecting roads to Burlington, Vermont. It was safely carried over the defendants' road, and delivered by them to the Cheshire Railroad, the next road in the line of forwarding; and by that road delivered to the Rutland and Burlington Railroad, and upon that road was detained and used.

The freight for the carriage of the iron, at the usual prices, was paid by the plaintiffs to the Rutland and Burlington Railroad Company for all the connecting roads; and the defendants received their proportion of it, without notice of any claim for failure to deliver any part of the iron. The Rutland and Burlington Railroad Company had agreed with the plaintiffs to have the whole lot transported from Charlestown to Burlington for an entire sum, less than the usual and established rates. There was also some evidence that this contract was made by the defendants; but upon the whole evidence it did not appear to have been made by them, but by the Rutland and Burlington Railroad Company; and that the defendants had no notice of any special contract until after the freight had been charged at the usual rate, the iron all carried over the defendants' road, and the freight paid by the plaintiffs, and the defendants had received their customary proportion of it.

Notice was given by the plaintiffs to the Rutland and Burlington Railroad within a few weeks after the lost iron was missing, and a claim made by the plaintiffs upon that road for compensation for it; and soon after, the defendants were notified that it was lost; but no claim was made upon the defendants, nor suggestion that they were in fault or responsible for its loss, until within a year of the time when this action was brought, which was nearly six years afterward.

The Rutland and Burlington Railroad Company were solvent; and a demand against them could have been collected, by due diligence, at any time within a year after the loss of the iron. They then became insolvent, and have so continued ever since. In the negotiations between them and the plaintiffs during that year they did not deny their liability, if it could be shown that the iron was received by them, and not delivered.

The occasion of the loss of the iron arose from the manner in which the way bills were made out by the defendants. Some of them did not designate the number of cars loaded with iron for the plaintiffs; and one of them did not, in any way, designate the amount of the iron transported. The defendants were at the same time forwarding other iron to the Rutland and Burlington Railroad Company, to be used on that road; and hence the mistake arose. The name of the Ogdensburg Railroad Company was afterwards changed to that of the plaintiffs.

MERRICK, Justice.—The Rutland and Burlington Company are undoubtedly liable to the owners for the value of the rails; but as that company has since become utterly insolvent, and any remedy against them would be worthless, because no judgment against them could be effectually enforced, the plaintiffs seek to make the defendants responsible for the value of the rails taken and used by that company.

It is alleged by the plaintiffs that the said error and the consequent loss to them by the misappropriation and unlawful use of the rails in question was occasioned by the defendants, by the careless, negligent and improper manner in which the way bills were made and prepared by them; that they were in fact prepared and expressed in such terms as to be very likely, even if not certain, to induce the agents and servants of the Rutland and Burlington Company to believe or suppose that the rails mentioned in them were sent and belonged to that company.

There is upon the facts stated in the report no doubt that the defendants, in accepting the rails and undertaking to cause them to be transferred over their own and each successive railroad on the line from Charlestown to Burlington, acted as and assumed the responsibilities of forwarding merchants or agents, as well as of common carriers. In their former capacity they were bound to exercise reasonable diligence and care; and this required that they should furnish and supply, for the use and guidance of the several successive carriers to whom in the due course of transportation the rails should come, way bills, or other suitable papers containing the needful and accurate information and directions as to the destination and the disposition to be made of them. No particular form is essential for that purpose, but the directions should be so expressed as to be free from any real ambiguity, and to be intelligible to persons of ordinary capacity, conversant with that kind of business, who should examine and consider them with proper attention. Any omission of such requisite care would constitute culpable negligence, and would make the party chargeable with it, liable in damages for all loss and injury which should result from, or be the consequence of it. Story on Bailm §§ 502, 537. Briggs *vs.* Boston and Lowell Railroad Company, 6 Allen, (Mass.,) 246.

Upon examination of the way bill, it is obvious that it is in several particulars less explicit and exact than it might have been. But it does, in substance, contain all the information which is material or essential to enable each successive carrier to understand his duty, and the service which he is expected and required to perform. The articles to be carried, the route over, and the place to which they are to be transported, and the consignee to whom they are to be delivered, are all plainly and accurately described. There is nothing equivocal or ambiguous in any of the expressions contained in it. The goods to be carried were described as a part of a lot of rails; the route is from Charlestown to Burlington; and the Ogdensburg Railroad is named and mentioned as the consignee. All this is plain, and must have been intelligible to any person having the least familiarity or acquaintance with the kind of business to which it referred. There is certainly nothing upon the face of the paper which has the least tendency to show that any part or number of the rails were sent to or owned by the Rutland or Burlington Company; and we are unable to see how any officer or agent of that company could deduce such a conclusion from it, or act upon any such supposition without carelessness and gross inattention to the contents of the way bill.

We are therefore of opinion that the plaintiffs have failed to establish their allegations that the way bills were made by the defendants in a negligent and improper manner, or that they gave any improper directions to the Rutland and Burlington Company, or that the misappropriation and loss of the rails is attributable to any carelessness or neglect of duty on their part.

The defendants are therefore entitled to judgment.

Atlantic and Great Western Railway.

We have received the statement for the year ending December 31, 1863, made in advance of the more detailed report of the Central Board of Management, giving an account of the business done upon this railway for the past year. The results are of the most gratifying character, and fully justify the opinions expressed by the promoters as to the remunerative character of the traffic which might be expected upon the line. Most of our readers are no doubt aware that this railway is intended to supply an unbroken line of communication between New York and St. Louis, on the Mississippi. The line starts from the New York and Erie at Salamanca, the link between New York and this place being supplied by the New York and Erie. The latter company gives to the Atlantic and Great Western a premium of 10 per cent upon the gross amount collected by it upon all freights sent on the line from any point on the Great Western Railway, and they pay also one dollar for every passenger brought upon the railway This contract, it appears from the report, came into effect on the 1st of May, 1863, and will continue in force for five years. The amount received by the Atlantic and Great Western under this agreement for the eight months of 1863 was $52,053, and this is specially appropriated to the payment of interest on the bonds of the company. The increase in the business between points on the road in Pennsylvania is such that the directors in their report state that the receipts from the Erie alone will be sufficient to pay the coupons on $1,500,000 of bonds. Leaving the Erie Railway and proceeding westward, the Atlantic and Great Western traverses the State of New York for the length of 48 miles; and this constitutes the first part of the undertaking, each section having its own board of directors and being established under the power of the State Legislature. The earnings of the railway upon the New York section, as compared with the previous year, were:

	1862.	1863.
Passengers.....	$38,172	$67,867
Freight and other sources.....	177,648	251,355
	$215,820	$319,222
Expenses for 1863.....		$153,179
Net earnings.....		$166,043

The number of passengers carried was 75,421, averaging a distance of 24½ miles for each passenger. The gross earnings per mile of road were $6,650, while for 1862 they were $4,496 per mile.

The financial condition of the company is thus stated:

Bonds 1st and 2d Mortgages, and Erie and New York City Bonds	$1,587,665
Bills payable, bearing interest	61,295
Total	$1,648,960
Interest paid on same, at 7 p. c. in '63	$115,427 20
Premium on gold, 1st Mort. coup.	16,558 71
	$131,985 91
Balance of net earnings in 1863	$166,043 00
Coupons and interest	131,985 91
Net earnings after providing interest on the funded and floating debt	$34,057 09

Of the freight carried over the line, Petroleum forms a very large proportion. The number of barrels carried were 246,368 in 1862; and 482,628 in 1863—being an increase of 236,260.

The unfinished condition of the road, as taken from the contractors, has rendered it necessary to make considerable expenditures in completion of earthwork, masonry, and ballasting, and in the increase of engines and cars.

The report states in conclusion: "It is a subject of congratulation that our business has, during the past year, so largely increased, and in great measure from local traffic, facilities for a large through freightage not being perfected in time to be of much benefit. With the great local business which will be obtained by the nearly completed extensions of this railway into the oil, coal, and iron districts of Pennsylvania and Ohio, the stock of this company must become highly remunerative; and the great through traffic of the valley of the Mississippi, which it will command when the western connections are made and rolling stock supplied, will unquestionably make the Atlantic and Great Western Railway one of the most valuable railway properties in the United States."

The second section of the line is that which runs through the State of Pennsylvania, which, *like that of New York, is a distinct company*, and incorporated by legislative authority of the State. The length of road in this State is 93 miles, and the rapidity with which this part of the railway has been completed has been most remarkable. In addition to this main line of 93 miles, an Eastern coal fields branch and extension has been completed and worked since the 1st of June last year. A Western coal fields branch, 13 miles in length, is under contract, and will be shortly completed. A central coal line has also been surveyed. It will traverse the extensive coal fields of the Mercer County Coal and Mining Company, which covers an area of nearly 50,000 acres, and possessing in several parts veins of excellent coal seven feet in thickness. The cost of the Main Line and Eastern has been $5,634,039; the revenue for the eight months of the year was $317,840; the expenses $169,303, leaving net earnings available for interest $48,037. The expenses include extraordinary repairs incident to a newly-finished line, which would properly belong to construction account. The traffic upon the line has hitherto been almost entirely of a local character, the through freight to and from the West not having as yet been provided for. The earnings of the company have, however, been very satisfactory.

The number of passengers carried, inclusive of those on the Eastern Coal Fields Branch and Extension were	145,216 00
Averaging 21 11-14 miles to each passenger.	
The gross earnings of the Main Line per mile for 8 months, were	$3,412 26
At the rate of $5,118 39 for the year.	
The number of tons carried were	164,981
Number of barrels of petroleum carried	420,795
The gross earnings of the Eastern Coal Fields Branch and Extension for seven months, were	42,874 38
The net earnings were	12,766 20

The amount of capital stock issued to the end of last year was $1,763,506; first mortgage bonds $2,500,000, second mortgage, $956,000. The receipts have increased from $37,602 in May to $134,696 in December of 1863; being in very much greater proportion than the increased mileage. The report states:

"The route of the Atlantic and Great Western is now nearly completed from Pennsylvania through the adjoining State of Ohio, and at the borders of that State it will effect a junction at Dayton with the existing Cincinnati, Hamilton and Dayton line, and will be continued from Cincinnati by the Ohio and Mississippi Railway to St. Louis.

"It is a gratifying fact that, in the face of most adverse circumstances, the line has been fully completed and equipped with rolling stock, by the perseverance and energy of the contractor, James McHenry. It is not a less gratifying fact that the experience of the past fully justifies the belief that the Atlantic and Great Western Railway line will not only realize the anticipations of its friends, but that its business will greatly surpass all predictions made. It will as one of the great arteries of the commerce between the Atlantic and the great West, secure, by its unrivaled facilities for freight transportation and its superior accommodation for the convenience and comfort of the traveling public, beyond all doubt a large share of the present and ever-increasing business of the country."

For the month of April, when only 322 miles of the road, including the Mahoning and Oil Wells branches, were in operation, the receipts were upwards of $240,000, and would have far exceeded that sum had the Erie Railroad been prepared for the large increase of business thrown on their line. But even at that rate, after allowing fifty per cent. for working expenses, a net profit would accrue of $1,260,000 per annum, while the interest on the first mortgage bonds only requires $525,000, and on the second mortgage bonds $406,000, so that the present earnings show an acces, of $329,000 beyond payment of interest on first and second mortgages.—*London Railway News May* 21.

HARLAN & HOLLINGSWORTH & CO.,

WILMINGTON, DELAWARE.

MANUFACTURERS OF ALL KINDS OF

RAILROAD MACHINERY.

PASSENGER CARS of the **finest finish**, also all kinds of FREIGHT CARS, DUMPING CARS, HAND CARS, WHEELS and AXLES, STEEL SPRINGS, and in fact EVERYTHING for the **full equipment** of a road.

From our long **experience** in Car building, and our **facilities** for doing work, we are enabled to give ENTIRE SATISFACTION in every particular.

From our LOCATION, and CONVENIENCES FOR SHIPMENT, we can supply southern roads with dispatch, and ship at reasonable freights.

We are also extensively engaged in building IRON VESSELS and IRON STEAM BOATS, STEAM ENGINES and BOILERS and **Machine Work in general.** All orders executed with dispatch and on reasonable terms.

The Practice of Economy.

Mr. Cobden, one of the most illustrious of the modern school of liberal statesmen, and therefore naturally a friend of the country where liberal institutions are specially its object and care, has written a letter to a friend in Philadelphia in which he expresses himself as follows:

"We are looking anxiously for the news from your side of the next campaign. For myself I have never considered that the result of your terrible civil war was to be decided by fighting alone. It is the organization of the South, through the operation of the war on the African race, that I have always regarded as the real source of the weakness and danger of the Confederates. But for this cause to have full effect requires time.

"During that time I fear you will be incurring an enormous expenditure and accumulating a terrible debt. This is not all; I am afraid, while the Government is necessarily spending vast sums, your citizens are individually giving way to extravagant private habits. This is lighting the candle at both ends. If persevered in it will lead you to terrible financial difficulties. The only way in which you can continue to furnish extraordinary supplies to the Government is by the rigid practice of economy on the part of individuals. *Let every patriot preach this truth to the people.*"

The advice of a friend even if it be sometimes not so palatable, is always worthy of consideration, and we think this a fitting occasion to commend the acceptance of his views as a duty we not only owe ourselves, but to the position we hold as the great exemplar of nations, to show them that a republican people cannot only defend, but reform themselves whenever they are departing from the line of safe conduct.

Mr. Cobden perceives by the light of history and experience, that a large inflation of credit and a large increase of paper money are sure to produce corresponding changes in the habits and transactions of a people, which always tend in one direction, that of extravagance and expenditure, never in that of economy; and so he kindly, and like a true friend warns us of our impending danger. It will be well for us if we will see it, for though the material resources of the country are imperishable; though our soil, our territories, our rivers, our lakes, our increasing population will remain intact while this continent lasts as a part of our globe, yet great individual and political difficulties must arise which for a time may impair if not neutralize our prosperity.

The Nation, in struggling for its existence against a most unjustifiable and wicked assault upon it, has been compelled to make enormous efforts both to raise men and provide money. Both have been required on a scale of expenditure unparalleled in history, and as it was out of the question to meet the contingency with the limited supplies of gold and silver at our command, we have had to substitute the promises of the Government in their place, and in the largest amounts, and to pledge its faith for several generations to come that these promises shall be kept. So far the necessity has been attended with a conviction in the public mind that its demands were not beyond the present and prospective ability of the American people to comply with, although we have a funded debt of twelve hundred millions of dollars, and a floating debt of five hundred millions more to absorb in some other way than by an immediate conversion into long bonds bearing interest. The interest of the one, and the capital of the other are entirely under control by the adoption of a judicious tariff, and the imposition of direct taxes, and no country was ever better able than ours to endure both. A vast amount of paper money has been put into circulation, and all classes in a position to offer labor and products in exchange, have been signally prosperous. Many trades and industries have been suddenly called into new and successful activity, and the evidences of individual prosperity have multiplied around us. But these consequences have been attended by others bringing danger in their train. An evident lavishness of expenditure has attended them, especially among those who have been suddenly surprised by an unusual command of money. Immense fortunes seem actually to have turned the heads of a great many persons, who have launched into display of the most unusual character, and indulged in the most costly of luxuries to which they were unaccustomed. Not that we object to the right of such persons to expend their suddenly gotten wealth in the precise manner they think best, but only to express the hope that their examples may not corrupt others who have not had the same luck, or been in possession of the same advantages. It is to this class of persons, we therefore address a few words of caution and advice.

The taxation we have to endure is a load from which there is no more escape than from death, and that it is heavy, and likely to be heavier for years to come, there can be no doubt. Not only does it meet us by the direct call of the assessor and collector, but indirectly in all the articles of necessity we are compelled to use to sustain life. The duties on imported goods, and the Government charges on the products of our factories, and the sales of merchandize, swell the cost of everything taken by the consumer. How important therefore it is that economy should be the rule rather than the exception. Every prudent and patriotic person will perceive that to discharge the great duty we owe our country with any degree of satisfaction, we must be able to practice self-denial, the foundation of all moral and pecuniary stability.

There is a large class of people who have already adopted this principle, if not voluntarily, then from stern necessity. We allude to those in possession of salaries or fixed incomes on the basis of values as established before the war. These having been unchanged during the change from a gold to a paper standard, have found their means of living reduced one-half. Those even who lived in some degree of elegance find themselves restricted to the simplest outlay, and we

speak within bounds when we say that there are thousands of most respectable and meritorious families who find it difficult to indulge in their customary comforts, or enjoy as they did the pleasures of social intercourse. These are practising economy without requiring any hints to do so.

There is another class, however, to whom some words of caution may be given. We allude especially to the industrial and working classes. We fear that many of those persons from the increase of their earnings are indulging in delusions of a permanent prosperity which will be fatal to their future prospects. The careless expenditure of their money in the numerous forms which temptation now so constantly intrudes upon them, is unwise and unnecessary. A return to old prices will bring disappointment to all those who think their present harvest is to be always ripe. New and artificial tastes suddenly dwarfed back into their simple elements will become a curse to their possessors. Now therefore, is the time for the workingmen and mechanics to practice economy, and to accumulate rather than spend their gains. There is no longer an excuse as to the difficulty or danger of investing small sums, as once there undoubtedly was, and which afforded a plausible excuse to many for their habits of profusion. Every person who has earned a surplus of fifty dollars may place it securely in Government stocks and be sure of having the interest and principal returned in gold, or of being able to sell them at a premium.

No one need fear to lose a dollar of his earnings if he invests in these securities. In a bank, or railway, or coal mine, or an insurance company there is always some risk, and small sums are not of much account in these institutions, nor give any influence. But the smallest holder of Government securities rises to the dignity of a public creditor, and is entitled to the honors of a patriot.

We therefore advise all to whom these remarks are applicable, to pursue at once the system of economy we have thus briefly recommended, and as fast as their accumulations permit, to place them in the National funds, as a resource against disaster or old age, or as a permanent resource for an increasing family.

As a nation we are generous, open-handed, and unfortunately extravagant. Great success has made us reckless in expenditure, and when we were not in debt the result was not so dangerous. But we are now loaded with an enormous debt, subjected to heavy taxation, and depleted by extraordinary charges for the simplest necessities of life. The times are changed, and we should change with them. The very richest find their incomes reduced by the financial changes of the hour. It is only contractors and speculators who are content with exhorbitance and irregularity. All others will discover that the tax on their pockets and that on their patience will be extremely unpleasant.

There is one remedy which every one may apply, and that is economy. We shall thereby not only improve our own private estates, be they of even very moderate dimensions, but perform a good service to our beloved country. No people ever became wealthy or strong that did not save what they earned, and the true secret of competence and happiness is, in that economical forecast, which in the day of great things, provides for the contingency of small ones.

Michigan Southern and Northern Indiana Railroad.

The following is a comparative statement of the earnings and expenses of this road for the fiscal years ending March 1, 1863 and 1864:

Earnings:	1863.	1864.
From freight	$1,804,581 78	$2,016,850 79
" passengers	892,138 31	1,244,129 25
" mails	58,966 00	58,514 58
" express	31,210 21	41,829 36
" rents	18,918 92	17,868 50
" all other sour's	13,016 18	10,101 75
	$2,813,831 40	$3,384,294 23
Expenses, viz:		
Repairs of road	$379,656 09	$482,334 76

Compared with the previous year the gross earnings of the past show an increase of $570,462 83; with an increase in expenses of $400,961 29—making the increase in net earnings $169,501 54.

Of the increase of gross earnings $212,269 01 was for gain on freight, $351,990 90 on passengers, and $6,202 80 on mails, express, rents, etc.

The proportion of operating expenses to earnings in 1863–'64, was 51.80; in 1862–'63, 48.50.

During the year an old claim secured by a mortgage on property of the Detroit and Milwaukee Railroad Company was collected, yielding $58,246 04 to the Treasury.

There has been paid into the sinking fund $114,000 of that class of bonds, and the commissioners now hold $764,000 of the sinking fund bonds, making the full amount due to the fund to this date. The report says:

The progress that has been made during the last four years, when the present management found the company in the greatest embarrassment, and almost hopelessly bankrupt, can be better understood by a perusal of the following statement:

The reported debt of the company, funded and floating, was on March 1st, 1860.	$10,617,798 60
Subsequently ascertained to this date as then unreported	597,620 22
Total debt	$11,215,413 82
The funded debt to-day is	$8,287,255 00
Bills payable (of which $15,000 is old and possibly contingent)	22,394 63
	$8,309,649 63
The total stock of the company, as reported March 1st, 1860, was	$9,018,200 00
Since ascertained, 122 shares common stock	12,200 00
Total	$9,030,400 00
The total stock to-day is	10,120,400 00
The amount of Detroit, Monroe and Toledo stock outstanding, as reported March 1st, 1860, was	$130,200 00
The amount of that stock now outstanding is	41,600 00

RECAPITULATION.

Liabilities in 1860:	
Debt	$11,215,413 82
Stock	9,030,400 00
Detroit, Monroe and Toledo stock.	130,200 00
Aggregate	$20,376,013 82
Present liabilities, March 1, 1864:	
Debt	$8,309,649 63
Stock	10,120,400 00
Deiroit, Monroe and Toledo stock.	41,600 00
Aggregate	$18,471,649 63
Diminution of aggregate of liabilit's	$1,904,364 19

Of this reduction the amount of $594,000 was by sinking fund bonds added to the sinking fund during the four years.

Within this period our equipment for freight business offering has been greatly below the demand of the business. Our average of cars per mile of road operated was during the fiscal year previous to that just closed 1.77, while the average number of cars per mile of road on the other roads centering in Chicago was 3.51. In operating our road, such was the close and effective adaptation of means to ends, and the diligent use made of what facilities we had, that while the other roads named averaged $1,006 earnings per car per year, our earnings averaged $1,540 per car. The difficulties encountered during the earlier part of this period in meeting such imperative demands as were occasioned by the large floating debt, including overdue interest, and in

satisfying the obligations to the sinking fund from the current revenue of the company, prevented the requisite appropriations for a proper increase of equipment; as the average of cars per mile and the yearly earnings conclusively show.

A due regard for the interests of the company and for the development of its business, would seem to require that proper facilities should be afforded to supply this need, and to enlarge the depot accommodations, to meet pressing wants and to keep pace with future demands of traffic, which otherwise must seek other channels for transportation. It is to this end that the attention of the board is now directed, as promising the best guarantees for future increase, and for profitable returns to the stockholders.

It is gratifying to state that under all the disadvantages, the board were enabled during the past year to declare the first dividend, of five per cent., ever earned on the guaranteed stock, which was made payable to that class of shareholders on the first of August last, and a subsequent dividend of like amount on the first of February last, with reasonable certainty of being able to maintain the same at semi-annual periods in the future.

During the year the company embraced the opportunity of selling at a premium $1,400,000 of the reserved common stock created and contemplated at the time of consolidation, the proceeds of which were sufficient for the purchase of $310,000 of ten per cent. guaranteed stock, and $1,126,000 of first and second mortgage 7 per cent. bonds—making a total of $1,436,000. It may be stated in this connection that the aggregate of guaranteed and common stock outstanding, by this issue, amounts to 101,204 shares as against 100,702 shares of both these classes of stock in 1858, as appears by the annual report for that year. It must be apparent to all that this capitalization materially improved the condition of the finances, and thus hastens the period when the common stockholders will realize upon their investment.

The results of the year show a surplus which, if not sufficient to justify the payment of a dividend on the common stock, substantially increases its value, and furnishes, together with the increasing revenue of the company, the strongest assurances of the capacity of the road to earn a return on both classes of its stock. The directors therefore see no reason why a resumption of dividends on the common stock may not be expected during the present year, and regularly maintained.

The decayed condition of the branch road laid with strap rail, extending from Constantine to Three Rivers, would not warrant its operation longer than till the first of December last, at which time trains were discontinued. The accommodations heretofore afforded by this branch to a rich and productive country tributary thereto, are now suspended, and unless some provision is made for the rebuilding of the road, the business will in part seek other portions of the road, and in part be diverted to competing channels. In view of this fact, and of the earnest of the public formerly doing business over this branch to resuscitate it, the directors, in the early part of the present year, directed their Chief Engineer to report upon the project, and also upon the extension of said branch twelve miles farther over a road already graded to Schoolcraft in the State of Michigan. This report has been prepared, and will be read to the stockholders at their annual meeting for their action thereon. The system of branch roads which has given to this company a long line to maintain lateral to the trunk road between Lakes Michigan and Erie, is too important in its future bearings to be acted upon hastily by the board, and is a more proper subject for the attention of the stockholders. It is to be hoped that sufficient interest will be felt in the welfare of the road, and such consideration be given to its future prospects, as to insure the personal attendance of stockholders at their next annual meeting, that full expression may be given of their views, and such measures be adopted in this and other matters as are best calculated to promote the prosperity and success of the company.

The following is a comparative statement of the assets and floating liabilities of the company March 1, 1863 and 1864:

Assets:	1863.	1864.
Uncollected earnings	$218,187 88	$89,071 08
Supplies on hand	196,999 20	288,725 80
Freight overcharges due from other companies.	14,898 53	31,387 10
Bills receivable, Toledo.	2,091 24	2,091 24

" Toledo	1,000 00	5,266 67
Coupons and bonded interest	22,592 29	14,921 45
Pay rolls and vouchers, February	140,218 31	163,519 46
Due individuals, Toledo.	.....	2,127 96
Interest on overdue b'ds not yet presented	.....	5,180 00
Unclaimed dividends on guaranteed stocks	.....	18,295 20
	$245,046 76	$224,310 74
Excess of assets	$199,961 40	$195,422 60

Decrease of assets, $25,274 82; reduction of liabilities, $20,736 02.

The apportionment of freight and passenger earnings of Main Line and Branches for the year 1863-'64, was as follows:

	Passenger.	Freight.
Main Line	$849,775 78	$1,599,131 83
Air Line	87,060 04	195,184 81
Det., Mon. & Toledo	125,741 84	105,849 43
Jackson Branch	33,720 29	30,363 05
Monroe and Adrian	28,955 18	47,430 05
Three Rivers Branch.	1,975 23	3,618 31
Storage	.....	35,323 31
Military transp	116,900 99	.....
	$1,244,129 25	$2,016,850 79
Previous year	892,138 31	1,804,581 78
Increase	$351,990 94	$212,269 01

The total number of passengers carried was 576,897; of which 96,414 were through, and 480,483 way. Of the through passengers, 69,792 were 1st class, 15,784 2d class, and 10,837 emigrant—yielding $513,792 47. Of the way passengers, 478,441 were 1st class, 758 2d class, and 1,283 emigrant—yielding $613,435 79. The number of miles traveled by through passengers was 23,690,068; by way passengers, 18,040,202—total 41,730,270. The average mileage of each through passenger was 245¾; do., way, 37½. The average amount received from each through passenger was $5.32; do., way, $1.27. Average rate per mile on through travel 2.17 cents; do., way, 3.43 cents.

The number of tons of through freight moved eastward was 183,475; do., westward, 60,430—total through, 243,905, yielding $1,093,659 48. Way freight moved eastward, 206,361; do., westward, 108,713—total way, 315,074, yielding $887,868. Total tons through and way freight eastward 389,836, or 69.74 per cent., yielding $1,385,398 73, or 69.92 per cent.; do., westward, 169,143, or 30.26 per cent., yielding $596,128 75, or 30.08 per cent.—the total tonnage being 558,979, against 543,626 the previous year; and the revenue therefrom, as above, exclusive of storage $1,981,527 48, against $1,706,184 64: a gain of 15,353 tons, and $215,892 84, or 12.02 per cent.

The number of engines owned by the company is 86; of which 63 are in good order, 14 require ordinary repairs, 7 thorough repairs, and 2 not in use. Number of miles run by passenger trains, 1,245,465; by freight trains, 736,985; by wood and gravel trains, 189,027—total 2,171,477, an increase over the previous year of 110,840 miles. Cost of repairs per mile run 7.4 cents, which includes almost the entire renewal of five engines, rebuilt during the year. The condition of the motive power of the road has been well preserved and is as efficient as at the beginning of the year.

The rolling stock consists of 8 12-wheel and 56 8-wheel passenger cars; 8 second class, 6 emigrant, and 22 mail, express and baggage cars; 14 drovers', 1 paymaster's, 2 wrecking, 16 gravel, 169 stock, and 948 freight cars.

The number of miles operated to December 1, 1863, was 529; since that time (by discontinuance of Three Rivers Branch,) 521.

Common Carrier.--Limitation of Responsibility.--Special Contract.

The case of Judson *vs.* The Western Railroad Corporation, was an action on contract, in which the plaintiff sought to charge the defendants as common carriers, for the loss of a quantity of dressed deer skins, which were in the defendant's freight depot at East Albany on the evening of the 5th of July 1861, when it, with all its contents, was destroyed by an accidental fire. At the second trial there was evidence tending to show, and it was found by the jury, that on the afternoon of the 5th of July 1861, two boxes marked G. C. Judson, Springfield, Mass., by railroad," were delivered by the New York Central Railroad Company to the defendants at East Albany, for immediate transpartation, with the necessary vouchers and expense bills; and it further appeared that the defendants have for the past ten years issued freight tariffs, which were in force in July 1861, containing, among other provisions, the following: No risk assumed beyond $200 on any one package, except by special agreement. All goods and merchandise will be at the risk of the owners while in the corporation storehouses, and no responsibility will be admitted for any loss or injury except such as may arise by fire from the locomotive engines, or by negligence of the agents of the corporation." These tariffs were posted in all the freight houses of the corporation, and liberally distributed to the public, and, before the 5th of July 1861, a large number of these freight tariffs were delivered by the defendants to the freight agents of the New York Central Railroad Company at Albany. A notice similar to that contained in the freight tariffs was, and for many years had been, inserted in the printed receipts given for goods delivered at the several stations of the defendants for transportation, but the defendants did not propose to bring these notices home to the plaintiff in any other way than as above stated; and the plaintiff himself testified that he had never seen them, and was ignorant of their existence.

The New York Central Railroad Company received the boxes from the plaintiff's agent at Fonda, New York, and gave for them a shipping receipt which contained the following stipulation, amongst others, "Goods or property consigned to any one place off the company's line of road, or to any point or place beyond its termini, will be sent forward with as reasonable dispatch as the general business of the corporation at its warehouse within mentioned will admit, by a carrier or freight man, when there are such known to the station agent at said warehouse willing to receive the same, unconditionally for transportation, the company acting, for the purpose of delivery to such carrier or freight man, as the agents of the consignor or consignee, and not as carriers.

The defendants requested the court to instruct the jury that the limitations and conditions contained in their tariff and freight receipts, brought home to the knowledge of the agents of the New York Central Railroad Company as above stated, would exempt them from all liability for the loss of the goods, or in any event, would exempt them from liability beyond $200 on each parcel. The judge declined so to rule. The jury returned a verdict for the plaintiff, with damages, and the case was reported for the consideration of the court.

Bigelow, C. J.—It would not be profitable to enter upon a citation and discussion of the numerous and conflicting cases bearing on the question of the rights of a common carrier, by a general notice, to absolve himself entirely from his common law liability for property intrusted to his care, or to modify and limit his responsibility by a mere constructive notice to those who may have occasion to place goods, wares and merchandise in his keeping for the purpose of transportation. A careful examination of the authorities would not lead to any very satisfactory result, or throw much light on the real principles on which the respective rights and duties of carriers and the public mainly depend. A very full and clear statement of the results arrived at in the leading cases on the subject can be found in the elementary writers, especially in Redfield on Railways, 264; Angell on Carriers, §§ 232,—245; Parsons on Con. 707.

There is, however, one conclusion which is fully supported by the weight of authority in the American courts, concerning which no serious doubt can be entertained; that is, that a public carrier may enter into a special contract with his employer by which he may stipulate for a partial or entire exoneration from his liability at common law as an insurer of property committed to his custody, and that such contract is not contrary to public policy, or invalid as transcending the just limits of the right of parties to regulate their dealings by special stipulation. As a necessary corollory of this conclusion, it is also held in the best considered cases and by the most approved text writers, that a notice by a carrier that he will not assume the ordinary responsibility imposed on him by law, if brought home to the owner of goods delivered for transportation, and asserted to clearly and unequivocally by him, will be binding and obligatory upon him, because it is tantamount to an express contract that the goods shall be carried on the terms specified in such notice. To this extent, the doctrine that a carrier may limit or modify his liability seems to be most just and reasonable. Inasmuch as the rule of law which holds a carrier to the responsibility of an insurer, except in certain special cases, is founded in a policy which is designed solely for the security and benefit of the owner of goods, there can be no sufficient reason for regarding the rule as absolutely inflexible or irrepealable, when the party, in whose favor it will operate, directly or by necessary implication consents to waive it, or agrees to an essential modification of his own rights under it.

But it is a very different proposition to assert that a common carrier may escape his legal liability or materially change it by a general notice to all persons that he will not be responsible for the loss or injury of property intrusted to his custody, or only liable therefor under such conditions and limitations as he may think proper to impose. A common carrier is in a certain sense a public servant, exercising an employment not merely for his own emolument and advantage, but for the convenience and accommodation of the community in which he pursues his calling. The law imposes on him certain duties and responsibilities different from and greater than those which attach to an occupation of a purely private nature, in regard to the conduct of which the public have no interest, and which can be carried on at the option or according to the pleasure of the person who is engaged in it. A common carrier cannot legally refuse to transport property of a kind which comes within the class which he usually carriers in the course of his employment, if it is tendered to him at a suitable time and place, with an offer of a reasonable compensation. Like an innkeeper, he is obliged to exercise his calling upon due request under proper circumstances, and is liable to an action for damages if he wrongfully refuses to do so. A legal obligation rests upon him to assume the duty which he holds himself out as ready to perform, and a correlative right belongs to the owner of goods to ask for and require their reception and transportation upon the terms of liability fixed and defined by the established rules of law. The carrier has not the option to accept or refuse the carriage of the goods at his pleasure; but the person seeking to have them transported can choose whether they shall be carried without any restriction of the carriers duty as prescribed by law, or whether he will waive a portion of his rights, and consent to a modification of the legal liability which attaches to the carrier. Such being the legal relation which subsists between a common carrier and his employer, it certainly would be consistent with it to hold that a carrier, by a mere notice brought home to the owner of goods intrusted to his care that he did not intend to assume all the liabilities of his calling, would escape or materially change the responsibility which the law annexes to the contract of the parties. It would in effect put it in the power of the carrier to abrogate the rules of law by which the exercise of his employment is regulated and governed. Certainly such a notice, even if shown to have been within the knowledge of the owner of goods, would, in the absence of evidence of his direct assent to its terms, afford no sufficient ground for the inference that he had voluntarily agreed without any consideration to relinquish and give up the valuable right of having his goods carried at the risk

of the carrier. On the contrary, it would be quite as reasonable to infer under such circumstances that the carrier did not intend to rely upon a notice upon which he could not legally insist, as that the owner of goods meant to surrender a right to which he was entitled to by law. In such case, mere silence cannot be said to amount to acquiescence.

The application of these principles to the present case is decisive against the right of the defendants to insist on the instructions for which they asked at the trial. It is not contended that the plaintiff had any actual knowledge of the notice issued by the defendants, containing a limitation of their common law liability as carriers. If he had any knowledge at all, it was at most only constructive, though the New York Central Railroad Company, who received the goods for transmission over their own road, to be delivered to the defendants to be forwarded over a portion of their route. There is no fact in the case from which any assent by the plaintiff to the terms of the notice can be inferred. One portion of the notice on which the defendants rely goes to the extent of repudiating all liability for the loss or injury of goods delivered to the defendants and in process of transportation, except such as might be caused by fire from the locomotive engines or by the negligence of the agents of the corporation. This certainly was not binding on the plaintiff. Equally invalid was that portion of the notice which announced that the defendants would not be liable for a greater amount than two hundred dollars on any one package, except by special agreement. This was equivalent to a notice that they would not be liable for a greater amount than two hundred dollars on a single package, unless they chose to assume a further liability. It was optional with them, under this notice, whether they would make any such agreement or not. If they refused or omitted to do so, the owner of goods had no power to compel them to enter into any agreement. Nor, if the notice of itself is binding on him, had he any means of obtaining the safe transportation of his goods by the defendants above the value of two hundred dollars, under the liabilities imposed by law upon common carriers.

We do not mean to say that a general notice brought home to an owner of goods may not be available to qualify and limit the responsibility of common carriers to a certain extent and within certain limits. All that we mean to decide is, that a common carrier cannot by a general notice exonerate himself entirely from his legal liability, nor limit it absolutely to a certain amount beyond which he will not be held responsible in case of injury or loss. This was the legal effect of the notice on which the defendants rely in the present case, as is admitted by their counsel, who puts his defence to this action on the ground that they are not liable at all, or only for the sum of two hundred dollars on each package. Such a notice being invalid, was not binding on the plaintiff, and he is therefore entitled to

Judgment on the verdict.

Public Debt of the United States.

The Secretary of the Treasury, in answer to a resolution of the House, states the public debt of the United States up to June 14, 1864, as follows:

DEBT BEARING INTEREST IN COIN.

Rate of Int.	Character of Issue.	Authorizing Acts.	Amount Outstanding.	After what date reimbursable.	Interest.	When payable.
6 per ct.	Bonds	January 28 1847	$9,415,250 00	Jan. 1, 1868	$564,915 00	Jan and July.
6 per ct.	Bonds	March 31, 1848	8,908,341 80	July 1, 1868	534,500 50	Jan. and July.
6 per ct.	Bonds	June 14, 1858	20,000,000 00	Jan. 1, 1874	1,000,000 00	Jan. and July.
6 per ct.	Bonds	June 22, 1860	7,022,000 00	Jan. 1, 1871	351,000 00	Jan. and July.
6 per ct.	Bonds	February 8, 1861	18,41[illegible],000 00	Jan. 1, 1881	1,104,500 00	Jan. and July.
6 per ct.	Bonds exchanged for 7-10	July 17 and Aug. 17, 1861	50,000,000 00	June 30, 1881	3,000,000 00	Jan. and July.
6 per ct.	Bonds exchanged for 7-10	July 17 and Aug. 17, 1861	21,421,700 00	June 30, 1881	1,285,302 00	Jan. and July.
5 per ct.	Bonds, 5-20's	February 25, 1862	510,756,900 00	May 1, 1882	30,645,414 00	May and Nov.
5 per ct.	Bonds, 10-40's	March 3, 1864	70,339,280 00	March 1, 1904	3,511,962 50	March and Sept.
6 per ct.	Bonds, Texas Indemnity	September 9, 1850	2,169,000 00	Jan. 1, 1865	108,450 00	Jan. and July.
6 per ct.	Bonds, Oregon War	March 2, 1861	1,016,000 00	July 1, 1881	60,960 00	Jan. and July.
7-10 per ct.	Notes, three years	July 17, 1861	118,577,000 00	Aug. 19 and Oct. 1, '64	8,656,168 45	Aug. 19 & Oct. 1, '64
	Aggregate of debt bearing Coin Interest		$337,941,091 80		$50,523,072 45	

DEBT BEARING INTEREST IN LAWFUL MONEY.

4 per ct.	Temporary Loan	July 11, 1862	$665,420 15	10 day's no. after 20 days.	26,616 80	
5 per ct.	Temporary Loan	July 11, 1862	17,185,903 86	10 day's no. after 30 days.	357,946 19	
6 per ct.	Temporary Loan	July 11, 1862	37,774,178 57	10 day's no. after 30 days.	2,266,450 71	
6 per ct.	Certificates of Indebtedness	March 1, 1862	151,963,000 00	1 year from date	9,118,800 00	1 year from date.
6 per ct.	One Year Notes	March 3, 1863	44,5 0,000 00		2,220,000 00	1 year from date.
5 per ct.	Two Year Notes	March 3, 1863	16, 3,000 00		24,000 00	2 years from date.
5 per ct.	Two Year Notes, with Coupons	Mar. 3, '63—Whole Is	$1,0[illegible],000			
	Less withdrawn and destroyed or ready to be destroyed		38,590,700			
			111,109,300 00	December 1, 1866	6,666,468 00	June and Dec.
	Aggregate of Debt bearing Lawful Money Interest		$379,700,802 58	Aggregate lawful money int.	20,576,057 70	

DEBT ON WHICH INTEREST HAS CEASED.

Character of Issue.	Authorizing Acts.	Amt Outstanding.	
Bonds	April 15, 1842	$238,808 45	
Bonds	Acts p. to 1857	104,811 84	
Treasury Notes	December 23, 1857	9,900 00	
Treasury Notes	December 17, 1860	600 00	
Treasury Notes	March 2, 1861	47,150 00	
Temporary Loan Coin	July 11, 1862	4,200 00	
Aggregate of debt on which Interest has ceased		$370,170 09	

DEBT BEARING NO INTEREST.

United States Notes	July 17, August 5, 1861, and February 12, 1862	$400,000,000 00	
	Less amount withdrawn	59,166,213 00	
United States Notes	Amount outstanding	833,788 00	
	Feb. 25, July 11, 1862, and July 17, 1863	399,166,212 00	$400,000,000 00
United States Notes	Issued in redemption of Temporary Loan	49,200,205 00	
	Less amount withdrawn	17,258 872 00	32,041,330 00
Fractional Currency	July 17, 1862	15,406,156 00	
Fractional Currency	March 3, 1863	5,625,792 85	
		21,031,948 85	
Due for Drafts on balance of Disbursing Officers		$455,073,278 85	
Unpaid Requisitions		2,433,825 65	
Aggregate of Debt not bearing Interest		46,876,000 00	
		$501,383,104 41	

RECAPITULATION.

	Amount outstanding.	Interest.
Debt bearing interest in coin	$337,941,091 80	$50,523,072 45
Debt bearing interest in Lawful Money	379,700,802 58	20,576,057 70
Debt on which interest has ceased	370,170 09	
Debt bearing no interest	501,323,104 41	
Total	1,719,395,163 88	$71,099,730 15

The foregoing is a correct statement of the Public Debt, as appears from the Books, Treasurer's Returns, and requisitions in the Department on the 14th June, 1865.

S. P. Chase, Secretary of the Treasury.

Railroad Earnings--Monthly.

The earnings of the Housatonic Railroad for May, 1864, were..... $30,615 18
Corresponding month of previous year. 24,567 07

Increase..... $6,048 11

The earnings of the Erie Railway for the month of April, 1864, were..... $1,052,293 02
Corresponding month of previous year 848,782 90

Increase..... $203,510 12

The earnings of the Hannibal and St. Joseph Railroad for the month of May, 1864. $186,856 15
Corresponding month in 1863..... 113,291 54

Increase..... $73,064 61

Interest and Dividends.

A dividend will be paid on the capital stock of the Michigan Southern and Northern Indiana Railroad Company, on the 1st day of August next, as follows, viz: Five per cent, less the Government tax, on the Guaranteed Stock, and Three and a half per cent, free of Government tax, on the Common Stock.

The Michigan Central Railroad Company has declared a regular dividend of 6 per cent., and an extra one for same amount, both payable July 1.

The Boston and Providence Railroad Company pay a semi-annual dividend of 4 per cent., clear of Government tax, July 1.

The Western Railroad Company will pay a semi-annual dividend of five per cent 1st prox.

The Eastern Railroad Company has declared a semi-annual dividend of 3 per cent, payable July 1.

The Old Colony and Newport Railroad Company will pay a semi-annnal dividend of 4 per cent. July 1.

The Connecticut River Railroad Company pay July 1, a dividend of 3 per cent. for the last five months.

The Rome, Watertown and Ogdensburg road will pay 15th July a semi-annual dividend of 5 per cent., free of tax.

The Fitchburg Railroad Company pays a dividend of $4 per share July 1.

The coupons of the First Mortgage Bonds of the Mariposa Company will be paid 1st July in gold.

McGregor Western Railway.

The road is now in operation to Luana, and is being graded to Pottsville, which place it will probably reach by the last of July. A large elevator is now being constructed at Pottsville in anticipation of the arrival of the cars.—*McGregor News.*

☞ Our American petroleum or mineral oils beginning to come extensively into use for signal lamps on the British Railways. It is cheaper than any other kind, does not congeal and has an illuminative power to a much greater degree than any other.

American Railroad Journal.

Saturday, June 25, 1864.

Stock Exchange and Money Market.

Of the seventy-five million loan only forty-one millions were accepted under the call for subscriptions, although the total amount offered was about seventy millions. The fortunate parties were those who proposed to take the new stock at the rate of 4 per cent. premium, which is considerably under the market rate of the previous loan of same date and tenor. During the past week the new stock has found ready sales at 106¼. The balance will no doubt be taken while the Secretary of the Treasury is in the city where he was to arrive on Tuesday last. With regard to the foreign loan it is stated that if the amount required by the Government can be readily filled in this country, the proposition from abroad will not be entertained. Indeed if the orders continue to come from the continent as they have done the last few months, that would seem to be the natural course for foreign investers to take, and the necessity of a separate negotiation on the part of the Treasury with any Continental Bankers would not seem to exist.

From the communication made to Mr. Cisco by Mr. Chase, it will be perceived that our recent statement with regard to the funded and unfunded debt of the Nation was perfectly within the truth, and that the contraction of the Government currency was even greater by many millions than was supposed at the time. The inflation so much complained of is in fact not strictly chargeable to the Government. The Banks are really the great offenders as we have also shown by indisputable figures. As the Treasury has set the example of restriction and curtailment, we think the Banks should follow it forthwith.

We learn that the farmers and grain producers of the west have resolved not to receive for their products any longer the notes of the Banks of the Eastern and Northern States, and are determined to receive none other than legal tenders and National bank currency. This determination will remedy an evil, and we hope it will be seconded nearer home. There is no good reason why the notes of our ordinary Banking institutions which do not pay specie, do not pay their dividends in gold, and have at present none of the marks of a specie basis, should flood the country with their bills, especially when most of them are unable to redeem them even in legal tenders.

We have too much Bank paper afloat and it may be many years before it will be payable in the specie it professes to represent. It appears that the assistant Banks of this City are steadily increasing their loans although their specie is decreasing. On the 18th of June inst. their statement was as follows :

Loans $195,773,583. Specie $22,912,767. Circulation $4,959,096. Deposits $169,445,777. Showing from the statement of the previous week the following differences :

Increase in loans	$837,761
Decrease in specie	1,125,413
Decrease in circulation	81,364
Decrease in deposits	3,091,481

The great feature of the week was the gold bill and the rise in gold. The President having signed the bill it became a law, and the Boards of Brokers both in this city and Philadelphia at once struck the article from their call lists. The Gold board, as it is called, also adjourned without day, and all transactions in it must now be carried on by *bona fide* dealers at their places of business with the cash in hand. Of course this change is anything but pleasant to the speculators who operate on small or often fictitious capitals. There is no real restriction put on the sale of gold itself by the new law, which is nothing more than a riot act, to disperse an unlawful assembly. There is no interference with the laws of commerce or the rights of individuals, and yet we shall probably hear very dismal lamentations over the loss of the right to distract the public mind and abuse the public confidence. Be the feeling what it might, the price of gold went up on Tuesday to a rate anticipated by us more than a year ago, though it was considered at the time a very daring prediction. We have all along seen what combination might do, when assisted by a paper currency inflation and excessive importations. We are well satisfied that this sudden rise which has startled

the public, while it might be expected, is mainly a fictitious one. That there is a premium fairly to be asked for gold as between it and paper we do not deny. At 25 per cent there is probably difference enough, all that can be legitimately estimated as the difference; but when 100 is paid, the condition of things becomes alarming. If this price holds long, great changes will inevitably occur in the relations of debtors and creditors; importations must fall off, or prices of foreign articles rise to Richmond quotations, the debts of the Government will double with the double prices it will have to pay for everything, and the classes whose incomes and salaries are fixed, must come to great distress. Now to produce such disastrous consequences we do not hesitate to say has been the object of a class of disloyal persons among us, and the rebellion under continued blows which have beaten it into the smallest possible shape, and left it in the most battered condition, has been kept in heart and hope by the New York gold market. If public and private credit can be sunk as low and become as contemptible as that in the confederacy why then, the South will be no worse off than the North, and the chances of final success are re-opened, and become brighter in the eyes of those whose vision is now narrowed, and may forever close in night in two cities of Virginia, where the brains and the official insignia, and the last remaining power of the rebellion are concentrated. Here in New York the battle is waged in the gold market, and beyond all question, the proceeds of many a cargo of blockade run cotton, and the capital of foreign enemies have been employed during the last year to get gold to this figure and the Country into this difficulty.

There is but one legitimate way of remedying the present evil, and it is the one long foreseen by Mr. Chase, but not yet recognised by Congress nor the people. It is the immediate contraction of the local Bank currency, if not voluntarily, by force of legislation. We have shown in a recent article that the Banks are enormously inflated, in some States 242 per cent of their capitals, and that even in the commercial State of New York, five hundred millions of indebtedness mark the operations of our Bank managers, the best and most conservative. When respectable newspaper presses call on Mr. Chase to borrow money only, and to issue no more of his own currency, do they mean that the Government shall pay 6 per cent for the use of irredeemable bank paper. Is this the money which Mr. Chase is so much blamed for not using in preference to legal tenders? Is he to pile up an annual charge of forty or fifty millions of interest payable in gold for its use, when it is not so popular, so useful, so convertible or so solvent as that of the Government. If paper money is all that we can now obtain for our public and private wants let us have the best we can get, and that, of which we can at least get some portion indirectly if not directly in coin.

We are therefore inevitably led to the following conclusions which we would express in the shape of simple propositions, the better to express our opinions.

1. That the use of paper money was an inevitable consequence of the breaking out of the rebellion, if we thought the Union worth preserving, and with it our free institutions and hitherto glorious Nationality.

2. That the amount of paper money issued by the Government was never in excess of its resources, or power to redeem through the intervention temporarily of the funded debt, and the regular payment of the interest in gold, which latter no Banking institutions have ever pretended to do.

3. That five hundred millions of legal tenders, based on seventeen thousand millions of dollars of property as returned by the census of 1860, with the internal revenues and custom duties of three hundred millions per annum, are the safest and soundest paper currency that could be possibly put afloat, and are certain to be redeemed and absorbed on a specie basis.

4. That the present dangerous inflation is not chargeable on the Treasury but on the State Banks which are every where running a race of expantions, at enormous speed and the most dangerous velocities, without anything to repress or check them.

5. This appears from previous statements which we have made in the hope of procuring a remedy at the hands of Congress.

6. That nothing short of the immediate action by Congress, by heavy taxation, or absolute repression of the local bank circulation to the limits of their capital, or forcing them into liquidation whenever they refuse payment of their notes in legal tender money, will prevent a continuance of the present derangement of the currency.

7. That it was the duty of Congress to have passed a bankrupt bill, and to have included the local banks within its operations.

These are the results to which we are compelled to come after careful consideration of the subject, at the same time warning the timorous not to be thrown off their guard by the late rise in the market. We have demonstrated, we believe, that the price of gold is no indication of the real condition of a country, but only of its commercial exchanges. There never has been in the United States in the profoundest peace, more than 2½ per cent. in gold on each dollar of our property. Ninety-seven and a half per cent. have had no representative therefore in the precious metals, but we could not therefore argue that it did not exist.

If a man has a bushel of wheat in his house, but cannot produce at the same moment a dollar in gold as its representative it is no proof that the wheat does not exist, and has not its value as an article of food or exchange. Nor is it likely that this rise will produce a fatal undervaluation of the Government securities, for these have grandly withstood all the other numerous fluctuations of the times, and maintained their solvency in gold, when all other securities produce nothing but paper. On the contrary, the more likely is it to be that the profits of investment in the public securities will cause a still greater absorption of them at home and abroad.

Money is easy to borrowers, 5 per cent. being the price charged at the National banks on collaterals of National securities. The other banks get 7 per cent. where they can, though generally unable as we have before hinted, to redeem their paper even in legal tenders, and seeking to get rid of this obligation even as late as Tuesday last, by certifying checks, another device of these institutions. Railroad shares have improved, and Government stocks are firm and advancing, U. S. coupon 6's stand at 113.

The import entries of the past week amount to $3,359,509, against $1,995,292 same week last season. The export clearances of domestic produce amount to $5,231,326, against $2,426,583 same week in 1863. The export of specie is $1,887,000, against $522,000 same week last year. The customs for the week are $631,000.

The total value of foreign goods imported into the port of Boston for the week ending June 17, was $719,889, against $330,221 for the corresponding week in 1863.

The total value of foreign exports from the port of Baltimore for last week was $151,620.

The Assistant Treasurer reported on Tuesday a balance of $45,426,046.

The total National debt including requisitions, (and the legal tenders unfunded to the amount of five hundred millions,) is now $1,719,391,168 88. The interest bearing legal tenders retired amount to $38,890,700, and the plain greenbacks placed in reserve $17,258,872, making in all a contraction of $56,149,572, thus showing Mr. Chase is as good as his word.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—At. and Gt. Western (Ohio div.,) 99¾; Hannibal and St. Joseph L. G. bonds, 101; Marietta and Cincinnati 1st mort., 105; Illinois coupon bonds, 1879, 104; North Carolina 6s, 58½; Kentucky 6s, 110; Illinois War Loan, 98; Wisconsin 6s, 100; Ohio and Miss. pref. cer., 92; Sixth Avenue R. R., 121; Norwich and Worcester, 110; Mariposa 1st mort., 102; Nicaragua Transit, 9; Wyoming Valley Coal, 61; Central Coal, 72½; Consol. Coal Co. Md., 70; Bucks Co. Lead, 1⅛; Quartz Hill gold, 14; Copake Iron, 10; Saginaw Land and Mineral Co., 5; Atlantic M. S. S. Co,, 176; American Exchange Bank, 120; 4th National Bank, 98; Bank of Commerce, 114.

Philadelphia.—Allegheny Co. coupon, 5s, 82; do., scrip, 81; Pittsburg 5 per cent scrip, 77½; Westchester 8s, 90; Camden and Amboy mort. 6s, 111; Huntingdon and Broad Top, 36; 13th and 15th streets, 33; 10th and 11th streets, 51; Pennsylvania 6s, War Loan, 107½; Big Mountain Coal, 8⅛; New York and Middle Coal Fields, 19⅛; New Creek, 1⅜; Green Mountain, 5½; Bear Valley, 18¼; Fulton 8⅛; Oil Creek, 5½; Phila. and Oil Creek, 1¼; Maple shade, 10¼; Dinsmore, 4; Clinton, 1; Irwin, 4½; Olmstead, 4; Perry, 6; Mineral, 4¼; Dalzell, 5¼; McClintock, 5; Feeder Dam, 1⅛; Rock, 4½; Union petroleum, 2¼; Etna Copper, 15¼; Empire Copper, 7; Penn., 10⅛; Merrimac, 4; Broad Top Imp. Co., 8⅛; Commercial Bank, 56; Commonwealth Bank, 47; Mechanics' Bank, 28¾; Girard Bank, 47½; Manuf. and Mech. Bank, 28; Consolidation Bank, 34; Farmers and Mech. Bank, 59¼. The latest quotations are: City 6s, 103⅝@104; do., new, 106⅜@106½; State 5s, 100¼@101; do., coupon 103@103¼; do., 6s, 1879. 107@107½; Phila., Wil. and Balt., 7½@—; Reading, 71½@71⅝; do., 6s, 1870, 107@108; do., 1886, 143@144; Camden and Amboy, 189@190; Pennsylvania R. R., 71¾@72; do., 1st mort., 117@118; do., 2d mort., 114@114¼; Little Schuylkill R. R., 49⅞@50; Morris Canal, 87@87½; do., pref., 140@140½; do., bonds, 108

@109; do., 2d mort., 104@105½; Wyoming Valley Canal, 80½@81¼; do., 6s, 105@106; Susquehanna Canal, 22@22¼; do., 6s, 67½@68; Sch. Nav., 29½@30½; do., pref., 41¾@42½; do., 6s, 1882, 98@98; Union Canal pref., 4½; do., bonds, 25@25¼; Delaware Div. Canal, 43@43½; do., bonds, 104@105; Elmira and Williamsport, 35@36¾; do., pref., 54½@55; do., 7s, 1873, 112¼@113½; do., 10s, 78@78½; Beaver Meadow, 97@100; Long Island R. R., 46@49; Lehigh Coal and Navigation, 75@75½; North Pennsylvania, 33¾@33½; do., 6s, 106@106½; do., 10s, 122@124; Philadelphia and Erie, 33@34; do., 6s, 108@108¼; Minehill, 64¾@65; Catawissa, 20½@21; do., pref., 41@42⅜; Lehigh Valley, 130@135; do., bonds, 110@111; Fifth and Sixth streets, (horse,) 63½@65; do., 7s, 109; Second and Third, 74@75; do., 7s, 112; Race and Vine, 12@15½; West Philadelphia, 72@73; Spruce and Pine, 45@48; Green and Coates, 39@40; do., 7s, 110@110¼; Chestnut and Walnut, 63@66; Arch, 33½@34; Thirteenth and Fifteenth, 33@33¾; Seventeenth and Nineteenth, 16; Girard College, 30@31; Tenth and Eleventh, 51@51¼; Norristown, 60¾@61.

Boston.—Northern (Ogdensburg,) 1st mortgage, 107¾; do., 2d mort., 36; Troy and Greenbush R. R., 53¼; Vermont Central, 2d mort., 86¼; Boston and New York Air Line 6s, 69; Sandusky, Dayton and Cin. R. Chrome, 2.75@2.95; Bare Hill, 5.50@5.75; Atlantic Coal, 1.65@1.80.

THE WOOL SPRING.

We were much impressed, upon a recent visit to the Works of the Union Car Spring Manufacturing Co., at the corner of 28th street and 7th Avenue, not only with their new method of treating steel, and the completeness of their machinery; but with the new use of so ancient a substance as wool; and the wonderful addition of strength its use, (*as they use it,*) gives to a spiral spring.

We say wonderful, because one must see, as we saw, to believe that a spiral spring made of ⅜ steel which is entirely exhausted under a pressure of 1,200 lbs., requires when properly packed with wool a pressure of over 15,000 lbs. to exhaust it.

We understand that it has been examined by many of the leading railroad experts of the country, with approval, and we think it is the interest of every one connected with railroads to examine this spring.

The great elasticity of wool and the permanence with which it retains this property have been long known. The spring known as the Union is an attempt to render these qualities available as a means of deadening the shocks, and effectually securing the equal and gentle motion so desirable in railway practice.

The wool is packed very evenly and tightly in the interior of a coiled spring, as indicated in the cut which accompanies the advertisement on another page, so that when working under a car the contained fiber and the enveloping metal are compressed and expanded together. Each supports the other. The material allows a very nearly uniform action at every temperature, and its arrangement tends to induce approximate uniformity under every variety of load, with only sufficient working of the fibers to render the action a little sluggish, and avoid a repetition of the vibration.

Machinery recently invented for placing the wool in the coil, packs it with any degree of force required for various kinds of springs, and what is very important in its effect on the action under heavy loads, leaves it in a cylindrical or slightly threaded mass, not protruding radially beyond the metal, or even extending outward very far into the narrow spaces between the several coils. The coils are formed of cylindrical wire, and may be forced together so that each coil is in fair contact with the succeeding one without pinching any wool between. The process employed in packing renders the resulting spring much superior to the early specimens.

Each spring is tested under a load some four times as great as is thrown upon it in practice. All the "set" is taken out, and is fully compensated for before it leaves the manufactory. Coils in the least defective are rejected, or reworked. So much pressure is applied to the fibers of the wool in the process of packing, that before the spring is compressed to its fullest extent it carries more than ten times as much load as the coil alone would support. It is pre-eminently a wool spring, but involves a happy combination of the coiled and tempered steel therewith, so that the latter supports and guides the wool as it works under the load, moving exactly with it at every point so as to avoid wearing it.

At the time of our visit on Tuesday, coils were being prepared for the horse cars, much lighter and more softly packed than those under heavy freight cars.

☞ The following is a copy of a dispatch from the Secretary of the Treasury, dated Washington, June 20, 1864, to John J. Cisco, Assistant Treasurer, New York:

Total amount of debt, including all legal-tender notes and unpaid requisitions, $1,719,395,168 88; amount of interest-bearing legal tender notes withdrawn, $38,890,700; amount of ordinary legal-tenders notes withdrawn and placed in reserve, $17,258,872; showing reduction at present of legal-tender notes of all descriptions, of $56,149,572. This statement shows the actual present state of debt and circulation. Of course it will be necessary to replace a portion of the 5 per cent legal tenders with compound interest 6 per cents.

S. P. Chase.

☞ The track of the Central Pacific Railroad Company is now going down rapidly on the 76th mile out from Sacramento, and the company has a good supply of laborers and all the rails, ties and other materials they can use for a long time.

☞ The first cargo of railroad iron and a locomotive designed for the completion of the Pacific Railroad *eastward* from Kansas City, was shipped to that city from St. Louis on the 17th inst.

☞ In future the Continental Bank will act as the New York Transfer Agent of the Cleveland and Toledo Railroad Company's stock. The Bonds and Coupons of the Company will be paid at the Continental Bank as they mature, on presentation. The Cleveland and Toledo Railroad Income Bonds of 1854 mature July 1, 1864, and will be paid as above.

☞ The preferred stock of the Chicago and Northwestern Railway Company is entitled to preferences of 10 per cent. in the dividends which may be declared in any year, out of the net earnings of such year, in the manner following: First, to a preference of 7 per cent. on the Common Stock; then, secondly, to a further preference of 3 per cent. After a further dividend of 3 per cent on the Common stock, both classes of stock shall be entitled to equal rates per share in any further dividends.

☞ Wm. Ramsdell, of Milford, has been elected President of the Wilton Railroad Company.

Railroad Earnings--Weekly.

The earnings of the Michigan Southern and Northern Indiana Railroad for the 2d week of June, 1864, were $69,300 00
Corresponding week of previous year.. 50,256 00

Increase $19,044 00

The earnings of the Michigan Central Railroad for the 2d week in June, 1864, were... $61,333 95
Corresponding week of previous year.. 45,274 16

Increase $16,059 79

The earnings of the Chicago and Rock Island Railroad for the second week in June, 1864, were $54,412 00
Corresponding week of previous year.. 36,148 00

Increase $18,264 00

The earnings of the Dubuque and Sioux City Railroad for the 2 weeks ending June 14, 1864, were $18,728 81
Corresponding 2 weeks in 1863 ..... 8,890 27

Increase $9,838 54

The Detroit and Milwaukee Railroad traffic for the week ending June 9, 1864, were... $21,543 51
Corresponding week of previous year.. 17,127 24

Increase $4,416 27

The earnings of the Montreal and Champlain Railroad for the week ending June 11, 1864, were $4,946 79
Corresponding week of previous year.. 4,362 42

Increase $584 37

The earnings of the Racine and Mississippi and Northern Illinois Railroad for the week ending June 7th, 1864, were:

	1864.	1863.
Passengers	$2,471 94	$1,649 32
Freight	13,232 01	6,954 69
Express	104 16	75 00
Mails	296 58	296 58
Total	$16,104 69	$8,975 57
Increase		$7,129 12

Receipts from January 1st to June 7:

1864 ..... $216,281 37
1863 ..... 134,973 57

Increase $81,307 80

The earnings of the Marietta and Cincinnati Railroad for the 2d week of June, were:

	1864.	1863.
Passengers	$7,137 37	$3,963 25
Freight	9,235 87	4,126 17
Mail, express & telegraph	1,190 58	815 00
Total	$17,563 82	$8,904 42
This month to date	$32,549 85	$16,591 72

The traffic of the Great Western Railroad for the week ending June 10, 1864, was as follows:

Passengers $22,760 43
Freight and live stock 28,517 48
Mails and sundries 1,593 50

Total $52,871 41
Corresponding week of 1863 ..... 43,656 50

Increase $9,214 91

The earnings of the Grand Trunk Railway for the week ending June 11, 1864, were:

Passengers $28,467 89
Express freight, mails and sundries ... 2,500 00
Freight and live stock 65,018 58

Total $95,986 47
Corresponding week, 1863 ..... 80,262 76

Increase $15,723 71

The earnings of the Chicago and Alton Railroad Company for the week ending June 15, were:

	1864.	1863.
Passengers	$18,723 90	$14,822 04
Freight	33,685 56	23,986 23
Sundries	1,660 58	1,499 56
Total	$54,070 04	$40,307 83
Increase 1864		$13,762 21

Funded Debt of Chicago.

The City Comptroller reports the several series of indebtedness on the 1st of April, 1864, as follows:

Municipal Debt:

6 per cents	due	January,	1867	$10,000
6 "	"	July,	1873	50,000
6 "	"	"	1874	40,000
6 "	"	"	1875	100,000
6 "	"	"	1876	100,000
7 "	"	"	1866	10,000
7 "	"	January,	1874	60,000
10 "	"	"	1868	1,000
Old issues				$371,000
7 per cents	due	April,	1881	913,500
7 "	"	December	1872	37,000
7 "	"	school	fund	28,000
Total municipal				$1,349,500

Sewerage Debt:

6 per cents		$87,000
7 "	1st loan	413,000
7 "	2d loan	620,000
Total		$1,120,000
Less cancelled by sink'g fund		58,000
		1,062,000

Water Debt:

6 per cents		$1,030,000
7 "		113,000
Total		$1,143,000
Less 7 per cents cancelled		10,000
		1,133,000
Total city debt		$3,544,500

Chesapeake and Ohio Canal.

At the 36th annual meeting of the Chesapeake and Ohio Canal Company, held June 6, the following officers were chosen for the ensuing year: President, Alfred Spates, of Alleghany county. Directors, Jos. H. Bradley, District of Columbia; Lawrence Brengle, Frederick county; Chas. Abert, Montgomery county; Lawrence A. Dawson, Montgomery county; in place of H. Delinger, of Washington county; Louis Watson, of Washington county; and A. C. Greene of Alleghany county. There were received for tolls in the year 1863, $154,790 38; for water rents, $6,254,-60; rent of houses and lands, $1,991 24, which, with the other items, form an aggregate of $162,-916 76. The payments made by the company, interest included, during same period amounted to $160,184 64. The company so far this year has had prosperity, and already the revenue amounts to $75,000, being about $18,000 in advance of last year during the same period.

Boston, Hartford and Erie Railroad.

The Governor and Council have decided that this company in crossing the South Bay shall build a solid structure for the purpose, and that the character of the draws and sluice-ways shall be made satisfactory to them. They reserve the right to decide upon the compensation to be hereafter furnished by the company in reference to the proposed tidal reservoir. This subject was refered to the Governor and Council by the last Legislature. —*Boston Journal.*

Pittsburg, Ft. Wayne and Chicago Railway.

The following statement shows the financial condition of the Pittsburg, Fort Wayne and Chicago Railway Company on March 31:

		Dr.
*To cost of railway, construction and equipment		$18,684,309 86
To cost of supplies on hand for current operations	$681,181 71	
To amount due from other companies	225,879 01	
To miscellane'us assets	297,934 12	
To cash in hand	581,271 93	
		1,786,266 77
To interest on coupon bonds for 3 months		185,675 00
To transportation expenditures for 3 months, viz:		
For conducting transportation	$212,250 54	
For motive power	251,198 28	
For mainten'ce of way.	166,643 75	
For mainten'ce of cars.	78,720 82	
For general expenses .	48,803 64	
		757,117 08
To surplus of earnings over expenditures for three months		429,055 66
		$21,842,424 32

By Capital Stock, viz:		Cr.
Full shares	$6,396,800 00	
Scrip certificates	18,084 23	
		$6,414,884 23
By Funded Debt, viz:		
1st mortgage bonds	$5,250,000 00	
2d mortgage bonds	5,160,000 00	
3d mort. bonds, (int. not accrued)	2,000,000 00	
Bridge bonds of O. & P. R. R. Co	188,000 00	
Debt bonds of P., Ft. W. & C. R. R. Co	183,583 00	
		12,781,583 00
By amount due other companies	$24,434 71	
By miscel. liabilities.	134,370 01	
By am'nt due for exp. in March and prior	473,176 44	
		631,981 16
By earnings for three months, viz:		
From freights	$852,920 19	
" passengers	439,153 12	
" express matter	15,000 00	
" mails	23,475 00	
" rent of railway	21,250 00	
" rents	625 00	
" miscel. sources	6,777 20	
		1,359,200 51
By excess of joint earnings received by Cleveland and Pittsburg R.R. Company during the 3 months ending March 31, 1864, over and above their proportion thereof, per contract		12,647 18
By balance to credit of income account		642,128 24
		$21,842,424 32

* Included in the amount to cost of railway is $242,663 82 expenditures for construction and equipment of the railway for the three months.

Western Maryland Railroad.

The Westminister *Sentinel* says that the extension of this road to Hagarstown has been decided upon. J. S. Gitt Civil Engineer who some years ago made surveys from Union Bridge to Hagerstown, is there now for the purpose of making a careful examination of the various routes and will then make a location and lay the road on the best ground, let it take what route it may.

Chicago and Northwestern Railway.

OFFICE CHICAGO AND NORTHWESTERN RAILWAY COMPANY, CHICAGO, June 10, 1864.

Whereas, the Galena and Chicago Union Railroad Company and the Chicago and Northwestern Railway Company were, on the 3d of June, 1864, duly consolidated into one company, under the name, style and title of the "Chicago and Northwestern Railway Company."

And whereas the Board of Directors of said consolidated company have duly elected and appointed the following general officers, to wit:

WILLIAM B. OGDEN, President.
PERRY H. SMITH, Vice President.
GEORGE L. DUNLAP, Gen. Superintendent.
WILLIAM H. FERRY, Acting Director of the Galena Division.
GEORGE P. LEE, Treasurer.
HENRY TUCKER, Assistant Treasurer.
JAMES R. YOUNG, Secretary.
WILLIAM M. LARRABEE, Assistant Secretary.

Now, therefore, by authority and direction of the Board of Directors of said consolidated "Chicago and Northwestern Railway Company," notice is hereby given to all officers and employees of said company, and to all parties having business relations with said company, that the lines of road heretofore comprising the Galena and Chicago Union Railroad Company, and the lines of railroad operated by said company under lease or otherwise, and the lines of railroad heretofore comprising the Chicago and Northwestern Railway Company, together with all the property, assets and effects of said respective companies, having been consolidated as aforesaid into one corporation and company, under the management and control of one Board of Directors and of the officers above named; the orders and instructions of the said officers will be observed and respected accordingly. WILLIAM B. OGDEN,
President Chicago and Northwestern Railway Co.

SUPERINTENDENT'S GENERAL CIRCULAR.

Chicago, June 10th, 1864.

In pursuance to the general notice issued by the President, bearing even date herewith, I hereby assume general superintendence of the several lines now forming the *Chicago and Northwestern Railway*.

The railway will hereafter be divided into and operated as four divisions, designated as follows:

That portion between Chicago and Fulton, and Chicago and Freeport, including the *Fox River Valley and Beloit and Madison Line*, will form and be known as the *Galena* Division.

That portion between Clinton and Nevada (Io.) will form the *Iowa* Division.

That portion between Chicago and Fort Howard will form the *Wisconsin* Division.

That portion between Kenosha and Rockford will form the *Kenosha* Division.

The following officers have been appointed:

E. H. WILLIAMS to be Superintendent, and J. C. GAULT Assistant Superintendent of the *Galena* Division.

I. B. HOWE, Superintendent of the *Iowa* Division.

T. F. STRONG and A. A. HOBART, Assistant Superintendents of *Wisconsin* Division.

C. H. SPAFFORD, Superintendent of *Kenosha* Division.

CHAS. S. TAPPEN, Gen'l Freight Ag't.
EDW. P. CUTTER, Gen'l Ticket Ag't.
BENJ. F. PATRICK, Gen'l Pass. Ag't.

All rules and regulations either *special* or *general*, heretofore in effect upon the *Galena* or *Iowa* Divisions will be observed until changed or countermanded from this office.

GEO. L. DUNLAP, Gen'l Sup't.

☞ Mr. J. O. Quigley of the house of Quigley Brothers has been admitted to a membership in the New York Stock Exchange.

Dayton and Michigan Railroad.

The annual meeting of the stockholders of the Dayton and Michigan Railroad which is under lease to the Cincinnati, Hamilton and Dayton Railroad, was held recently at Dayton, when the annual reports of the officers were read and adopted. The earnings of the year ending May 31, were $768,246 20, against $663,705 55 for the year previous. The operating expenses this year were $423,746 99.

Directors.—S. S. L'Hommedieu, President, Cincinnati; R. M. Shoemaker, Vice-President, Glendale; R. M. Waite, Toledo; H. S. Conklin, Sidney; P. Smith, Dayton; D. McLaren, Cincinnati; Geo. H. Hill, Cincinnati; John Young, Cincinnati; John W. Hartwell, Cincinnati.

General Superintendent, Daniel McLaren; Secretary and Treasurer, F. H. Short; General Freight Agent, D. C. Henderson.

The report of Secretary and Treasurer shows a gross income for the year ending March 31, 1864, of	$768,246 20
Expenses amounting to	423,746 99
Leaving a balance of	$344,499 21
Out of this balance there has been paid for taxes, rents, insurance and interest on bonds	219,542 06
Leaving a net profit of	$124,957 15

These profits have been applied as follows:

For construction	$6,004 15
Amount on account of trestle work	3,598 90
New locomotive and cars	93,529 90
	$103,132 95
Leaving a balance of	$21,814 20

Railroad Bridge Across the Mississippi.

The contract for the construction of the masonry—nine piers and two abutments—for the bridge of the Minnesota Central Railroad, about two miles above St. Paul, was let on the 7th inst., to Messrs. Reynolds, Saulpaugh & Co., of this city. The bridge is to be the same style as the one at this place, with a draw. The job of Messrs. R., S. & Co., will amount to about $50,000, and is to be completed by June, 1866.

Mr. Thomas Saulpaugh will take his family with him to St. Paul, and immediately commence the work.—*Rock Island Argus.*

Franklin Branch R. R.

The business of the Franklin branch of the Atlantic and Great Western Railway is absolutely enormous. Although a year has not yet elapsed since its completion to this point, it has been forced to build additional Freight Depots, houses and platforms, so that the original space marked out for these purposes has become entirely too small. Around the depot is springing up feed and produce stores, groceries, hotels, shops—and a village generally. The track is now about completed to "the Point," preparatory to extending it to Oil City. In a few days oil shippers will be able to transfer their oil directly to the cars, a saving and a benefit to them, but a loss to the teamsters.—*Franklin Citizen.*

☞ The Pictou *Standard* says that Sandford Fleming, Esq., the Chief Railway Engineer has arrived at Pictou from Canada. Mr. Schriber, who has conducted the survey at the Truro end of the line, has also arrived, and will remain in charge of the Pictou end. Mr. Tremain, who has been in charge of the survey at Pictou, will proceed to Truro, and take charge there.

☞ The Cape Breton *News* says that engineers are now engaged in a preliminary survey of the projected Sydney and Louisburg Railway.

The Postal Order Bill.

The postal money order system just established by law, provides that no money order shall be issued for any sum less than one nor more than thirty dollars; and all persons who receive money orders are required to pay therefor the following charges or fees, viz: For an order for one dollar or for any larger sum, not exceeding ten dollars, ten cents shall be charged and exacted by the Postmaster giving such order. For an order for more than ten, and not exceeding twenty dollars, the charge shall be fifteen cents; and for every order exceeding twenty dollars, a fee of twenty cents.

Atlantic and Great Western Railway.

On the 20th inst., Mr. Kennard arrived with his palace car at Dayton on the newly laid track of the Atlantic and Great Western Railroad. The ceremony of driving in the last spike in this road was formally gone through with in presence of the prominent officers of the road and those of the Cincinnati, Hamilton and Dayton Railway. A large number of citizens witnessed the event. Among other distinguished guests were Lieut.-Gov. Sanderson and Gen. McCook. This line forms the connecting link between New York and St. Louis without break of gauge, a distance of 1,200 miles. It is rumored that on the 23d a train of cars will run without change from Jersey City to St. Louis.

Joliet and Chicago Railroad.

The following gentlemen have been elected directors of this company for the ensuing year: James Robb, G. A. Robbins, D. Willis James, John Crerar, A. C. Badger. Joseph Price, Secretary.

☞ The Willimantic *Journal* says that "work on the Boston, Hartford and Erie Railroad has been suspended for a few days past near Willimantic, and it is believed there is some difficulty with the Air-line folks, which needs to be adjusted."

☞ The earnings of the Rochester and Genesee Valley Railroad during the past year were $69,950 18—48 per cent. of which go to this company, and 52 per cent. to the Erie Railway Company, which has a lease of the road. The receipts of the year show an increase of 24½ per cent. over those of the previous year, and 53½ per cent. over 1862.

☞ We learn from the *U. S. R. R. and Mining Register*, that negotiations have been informally concluded for merging the Beaver Meadow Railroad Company into the Lehigh Valley Railroad Company. "By this consolidation of interests, the Lehigh Valley Railroad is extended to the Penn Haven and White Haven Railroad; also to the Catawissa Railroad; also to the Lehigh and Mahanoy Railroad. Hereafter the Lehigh Valley Railroad will control 74 miles of road from Easton to the Shamokin Valley and Pottsville Railroad, besides 16 miles of road from Penn Haven to White Haven; making altogether 90 miles of road."

Cleveland and Toledo R. R.

The following gentlemen have been elected directors for the ensuing year: D. N. Barney, A. H. Barney, H. Keep, and E. T. H. Gibson, of New York, John Gardner of Norwalk, Samuel Young and T. H. Hosg, of Toledo, and James Mason and T. P. Handy of Cleveland.

Induration of Iron.

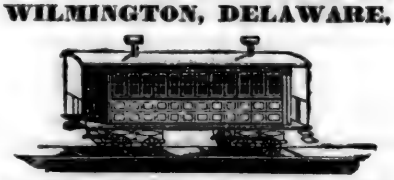
The iron work of the new bridge at Blackfriars is to be indurated by a process patented by Messrs. Morewood & Co., and is alike important from the great cost which will be incurred, and the testing of a rather abstruse chemical formula for the preservation of iron from oxidation and decay. The process is as follows: "The iron is to be thoroughly cleaned, and heated to the requisite temperature in a furnace planned by the inventors. When this temperature is attained, it is to be plunged into a bath of prussiate of potash and chloride of potassium, in a molten state, so that when the iron is withdrawn it may easily part with surplus of the aforesaid chemicals, which should run off like oil. The iron is then to be dipped into boiling water, containing a certain proportion of cyanide of potassium; from thence it is removed to a bath for a final washing, and set up on end to dry. All the processes are to be carried on under cover, and before exposure to the atmosphere the iron is to be coated with an asphaltum paint twice, at given intervals; and again it is to receive two coats after fixing. Of course, all the necessary planing, drilling, and fitting is to be done preparatory to the indurating. The time the iron is to remain in the bath will vary from one to five minutes, according to the weight of the metal to be operated upon. The elaborate character of the process to which the contractor is rigidly bound, will account for the large sum to be expended in carrying out this part of the work; £4 per ton is allowed to the contractor for the induration and painting; Messrs. Morewood will receive from the contractor 5s, per ton as their royalty, which it is estimated will be £1,000. Thus £16,000 is to be spent in this effort to prevent oxidation, no greater proof of which, in its damaging results, can be offered than the case of the cleaning of the oxide (or rust) from the Menai Bridge from which has lately been removed above 40 tons of oxide of iron."—*London Mechanics' Magazine.*

Substitute for Gutta Percha.

At a meeting of the French Academy of Sciences M. Serres gave an account of the *Valata* a shrub which abounds in Guiana, and affords a juice which he asserts is superior, for many purposes, to gutta-percha, but especially as an insulating material for enveloping telegraphic wires. The milk or juice is drinkable, and used by the natives with coffee. It coagulates quickly when exposed to the air, and almost immediately when precipitated by alcohol, which also dissolves the resin of the Valata juice. All the articles made with gutta percha can be made with the sap of the Valata, and it has no disagreeable smell. When worked up it becomes as supple as cloth, and more flexible than gutta percha. M. Serres exhibited a number of articles manufactured of Valata milk. Up to the present time it seems, from M. Serres' account, not to have become an article of commercial export.—*London Artizan, March*, 1864.

Susquehanna and Tide Water Canal.

The Board of Directors of the Susquehanna and Tide Water Canal Companies have just made their annual excursion over their line of works, and report the condition of the Canal and the business upon it, as very satisfactory. The Susquehanna and Tide Water Canal form the chief outlet to the Atlantic markets, as the shortest and best route for the trade, of 486 miles of constructed canals. These arteries penetrate with their long lines the regions richest in mineral and agricultural wealth, and the greatly enhanced values of the commodities transported over these works, together with the impossibility of supplying the steadily increasing demand for such articles as coal, iron and lumber, gives the fullest assurance that the greatest capacity in the way of transit facilities will be required to get to the seaboard an approximate supply of these necessary staples. A new importance has been given to all inland navigation, which it has not heretofore enjoyed. The Susquehanna and Tide Water Canals cost for construction about four and a half millions of dollars. They are 45 miles in length, from Havre de Grace to Columbia, and have always had the reputation of being well located, not liable to injury from freshets, and to be among the best constructed works in the country. With the completion of the work of enlargement, some time ago commenced on the Pennsylvania Canal, and also of the North and West Branch Canals to give them a capacity equal to that of the Susquehanna and Tide Water Canal, a very large augmentation of business will be realized.—*Phila. Ledger June* 17.



A Bridge over the Straits of Messina.

The Italian journals announces that it is contemplation to unite Sicily with Italy by a bridge, to be constructed on a new system. The chains will be made of cast steel, and strong enough to support the weight of several railway trains.

☞ The "Allegheny and Pittsburg Oil Co." is represented as one of the largest and most productive of the Oil Companies in this State. Its shares are almost entirely in the hands of a few of the heaviest capitalists in this city, Pittsburg, and Erie, and has never been on the stock market, being held in present hands for the very large per centage of profits which it already pays and promises to increase. There is no doubt vast wealth in the oil region of northern Pennsylvania and when capital is more entirely devoted to profit from the production of oil as in the case of the company here noticed, rather than profit from the formation of companies and sale of shares, we shall then begin to realize the wealth which the oil region manfestly covers.—*Phila. Ledger.*

☞ The New York Central Railroad Company are now paying off their 7 per cent. bonds of 1854 –64 through the Bank of Commerce. We learn that the entire loan was provided for by private negotiation, some months ago, at the rate of 102@ 103 for new 6 per cent. bonds.

HARLAN & HOLLINGSWORTH & CO.,
WILMINGTON, DELAWARE.

MANUFACTURERS OF ALL KINDS OF
RAILROAD MACHINERY.
PASSENGER CARS of the **finest finish**, also all kinds of FREIGHT CARS, DUMPING CARS, HAND CARS, WHEELS and AXLES, STEEL SPRINGS, and in fact EVERYTHING for the **full equipment** of a road.
From our long **experience** in Car building, and our **facilities** for doing work, we are enabled to give ENTIRE SATISFACTION in every particular.
From our LOCATION, and CONVENIENCES FOR SHIPMENT, we can supply southern roads with dispatch, and ship at reasonable freights.
We are also extensively engaged in building IRON VESSELS and IRON STEAM BOATS, STEAM ENGINES and BOILERS and **Machine Work in general.** All orders executed with dispatch and on reasonable terms.

East Indian Railway.

The railway improvements in India have been designed, and are carried on in a gigantic scale, and with the utmost energy and success. One of of the most important of the lines is that from Calcutta to Ghazzeeabad, including branches, about 1,101 miles in length. From this last named point to Delhi, a celebrated and populous city on the River Jumna, a distance of twelve miles has been in abeyance, but the Government of India has recently recommended that the junction with the Punjaub Railway should be made at Ghazzeeabad, that this company's station should be at Delhi, and the bridge over the Jumna should be a railway bridge.

The line, however, from Calcutta to Delhi is open for traffic, with the exception of the bridge over the Jumna at Allahabad, a distance of 1,020 miles, while the remaining distance was to have been finished in the month of April last.

Great credit is taken for the design and execution of this railway. There is not any work to surpass with it in England or on the continent, and it compares favorably with the Grand Trunk of Canada, and is said to excel it in construction and material. It is designed to unite with two great lines coming from the western shores of Hindostan from Bombay and the Punjaub north, and connected with the River Indus. So that there will be a linked system of railways across the great Peninsula, making a connection with the Indian Ocean and the Bay of Bengal, and of course saving several thousand miles distance for traffic of a certain description, and all passengers between the two coasts, which otherwise would, as between Bombay and Calcutta have to double Cape Comorin.

Notwithstanding the difficulties, such as climate, the habits and manners of the native population, the distance which the rails, engines and machinery generally have had to be transported, the engineers well supported by the shareholders and the Government of India, have pushed their efforts to a successful issue, and we believe as a system, the East Indian Railways are grander than any others on the globe, and will not be surpassed by any until the Union Pacific unites the Atlantic and Pacific Oceans.

The annual meeting of the company was held a few weeks since in London, and from the report we gather the following information:

On the Bengal division the number of passengers conveyed on 608¾ miles during the past half year was 1,333,444, showing an increase of 300,863 passengers as compared with the corresponding half of the preceding year on 396 miles open. The tonnage of goods and minerals for the half year ended 31st December last has been 239,834 tons against 179,377 tons in the corresponding half of 1862. The gross traffic receipts for the half year ended 31st December last have been £345,763, against £200,651 in the corresponding half of 1862. The gross recipts for the year 1863 have been £737,485 against £419,424 for the year 1862, showing an increase of $318,161. The net traffic receipts since the opening of the line have been as follows:—From 15th August, 1854, to 31st December, 1861, £687,826; for the year 1862, £199,227; and for the year 1863, £327,038; together, £1,214,091. The gross receipts on the 606½ miles opened in 1863 amount to £23 7s. per mile per week. The number of passengers conveyed on the northwest provinces division (328¾ miles) has been 260,881, showing an increase of 71,084 passengers compared with the corresponding half of 1862, when 279¾ miles were open. The gross traffic receipts for the half year ending the 31st December have been £127,939 against £83,537 for the corresponding half of 1862. The total gross receipts for the year 1863 have been £252,471, against £163,977 in 1862, showing an increase of £88,494. The net traffic receipts since the opening of the line for public traffic have been as follows:—From March 3, 1859, to December 31, 1861, £165,194; for the year 1862, to £70,179; and for the year 1863, £112,926—together, 348,299. The gross receipts for 1862 on 643 miles were £583,401, or about £17 9s. per mile per week; the net receipts being £269,406, £8 1s. 2d. per mile per week. The gross receipts in 1863 on 927¼ miles were £990,056, or about £20 10s. 8d. per mile per week; the net receipts being £439,964, or about £9 2s. 6d. per mile per week, and the receipts are still increasing. Powers will be taken in the company's bill now before Parliament to raise an additional capital of £7,000,000. The new audit department in India is working most satisfactorily, and for the first time since the opening of the line, the half year's revenue account has been finally audited, approved, and passed by the consulting engineer to the Government. The capital account in India to 31st of October, and in England to 31st December, 1863, showed an expenditure of £20,590,136, leaving a balance unexpended of £854,457.

The expenses of the traffic were large; it arose in some respects from carrying a very large amount of traffic over a single line. There was another reason, in the large amount they paid for wages to Europeans. Every engine driver must be a European. The wages they gave were £18 a month, which was double the amount paid in Europe. When they considered that less work was done for the money, the cost of sending men out to India, and other matters, the average cost of European labor in India was as five to one in England. In the revenue account of the Bengal division they would perceive that £86,000 had been expended on the locomotive department, which was 25 per cent. of the working expenses. Of that amount £38,000 was for wages of engine drivers and cleaners. The expenditures had engaged the serious consideration of the board, and they had called the attention of their officers to the subject. Again, in the revenue account of the railway in the Northwest Provinces, there was a heavy charge for fuel—£41,000, or about 33 per cent. of the total expenses. Of that sum £24,000 was the cost of coal, coke, and wood. This

included a charge for loss of weight in wood-fuel, which belonged to the previous half year.

In view of the company's future operations, and both to diminish the cost of fuel as well as increase the traffic, it is proposed to open a connection with the main line and the principal coal deposits, and this plan is expected to be carried out as soon as the Government makes its choice between the routes surveyed. We gather some other interesting information from the report in the following extract:

They had not yet disposed of their large flotilla, as it was not easy to find purchasers. If out of the £584,000 expended on those vessels and their machinery they should be able to place a comparatively small sum to the credit of capital, the rest would be amply covered by the advantage already gained of being enabled to complete the line so much sooner by the aid of the flotilla than they possibly could without it. The establishment of the audit department in India had realised all their anticipations as to the satisfactory audit of the accounts. Nothing was expended without the sanction of the Government officer, and the interests of the shareholders were protected. He believed the statement of the accounts was a fair and faithful record of what was done in India. There was also an audit committee, consisting of members of the board, to examine everything. They had a bill now before Parliament which would be submitted to the proprietors for their approval at the proper time, in compliance with the standing orders of the House of Lords. They sought power in it to alter the times for holding the annual and half yearly meetings, holding them a month or two later to give time for the preparation of the accounts. They proposed to establish a savings bank for their army of servants in India, which he had no doubt would be of great advantage to them. They also proposed to ask for powers to raise £7,000,000 of additional capital, which with the £20,000,000 already authorized, and £3,000,000 borrowing power, would make an even sum of 30,000,000. The cost of the line and works from various circumstances had been much greater than was originally anticipated. The price of materials and labor had since they commenced greatly increased in amount. Had Government permitted the terminal station at Howrah two or three years ago to be enlarged to accommodate the immense traffic in the manner proposed by the directors, a considerable saving in the cost would have been effected; and this was also the case with regard to the delay of other necessary works. The traffic on the line had reached £34 per mile per week, and the directors were now anxious to provide ample station accommodation and working stock to earn £40 per mile per week. This rendered a large portion of the proposed additional capital necessary. The effects of the great changes in the economy of India had been to enlarge its resources.

The Canadian Confederation.

The proposed confederation of the British North American Provinces contemplates giving to each Province a separate Legislature, for the management of purely local matters—a federal legislative body being created for regulating the more general business of the country, such as the tariff, the canals, the common public debt (about $75,000,000) already created, the inland post-office, the ocean mail service, and the volunteer system already established. This proposed confederation it is intended, with the assent of the communities concerned, to extend so as to include the maritime colonies of New Brunswick, Nova Scotia, Prince Edward Island and Newfoundland, all of which have already taken an initiatory step toward creating a federative union among themselves.

☞ The resolution of the Common Council of the city of Buffalo, passed August 7, 1862, authorizing the Mayor and Comptroller to borrow $75,000, for the purpose of procuring commutation, or substitutes for drafted men, etc., has been confirmed by the legislature. All bonds issued or liabilities incurred under color of said authority, to the extent and amount, mentioned are declared legal and binding claims against the city, and may be enforced and collected in the same manner and with like effect as they might have been, had the Council had full authority in the premises to issue them at the time they were issued.

Cincinnati, Hamilton and Dayton R. R.

The income and expenses of this Company for the years ending March 31, 1863 and 1864 were as follows:

Income:	1863.	1864.
From passengers	$348,893 39	$457,162 85

Paid on account of collision, Jan. 5, 1864	.....	17,482 18
Miscellaneous	18,168 78	22,581 53
	$390,936 81	$554,507 12
Balance of earnings	$486,467 05	$528,821 35

From which deduct—		
Interest on bonds	$93,380 00	
State taxes	16,212 80	
Internal revenue tax on passengers	13,871 37	
Do., as manufacturers	615 00	
Insurance	2,480 82	
		126,509 99
Net income for the year		$402,311 36
Dividends Oct. 1863, and April, 1864, 5 per ct. each and government tax.		239,963 91
Leaving a surplus for the year of		$162,347 45
The amount credited to surplus March 31, 1863 was	$243,723 75	
Which has been reduced by charging up amount paid for endorsements, depot burned, etc	21,553 72	
		222,170 03
Making to credit of this account March 31, 1864		$384,517 48

Compared with the previous year the gross income has increased $205,924 61; with an increase in operation expenses of $163,560 31. The entire expenditure, including interest, taxes, etc., was $681,017 11, against $496,590 38 in 1862-'63; and the net income $402,311 36, against $370,813 43—an increase of $31,497 93. The gross earnings of the road per mile were $18,055 48. The number of passengers carried during the year, 527,451—an increase over the previous year of 86,201.

The gross earnings for the twelve years ending March 31, 1864, have been as follows:

1853	$321,793 18	1859	$489,437 92
1854	463,021 45	1860	561,681 52
1855	483,629 48	1861	615,071 07
1856	471,885 70	1862	646,205 57
1857	518,333 95	1863	877,403 86
1858	487,421 27	1864	1,083,328 47

The earnings of the Dayton and Michigan Railroad, now operated under lease by this company, for the 11 months ending March 31, 1864, were $709,289 18; and the expenses, including mileage of cars, $381,297 39—leaving a balance of $329,941 79. Of this sum, $141,180 96 has been applied to the payment of interest and taxes; and $172,955 23 paid for construction and new equipment—leaving an unexpended balance to credit of lessors account of $13,805 60. The earnings for the past eleven months show an increase over those of the preceding eleven months of $81,884 79. The earnings for the past four years ending March 31, 1864, compare as follows:

1861	$375,002 59	1863	$663,705 55
1862	400,168 37	1864	769,202 78

The lease of the Dayton and Michigan Railroad, it is believed, will prove of great value to our Company. The development of business on the line of the Dayton and Michigan Railroad—the large lumber, grain and other traffic of Toledo, together with that passing through Toledo from the north and northwest, to and from Cincinnati—must not only make the Dayton and Michigan Road a good investment, but add largely to the business and profit of the Cincinnati, Hamilton and Dayton Road. The original understanding with the Little Miami and Columbus and Xenia Companies was, that they were to participate in the lease; but for reasons of sufficient weight with those Companies, they have declined such participation, and agreed that this Company shall take the lease on its own account. This is satisfactory to all parties.

To provide for the rapidly increasing business at Toledo, the Dayton and Michigan Company has, during the past year, purchased 864 feet of land fronting on the Bayou. This, with that heretofore purchased, will give ample room for the business of the Road at Toledo. The Freight Depot, and docking, will have to be extended to enable the Company to do the business offering. The purchase of the ground amounts to about one hundred thousand dollars, for which Thirty Year Bonds, bearing seven per centum interest, secured by a mortgage on the land, will be issued.

The contract for a division of business and earnings, between this Company and the Little Miami and Columbus and Xenia Companies, has been in operation four years. Both parties are still satisfied with the contract, and believe it to be highly beneficial to the Stockholders of the respective Companies, and not prejudicial to the public.

The continuation of our double track, as far as Hamilton, cannot be much longer delayed. The largely increasing business, received at Hamilton from the Roads connecting with ours at that place, together with that to be done in connection with the Atlantic and Great Western Railway, and the regular growth of local traffic, demand this extension of track facilities.

Since the last Annual Meeting a contract has been made with the Atlantic and Great Western Railway Company, by which our Company agrees to provide an additional track, of the six feet gauge, to accommodate the business to be done in connection with that Road, and its connections. In the meantime, and until the necessities of business requires, the facilities of another track are furnished by laying two additional rails on our present cross ties, thus forming two separate tracks to Dayton. This improvement will involve a large outlay, amounting probably to $900,000. It is believed the additional business to be done

by our Road, in connection with the Atlantic and Great Western Railway, will make the expenditure remunerative. This contract has been made, with the concurrence of the Little Miami and Columbus and Xenia Companies, and, during the continuance of our present relations with those Companies, under the agreement of April 2, 1860, they will pay interest on two-thirds of the expenditure.

To obtain the funds necessary for this improvement, the Stockholders of this Company, at a meeting, held October 7, 1863, voted that $344,200, of additional Stock be issued at par, thereby increasing the present capital to $2,500,000. They also voted that $300,000 in Second Mortgage Bonds, those remaining in the hands of the Company, be disposed of at par. Both the Stock and Bonds were worth a premium in the market, but were disposed of exclusively to the Stockholders, at par, pro rata. The remaining sum necessary to complete the Road, it is believed, can be paid out of the assets and current earnings of the Company, without interfering with regular dividends to Stockholders.

The work of laying down the rails, substituting some fifty thousand cross ties, widening bridges, etc., for the broad gauge, will be completed in the next two months. It has been done under circumstances the most difficult—the large number of passenger and freight trains requisite for the business of the Road, have been kept at work at the same time that our track and bridges were undergoing the necessary alterations and repairs for the broad gauge cars. Credit is due to our General Superintendent for the energy, ability and untiring industry with which he has prosecuted the work, and at the same time carried forward the general business of the Road. It is expected the broad gauge will be finished to Cincinnati, and the line from our city to New York opened for business in July next.

The completion of the Atlantic and Great Western Railway will furnish us a direct all rail route to New York, such as we have not before had; and will doubtless command for us a large share of both passenger and freight traffic between the East and the West. It will also furnish us a better rail route to Pittsburg and Philadelphia, by way of Mansfield, and the Pittsburg, Fort Wayne and Chicago Railroad, over which we may expect an increase of business.

Another source of benefit to be derived from the building of the Atlantic and Great Western Railway, will be the completion of their branch from a point near Salamanca into Buffalo, thus furnishing us a desirable all rail route to a point the importance of which can scarcely be over estimated. In connection with this, is a bridge in course of construction across the Niagara River at Black Rock, near Buffalo, for the purpose of connecting the Atlantic and Great Western Branch Road with one leading to Niagara Falls, and connecting with the Canada Roads.

To meet this prospective increase of business, arising from the Dayton and Michigan and Atlantic and Great Western Railways, and their connections, it has become necessary for our Company, at Cincinnati, to provide much more extended depot facilities and side track room. With a view to this, we have purchased additional ground, and are building an additional Freight Depot, as well as a Passenger Depot, which will favorably compare with other like buildings of the country.

In the early days of the Cincinnati, Hamilton and Dayton Railroad Company, it was supposed we had provided more land in Cincinnati, than would be required for Railroad purposes, and the expectation was that we should have some to dispose of for profit. Like many other Railroad Companies, we have been mistaken in this particular, and now find that instead of selling, we must purchase more.

The business between the Ohio and Mississippi and the Atlantic and Great Western Railways, they being of uniform broad gauge, it is expected will be large. As all this must pass over our Road, we are uniting with the Ohio and Mississippi Company in providing the requisite facilities for the purpose. It is understood the passenger trains of the Ohio and Mississippi Company will be run into our Depot, and that the Ohio and Mississippi Company will provide for an extensive transfer house for freight, on their valuable ground below the city, where our tracks first unite.

BALANCE SHEET MARCH 31, 1864.

Secretary & Treasurer.—FREDERICK H. SHORT.
Superintendent.—DANIEL MCLAREN.

Taunton Branch R. R.

The annual meeting of this company was held in Boston on the 27th ult., Wm. A. Crocker, Esq., President in the chair. The Treasurer, Edward Pickering, Esq., presented his annual statement, which was accepted. This statement shows the following condition of the financial affairs of the corporation for the year ending May 31, 1864: Total property of the corporation, $301,440 81; total earnings, $99,712 85; total expenses, $65,246 57; net earnings, $34,466 28; dividends, $20,000; earned per share, $13 78; divided per share, $8. The equipment of the road consists of 3 locomotives, 6 passenger cars, 5 baggage cars and 74 freight cars, appraised at a total value of $54,945. A new locomotive has been contracted for at the price of $17,510, and is in process of construction. The report of the Committee on Accounts was presented and accepted.

During the last session of the Legislature an act was passed, notwithstanding the strenuous opposition of the corporation, authorizing the Dighton and Somerset Railroad Company to construct a railroad from either Braintree or Randolph, through Taunton to Somerset. It being found of no avail to oppose the passage of the act, the corporation procured the insertion of a section therein, by which they are empowered to construct a curve from their railroad to the Dighton and Somerset Railroad, and to enter upon and use that railroad, and also to increase their capital stock by the sum of $100,000. It was voted to accept the additional act. The following gentlemen were unanimously elected directors for the ensuing year: William A. Crocker, Nathaniel H. Emmons, E. Baylies, Thomas B. Wales, James M. Beebe.

Tennessee Railroad Bonds.

Statement of the amount of bonds authorized and issued by the State to aid in the construction of railroads in Tennessee:

Railroads.	Authorized.	Issued.
Memphis and Charleston	$1,100,000	$1,100,000
Mississippi and Tennessee	98,000	98,000
Mississippi Central & Ten.	618,000	574,000
Nashville and Chattanooga	1,650,000	1,650,000
East Tennessee & Georgia	1,312,000	1,312,000
East Tennessee & Virginia	1,802,000	1,802,000
Winchester and Alabama	467,000	413,000
McMinnville & Manchester	372,000	373,000

Knoxville and Kentucky	730,000	.....
Cin. Cumberland Gap and Charleston	1,140,000	.....
Total	$19,549,000	$12,712,000

The Tea Trade.--Increase of American Commerce.

Hankow, one of the largest and most important of the three ports on the Yang-tze Kiang, open to foreign trade by treaty, is rising into great importance as a mart for the collection and export of tea. It is distant from Shanghai by the course of the river about six hundred miles, and is situated on a delta formed at the junction of the River Han, with that before mentioned. It is a busy populous place. Since 1861 foreigners have begun to reside there to engage in commerce. Its exports of teas in 1863, (all black,) were 36,386,389 lbs. Vessels of six hundred tons sail up to Hankow and load directly for foreign ports.

In four months of that year four sailing vessels and one steamer cleared direct for London with 39,121 packages, or 3,623,873 lbs. A resident correspondent who writes to the *Boston Journal*, informs us that the establishment of a custom house, in accordance with the treaty, dates from the first of January, 1863, and from this source is obtained the following exhibit of the actual trade of Hankow during the year ended Dec. 31, 1863 The total value of merchandise imported during the year is 9,926,317 taels, equal to about $18,250,000.

The total value of merchandise exported is 12,844,070 taels equal to about $17,125,000. The otal value of goods re-exported 197,220 taels

equal to 263,000. The total amount of duties collected, 1,314,002 taels, equal to $1,750,000. Of this amount 806,807 taels equal to $1,074,240, collected on exports, imports, and tonnage dues by American vessels; 501,760 taels, equal to $668,513, do. do. British vessels; 5,435 taels, equal to $7,247, do. do. French vessels.

The clearances during the year were as follows, viz:

During the half year ending June 30, 1863.	Vessels.	Tons.	During the half year ending Dec. 31, 1863.	Vessels.	Tons.
American	178	56,287	American	231	91,345
British	134	29,811	British	74	23,882
French	45	2,289	French	9	571

Total: American vessels 404, 147,682 tons; British vessels 208, 53,693 tons; French vessels 54, 2,860 tons.

Grand total: 666 vessels, 204,185 tons.

In addition to the above, sixty rafts of timber, valued from $500 to $12,000 each were cleared,

The above figures thus show for American shipping an increase during the last half of the year 1863, of more than 80 per cent. as compared with the *aggregate* tonnage of British and French vessels; and six new steamers are now building, or are on the way out from America, which will add at least five thousand tons to American shipping during the year 1864.

We are pleased to note the fact that at least in one direction in spite of the war, American commerce is on the increase.

Railroads of the State of New York.

REPORT OF THE STATE ENGINEER.

The following is an Abstract of the Reports of the Railroad Corporations of the State of New York, for the year ending September 30, 1863:

TABLE A.—*Stock and Debts.*

Amount of capital stock per charter and acts of the Legislature	$106,503,400 00
Amount of capital stock subscribed for	89,645,234 66
Amount of capital stock paid in, per last report	85,765,091 91
Amount of capital stock now paid in	87,586,986 45
Amount of funded debt, as by last report	69,201,011 90
Amount now of funded debt	70,336,348 54
Amount of floating debt, as by last report	1,986,369 63
Amount now of floating debt	886,662 74
Total amount now of funded and floating debt	71,223,011 28

TABLE B.—*Cost of Construction and Equipment.*

For graduation and masonry	$37,474,722 93
For bridges	2,219,128 90
For superstructure, including iron	29,933,037 59
For passenger and freight stations, buildings and fixtures	5,763,330 91
For engine and car houses, machine shops, machinery and fixtures	1,930,043 32
For land, land damages and fences	9,044,970 44
For locomotives and fixtures, and snow plows	5,602,507 86
For passenger and baggage cars	2,848,879 41
For freight and other cars	4,401,080 42
For engineering and agencies	5,582,508 50
Total cost of construction and equipment	$148,040,643 75
Total cost of same, excluding city roads	136,850,299 15

TABLE C.—*Characteristics.*

Length of roads in miles	3,240.16
Length of roads laid	2,698.46
Length of roads in operation, excluding city roads	2,580.67
Length of double track, including sidings	1,193.42
Length of branches laid	506.09
Length of double track on same	24.18
Length of equivalent single track, exclusive of city roads	4,204.27
Number of engine houses and shops	196
Number of engines	799
Number of first class passenger cars	1,323
Number of first class passenger cars, excluding city roads	721
Number of second class and emigrant cars	234
Number of second class cars, excluding city roads	177
Number of baggage, mail and express cars	245
Number of freight cars	11,115

TABLE D.—*Business of the Year.*

Passenger Transportation:	
Miles run by passenger trains	21,138,173
The same, excluding city roads	6,320,163
Number of passengers, all classes, carried in cars	68,489,444
The same, excluding city roads	10,765,631
Number of miles traveled by passengers, or number of passengers carried one mile, city roads not included	442,948,605
Freight Transportation:	
Miles run by freight trains	10,291,398
Number of tons carried in freight trains	7,197,804
Total movement of freight, or number of tons carried one mile	994,039,502
Classification of Freight:	Tons.
Products of the forest	462,105
Products of animals	1,598,112
Vegetable food	1,311,515
Other agricultural products	400,785
Manufactures	921,808
Merchandise	1,153,686
Other articles	1,349,893
Total tonnage	7,197,804
Excluding City Roads:	Miles.
Average rate of speed of ordinary passenger trains, including stops	20.90
Average rate of same, when in motion	25.09
Average rate of speed of express passenger trains, including stops	26.88
Average rate of same, when in motion	30.94
Average rate of speed of freight trains, including stops	11.21
Average rate of same, when in motion	14.48
Average weight, in tons, of passenger trains, exclusive of passengers and baggage	71.24
Average weight, in tons, of freight trains, exclusive of freight	144.70

TABLE E.—*Cost of Maintenance of Roadway.*

Allotted to Passenger Transportation:		
Repairs of road-bed and way, exclusive of iron	$1,117,610	43
Cost of iron for repairs	580,459	45
Repairs of buildings	220,133	40
Repairs of fences and gates	31,556	61
Taxes on real estate	155,526	36
	$2,105,286	25
Allotted to Freight Transportation:		
Repairs of road-bed and way, exclusive of iron	$1,823,465	42
Cost of iron for repairs	977,389	01
Repairs of buildings	387,192	55
Repairs of fences and gates	49,983	61
Taxes on real estate	260,696	79
	$3,498,727	38
Allotted to passenger transportation	$2,105,286	25
Allotted to freight transportation	3,498,727	38
Other costs not allotted	564,261	15
Total cost of maintenance of roadway	$6,168,274	78
Total cost, excluding city roads	6,066,871	18

TABLE F.—*Cost of Repairs of Machinery.*

Allotted to Passenger Transportation:		
Repairs of engines	$608,957	69
Repairs of cars	764,267	29
Repairs of tools, &c	76,482	25
Incidental expenses, oil, fuel, &c	57,323	79
	$1,507,031	02
Allotted to Freight Transportation:		
Repairs of engines	$1,099,471	40
Repairs of cars	2,106,212	39
Repairs of tools, &c	120,224	45
Incidental expenses, oil, fuel, &c	96,484	39
	$3,422,392	63
Allotted to passenger transportat'n	$1,507,031	02
Allotted to freight transportation	3,422,392	63
Other costs not allotted	89,698	36
Total cost repairs of machinery	$5,019,122	01
Total cost, excluding city roads	$4,958,318	13

TABLE G.—*Cost of Operating the Roads.*

Allotted to Passenger Transportation:		
Office expenses, stationery, &c	$66,921	45
Agents and clerks	393,585	07
Labor, loading & unloading freight	20,698	62
Attendance of porters, watchmen and switchmen	191,214	61
Wood and water station attendance	46,929	63
Conductors, baggagemen and brakemen	297,720	36
Enginemen and firemen	260,084	26
Fuel, and cost of labor in preparing for use	873,298	12
Oil and waste for engines & tenders	113,433	41
Oil and waste for cars	17,525	57
Loss & damage of goods & baggage	14,823	75
Damages for injuries to persons	21,063	96
Damages for property and for cattle killed	10,395	05
General Superintendence	75,904	98
Contingencies	394,866	10
	$2,798,464	94
Allotted to Freight Transportation:		
Office expenses, stationery, &c	$82,081	29
Agents and clerks	603,949	03
Labor, loading & unloading freight	1,076,653	59
Attendance of porters, watchmen and switchmen	311,095	24
Wood and water station attendance	74,482	62
Conductors, baggagemen and brakemen	489,084	60
Enginemen and firemen	586,207	51
Fuel, and cost of labor in preparing for use	1,842,389	42
Oil and waste for engines & tenders	217,752	73
Oil and waste for cars	48,290	05
Loss & damage of goods & baggage	70,976	51
Damages for injuries to persons	12,176	97
Damages for property and for cattle killed	16,688	99
General superintendence	116,416	13
Contingencies	398,884	19
	$5,447,078	87
Allotted to passenger transportation	$2,798,464	94
Allotted to freight transportation	5,447,078	87
Other costs not allotted	1,825,225	35
Total cost of operating roads	$10,070,769	16
Total cost, excluding city roads	$8,339,009	21

TABLE H.—*Earnings and Payments.*

Earnings:		
From passenger business	$12,617,090	92
The same, excluding city roads	9,958,718	84
From freight business, city roads excluded	22,511,698	06
From other sources	1,284,166	56
The same, excluding city roads	1,246,958	62
Total earnings	$36,412,955	54
The same, excluding city roads	$33,704,142	10

Payments other than for construction:	
For transportation expenses	$22,397,463 47
The same, excluding city roads	20,337,430 19
For interest	4,878,539 32
The same, excluding city roads	4,762,503 99
For dividends on stock	4,608,357 13

TABLE I.—*Accidents.*

Number of passengers killed	25
Number of passengers killed, excluding city roads	14
Number of passengers injured	70
Number of passengers injured, excluding city roads	36
Number of employees killed	66
Number of employees injured	25
Number of others killed	117
Number of others injured	44
Total number killed	208
Total number injured	139
Total number killed, excluding city roads	182
Total number injured, excluding city roads	91

Deductions from the foregoing Results.

If we exclude the city roads, we have as follows;

Average cost per mile of road and equipment	$53,028 98
Average cost of road and equipment per mile of single track	32,550 31
Average number of miles traveled by each passenger	41.15
Average number of passengers in each train	70.08
Average number of miles each ton of freight was transported	138.10
Average number of tons in each freight train	96.59
Aggregate movement of passenger trains is equivalent to passing over the road	2,449 times.
Aggregate movement of freight trains is equivalent to passing over the road	3,988 times.
Average number of trains passing daily over the road, about	17½
Average cost per mile of road, for maintaining roadway	2,350 89
Average cost per mile of road, for repairs of machinery	1,921 33
Average cost per mile of road, for operating road	3,231 33
Average cost per mile of single track for maintaining roadway	1,443 03
Average cost per mile of single track for repairs of machinery	1,179 35
Average cost per mile of single track for operating road	1,983 46
Average sum received for carrying one passenger one mile	2.25 cents.
Average sum received for transporting one ton of freight one mile	2.26 cents.
Average number of miles of travel for each passenger killed	31,639,186
Average number of miles of travel for each passenger either killed or injured	8,858,972
Average number of passengers carried for each one killed	768,974
Average amount of dead weight moved for each passenger carried.	1.01 tons.
Average amount of dead weight moved for each ton of freight transported	1.50 tons.

Average expense is 60.32 per cent. of all the earnings.

COST OF TRANSPORTATION, AND EXPENSES ON GROSS EARNINGS.

Deductions from the reports of several of the principal companies, showing, 1st. Average sum received per ton per mile on freight. 2d. Average cost per ton per mile transporting freight. 3d. Per centage of transportation expenses to gross earnings.

Name of Road.	Average per ton per mile. Received for transporting. Cents.	Cost of transporting. Cents.	Per cent. of transportation expenses on gross earnings.

Portland, Saco and Portsmouth Railroad.

The receipts and expenditures of this road for the fiscal years ending May 31, 1863 and 1864, have been as follows:

Receipts:	1863.	1864.
From passengers	$195,146 13	$240,439 82
" freight	74,582 86	95,493 91
" expresses	3,712 91	4,041 80
" mails	7,837 44	7,837 44
" sundries	1,917 45	3,039 82
	$283,196 79	$350,852 79
Expenditures, viz:		
Maintenance of way	$26,931 59	$46,233 16
Locomotive power	31,342 23	40,914 42
Train expenses	15,093 68	20,164 63
Office establishment	16,490 82	11,555 19
Station expenses	11,661 65	22,615 02
Taxes, insurance, etc	.....	9,282 40
Machine shop	1,401 01	1,966 58
Credit renewal account	10,000 00	10,000 00
	$112,920 98	$162,731 40
Net earnings	$170,265 81	$188,121 39
Dividends, six per cent. and U. S. tax.		92,783 50
Surplus earnings		$95,337 89
Surplus per last report	$71,784 88	
Deduct for over-estimate	1,243 24	
		70,541 64
Total		$165,879 53
From which deduct—		
Balance of cost Saco River bridge	$3,836 02	
Paid Boston and Maine and Eastern R. R. Co.'s	65,000 00	
Profit and loss	942 31	
		69,778 33
Surplus May 31, 1864		$96,101 20

The road and equipment has been kept in thorough repair, and has been operated without any delay, or accident to the very large number of passengers carried over the road. The number of passengers, and amount of freight transported has exceeded that of any former year. There have been laid down during the year about 130 tons of new rails, and 15,000 sleepers, with the improved fish-joint and chair. The company have now on hand about 90 tons of rails and 1,000 sleepers. At least 100 tons of iron and 7,000 sleepers will be required the coming year in addition to what is now on hand. One new passenger engine will also be required this season. A large outlay will also be necessary the present year to provide for the increased business at Portland station. The road and its bridges, as a whole, are in most excellent order, and with the exception of the Portland station and grounds, will require no extensive outlay beyond the ordinary repairs.

The equipment of the road consists of 10 locomotives; 2 passenger, 2 baggage, 51 platform, 55 box, 2 stone and 10 hand cars. Miles run by engines, 154,991. Passengers carried, 299,309.

TRIAL BALANCE, MAY 1, 1864.

Kennebec and Portland Railroad	$100,000 00
Railway	1,360,183 97
Wharf at Portland	10,930 04

President.—ICHABOD GOODWIN.
Treasurer.—E. NOTT.
Superintendent.—J. RUSSELL, JR.

Philadelphia, Wilmington and Baltimore Railroad.

The receipts of this road for the month of May,

1864, were	$285,876 09
May, 1863	192,164 51
Increase	$93,711 58
Total for five months, 1864	$1,352,509 15
Total for five months, 1863	1,036,461 76
Total gain in 1864	$316,047 39

The laying of the double track from Philadelphia to the Susquehanna River is completed. The building of the bridge across the Susquehanna is progressing. The pier in the deepest water, forty-two feet, is finished, with three others and the abutments. There are nine piers yet to be built. The double track from the Susquehanna to Baltimore, about forty miles, is now being laid with the Redwood iron at a cost of about $8,000 per mile.

North Missouri Railroad.

The gross earnings of the road for the year ending the 29th of February, 1864, are as follows:

	1864.	1863.
Transportation of freight	$283,894 80	$233,276 85
Transportation of pass.	283,698 59	203,560 57
Transportation of mails	21,209 14	25,367 73
Total earnings	$588,802 53	$462,205 15
Operating expenses	$420,733 32	$314,949 42
Net earnings	$168,069 21	$147,255 73

☞ The sales of land by the Illinois Central Company to farmers and others on the line of the road, since the 1st of January, amount to a million and a half of dollars, and the cash collected from the previous sales to $950,000. The collections after the new harvest, now near at hand, promise to be even larger.

American Railroad Journal.

Saturday, July 2, 1864.

Stock Exchange and Money Market.

Our remarks on the subject of bank inflation have as we are glad to notice, attracted the attention and comment of our cotemporaries of the Press. And there is no subject just now which better deserves them, for if we ever hope to get back to a specie basis, the banks of the country must stop their excessive discounts and withdraw, or be made to withdraw their excessive circulation. Inflation is due to both these causes. It is to be remembered that there is an essential difference between the operations of the Government and those of the banks. The former issues its promises to pay for real value received, for a good consideration, the very best it is possible to offer, viz., the maintenance of the Union, the constitution, the integrity and nationality of the republic, and to destroy the rebellion, wicked and bloody which has endangered its existence. The banks on the contrary, are engaged solely in the business of making money, and if they exchange their promises to pay for the promises to pay of their customers, it is but paper for paper, and with a certain amount of risk as they often find out from experience. Their profit arises in loaning their deposits and their own notes, whenever they can do so, and in keeping them out. Expansion is their business, their advantage and success; and when by a suspension of specie payments they escape the responsibility of redemption, and the penalties of non-redemption, it is a state of things which affords them the largest profits, and an almost entire mastery over the currency, as well as all the financial operations of manufactures and commerce.

The intervention of a National currency, which in such times as these is next best to the gold and silver which have become commodities, like diamonds, as being too scarce and too much in demand to pass from hand to hand as money of circulation, has changed the position of the State banks, and imposed upon them the obligation of redeeming their issues in legal tenders, but even this redemption is scarcely attempted. The institutions most clamorous against Government inflation can neither redeem their issues in gold and silver, or legal tenders, and resort to all sorts of shifts and expedients to meet their balances, both at the clearing house and with their customers.

That these banks are not acting loyally to the country is evident. Even in this city where the elder institutions under the lead of some very honest but not all very sagacious managers have attempted to drive all money out of use but their own unredeemed if not irredeemable issues; the business of inflation goes on. The weekly averages on the 25th of June, of our associated banks show what a week's business had been. The specie in their vaults during the week had decreased $915,393. The whole amount of specie on hand was $16,270,000 less than it was on the same day a year ago, it then being $38,271,202, while the circulation was only one million less than it was then, with that large amount of specie on hand. The circulation of these city banks when they had over 38 millions of coin to meet it, was $6,004,177, and now when they have but $22,016,291 on hand, their circulation has only been reduced about $954,720! Notwithstanding, the operations for the week ending June 25th, show that though the specie had decreased nearly a million, and the deposits had decreased $10,672,782, the loans had increased by $1,808,439. We really think that the inconsistency which these bankers display, lessens the confidence we might otherwise place in their opinions. We repeat it therefore, that if we wish to repress any further inflation of paper, the banks must be taken in hand, and compelled by popular sentiment, if not by law, to keep within proper bounds.

We notice that our remarks on the condition of the banks of Pittsburg, drew forth a reply from the President of the Merchants' and Manufacturers'. This statement, while it corrected the amount of circulation as stated in many journals, showed a condition of affairs by no means brilliant; a circulation of nearly twelve hundred thousand dollars on a capital of six hundred thousand, and only about one hundred and sixty thousand dollars of specie in its vaults. Its whole

surplus, if every dollar of assets was realized, would only be about $180,000, while if the assets in Government securities which it put forth ostentatiously, were converted into gold at their present rate, the bank alluded to would be unable even to repay its capital to its stockholders by many hundred thousands of dollars. As long as no redemption either in money or legal tenders can be enforced upon the local banks, so long will they run riot with their circulation, offering it to the most daring speculators, rather than to the most conservative dealers; if not frequently operating in stocks and gold for their own account, or that of their officers; as we have known some banks in the country to do in former years of excitement and speculation.

The operations of the Treasury are understood to be of an important but conservative character. Mr. Chase is steadily pursuing his policy of contraction, though he does not seem to be followed in it by the banks. When the day comes that the popular currency of greenbacks disappears, and we are driven to the use of the fifteen hundred different kinds of local bank notes, the value of which no one but a skilful broker ever knows, we shall learn the difference to our cost and discomfort. We believe that if the local bank notes were to disappear to-day from the public eye, that the present Government issues of legal tenders could be maintained in circulation at the par of gold without much difficulty. They would then be no more than 5 per cent. of the census value of the real and personal property of the country as it was in 1860, and which has in the past four years increased over 50 per cent., strange and unexpected as the statement may appear.

Mr. Chase has concluded to offer the remainder of the new loan, about 33 millions to bidders, at 104 and upwards. There is a certain class of newspaper people who have unfortunately the control of presses, who are nothing if they are not critical: whose business is to pull down, never to build up; architects of ruin only, who travel on a path which is lighted by the torches which they seize from the conflagration of the National edifice. "The course," say these men, "the course of Mr. Chase tends to weaken confidence;" a most unfair and untrue assertion. What loss of confidence is there when he has negotiated twelve hundred millions of loans, at a time, and during a period when no European Government could possibly have raised so much money for themselves, and when our Government currency is sought for in preference to all others; when it is so scarce that the banks are unable to pay their depositors in it, and when it is almost constantly at a premium when required in large sums. It is idle to talk of a want of confidence when such facts as these are observable by the poorest vision. Nor is he to be blamed for the varieties of the securities he has offered to capitalists. No one supposed the war would have lasted as long as it has; nor would it, if it had been more ably conducted. When the Secretary of State again and again said, and no doubt believed what he said, that the contest would end in sixty days, Mr. Chase could not foresee how much money would be required for its expenditures.

If he had proposed a loan at the start of fifteen hundred millions, there would have been a general outcry from the timid and the disloyal, and it could not have been obtained, so disproportioned was the sum to the probabilities and necessities of the hour. He was forced both by circumstances and by economical foresight to adjust his loans to the demands of the day. All Governments have to do the same thing. That of Great Britain has always adopted the same course of conduct. The grumblers at Mr. Chase's variety of securities must know or at least ought to know that British securities are quite as numerous in form and tenor as ours. They consist of three per cents, three and a half per cents, four per cents, five per cents, perpetual annuities, terminable annuities Consols (or a consolidation of annuities,) Exchequer bills, and the unfunded debt, and are by no means as simple in their arrangement as our own. More than this we have never defaulted in the payment of the interest of our debt in gold at any time and the British Government has. How absurdly and how ignorantly then do these fault finders talk of our securities! Congress has just provided further means for the Treasury when the present loans are exhausted, by authorising a new one for four hundred millions two hundred of which if we understand the bill, may be 7-30's with interest in currency, not legal tenders. So also provision has been made for a further levy of soldiers, to fill up our ranks and to continue the contest till victory and and union crown our efforts. For this is the temper and this the determination of the twenty four millions of loyal people, who will not consent that three millions of infuriated confederates shall destroy their cherished institutions. This is now the final issue, and it must be met. The men who advocate a disgraceful peace are the worst enemies of the American people.

The gold market has been rampant, as will appear from our quotations. Those in want of gold are in no way hindered from buying it by the new law, but those who are gambling in it, are. It is a curious subject for reflection, what do the sellers of gold do with the greenbacks or local currency, which they have been receiving within the last few days at the rate of 240 or 50 per dollar in gold. What do they with the currency they receive on their own terms? It must be put to some use, but how it is used no one seems to know, unless it is sent to the confederates to support the rebellion, and where it is by comparison almost as good as gold. We are unable to trace the operations of the parties alluded to, for there is a want of apparent sagacity in their movements not easily explained. It seems to be thought that a foreign loan has been negotiated to some extent on favorable terms. If so we hope the proceeds will be brought to this country in the precious metals direct. Drawing bills on it in our opinion produces no moral or political effect. The Bank of England should be made to feel our strength, and through it those blockade runners who have been decrying our cause, our credit, and our character. The total exports of gold and silver, bullion and specie for the first four months of the present year from Great Britain, amounted to £5,668,217, while the total imports for the same period were only £5,553,504. Thus showing that notwithstanding that country receives all our specie, she now keeps none of it, and if brought to the same condition with ourselves, that is to say if she was drawn upon in the same manner and to the same extent that we are, she would suffer as much as we do. For she has no gold in her mountains, and no sixty or seventy millions coming forth annually from her soil as we have. The money she gets from Australia is colonial money and first belongs to the miners who dig it out, and after she gets it from them by sending them their clothes and beer, she cannot keep it but is forced to pay it out again to the semi-barbarous people of Egypt and China, and the strange people of India, the former having received already during the present year £755,761, and the latter £2,293,805.

So that if Mr. Chase would bring the proceeds of his foreign loan direct to New York, the very act would change the whole financial relations between us and Great Britain; it would upset all the financial calculations of the Bank of England, and the persistent intrigues of our foreign enemies. If fifty millions could be shipped to the United States the next two months, the whole character of these would change to our immense immediate advantage. That sum could not be withdrawn from London without making us masters of the situation.

Money is dearer than it was some weeks since, forcing securities into the market at lower than previous rates, and there is very little doing in Exchange. The Assistant Treasurer reported his balance on Tuesday at $21,681,068.

The Import Entries of the past week amount to $6,498,893, against $2,545,129 same week last season. The Export Clearances of Domestic Produce amount to $5,836,881 against $2,549,154 same week in 1863. The Export of Specie is $1,296,000, against $134,000 same week last year. The Customs for the week are $680,000.

It appears officially that the revenue from the customs will this year be $100,000,000; a complete reply to those who say Mr. Chase has no gold at his command. Our readers will find the quotations of the past week full and complete.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Illinois coupon bonds, 1879, 103½; do., 1870, 102; North Carolina 6s, 59; Michigan 7s, War Loan, 105; Joliet and Chicago R. R., 104½; New Jersey R. R., 165; Pitts., Ft. W. and Chi. scrip, 110; At. and Gt. Western (Ohio div.,) 1st mort., 99½; Marietta and Cincinnati 1st mort., 105½; Milwaukee and St. Paul 1st mort., 100; Peninsula R. R. 1st mort., 98; Mariposa 1st mort., 103; Hamp. and Balt. Coal, 109½; Central Coal, 70; Gregory Consol. Coal Co., 25; Nicaragua Transit, 8; Bucks Co. Lead, ¾; Quartz Hill gold, 13; Atlantic M. S. S. Co., 176; Copake Iron, 10; Bank of State of New York, 110; Ocean Bank, 97½; 4th National Bank, 97; American Exchange Bank, 119.

Philadelphia.—Allegheny Co. coupon, 5s, 85; do., scrip, 81; Reading mort. 6s, 1880, 115; Huntingdon and Broad Top, 35; do., pref., 43; 5th and 6th streets, R. R., 64½; Union Canal, 2¾; Fulton Coal, 8; New York and Middle Coal Fields, 19¾; Green Mountain, 6; Locust Mountain, 75; Tremont Coal, 15; Big Mountain Coal, 8; New Creek, 1⅜; Clinton, 1; Bear Valley, 18; McClintock Oil, 5; Feeder Dam, 1⅛; Oil Creek, 5¾; Maple shade, 10¾; Perry, 5¼; Irwin, 4⅛; Phila. and Oil Creek, 1⅜; Densmore, 4¼; Olmstead,

Chrome, 2.50@2.75; Bare Hill, 4.40@4.50; Atlantic Coal, 1.45@1.55.

What is Taxable Income.

A Deputy Commissioner of a revenue district in Illinois has undertaken the function of deciding what is income in a most extraordinary manner. One of the assessors in that region made the following statement:—"A person some twenty years ago, purchased a piece of land at a cost of $1000, and sold about one-fifth of it last year for $20,000." Is this profit, income? The assessor replied where real estate has risen in value since its purchase the increase must be considered income to the owner. The only question is, shall this appreciation be taxed as income each year of its accrument, or shall the Assessors wait until the property be sold and the absolute profit be realized before he considers it income? To assess the nominal appreciation of property year by year would be to assess an amount vague and uncertain, and frequently valueless to the owner. Such a course would be fruitful of bickering and dissatisfaction, to say nothing more. The Assessor was directed to assess the profits realized.

We have no doubt this decision will be overruled at once. It is a sheer piece of absurdity. The improved value of the property, if actually realized, at once became capital, existed in some other form of property, as bonds or mortgages or other real estate or securities, and became taxable to such amount. To tax it as income was to subject it to double taxation and pervert the meaning of words and the usages of business.

Albany and Susquehanna Railroad.

The Unadilla *Times* says that Mr. Marsh, one of the contractors on the Albany and Susquehanna Railroad, has been given the general charge of the whole work, as far as let, from Central Bridge to the Tunnel—and if any one of the contractors fail to fulfil their obligations he goes on with the work himself. The difficulty of obtaining laborers at any price is a serious drawback to the speedy completion of the road.

☞ Messrs. Stone, Quigley and Burton, of Philadelphia, have entered into a contract for the erection of a new military suspension bridge over the Alleghany River at Franklin, Venango County, Pa. The bridge will be 720 feet long, and 18 feet in width of roadway. The design will be made by John W. Murphy, Civil Engineer, who is the inventor, and it will be similar to the bridge over Gauley River, Western Virginia, erected by the Government in 1862.

Washington County R. R.

We understand that next week the route for the Washington County Railroad, which is to run from Knoxville or Weverton, on the Baltimore and Ohio Railroad, to Hagerstown, will be surveyed by a Surveyor appointed for the purpose, and the route located, that it may be immediately put under contract with a view to an early construction.

☞ A special meeting of the Directors of the Pittsburg, Fort Wayne and Chicago Railway Company is called for the 11th of July at Pittsburg. One of the objects of the meeting is reported to be to declare a dividend of 2½ per cent. for the quarter ending July 1.

The Madras Railway.

In another place we give an abstract of the financial condition of the Madras Railway, its various lines and connecting Branches. It appears that the South West line connecting Madras on the Coromandel coast with Beypoor in the interior a distance of 406 miles is now passed by rail and has been in use for two years, has been maintained in good order and is in regular working condition. On the southern part the defective sleepers had been renewed for near three-fourths of the distance, iron sleepers being principally if not entirely adopted.

On the Bangalore branch forming part of the South Western line the progress has not been quite as rapid as was expected from various causes of no permanent disadvantage, while the most difficult part, the ascent through the mountainous lands of Mysore has been completed and trains have passed over it. It was expected to be finished in November of the present year. Great expectations are formed of the remunerating character of this part of the line. Bangalore, the terminus, is the capital of a fertile and prosperous country, and the principal military station in that part of India.

The Salt Cotaur Branch is completed and the regular traffic has commenced.

On the North West line no extension has been made, and the distance worked this year is but 41 miles, the same as the last half year. Twenty-five miles of additional length were nearly finished and it was anticipated that the whole line to Cuddapa would be ready the present season.

The direction of the line from Cuddapa was not yet determined on, whether to Hyderabad as proposed by the Great Indian Peninsula and the Bombay Government, or as was originally proposed through Gooty and Bellary to Moodgull to meet the Bombay line. On the North West line iron sleepers were used exclusively and every day's experience proved them to be very greatly superior to wooden sleepers.

At the end of the year 1863 there were finished of the Madras railway (two lines) 450 miles and open to traffic, and in the course of the present year there would be added 200 miles more, making in all 650 miles. The Bangalore branch was to be in complete running order in the present July.

☞ *The Lake Superior News and Journal*,—says: "We learn that the Mineral Land Company has sold all their lands in Marquette County, over 30,000 acres, to the Peninsula Railroad Company, or to individuals connected with it. It is known that immense deposits of pure iron ores exist in many places upon these lands, and that more will be found in the development of the country. It also gives them timber for three or four blast furnaces, with an abundance of ore to supply them from the mines from which they will ship. This purchase places the Peninsula Road upon a basis so firm and strong, so far as business is concerned, that there is no longer any question upon that score, as it gives them the ore to furnish it a business themselves. As a whole it is a most valuable tract of land."

Pittsburg and Connellsville Railroad.

At length there is some prospect of the completion of this work to Cumberland, the point originally designed for its terminus. A circular issued by the board of directors of the company, at a meeting held on the 11th of June, authorizes the president of the company to contract for the graduations, masonry and ballast of the eighty-six sections of the road between Connellsville and this point, with parties from whom proposals have been received, "subject to the removal of any legal difficulties which exist or may occur to prevent the immediate prosecution of the work." Among the parties who have made proposals, we notice the not unfamiliar names in railroad contracting of our fellow-citizens, John Humbird and James Reynolds, Esqs. Mr. Humbird, in connection with Mr. Hitchcock, of New York, offers proposals for the 115th, 116th and 117th sections of the road, and Mr. Reynolds for sections 59, 60, 61, 62, 63 and 64.—*Cumberland (Md.) Alleganian.*

Delaware and Hudson Canal Company.

In pursuance of authority given at a meeting of the stockholders of the Delaware and Hudson Canal Company, held on the 21st of April last, there will be apportioned among such persons as shall be stockholders in the said company on the 12th day of July inst., twelve thousand five hundred shares of new stock, in the ratio of one share to every six shares of stock then held by each stockholder. Certificates of stock so apportioned will be ready for delivery to those entitled to the same on and after the 1st of August next. No scrip will be issued for fractions of a share; but the number of shares representing the aggregate of such fractions will be sold at public auction on the 26th day of July, and the net proceeds will be paid to the stockholders on and after the 1st of August, according to their respective interests. The Government tax on the above mentioned apportionment will be paid by the company.

Petroleum Railway Signals.

Mr. J. T. Hall, the gas engineer to the London and Northwestern Railway Company, has been directing his attention to the burning of mineral oils for signal purposes, and the lighting of railway stations; and, after a series of experiments, has succeeded in "constructing a signal lamp and lantern in which petroleum may be used with perfect safety, and a brilliant and uniform light be obtained. The light is not affected by gusts of wind. It is already in successful operation at several of the stations on the London and Northwestern Railway. In addition to its employment for railway signals, it may also be used for lighting coal and other mines, lighthouses, and similar places. It is said that whilst the new petroleum lamp gives a large excess of illuminating power, the actual cost, as compared with other oils, is less by upwards of 50 per cent."

Railway Bridge Across the Susquehanna.

This grand railway structure is in rapid progress. The whole length of the bridges will measure 3,100 feet, will have thirteen piers, one-half of which will rest upon pile foundations, and the other upon the solid rock, eleven spans, each 250 feet in length, and two draw spans, each 75 feet. The piers generally are 8 feet wide and 24 long on the square, whilst the two at either end of the draw are 12 feet wide and 24 long. The centre pier on which the draw turns will have a circle of 24 feet in diameter. From ordinary low water to the foot of the arches will be 13 feet, and from ordinary low water to the bottom chord, 26 feet. The height of truss will be 25 feet, and the bed of track will consist principally of the usual crossties. The piles are driven into the bed of the river by a powerful Steam Engine, the granite is obtained in huge blocks from the extensive quarries at Port Deposit, and divers in marine armor, render valuable assistance in the construction of the piers.

☞ Mr. E. F. Satterthwaite's circular of June 11 says that at the London Stock Exchange American securities are in request. "The chief feature has been the demand for United states five-twenty bonds, considerable amounts having been taken on continental account. In railroad shares operations have been on a limited scale, and we have to report a decline of $4 in Illinois and $2 in Erie. There has been more inquiry for the bonds of the Atlantic and Great Western Railway, consequent on the desire to secure the July coupons now advertised to be paid on the 1st proximo."

☞ The Legislature has legalized the action of the Supervisor, Town Clerk and Justices of the Peace of the town of Oyster Bay, Queens county, in issuing four bonds of said town, of five hundred dollars each, for the purpose of procuring substitutes for indigent men of family, drafted and accepted as soldiers from said town. The money to pay the interest upon said bonds as it accrues, and the principal at maturity to be assessed upon said town.

South Side Railroad.

By the act of the Legislature of this State passed April 20, 1864, the period allowed for the completion of the South Side Railroad of Long Island is extended for the term of two years from the passage of the act.

Hudson River Bridge.

AN ACT to amend chapter one hundred and forty-six of the laws of eighteen hundred and fifty-six, and chapter four hundred and fifty-four of the laws of eighteen hundred and fifty-seven, authorizing the construction of a bridge across the Hudson River at Albany. Passed April 20, 1864; three-fifths being present.

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

SECTION 1. The Hudson River Bridge Company at Albany is hereby authorized to remove the site of its bridge from the place now located for the construction thereof, to a line running across the Hudson River, under the provisions of this act, south of the north boundary line of the city of Albany, and not more than one hundred feet north of the north line of Lumber street in said city, at a proper height of not less than twenty feet above ordinary common tide water, to be ascertained and fixed by the State Engineer and Surveyor as hereinafter provided.

§ 2. It shall be the duty of the State Engineer and Surveyor, when requested so to do by the said corporation, to ascertain and fix upon the proper place for the construction of said bridge across said river, and also upon the proper height thereof so as to comply with the requirements of this act. The determination of the State Engineer and Surveyor in regard to the location and height of said bridge shall be reduced to writing and signed and acknowledged by him, and filed in the office of the Clerk of Albany County, and thereupon said corporation shall have the right to proceed in the construction of such bridge at the place so located therefor, and shall not be restrained by any court or office, by injunction or otherwise, in the work of such construction, unless such injunction shall be granted by the Supreme Court sitting in a judicial district of this State, at a general term of said court, nor unless at least eight days' previous notice of the time and place of the hearing of the application for such injunction shall have been served upon said corporation, with the papers upon which such application shall be founded, and application for such injunction may be made as aforesaid at a general term, in any judicial district in the State.

§ 3. This act shall take effect immediately.

New Blast Engine.

We have on a former occasion drawn attention to the recently-patented blast engine of Mr. H. C. Coulthard, of the Park Ironworks, Blackburn. We are now enabled to lay before our readers the results of the working of one of the engines, which has been erected by Messrs. Coulthard, at the Stanton Ironworks, near Nottingham. The engine has an air cylinder 56 inches in diameter, and a steam cylinder of 21 inches in diameter, both having a clear stroke of 3 ft., and with pressure of steam in the boilers of 40 lbs. per square inch, and with the engine making only 35 revolutions per minute, or at the rate of 200 feet per minute, a pressure of blast is uniformly maintained, at 3½ lbs. per square inch, in sufficient quantity for the furnace of 15 feet diameter at the boshes. The proper speed of the engine is about 50 revolutions per minute; it is, therefore, evident that with the increasing speed increased amount of air would be obtained. The action of the India rubber ball-valves is perfect, as they can be constantly seen at work, rising and falling with great freedom. One curious fact in connection with these ball-valves may be mentioned—that as they rise from their seats they turn partially round by the action of the air; this action gives them great durability, as the valve never beats twice consecutively in the same place.—*London Mining Magazine.*

☞ John F. Blandy, Esq., has been elected President of the Little Schuylkill Railroad Company, to supply the vacany caused by the resignation of A. Derbyshire. Mr. D. was subsequently elected a Manager to serve in place of W. C. Houston, resigned.

☞ A special meeting of the stockholders of the Philadelphia and Erie Railroad Company was held in Philadelphia on the 25th ult., at which 28,600 shares of stock were voted, all of which were for the resolution instructing the board of managers to aid in the immediate construction of a railroad from the most eligible point to the oil region.

Railroad Earnings--Weekly.

The earnings of the Chicago and Alton Railroad Company for the week ending June 23, were:

	1864.	1863.
Passengers	$19,265 03	$20,882 71
Freight	35,332 49	22,576 64
Sundries	2,758 60	1,999 56
Total	$57,356 12	$45,458 91
Increase 1864	$11,897 21	

The traffic of the Great Western Railroad for the week ending June 17, 1864, was as follows:

Passengers	$30,389 66
Freight and live stock	24,104 77
Mails and sundries	2,126 09
Total	$56,620 52
Corresponding week of 1863	43,679 12
Increase	$12,941 40

The earnings of the Grand Trunk Railway for the week ending June 18, 1864, were:

Passengers	$84,000 90
Express freight, mails and sundries	2,500 00
Freight and live stock	69,742 94
Total	$106,243 84
Corresponding week, 1863	83,751 03
Increase	$22,492 81

The earnings of the Montreal and Champlain Railroad for the week ending June 18, 1864, were | $5,617 61
Corresponding week of previous year | 4,498 79
Increase | $1,118 82

The earnings of the Racine and Mississippi and Northern Illinois Railroad for the week ending June 18, 1864, were:

	1864.	1863.
Passengers	$2,696 75	$2,185 69
Freight	13,790 63	7,362 40
Express	104 16	75 00
Mails	296 58	296 58
Total	$16,888 12	$9,919 67
Increase	$6,968 45	

Receipts from January 1st to June 14:

1864	$233,169 49
1863	144,893 24
Increase	$88,276 25

The earnings of the Michigan Central Railroad for the 3d week in June, 1864, were | $60,583 50
Corresponding week of previous year | 49,881 64
Increase | $10,701 86

The earnings of the Michigan Southern and Northern Indiana Railroad for the 3d week of June, 1864, were | $70,553 16
Corresponding week of previous year | 50,875 08
Increase | $19,678 08

The earnings of the Chicago and Rock Island Railroad for the third week in June, 1864, were | $49,484 00
Corresponding week of previous year | 43,948 00
Increase | $5,536 00

The earnings of the Chicago and Northwestern Railway for the week ending June 14, 1864, were:

Passengers	$27,220 83
Freight	94,121 49
Mail	1,884 37
Express	384 17
Total	$123,610 86
Corresponding week of previous year.	83,742 00
Increase, 47 per cent	$39,868 86

The Milwaukee and St. Paul Railway earned for the first two weeks in June | $128,741 00
Corresponding week, 1863 | 62,587 00
Increase | $66,154 00

The earnings of the Milwaukee and Prairie du Chien Railroad for the 2d week in June, 1864, were | $53,709 00
Corresponding week of previous year | 29,879 00
Increase, 73 per cent | $23,830 00
The increase since Jan. 1, 1864 | $297,052 00

The earnings of the Marietta and Cincinnati Railroad for the 3d week of June, were:

	1864.	1863.
Passengers	$6,202 39	$4,170 26
Freight	8,874 95	4,854 03
Mail, express & telegraph	1,190 58	815 00
Total	$16,267 92	$9,839 29
This month to date	$48,817 77	$26,481 01
Total since Jan. 1	$431,165 57	$278,583 54

The Detroit and Milwaukee Railroad traffic for the week ending June 23, 1864, was | $21,120 95
Corresponding week of previous year | 16,797 64
Increase | $4,328 31

Interest and Dividends.

The Terre Haute and Richmond Railroad Company have declared a dividend on the capital stock of six per cent., free of Government tax, for the six months ending May 31, payable to Eastern stockholders at the office of the Farmer's Loan and Trust Company, in New York, on and after July 5.

The Panama Railroad will pay, July 5, a quarterly dividend of 4 per cent., with 1 per cent extra from the earnings of the steamers.

The quarterly dividend of 1¾ per cent., free from Government tax, due July 4, on the Joliet and Chicago Railroad stock, will be paid on the 5th proximo, by the United States Trust Co.

The Worcester and Nashua Railroad Company has declared a semi-annual dividend of $2 50 per share, payable July 1, free of Government tax. The Providence and Worcester 4 per cent. The Hartford and New Haven, 3 per cent. The New Bedford and Taunton, 3 per cent. The Lynn and Boston, 4 per cent.

The interest on the bonds of the Mississippi and Missouri Railroad, maturing July 1, will be paid at the Corn Exchange Bank, New York.

The July coupons of the first second and third mortgage bonds of the Columbus and Indianapolis Railroad, will be paid at the St. Nicholas Bank.

The July coupons of the St. Paul and Pacific Railroad 1st mortgage bonds will be paid, free of Government tax, at the office of E. B. Litchfield & Co., No. 18 William street.

The interest due 1st July to the holders of Indiana 5 and 2½ per cent. State stocks, will be advanced as heretofore, at the banking house of Winslow, Lanier & Co., No. 52 Wall street.

The interest coupons on bonds of the Brooklyn City and Newtown Railroad Company, due on the 1st of July, will be paid at the office of the company.

Stockton (California) City coupons, due and payable in New York in July, 1864, and January, 1865, will be paid in United States gold coin, on presentation at the Metropolitan Bank, New York City, on respective date.

Coupons of Dubuque and Sioux City Railroad first mortgage bonds, and coupons of Dubuque and Southwestern Railroad, first mortgage preferred bonds due July 1, 1864, will be paid less Government tax, by M. K. Jesup & Co., 59 Exchange Place.

Coupons of Chicago and Alton Railroad first mortgage bonds, and coupons of Joliet and Chicago Railroad first mortgage 8 per cent. bonds, due July 1, 1864, will be paid, less Government tax by M. K. Jesup & Co.

The coupons of the first mortgage bonds of the Sacramento Valley Railroad Company, due July 1, 1864, will be paid in gold coin, less 3 per cent. U. S. tax, at the office of Schuchardt & Gebhard.

The holders of the Dayton and Michigan Railroad Company's mortgage bonds are notified that the interest coupons falling due on the first day of July, 1864, and signed P. Smith, Secretary, will be paid at the Bank of America, and the coupons of said bonds maturing on the first day of July, 1864, and signed J. G. Telford, President, will be paid on presentation at the office of Winslow, Lanier & Co.

The coupons due July 1, 1864, of the 1st mortgage bonds of the Allegheny Valley Railroad Company, will be paid on presentation at No. 300 Walnut street, Philadelphia.

The coupons of the bonds of the Frankford and Southwark City Passenger Railroad Company, due on the 1st of July, will be paid at the Girard Bank.

Coupons due July 1, on Chicago City Municipal Bonds, Chicago City Water Loan Bonds, Albany City Six Per Cent Bonds, will be paid by Duncan, Sherman & Co.

The coupons of the Evansville and Crawfordsville (late Evansville and Illinois) Railroad Bonds, due on the 1st of July next, will be paid at the office of the Farmers Loan and Trust Company.

The coupons on the bonds of the Housatonic Railroad Company due July 1, 1864, will be paid at the office of Messrs. Ketchum Son, & Co. No. 40 Exchange-place, New York, or at the Treasurer's Office in Bridgeport, Ct.

The July interest on Kansas State bonds for 1864 will be paid at the Metropolitan Bank, New York city.

Coupons due July 1, 1864, from bonds issued by the Galena and Chicago Union Railroad Company will be paid at the office of H. H. Boody & Co., No. 8 Wall street.

The Preston Coal Co. have declared a quarterly dividend of 2½ per cent. The Ebervale Coal Co., 6 per cent. The Lykens Valley Coal Co., 5 per cent. The Westmoreland Coal Co., 5 per cent. The Isaac's Harbor Gold Co., of N. S., 1 per cent. for the month of June. The Maple Shade Oil Co., 3 per cent for the month of June.

Interest on the Public Debt of Illinois will be paid by the State Treasurer at the Am. Exchange Bank in this city from the 5th to the 20th July. After that only at the office of the Treasurer at Springfield, Ills.

Railroads Common Carriers.—Loss of Baggage—Delivery of Check.

The case of Hickox *vs.* The Naugatuck Railroad Company, involved the consideration of a question of practical importance which occasionally arises in connection with the liability of railroad corporations as common carriers. As we have from time to time suggested in these articles, the liability of a warehouseman is far less extensive than that of a carrier. In some cases it is possible for carriers to show that at the time of the loss of baggage or freight, they were acting merely as warehousemen, and not liable for losses except such as can be shown to have occurred from their negligence. Upon these questions some nice distinctions are drawn, and it is not always easy to harmonize the decisions.

The present action, the latest that we have noticed, was brought against the defendants as common carriers, for the loss through their negligence of money and clothing contained in a trunk of the plaintiff. A jury having rendered a verdict for the plaintiff, the defendants moved for a new trial for error in the charge of the Court. The facts of the case sufficiently appear from the decision.

BUTLER, J.—This declaration is framed against the defendants for negligence in carrying and conveying the plaintiff's baggage, as incidental to his own transportation from Waterbury to Bridgeport. It contains no count, adapted to a recovery for negligence as a depositary.

On the trial the plaintiff claimed to have proof that he took his trunk to the station at Waterbury at 11 A. M., and requested that it might be checked for the next train, which started at 3 P. M., for Bridgeport; that he was informed that it was not their custom to check baggage until about fifteen minutes before the time when the train should leave, whereupon he left his trunk in care of the agent of the company in the baggage room of the station; and that at the customary time it was checked for him and put on the cars for Bridgeport, and that he went on the same train.

These facts were not denied except in a qualified manner.

The defendants denied only the receipt of the trunk for transportation before it was checked, and denied that it contained the missing articles when checked. It was rifled, after delivery to the company, but when and where did not appear.

On these facts the plaintiff claimed that the company were liable as carriers.

The defendants claimed, and asked the court to charge, that if the trunk was rifled after it was left at the station, and before it was checked, there could be no recovery in this action.

The court left it to the jury to say whether the trunk was received for transportation before it was checked, and of that no complaint is made.

But the court went further, and charged that if not received for transportation before checked, and it was rifled after delivery and before being checked, and by reason of the gross negligence of the defendants, or, in other words, if they found that the defendants held till checked as warehousemen, and incurred a liability as such, they were liable in this action. That we think was error. There is no count adapted to such a recovery.

But the error is not one which entitles the defendants to a new trial.

The facts stated in the motion and not denied, were sufficient to justify a direction by the court to the jury to render a verdict for the plaintiff. They show conclusively that the trunk was received for transportation.

The reasonable convenience of travelers requires that they have an opportunity to deliver baggage at any reasonable time before the departure of the train, and it is therefore the duty of a railroad company to keep an agent at all important stations to receive and take charge of baggage, Jordan *vs.* Fall River Railroad Company, 5 Cush., 69. For aught that appears such was the custom of the defendants and the agent who received the trunk was there for that purpose.

In respect to passengers the company are carriers merely, and the trunk an article which ordinarily accompanies the passenger. If nothing has been said therefore in respect to the purpose for which it was delivered and received by the agent of the defendants, its reception for transportation would be implied.

But the purpose and the hour were expressly indicated by the plaintiff, and it was received without objection, except that they could not then give him a check. Clearly it was received for the purpose indicated, and the time fixed when by their custom a check would be given him. The length of time which elapsed between its reception and the departure of the train could make no difference.

In the case of The Camden and Amboy Railroad Company *vs.* Belknap, 21 Wend., 354, trunks were left with the company in the afternoon of one day to go with the owner by the boat of next morning, and one of them was taken from the office of the company through the negligence of the clerk or porter, before the departure of the next boat, and it was holden that they were in the possession of the company as *carriers*, and that they were answerable as such. See also Redfield on Railways, 242–'3.

The custom of checking can have no effect upon the character of the delivery. That custom did not necessarily qualify the delivery and acceptance. The check is in the nature of a receipt, and may be given and received at any time when the convenience and custom of the company dictate. It is not the contract, but evidence of the ownership, delivery and identity of the baggage. It is the delivery and acceptance, the abandonment of all care of the baggage by the passenger, and the assumption of it by the agents of the carriers expressly or impliedly for the purpose of transportation, which fix the liability of the latter as such, and that liability begins when the baggage is delivered to the agent of the company for carriage. Redfield on railways, 246.

Inasmuch therefore as the plaintiff was entitled to a verdict upon the facts, and no injustice has been done, there can be no new trial on that ground.

But there is also error in respect to the amount of damages. The company were liable for money contained in the trunk required by the plaintiff for his personal use and traveling expenses. That is well settled and was conceded on the trial.

But their liability extended no further. The plaintiff admitted that sixty dollars of the money in the trunk was taken with him for the purchase of clothing. That money was in no just sense taken for traveling expenses or personal use. So the defendants requested the court to charge the jury, and we think they were entitled to such charge, in explicit terms, and that on that point the charge and verdict are wrong.

A new trial is therefore advised, unless the plaintiff remits the sum of sixty dollars, which he was not entitled to recover.

In this opinion the other judges concurred.

Madras Railway.

The half-yearly meeting was held on the 6th of May in the London Tavern; General Duncan Sim in the chair, when the report, of which the following is an abstract, was read:—No additional length of railway has been opened in the past half-year. There have been carried 651,072 passengers, against 559,186, and 123,526 tons of goods (exclusive of railway materials), against 71,183 tons in the corresponding six months of the preceding year. The receipts for the half-year ending 31st December amounted to 127,705*l.*, against 87,763*l.*, and the net receipts to 46,308*l.*, against 25,450*l.*, in the corresponding period of 1862. The increase in receipts of the half-year, as compared with the corresponding period, has been 45½ per cent., while the net receipts have risen 82 per cent. The shipments from this country of materials, plant, and stores during the year 1863 amounted to 62,672 tons in 85 ships. The works on the South-West line have withstood satisfactorily the heaviest monsoon that has been experienced for some years. The permanent way is generally in good order. The progress made in substituting iron sleepers has enabled the engineer to reduce considerably the number of men employed and the expense of maintenance in the first division of the line. In the second division the process of replacement is going forward. The renewals in the third division are completed, but it still requires a good deal of ballasting and attention. The wooden sleepers on the west coast are replaced as they decay by better seasoned and selected timber, and trial is being made of Boucherie's process for impregnating and preserving different kinds of country wood, of the result of which accurate records are kept. The stations are all in good order. Unforeseen delays have prevented the opening of the Bangalore branch, but the end of July is the date now named for the completion of the works. Material trains have been running over the first 40 miles of the line, and little or nothing remains to be done on the remaining part beyond completing the laying of the permanent way, which was proceeding as fast as materials could be put down, and every exertion is being made to open throughout to Bangalore as early as possible. The electric telegraph of the South-West line is in good working order, and Bangalore has been placed in communication with Madras. The gross receipts from passengers traffic amount to 44,080*l.*, against 36,758*l.* for the corresponding half-year, showing an increase of 7,272*l.*, or 19½ per cent. The goods traffic, exclusive of railway materials, weighed 107,010 tons, the receipts being 53,135*l.*, against 63,051 tons and 30,517*l.*, for the corresponding half of 1862. The total receipts for the half-year ending 31st December amounted to 121,089*l.*, the working expenses to 40,060*l.*, the maintenance of way to 37,948*l.*, leaving the net receipts 43,071*l.* The receipts per mile on the 406 miles open were 298*l.*, against 208*l.*, and per train mile 6*s.* 3½*d.*, against 4*s.* 11½*d.*, the expenses being 4*s.* 0½*d.* per train mile, against 3*s.* 6½*d.* at the corresponding period of 1862. The net receipts amount to 43,071*l.*, against 24,114*l.* for the corresponding period, showing an increase of 78½ per cent. The working expenses were 64.43 per cent., against 71.40 per cent. for the corresponding period of 1862. The result of further experience on the North-West line with the iron sleeper road is most satisfactory. It is in excellent order, and the cost of maintaining it has been under 6*l.* per mile per month for the half-year. The receipts on the 41 miles of this line open amount for the half-year to

6,616*l.*, against 3,424*l.*, for the corresponding period of 1862 on 35 miles open; the expenditure to 3,379*l.*, or 51 per cent. against 2,083*l.*, or 62 per cent. The capital account shows that 6,-929,317*l.*, had been received, and 5,009,232*l.*, expended and allocated, leaving an unallocated balance of 1,920,085*l.*, of which 1,372,649*l.*, appears to have been expended, leaving 547,436*l.*—*The London Railway Times.*

Chicago & Great Eastern Railway Company,

SEVEN PER CENT

FIRST MORTGAGE BONDS.

The subscribers now offer for sale the remainder of the issue of SEVEN PER CENT. FIRST MORTGAGE BONDS of the CHICAGO AND GREAT EASTERN RAILWAY COMPANY, appropriated to the construction of their road from Chicago to La Crosse, Indiana.

The rails have all been purchased for the completion of the entire line, much below the present market value, and are now going forward to Chicago. The work is rapidly progressing and the Company expect to open the road for traffic early the ensuring Fall, forming a new and very short trunk line from Chicago to the Eastern markets.

The interest payable during construction has been provided, and is now on deposit with the Bankers of the Company. Apply to

BAIRD'S PATENT Incrustation Preventer,

AND REMOVER

FOR STEAM BOILERS,

In either Salt or Fresh Water. No invention connected with Steam Power combines so many advantages as this. The economy in fuel alone, from its use, repays the cost of the preventive. Certificates from Engineers and owners of Steam Boilers, at sea and on shore, can be seen at the office of JAS. F. LEVIN,
23 Central Wharf, Boston.

MERRITT & WALCOTT, 69 Courtlandt Street, New York.
29 Front Levee, New Orleans.

COAL.

ANTHRACITE

AND

BITUMINOUS COALS

of all kinds.

QUINTARD & WARD,

11 Pine street, N. Y.

U. S. 10-40 BONDS.

These Bonds are issued under the Act of Congress of March 8th, 1864, which provides that all Bonds issued under this Act SHALL BE REDEEMED IN COIN, at the pleasure of the Government, at any period NOT LESS THAN TEN NOR MORE THAN FORTY YEARS from their date, and until their redemption FIVE PER CENT. INTEREST WILL BE PAID IN COIN, on Bonds of not over one hundred dollars annually and on all other Bonds semi-annually. The interest is payable on the first days of March and September in each year.

As these Bonds, by Act of Congress, are

Exempt from Municipal or State Taxation,

their value is increased from one to three per cent. per annum, according to the rate of tax levies in various parts of the country.

At the present rate of premium on gold they pay

Over Eight Per Cent. Interest

in currency, and are of equal convenience as a permanent or temporary investment.

It is believed that no securities offer so great inducements to lenders as the various descriptions of U. S. Bonds. In all other forms of indebtedness, the faith or ability of private parties or stock companies or separate communities only is pledged for payment, while for the debts of the United States the whole property of the country is holden to secure the payment of both principal and interest in coin.

These Bonds may be subscribed for in sums from $50 up to any magnitude, on the same terms, and are thus made equally available to the smallest lender and the largest capitalist. They can be converted into money at any moment, and the holder will have the benefit of the interest.

The Funded Debt of the United States on which interest is payable in gold, on the 3d day of March, 1864, was $758,985,000. The interest on this debt for the coming fiscal year will be $45,087,126, while the customs revenue in gold for the current fiscal year, ending June 30th, 1864, has been so far at the rate of over $100,000,000 per annum.

It will be seen that even the present gold revenues of the Government are largely in excess of the wants of the Treasury for the payment of gold interest, while the recent increase of the tariff will doubtless raise the annual receipts from customs on the same amount of importations, to $150,000,000 per annum.

The authorized amount of this loan is Two Hundred Million Dollars. Instructions to the National Banks acting as loan agents were not issued until March 26, but the amount of Bonds reported sold at the United States Treasury is over

$70,000,000.

Subscriptions will be received by the TREASURER OF THE UNITED STATES at Washington, and the ASSISTANT TREASURERS at New York, Boston and Philadelphia, and by the

First National Bank of New York, No. 4 Wall Street.

AFFORD EVERY FACILITY TO SUBSCRIBERS.

CAST STEEL.

MANUFACTURED BY

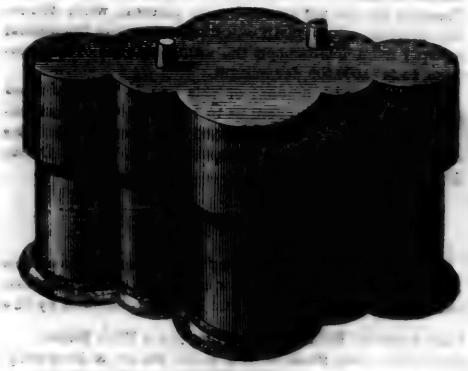
NAYLOR, VICKERS & CO., SHEFFIELD, ENGLAND.

CAST STEEL TYRES WITHOUT WELD,

Reversible Crossings and Frogs, Disc Wheels, Pistons and Piston Rods without weld, Crank and Straight

AXLES, AND EVERY DESCRIPTION OF STEEL FOR RAILWAY PURPOSES.

STEEL CROSSINGS have been in use more than three years with very little perceptible wear, in places where the ordinary ones had to be replaced every four months. They have been estimated to be good for ten years in the worst places.



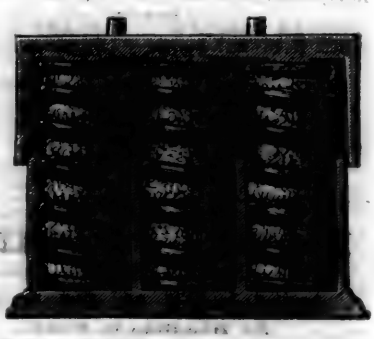
THE "VICKERS" TYRES are in constant and extensive use on almost all the Railways in Great Britain, and also on many roads in other parts of Europe. Their chief advantages are:—1. Their Durability: they will outlast any Iron Tyre without being turned, and for this reason are cheaper than Iron Tyres (free of cost). 2. Their Safety: being without a weld they are not liable to break, and Steel is proved to be a stronger and tougher metal than any other. 3. Their Uniformity: they do not wear in flat places nor "laminate." 4. They are not injuriously affected by frost, and are guaranteed to stand the severest climate.

STEEL AXLES will be found economical, because they may with safety be made much lighter than those of Iron. They will wear longer and "smoother," and will consume much less oil; nor are they liable to granulate from constant use.

For CIRCULARS, GIVING FULL PARTICULARS AND TESTIMONIALS, PRICES, etc., apply to **NAYLOR & CO.,**

421 Commerce street, Philadelphia; 99 John street, New York; 80 State street, Boston.

UNION CAR SPRING
MANUFACTURING COMPANY.



Office, 132 Broadway,

MANUFACTORY,

286 and 288 SEVENTH AVENUE,

NEW YORK.

CHARLES BUTLER,
President.

THOMAS BOND,
Treasurer.

JOHN HALDEMAN,
Superintendent.

MANUFACTURED solely by the "UNION CAR SPRING MANUFACTURING COMPANY."

This Spring is made by placing Steel Spiral Springs packed with wool in the inside only, in a casting with cylindrical apertures or cells just large enough to receive the filled spirals, with a cap or cover fitting over and outside the casting.

Size and capacity can be varied so as to give any amount of elasticity, or, any amount of carrying capacity.

These Springs have been examined by many of the leading railroad experts of the country and in every instance with unqualified approval.

Springs that were rudely made before our manufactory was in operation are running with a satisfactory success on important roads. A set of Freight Springs imperfectly made and tempered were placed by the Penn. Central under their heaviest Freight Locomotive tender on the mountain division of their road, and gave entire satisfaction. They placed another set on one of their Freight Cars, which with its load made a total weight of 32,000 pounds and still left a motion of half an inch.

Most Railroad experts agree in the opinion that they have no spring which meets their wants. One spring which has great softness, has almost as much lateral motion as vertical; is rigid in cold weather, and short lived. Another spring which has life, has so much rigidity as to wear the roadway and rolling stock as much or even more than the twisting which follows the combination of an excessive lateral and vertical motion. Springs of other combinations must be made rigid in order to preserve their component parts.

We believe we have succeeded in avoiding these objections and can offer a spring, which while it is elastic, will have great range of motion, with a direct vertical action, and durability.

Wool is one of the most indestructible of elastic substances, and has an elasticity which cannot be entirely exhausted with any weight which can be placed on a car, and yet, the back-bone of the Spring is the Steel Spirals.

The impossibility of exhausting with any usual load the column of wool in the spiral, prevents the Spirals coming home, and bringing steel against steel, which by causing crystallization, destroys the steel. The wool is packed in the coils by a powerful press, or it would be of no service.

Our springs are light in weight and easy of adaptation, as they can be placed where any other spring can be placed, and besides, they have that which is only acquired elsewhere by placing two or more springs together, viz: breadth of base.

We ask, when it is possible, an inspection of our works, as we feel convinced that an examination there will prove the superior merit of our Springs, and the perfection of our process.

We ask that you shall order one set, at least, and judge for yourself by personal test, and if you have bolsters under your tenders, make the test there, as it is the most severe.

The excellence of our Spring, its ease of adaptation, its meeting the great want expressed by railroad men that their freight cars should be carried by elastic springs both to save roadway, rolling stock, and *to carry freight in nearly as good order as it can be carried by water*, together with the *saving* in motive power by drawing a *lively* load instead of a *dead* load, will commend our Spring to your attention.

The Great Indian Peninsula.

It is very difficult for the American reader fully to understand the abstracts of the Reports which are made by the East India Railway Company Managers to their stockholders, without reference to a map. Yet they are really of great value to Engineers in this Country, as they illustrate large conceptions, rapid execution and a happy combination of ample means expended with great scientific skill. No complete account of the East Indian railways has yet come from the American press even in the shape of a republication, though we believe there are several such in print in England.

A good general idea of them may be formed from the lecture delivered a few years since by Dr. Buist before the British Asiatic Society. India, ruled by the British Government is in the shape of a peninsula, with such physical configurations as to have occasioned a necessity for at least three different systems of railways, which are called the Deltoid, the Ghautee and the Concanny. The first traverses the Deltas of the Indus and the Ganges with grades of 4 or 5 feet per mile, for they are parts of the vallies of the Indus and the Ganges, and neither curves nor gradients have embarrassed the Engineers to any great extent. The real obstacles were the inundations, the viaducts and the river courses. For hundreds of square miles not even a useful peble could be found, and the ballasting had to be prepared of clay turned into a sort of brick. In the Ghautee, Ghat, or mountain regions, while materials of all kinds are abundant, the curves and gradients were fearful. Mountain masses 20 or 30 miles long, and 2 or 3,000 feet in height had to be passed, while the Concanny system presented wide rivers and salt marshes to be overcome, and the competition of cheap and easy navigation. Yet over all these has been gained a complete triumph.

Mr. Vignolles first brought forward the idea of the East Indian Railways in 1838 to the notice of the Directors of the East India Railway Company, and at the present time the great Trunks and the connecting lines are rapidly approaching completion, and are in fact in use for thousands of miles in all directions.

The Great Indian Peninsula stands in the front rank of these works and was commenced in 1851. 310 miles were finished in 1862 and the report at the half yearly meeting of the stockholders in London made a few weeks since informs us, that in Dec. 1868, 542 4-10 miles were completed. The original cost of construction was estimated at $45,000,000 and the report shows that the capital employed has been swelled to $53,918,450, and that a further sum of $10,000,000 and the issuing of debentures to the extent of $15,000,000 more will yet be required to finish the work. On these sums there is a guaranteed interest of 5 per cent by the Government of India, but there is no expectation that the shareholders will hereafter be obliged to resort to the guarantors. We may contemplate a similar result for our own Government after the Pacific Union is constructed. The current receipts and expenditures for the last half year ending in December 1863 we stated as follows:

The gross receipts for the half-year ending December last amounted to 207,870*l.*, against 153,283*l.* for the corresponding period of 1862, showing an increase of 54,587*l.*, or 53*l.* per mile. The gross receipts per mile averaged 383*l.*, or 7s. 0¾d. per train mile, against 330*l.* per mile in the corresponding half of 1862, and 6s. 6¾d. per train mile. The number of passengers conveyed was 1,707,210, against 1,379,081 in the corresponding half-year. The working expenses amounted to 147,560*l.*, or 70.99 per cent., including 23,734*l.*, or 11.42 per cent., for compensation; and to 95,020*l.*, or 61.99 per cent., including 2,648*l.*, or 1.72 per cent., for compensation for the corresponding half of 1862.

The full measure and development of the line will be found in its complete communication between Bombay and Calcutta, and Bombay and Madras, the former of which is expected to be made by the close of the present year. It appears from the report that connections are in progress with Jubbulpore, and from Mulkapore to Sheagaum into the Nagpore territory, and from Sholapoor to Hyderabab; further surveys having resulted in lessening the gradients and lightening the work.

The Directors are confident of great future results, having access to immense coal fields, finding the traffic on the increase, and new and favorable views taken of the improvements by the more intelligent and influential Natives. Cotton is one of the staples of transportation. At Bombay large and commodious stations for goods to be delivered in the harbor, and for passengers in the city were soon to be constructed. Bombay is on an island separated from the mainland by a narrow strait, and is 770 miles from Madras, 1,308 from Calcutta and has a population of about 220,000, of which three-fourths are Hindoos.

From these brief statements we may gather enough to encourage us in the great work we have now in hand, the Union Pacific Railroad, which under the recent and liberal legislation of Congress should now be pressed to an early conclusion. The rapid construction of the Eastern division to the 100th degree will enable the residue to be built under very favorable circumstances, far more so than any of the railways of India. And when we see a single railway like that under notice has cost, or will cost about $70,000,000 we can also see that the appropriations for the Union Pacific nearly twice the length of the former, which has but one obstruction to overcome resembling the Ghauts of India, to wit the Rocky Mountains, are likely to be amply sufficient.

Philadelphia and Reading Railroad.

The following is a comparative statement of the receipts and expenses of this road for the fiscal years ending November 30, 1862 and 1863:

	1862.	1863.
From passengers	$403,563 77	$566,520 38
" merchandise	523,416 16	673,142 61
" coal	2,879,419 55	4,897,200 04
" U. S. mail	19,618 00	21,309 34
" miscellaneous	85,712 74	94,729 65
	$3,911,830 22	$6,252,902 02
Working expenses:

New coal barges	77,880 00	
Real estate	238,019 29	
		2,124,368 98
Dividend fund for the year		$1,582,531 35
Disposed of as follows:		
Sinking funds	$210,830 30	
State tax on capital	43,136 90	
Dividends on pref. stock	108,626 00	
		362,593 20
Balance of dividend fund, 1863		$1,219,938 15
Add balance dividend fund, 1862		951,321 14
Total reserved fund		$2,171,259 29

The number of passengers carried in 1863 was 211,972, against 150,970 in 1862, an increase of 61,002, and the increased receipts therefrom $162,956. The number of tons of merchandize transported was 647,363, against 451,733 tons in 1862, an increase of 195,630, and the increase in receipts therefrom $149,727. The coal tonnage amounted to 3,065,261; in 1862 it was 2,310,991, an increase of 754,270 tons, with an increase in receipts of $2,017,781. The total increase in gross earnings over those of the previous year was $2,841,072, with an increase in expenses, including renewal fund, of $1,100,104—making the increase of net profit, $1,100,104. The amount to credit of reserved fund, November 30, 1862, was $990,956 21; from which is deducted for sundry drawbacks on traffic in 1862, the sum of $39,635 07—leaving the balance as above, $951,321 14. The total reserved fund now stands at $2,171,259 29.

The equipment of the road consists of 166 locomotives, of which 137 are first class, 21 second class, 5 third class and 3 fourth class; 94 passenger, 24 baggage, and 16 mail and express cars, all 8-wheel; 3 iron and 2,624 wooden 8-wheel coal cars, and 2,974 iron and 1,940 wooden 4-wheel coal cars—making a total of 7,551, equivalent to 5,094 8-wheel cars. Of the 879 cars for freight, etc., 507 are 8-wheel, and 372 4-wheel, equivalent to 698 8-wheel cars. In addition to the above there are owned and used in the management of the road, in transportation department, 35 8-wheel and 77 4-wheel freight cars; 4 small passenger cars; 23 steam engines; 10 snow ploughs; 15 carts, wagons and drays; and 80 horses and mules for hauling in Philadelphia and elsewhere. And in roadway department, 1 passenger car, 1 wreck car, 38 8-wheel and 262 4-wheel freight cars. The equivalent number of 4-wheel cars in use on the road is 12,201.

There have been added during the year, 23 locomotives; 214 4-wheel and 1,183 8-wheel coal cars, and 120 4 and 8-wheel dumping, freight and other cars—equal to 2,715 4-wheel cars. Eight locomotives and 83 freight cars have been rebuilt during the year, and their cost added to transportation expenses.

The expenses of transportation department have increased $553,362 66, compared with those of 1862. This difference is explained by the large increase in the amount of coal and general merchandize, and in the number of passengers transported in 1863; the high price paid for coal, iron, oil, and all other materials, and for wages of every description; the cost of working the Little Schuylkill Railroad from April 1, 1863, a period of eight months; and of working the East Mahanoy Railroad from June 22, 1863; and the additional cost of working the Swatara, Mt. Carbon, Mahanoy and Broad Mountain, and the Union Canal Railroads during the whole of the past year, compared with similar expenses during a portion only of 1862.

The gross tonnage of the road, 4,391,877 tons (exclusive of weight of engines and cars;) exhibits a large increase over any preceding year; and the efficiency of the locomotives transporting it has been fully maintained—the average load of coal hauled by each engine having been 514½ tons, being 57½ tons greater than in 1862, and largely in excess of any previous year.

In addition to the heavier coal tonnage, the other great staples of the road show a gratifying increase—pig metal and manufactured iron, iron ore, lumber and live stock, having been carried in larger quantities than ever before.

The Lebanon Valley Branch Railroad continues to prove a valuable feeder to the main line, having transported 282,798 passengers and 647,982 tons of freight during the past year. Of which 411,257 tons of coal and merchandize, and 45,845 passengers passed over the main line of the Reading Railroad. The revenue of the Lebanon Valley Branch road exclusively was $669,959 30; and the expenses, including total cost of working the road, $229,749 80. In addition to the above revenue, $352,003 43 was received from that portion of the same merchandize and passengers which passed over the main line of the Reading road.

The total number of miles run by engines over the main line in transportation department the past year was 1,755,699; in roadway department, 47,518; in renewal, etc., department, 29,971—total, Reading Railroad, 1,833,185; total, Lebanon Valley Railroad, 331,787; total, Chester Valley Railroad, 33,771; on lateral roads in coal region, 522,946—total, 2,721,689. Miles run in 1862, 2,088,166—increase, 633,523.

The total tonnage for the year on Main and Branch roads, including weight of passengers, in tons of 2,000 lbs., was 4,391,877. The total number of tons hauled one mile, including cars but exclusive of engine and tender, was 740,315,180. The average weight of loaded coal trains down was 903.5; empty coal trains up, 327.3; do., passenger trains, 64.

The total number of miles run by all engines owned and used by the company from May, 1838, to November 30, 1863, was 31,269,359. Total number of tons hauled one mile between same dates, 7,638,673,733. Total amount of coal transported from commencement to date of the report, was 32,759,683. The total tonnage of the road was 44,650,029.

The total number of passengers carried during the year was 576,861; number of miles traveled by same, 19,501,224—equal to 211,970 through passengers carried over the whole road. The total number of passengers carried to date of the report, including Philadelphia Branch road was, 5,435,308.

The Philadelphia Branch road, between Philadelphia and Schuylkill Viaduct is three miles long. The tonnage was 5,389; number of passengers 15,715; total receipts $3,307 55.

Since the last annual report, the Little Schuylkill and East Mahanoy Railroads have been placed in charge of the roadway department, and the accounts cover the repairs and renewal of these roads for eight months, and also eight months of the Union, and six months of the Mt. Carbon, Good Spring and Lorberry, in addition to those of 1862. An average advance of 50 per cent. in the value of labor and materials has seriously affected the cost of maintaining the road and its branches, being $117,278 in excess of last year. This is an increase of 45 per cent., while the tonnage carried 100 miles, has been enlarged from 2,443,377 to 3,404,269—an increase of 39 per cent. Per mile of track it has been $728 14 against $599 33, and per ton carried 100 miles it has been 10 99 cents, against 10.51 cents in 1862. It will thus be seen that the advantage to be derived, under ordinary circumstances, from a large tonnage decreasing the initial expenses, has this year been neutralized by the general inflation of prices. The cost of renewing rails has been 2.67 cents per ton against 2.56 cents in 1862. The extent of railway in charge of this department November 30, 1863, is as follows:

	Miles of Main track and Br'ches.	Miles of Sidings.	Total Miles.
Philadelphia and Reading	198.50	63.61	262.11
Willow street	3.50	0.54	4.04
Mt. Carbon & Pt. Carbon.	5.00	7.18	12.18
Mount Carbon	7.83	2.00	9.83
Lebanon Valley	72.98	9.29	82.27
Chester Valley	21.50	1.80	23.30
Schuylkill Valley	25.23	1.49	26.72
Mill Creek	15.03	3.11	18.14
Union	3.47	0.61	4.08
Good Spring	6.75	0.27	7.47
Lorberry	5.62	0.89	6.51
Little Schuylkill	29.56	18.83	48.39
East Mahanoy	8.04	1.07	9.11
Total	403.01	111.14	514.15

The expenses charged to renewal account during the year amount to $323,886 59, and are $116,144 in excess of last year, viz:

Road bed and tracks	$135,708 24
Sidings and switches	42,046 54
Bridges	82,808 50
Stations	83,323 31
	$323,886 59

In addition to the above, the following items of work have been executed, which are not chargeable to the renewal fund, viz:

Construction of West Reading R. R.	$22,304 91
" Port Kennedy R. R.	2,826 77
Extending Good Spring (formerly Swatara) Railroad	4,423 42
Finishing East Mahanoy Railroad	15,071 03
	$44,626 13

The three first items will be represented by capital stock in the respective companies, and the last by a cash payment.

The West Reading Railroad consists of 1½ mile of track, to and along the river front of that city, one-fourth of a mile of which only remains to be laid.

The Port Kennedy Railroad is a branch one mile in length to extensive lime-kilns, and is approaching completion.

The Good Spring Railroad extension to new coal openings in the Pine Grove region is 2½ miles in length. It is now nearly ready to receive the rail track, and when finished will add to the business of the company.

The East Mahanoy Railroad is yet in an unfinished condition.

The connection between the Lebanon Valley and East Pennsylvania Railroad at Reading has been completed at a cost of $21,222 63.

Contracts have been entered into for a connecting link between the Schuylkill Valley and Little Schuylkill Railroad near Tuscarora, and for a branch to an extensive colliery, now building near the same spot. When these works are completed they will add largely to the business of the Schuylkill Valley Railroad.

It was confidently expected that 12 miles of second track would have been added to the Lebanon Valley Railroad during the year; but owing to the difficulty of procuring iron, only two miles of second track and three and a half miles of main track have been laid. Seven and a half miles of sidings have been laid at various points to meet the pressing demands of a swelling traffic, and yet the want of more track room is seriously felt at the important stations.

The short supply of rails in times of business inflation, and the inability of manufacturers to fulfil their engagements, are at this time subjects of grave importance in railway management.

The following is an abstract from the General Account of the company, November 30, 1863:

Railroad		$14,449,398 39

Railroad Earnings--Monthly.

The earnings of the Michigan Central Railroad for the month of June, 1864, were ... $265,780 35
Corresponding month of previous year 206,221 37

Increase ... $59,558 98

The earnings of the Michigan Southern and Northern Indiana Railroad for the month of June, 1864, were ... $311,717 00
Corresponding month of previous year 237,982 00

Increase ... $73,735 00

The earnings of the Chicago and Rock Island Railroad Company for the month of June, 1864, were ... $205,866 00
Corresponding month of previous year 166,606 00

Increase ... $39,260 00

Customs Revenue at New York.

The customs revenue at the Port of New York for the fiscal years ending June 30, 1863 and 1864, compare as follows:

	1862-3.	1863-4.
July	$7,211,817	$4,912,718
August	4,762,581	6,332,334
September	5,239,045	7,270,543
October	4,309,419	6,238,943
November	3,003,270	5,075,846
December	2,664,594	5,248,189
January	4,127,906	6,180,586
February	3,590,713	7,471,027
March	4,554,460	7,659,770
April	3,957,197	13,982,555
May	3,873,865	3,908,058
June	3,738,924	3,348,010
Total	$51,033,801	$77,628,529
Total at New York, as above		$77,628,529
At other ports		25,589,664
Total Customs of year		$103,218,193
Interest on present Gold-bearing Debt		50,823,672
Surplus		$52,394,521

☞ The Managers of the Susquehanna Canal Company announce the following charges for tolls for the month of July at 19 cents per 1,000 pounds; for the months of August and September 20 cents, and from the 1st of October to the end of the season 22 cents.

Foreign Dry-Goods Trade.

Buffalo and Lake Huron Railroad.

The report of the directors for the half year ending January 31, 1864, states that the traffic receipts show a larger aggregate amount than has been taken during any previous half year, amounting to £59,907, being an excess of £12,547 over the corresponding period of 1863. Of this increase, £5,306 has been derived from passenger traffic, being 40 per cent. excess over the corresponding half of last year. This is owing to the efforts made to develop the through passenger traffic by the route in connection with the Grand Trunk to Detroit, and although a slight result, it may be taken as an earnest of what may be done when the bridge across the Niagara River at Buffalo is constructed. But for the serious interruption to traffic in the last five weeks of the half year by unprecedentedly severe weather, during which the want of the bridge was severely felt, the results would have been much more satisfactory. The pecuniary loss to the company during this period by reduced traffic and by increased expenses was very considerable. The working expenses show a considerable increase as compared with the corresponding half year, owing partly to the increased mileage, but also owing to exceptional circumstances. The item of maintenance is £1,700 in excess, but this appears to be owing to an insufficient charge in the corresponding half of last year. As compared with the average of nine half years there is a slight decline. The amount paid for haulage to the New York Central, and for transportation of freight, shows an increase commensurate with the increased traffic. The whole of this item, £3,850 will be saved when the line is connected with both of the American roads at the bridge. The board being more than ever convinced of the necessity for the construction of the proposed bridge across the Niagara River, have done all in their power to promote the formation of the company required under the charters. They have now the pleasure to state that the subscription books have been closed, with application for three times the amount of stock required.

The repairs of the road have been interfered with by the non-arrival of 500 tons of rails shipped in July, as an addition to the reserve, but which arrived out only in April. On this account, and from injury done to the road by the severe weather already alluded to, several accidents have occurred, none of them, however, of a very serious nature.

There has been a gradual improvement carried out in the condition of the company's cars, and the whole stock is in good condition. The expenses per train mile 1.06 (cents) more than the corresponding period of 1860, arise from the complete overhauling of the stock. Of the twenty-seven engines, twenty-two are in first class condition, three in good working order, and two under repair.

Since the publication of the last report, the directors, acting on the resolution of May 1863, have carried out the views then expressed by constructing an additional amount of rolling stock, which has been mainly instrumental in earning the increased receipts observable in the present returns.

An agreement was signed in December last with the Grand Trunk for mutual running powers between Buffalo and Detroit; and application was made in this session of the Provincial Parliament for an act to ratify the arrangement. The result of this measure will be to give access for both companies to the railways running east and west of these points, and will thus form a continuity of connection between New York and the Western States. Subsequent negotiations have led to a preliminary agreement being signed enabling the Grand Trunk to work the road in unison with its own system, upon the principle of a division of net receipts. The details will be submitted to the meeting of proprietors on 9th June, for consideration and approval.

The committee appointed by the bondholders, acting in concert with Messrs. Bischoff, Coxe, and Bompas, have recommended to the board that a sum of £160,000 should be raised for the purpose of paying off the present floating debt of the company, increasing the rolling stock, laying down a third line of rails from Buffalo to Stratford, completing the stations at Goderich and Buffalo, and subscription towards the bridge at Buffalo, over which the company desire to have a controlling interest. The directors, however, trust that, under the arrangement with the Grand Trunk, they will be enabled to reduce materially the amount necessary to be raised for the final adjustment of their engagements.

Pending the necessary financial measures of the company, application has been made to the Legislature for an extension of time to complete the Hamilton and Port Dover, in order to obviate any difficulty that may arise from premature action in this matter.

The improved aspect of the commercial resources of the province of Canada, and the yearly development of trade and manufactures exhibits a healthy tendency, which must operate in a continued state of progress. This must ultimately promote the interests of all industrial undertakings, in which the system of railways and the growing traffic of the country will be largely benefitted.

Lehigh Valley Railroad.

The Lehigh Valley Railroad, by purchase, came into possession of the Beaver Meadow Railroad on the 1st inst. The Quakake Road was purchased by the same Company last Spring. These purchases give the Lehigh Valley Railroad Company a continuous line from Easton to the Catawissa and Williamsport railroad, and, by the construction of the Penn Haven and White Haven railroad which is now completed and running, a continuous line from the mouth to the head waters of the Lehigh river. The construction of about fifteen or twenty miles of railroad will extend the Lehigh Valley railroad into the heart of the Wyoming coal-fields. It is now, by the construction of the Lehigh and Mahanoy railroad, in connection with the Schuylkill coal-fields. Thus it will be seen that ere long the Lehigh Valley railroad will extend into each of the three great coal-fields of Pennsylvania.

Hanover Branch Railroad.

The earnings of this road during the year ending March 31, 1864, were:

From freight	$16,125 62
" passengers	19,130 64
" mail, express, etc	3,160 74
Total Hanover Branch Railroad	$38,417 00
Working Gettysburg Railroad	5,232 50
" Littlestown "	1,336 60
Total earnings	$44,986 10

The expenses were:

Transportation	$5,285 72	
Motive power and fuel	10,847 83	
Repairs of road	6,478 38	
Maintenance of cars	2,385 09	
General expenses	1,256 22	
		26,253 24
Net earnings		$18,732 86

The receipts from all sources during the year have been as follows:

Earnings, as above	$44,986 10
Balance, as per last report	1,175 15
Sale of materials, etc	3,461 99
Materials used in excess of purchase	5,498 40
	$55,121 64

The disbursements were:

Working expenses, as above	$26,253 24
Extraordinary	1,467 54
Floating debt	17,400 00
Dividends	4,021 00
Interest, taxes, etc	1,606 87
Materials	4,348 70
Balance in treasury	24 29
	$55,121 64

The earnings exceed those of the previous year $6,474 29; and the expenses, $6,997 99—making a decrease of $523 70 in net earnings.

There were carried over the road during the year, 17,554 through and 6,868 way passengers, against 13,948 through and 5,639 way passengers of the previous year. The report says:

The sale of the Littlestown Railroad under foreclosure of the Mortgage being announced, and apprehensions entertained of its purchase by parties not interested in its maintenance, but with a view to vacating it and removing the iron and superstructure. As this road in the past was regarded as a valuable tributary, and from the present activity in the iron trade and developement of extensive beds of ore in its locality, a great augmentation of the receipts of both roads from this traffic being anticipated, the Board resolved to co-operate with the bondholders interested in

its perpetuation and purchase the road. This has involved an investment of $10,000 in the First Mortgage bonds of that Company at 90 per cent. An agreement has also been made with those bondholders providing for the exchange of the heavy rails on one mile of the track of that road for a like quantity of the light rails on this road at a difference of $25 per ton.

The equipment consists of 4 locomotives, 3 passenger, and 20 freight and construction cars.

GENERAL STATEMENT.

Capital stock	$116,850 00
Mortgage bonds (Littlestown R. R.)	10,000 00
Dividend due	855 00
Bills payable	150 00
Profit and loss	586 84
Profits from earnings of road	106,723 89
	$235,165 73
Cost of road and appurtenances	$179,627 79
Real estate	4,000 00
Equipment	36,265 00
Materials on hand	5,415 00
Bills receivable for cars sold	4,620 00
Due from U. S. and State Government	4,500 00
Due from Gettysburg R. R. Co.	573 65
Rent of Junction House	140 00
Cash in Treasury	24 29
	$235,165 73

Pennsylvania Railroad.

The following is a comparative statement of the operations of this road for the years ending December 31, 1862 and 1863:

Earnings.	1862.	1863.
From passengers	$1,731,392 20	$2,275,536 78
" U. S. troops	379,393 21	514,693 18
" U. S. mails	74,773 43	75,598 20
" expresses	146,851 96	263,128 82
" freight	7,668,419 85	8,602,261 97
" miscel. source	303,460 31	160,194 00
	$10,304,290 96	$11,891,412 95
Expenses:		
Conducting transp.	$1,320,459 78	$1,702,146 73
Motive power	1,824,005 37	2,211,038 02
Maintenance of road	1,345,961 67	1,556,367 57
" cars.	867,332 13	1,193,309 93
General expenses	73,313 64	117,137 96
	$5,431,072 59	$6,780,000 21
Net earnings	$4,873,218 37	$5,111,412 74

Compared with the year 1862, the gross earnings show an increase of $1,587,121 99; with an increase in expenses of $1,348,927 62—making the increase in net earnings, $238,194 37.

The following is a comparative statement of the earnings, expenses and net earnings of the road for the years 1860, 1861, 1862 and 1863:

	Gross earnings.	Operating expenses.	Net earnings.
1860.	$5,932,741 88	$3,636,299 08	$2,296,402 40
1861.	7,300,000 95	3,653,062 76	3,646,938 19
1862.	10,304,290 96	5,431,072 59	4,873,218 37
1863.	11,891,412 95	6,780,000 21	5,111,412 74

The following will show the gross earnings, expenses, etc., of the canals owned by the company during the same time:

	Earnings.	Expenses.	Net.
1860.	$209,365 85	$154,760 63	$54,605 20
1861.	176,109 04	147,872 59	28,236 45
1862.	251,481 76	258,091 56	*6,609 80
1863.	287,156 52	362,374 32	*75,217 80

* Decrease.

The following will show the number of passengers and tons of freight carried during the years named:

	Passengers.	Freight.
1860	1,303,444	1,346,525
1861	1,059,088	1,620,586
1862	1,143,418	2,058,548
1863	1,707,886	2,265,413

The above tonnage of freight is inclusive of coal, but exclusive of fuel and other materials transported for the use of the company; the latter in 1860 amounted to 124,597 tons; in 1861, to 138,499; in 1862, to 164,503; and in 1863, to 188,913. The coal tonnage of these years was 523,233; 707,754; 835,146; and 903,199 respectively.

The following is a statement of the receipts from and expenses of such portions of the Philadelphia and Erie Railroad, as have through its lease been delivered to this company, for the year 1863:

Receipts:		
From passengers		$275,604 20
" troops		20,568 06
" freights		363,234 53
" express		11,800 53
" mails		13,324 99
" miscellaneous sources		23,137 62
		$727,669 93
Expenses:		
Conducting transp	$109,624 28	
Motive power	87,835 84	
Maintenance of road	127,379 33	
" cars	11,756 58	
Thirty per cent. due on lease to meet interest on bonds, etc	218,300 96	
		554,896 99
Net earnings		$172,772 94
Which is chargeable with the interest on the rolling stock, shop machinery, and their probable depreciation, estimated together at about 12½ p.c., say.		$127,772 92
Leaving net profits on lease		$45,000 00

The earnings of the cars of the Pennsylvania Railroad Company in use on the Erie Railroad, gives a total of $3,939 42, which added to the earnings of the Erie Railroad, gives a total of $731,609 35, and leaves, after paying the Erie Railroad Company's proportion, ($218,300 96,) and the working expenses, ($334,859 06,) the sum of $177,449 33, to meet the outlay of the Pennsylvania Railroad Company, in the equipment of the Erie Railroad, etc.

The balance sheet for the Philadelphia and Erie Railroad for 1863, is as follows, viz:

To amount of stock on hand, Jan. 1	$28,175 92
" " bills, during 1863	499,075 31
" " pay rolls during 1863	204,088 17
	$731,339 40
Amount of expenditure in the following departments, viz:	
Conducting transp	$327,925 24
Motive power	87,835 84
Maintenance of cars	11,756 58
" way	127,379 33
Road and shop stock on hand Jan. 1, 1864	80,996 29
Individuals' and company's General Manager's accounts	95,446 12
	$731,339 40

The whole receipts of the company from the operations of its works, including the Philadelphia and Erie Railroad for the year 1863, were as follows:

From the Pennsylvania Railroad	$11,891,412 95
" " Canals	287,156 52
" Phila. and Erie Railroad.	727,669 93
Total receipts	$12,906,239 40

The financial condition of the company, December 31, 1863, is shown in the annexed.

BALANCE SHEET.

Capital stock		$13,430,250 00
First Mortgage Six per cent Dollar Bonds, payable 1880		4,980,000 00
Second Mortgage Six per cent Dollar Bonds, payable 1875		2,621,000 00
Second Mortgage Six per cent Sterling Bonds, payable 1875		2,283,840 00
Bonds due the State of Pennsylvania, bearing 5 per cent interest		6,900,000 00
Mortgages and Ground Rents on Real Estate		164,284 32

American Railroad Journal.

Saturday, July 9, 1864.

Stock Exchange and Money Market.

Since the preparation of our article of the last week, the important information was communicated to the public that Mr. Chase had resigned his place at the head of the Treasury department. Though this event had been contemplated for some time both by his friends and opponents, still the precise moment was uncertain, and there was a shock when the news came. We are enabled to say from the best authority that the causes which led to the result had nothing whatever to do with his financial policy, so that those who believe his system will be much changed under the management of Mr. Fessenden may find themselves mistaken. There is but one policy left while this war lasts, and that is to borrow as much money as may be required and on as good terms as possible, after employing all the other means at the disposal of the Government. And the financier who has now gone into retirement has been more successful in raising money than any one who comes after him will be, if the rebellion is allowed to drag its slow length along for another three years. That Mr. Chase has made several mistakes in the details of his arrangements there is no doubt whatever. The issue of the legal tender 5's bearing interest, instead of taking currency out of circulation, added to it, and the proposition for the 75 million loan was ill timed, for it discredited the 10-40s which were doing well, and would have done better if they had not been interfered with. So too the raising of the rate of interest on deposits in the Treasury from 5 to 6 per cent. was a mistake, for the effect of it was to cause all the previous depositors to withdraw their deposits at 5 and renew them at 6, and the aggregate amount after all, was increased but a few hundred thousand dollars. It is easy to show that by this operation the Government was paying 11 per cent for some of its deposits. The great merit of Mr. Chase was in his large and comprehensive views as to the resources of the nation and the spirit of the people, in a perfect knowledge of the business of his office, which he personally understood and carefully looked after in all its branches, in the great economy he practised in its management, and his thorough correctness in the account keeping department, and his familiarity with his entries and his balances. Indeed his foresight and his accuracy in his estimates were really wonderful, and entirely without precedence in the career of financial ministers. With Mr. Chase we knew where we were, and at what rate we were going. Whether his successors will be as sagacious, or be able to inspire similar confidence in the public mind remains to be seen.

We quote from a cotemporary of Philadelphia the following interesting commentary, as evidence of the late Secretary's ability, though it comes from a source not very friendly to him or the Government.

"As an evidence of the accuracy of the estimate made by Secretary Chase, we find that in his annual report of December 4, 1862 eighteen months ago, he said, "On the supposition that the war may be continued with undiminished disbursements until the 1st of July, 1864, the debt likely to have been then incurred must be estimated at $1,744,685,586 80." On the 28th of June, 1864, two days before the expiration of the period of fulfillment, an official statement of the public debt on that day shows it to be $1,740,036,689 53. If we add four millions for the expenditure or increase of debt of those two days, we have a most wonderful exactitude of calculation and prediction—one, considering the amount involved and the length of time covered in the estimate, that was never before equalled."

Indeed the circumstance is one without a parallel in history, and the statesman who was so far seeing, so accurate, so prophetical, was certainly worth retaining in the Cabinet. We have no wish in these commercial reviews to engage in political speculations, and therefore must pass over the history of the causes which led to Mr. Chase's resignation. We have them from the best authority, and we could set right in their opinions on the subject, many of our cotemporaries if we chose to do so.

The chapter yet to be written on this subject will be a curious one. We may say very briefly however, that the resignation of Mr. Cisco was the match which fired the train, and led to the

change in the Treasury department. His place was long sought for. The possession of the Assistant Treasurership in New York, by persons known to be jobbers and traders in politics, offices, contracts and shoddy is equivalent to the certain gain of a large fortune, not by the official patronage, but in the knowledge of the financial policy of the Government. We have it direct from Mr. Cisco himself that if he had availed himself of his knowledge of the Treasury movements, by corresponding operations in the street, he could have realized ten millions of dollars!

Mr. Chase understood this perfectly, and therefore declined to select from the names proposed. He preferred to be represented by an agent whom he could control and rely upon, even if the position was above his real merit or claims, and this proposition being refused, there was nothing left but resignation, which was now quickly accepted. We may, however, congratulate the Country that in the succession to this department of the Treasury, we shall be sure of integrity, all possible economy, and in the administration of its affairs total exemption from political or official corruption. Of Mr. Chase's personal feelings on the subject we can say with truth, that he is relieved by his change of position.

The first acts of Mr. Fessenden have been popular. He has declined following up the loan for the balance of the 75 millions. This will give new life to the 10-40's and cause their absorption more rapidly. Beyond all question he will close with the foreign loan if it is practicable to adjust the details, and thus introduce a large metallic resource to those he is likely to receive from the customs and California, but we proffer the advice that the proceeds be brought in specie to this Country.

The future policy of the Secretary will be continued in the line adopted by his predecessor, absorption of the excessive currency of which upwards of fifty millions have been recently retired. And here it is proper to remark, that however large the issues were, there was no alternative except that of inflating with local Bank paper if the Government issues had been stopped. Mr. Chase has with the utmost reluctance resorted to the latter expedient. He was compelled to do so because of the enormous, nay lavish expenditures of the war. We are permitted to make the following extract from a letter written by Mr. Chase to a personal friend in this city under date of July 2d. "Congress by authorising and the President by sanctioning immense expenditure, had forced me against my will and all my convictions of true policy to issue legal tenders and offer bonds in excess, and yet would not put the burden of the reduction upon the State Banks where it properly belonged, nor yet give me the means I needed to make the negotiation of loans at home or abroad certain upon reasonable rates. The tax bill and the tariff bills together, were likely to fall short by near a hundred millions of the sum I believed necessary for the credit to secure the required loans." If Mr. Fessenden is to borrow, and no doubt he will have to do so very largely, it is a grave question what he is to borrow and pay interest for. Is it local Bank paper? Are we to pay 6 per cent. for the privilege of using wild cat money, or other money not any better, and which our soldiers, seamen and contractors will probably refuse to receive?

Is the Treasury to come with cap in hand to Bank Directors hereafter to get money on their own terms to carry on the war? We certainly do not like this view of the subject, and yet this is what a large party of financial operators desire to see done.

The gold bill has been repealed. It had but a short trial. While it was in operation there was a sharp decline of about 40 per cent. Since it has been repealed, the decline has been recovered, and an advance has taken place. Strange to say when the news of the sinking of the Alabama arrived, the combination put up the rates full 15 per cent. We would respectfully inquire of the champions of free trade and commercial liberty whether this rise can be attributed to the natural operation of commercial laws; whether there was any possible connection of a legitimate character, between the destruction of a piratical enemy, and a *bona fide* demand in our market for gold. Does it not rather show that the combination, against law, necessity and all patriotic considerations are determined to injure the country all they can, and to show their power, even in the face of the defeat of the rebel cause, to injure and impair the National credit? If Petersburg is taken perhaps gold will be quoted at 15 per cent. more, and if Richmond, fifty per cent. more. If this is commercial and purely commercial, we do not understand the meaning of words, nor comprehend the laws of trade.

The Money Market is rather stringent, 7 per cent. being the rule with lenders generally. Governments have advanced and are in request. The operations of the banks continue to be expansive. They cannot resist the opportunities offered them of making money. On the 2d of July their deposits had decreased from $158,772,982, of the previous week to $154,989,844, but their loans had increased to $198,089,016, from $197,077,002 of the week previous, and their specie the meanwhile decreasing in the same period from $22,000,898, to $21,206,685.

It appears officially from the returns of the fiscal year ending in June, that the total amount of specie received during the year at the New York Custom House was $77,628,529, against $51,033,801 the preceding year. If we add to this sum the receipts at other ports on the Atlantic and the Pacific, viz., $25,589,664, we have the total amount of specie revenue as $103,218,193. If we deduct from this the interest on the gold bearing debt which is $50,823,672, we have a balance or surplus of gold to the amount of $52,394,521. And yet there are people, or rather operators in Wall street, who positively declare there is not a dollar of gold at the command of the Treasury.

The National Banks now organized amount to 674, with an aggregate capital of $63,215,000 on which their circulation is limited by law. It is plainly to be seen that this National system is sure to prevail over all others, and the sooner the local banks come under it the better for them and the country. Their hostility is plainly to be traced to the fact, that if they do so, their circulation will be reduced to limits which they are in no way inclined to adopt, no matter how much they clamor against Government inflation.

The import entries of the past week at the port of New York, amount to $4,811,092, against $3,911,899 same week last season. The export clearances of domestic produce amount to $4,179,995, against $4,211,468 same week in 1863. The export of specie is $561,000, against $398,000 same week last year. The customs for the week are $1,002,000.

The total value of foreign goods imported into the port of Boston for the week ending July 1, was $892,227, against $728,153 for the corresponding week in 1863. The exports were $227,335 against $175,554 for the corresponding week in 1863.

The total value of foreign exports from the port of Baltimore for last week was $148,576.

Railway shares are active in moderation. Large orders came out for Government securities by the last steamers. The almost certainty of a general war in Europe, and the immense power and resources of the North being now more than ever demonstrated, it is natural that the Continental bankers should endeavor to place some of their wealth in a country which grows in spite of all difficulties, and has a colossal strength of purpose which no foreign enmity can shake, and stores of wealth that no expenditure can destroy.

As one of the features of last week's Money Market we may record the fact that several large houses which had been speculating in provisions in the expectation of a further rise in gold, were utterly broken down by the fall which we have already alluded to.

Our latest accounts from abroad advise us of increasing alarm in British monied circles, and the rapid disappearance of silver from circulation in France; to so great an extent as to put the Government to the probable expedient of using zinc as a substitute for small coins.

Atlantic and Great Western R. R.

On the 11th of September, 1860, this road was opened from Salamanca to Jamestown, New York, a distance of 23 miles; May 26, 1861, to Corry, 27 miles; November 10, 1862, to Meadville, 41 miles; January 1, 1863, to Warren, Ohio, 60 miles; June 1, to Akron, Ohio, 59 miles; and same date to Franklin, Pennsylvania, from Meadville, 26 miles; November 10, to Cleveland, 50 miles; December 31st, 1863, to Galion, 81 miles; June 21, 1864, to Dayton, 94 miles; whole length from Salamanca to Dayton, 378 miles. Third rail from Dayton to Cincinnati, 60 miles.

In 1863, this road carried 533,487 barrels of Petroleum, of which 385,220 were shipped from Corry, and 115,032 barrels from Franklin.

Railroad from Oswego to Rochester.

This enterprise seems to grow in dimensions as it is considered. The proceedings of a meeting held in Oswego on the 28th ult., is published at length in the *Palladium* of that city. "It is now proposed to build the road to the Niagara River, at Lewiston, and also to build a line between Rome and Troy—thus making an independent line from Lewiston to Troy. The road between Rome and Oswego (by way of the Rome, Watertown, and Ogdensburg to Richland, and thence by a new line to Oswego), is expected to be finished this Fall. An interview with the managers of the Great Western Railroad (C. W.) was reported, and resolutions of the Board of Trade of Troy were read. The meeting adjourned to a future day, leaving the subject in the hands of a committee."

Berks and Chester R. R.

The Berks and Chester Railroad, to run from Birdsboro' to Downington, is already commenced. The line is now being run by a corps of Engineers, and as soon as they are through, the work will be placed under contract. The road will connect with the Reading road by a bridge over the Schuylkill some fifty yards or so above the present bridge. The line will pass up Hay-Creek Valley, and connect at Downington with a road leading to New Castle, on the Delaware. As the river at that point is never frozen over in the severest season, a large amount of coal will no doubt find its way to market over this new road, especially during the Winter months. The Stockholders are called to meet at Birdsboro' on the 6th of July, to organize the Company by the election of a President and eight Directors to serve until others are chosen. From the character of the men who have this enterprise in hand, we have no doubt that the road will be built at an early day.—*Pottsville Miners Journal.*

The Special Income Tax.

The following is an exact copy of the joint resolution assessing a special tax on incomes:

Resolved, That in addition to an income duty already imposed by law, there shall be levied, assessed and collected on the first day of October, 1864, a special income duty on the gains, profits or incomes, for the year ending the 31st of December next preceding the time herein named for levying, assessing and collecting said duty of all persons residing within the United States, or of citizens of the United States residing abroad, at the rate of five per centum, on all sums exceeding $600, and the same shall be allowed, assessed, estimated and collected, except as to the rate according to the provisions of the existing laws, for the collection of income duty annually where not inapplicable hereto; and the Secretary of the Treasury is hereby authorized to make such rules and regulations as to the time or mode or other matters, to enforce the collection of the special income duty—provided, that in estimating the annual gains, profits or income as aforesaid for the foregoing special duty, no deduction shall be made for dividends or interest received from any avocation, corporation or company, nor shall any deduction be made for any salaries or pay received.

Philadelphia and Erie Railroad.

We are informed that at last this great public highway, which connects the Delaware river at Philadelphia with Lake Erie, is completed. On the second instant, Mr. E. F. Gay, the Vice-President, and Mr. Robert Faries, the Chief Engineer of the road, telegraphed to Mr. Morehead as follows: "Track just closed two miles West of Johnsonsburg. Philadelphia and Erie at last united with iron bands."

The new line will be opened for through travel to Philadelphia and Erie in about two weeks, that length of time being still necessary for the more perfect adjustment of the rails.

☞ The New Haven, New London and Stonington Company have expended their entire earnings during the year in outlays, making their road more valuable and safe. The road needs an increase of its motive power, the absence of which deranges its trains, and the Commissioners have recommended the addition of a new engine, and an additional amount of new iron to its track. This road is still operated by trustees for the bondholders.

☞ The interest of railroad companies' bonds are subject to a tax of 5 per cent., instead of 3 per cent., on and after July 1, 1864. The following letter from the Acting Commissioner of Internal Revenue has been received at the office of one of the railroad companies in this city:

TREASURY DEPARTMENT, Office Internal Revenue }
WASHINGTON, July 1, 1864. }

SIR: In reply to your letter of the 27th ultimo, I have to state that the interest of railroad bonds, due on or after this day, is subject to an internal revenue tax of five per centum.

Very respectfully,
E. A. ROLLINS, Acting Commissioner.

South Branch Railroad.

This road is about 15 miles in length. It branches from the Central railroad of New Jersey at Somerville, and extends to Flemington, the county town of Hunterdon County. It passes through several villages and a highly agricultural district, and opens a speedy and convenient route for passengers and freight from Hunterdon County to New York.

Santiago and Valparaiso Railway.

The paper read at the Institution of Civil Engineers, London, on 19th April, was entitled a "Description of the Santiago and Valparaiso, Chile, South America; with remarks upon resistances from curves on railways, and upon coal-burning locomotives," by Mr. W. Lloyd, M. Inst. C. E.:

The original proposition for uniting the capital of the republic of Chile with its chief port was made by Mr. Wheelwright, an American citizen, in the year 1850. Detailed surveys and plans, prepared by Mr. A. Campbell, an American engineer, were submitted to the Government in the following year, for the construction of a line, the estimated cost of which was stated at about seven millions of dollars. In July, 1852, an act of Congress was obtained by a company of Chilian capitalists; and in the month of October of the same year the works were commenced. Differences, however, arose which led to the services of a staff of engineers being secured from England, under the direction of Mr. C. Maugham; but owing to his decease, in May, 1854, the author arrived in Chile, and took over charge as chief engineer. He then found that although a large sum had been expended, but little real progress had been made. On his recommendation a portion of the original works were abandoned, and an entirely new route adapted. He also endeavored to place the workmen upon a more independent footing, provided proper tools and implements, with the requisite instruction in their use, and established, as soon as possible, the contract system. In this way the works were advanced with considerable rapidity; so that in September, 1855, a length of 8 miles was opened; by December, 1856, a further distance of 20 miles; and in May, 1857, the passenger traffic was opened to Quillota, a total distance of 34 miles from Valparaiso, but on a part of the last section the works were of a provisional character pending the completion of a tunnel through the San Pedro hill. Thus far the line was carried out by Chilian capitalists, assisted by the Government. But its extension to Santiago, a further distance of 80 miles, was entirely executed on account of the State, who purchased the private stock at par. The first sod of the extension was turned in September, 1859, a length of 7 miles was opened in February, 1861, an additional 16 miles in September, 1862, and the whole of the line was completed in September, 1863, by the author as engineer-in-chief to the Government of Chile. The work had thus occupied nearly eleven years; it was believed, however, that it might readily have been accomplished in one-half the time, but for the delays and impediments arising out of the control of the authorities.

Respecting the physical features of the republic, it was remarked that the extreme width of the country seldom in any part exceeded 100 miles; yet in this distance there was a difference of level equal to about 20,000 feet. In fact the country resembled a vast mountain slope—its foot bathed by the Pacific Ocean, and its perpetual snow-covered summit lost in the clouds. The country was also volcanic, and subject to rain-storms of unusual violence. Being thus constantly liable to terrestrial disturbances, and not overburdened with pecuniary resources, the mode of carrying out such enterprises, with security and economy was a deeply interesting study. Evidently the first cost of construction was more important than the future cost of working, as an unusually high rate of fares would still be an enormous economy to the public, and high velocities were not demanded.

The distance in a direct line from Valparaiso (pop. 70,000) to Santiago (pop. 200,000) did not exceed 70 miles. The coach road between the two places pursued a tolerably direct course; but the physical obstacles upon this route rendered it indispensable to seek for some less obstructed means of access to the central valley of Chile. The road crossed three principal ranges of mountains, 1,800 feet, 1,950 feet, and 2,595 feet respectively above the sea level; while the two intermediate planes had an elevation of 830 feet and 1,000 feet above the same level, and the great central plain, in which Santiago was situated, was 1,800 feet above the sea. Merchandise was conveyed in large two-wheeled carts, drawn by eight bullocks, and capable of holding 2 tons, and the time occupied in the transit varied from six days to forty-four days, and the cost from 1*l.* 13*s.* per ton in summer to 3*l.* 17*s.* per ton in winter, the average being about 2*s.* 6*d.* per 100lb. The opening of the line would reduce the cost of conveyance of goods to one-third, and the time to five or six hours; while passengers, instead of paying 2*l.* each by coach, would make the journey in one-half the time at an expense of 10*s.*

The line, as executed, left Valparaiso at its northeast extremity, followed the coast for a distance of 3 miles, crossing its various indentations, or cutting through the projections of syenitic rock. This portion was level throughout, being about 12 feet above high-water mark, and in many places was defended by sea walls of massive granite blocks; but it consisted of a series of curves of small radius. Thence it diverged to the east, and passed up the valley of La Vina del Mar for 5 miles, with gradients never exceeding 1 in 100, and after crossing the ravine of Paso Hondo, it reached the course of the Quilpue River, along which it ran for 10 miles, the works comprising deep cuttings in rocks, heavy embankments, and considerable wrought-iron viaducts, the gradients in many places being as steep as 1 in 50, so that at the eighteenth mile the summit of Lebu, which was 510 feet above the Pacific Ocean was attained. The line then descended for 2½ miles at the rate of 1 in 65, and for 1½ mile at 1 in 90, reaching the Limache River, which was spanned by three bridges, at the twenty-fourth mile. For the next three miles the line ascended again at the rate of 1 in 90, to surmount the second summit of San Pedro, the level of which was 384 feet above the sea. At this point the line passed through a spur of the Andes, by a tunnel 1,600 feet in length, two-thirds of which was through granite and trap rock, containing much water, and the remainder consisted of decomposed rock and clay, so that it was considered necessary to arch the tunnel throughout. The completion of the tunnel having been delayed from a variety of causes, it was deemed advisable to form over the crest of the hill a provisional line, by which the traffic to Quillota was carried for four years, without the slightest accident. This line was worked by one of the ordinary passenger locomotives employed as stationary engine, and by its means 250 passengers and 100 tons of goods were daily conveyed up inclines of 1 in 13 and 1 in 15 on either side, surmounting a height of 150 feet from the starting-point. During the suspension of the tunnel works, the timbering under the wet decomposed rock became decayed; and when attempts were subsequently made to excavate the material, it flowed into the tunnel as fast as it could be removed, until the surface of the ground, 120 feet above, began to sink. The area of this settlement was observed to be much larger than the orifice below. When the ground had sunk 10 feet, a large lattice timber framework was prepared to occupy this area, and upon this brushwood was spread. The excavation below was then proceeded with, the frame rapidly disappeared, and the sides of the cavity fell in as the frame descended. A second frame, similarly covered, was then inserted, after which the miners found they were gaining upon the slip, and eventually succeeded in getting the timbers properly erected. It was then discovered that the first frame had descended to the tunnel, and had perfectly plugged up the aperture.

Beyond the San Pedro tunnel the line descended to the river of the same name, and again ascended to Quillota (pop. 10,000.) This town was 34 miles from Valparaiso, and was situated on the Aconcagua River, one of the principal in Chile, but not navigable in any part, up the valley of which the line was carried for 20 miles. It then diverged to the valley of Tabon, crossed the Vichichulen River, and at the fifty-seventh mile reached the station of Llaillay, where the Tabon incline commenced. The characteristics of this incline, contrasted with other similar works, might be gathered from the following table:—

Name of incline.	Length of incline.	Total rise.	Sharpest curve Av'r'ge Rise.	Radius.	Summit over sea.
Mountains.	Miles.	Feet.	Rise.	Feet.	Feet.
Alleghany	15	1,690	1 in 47	600	2,626
Semmering	13¼	1,325	1 in 47	625	2,887
Bhore Ghaut.	15¾	1,831	1 in 48	990	2,027
Tabon	12	1,360	1 in 46½	604	2,640

There was a maximum gradient of 1 in 44½ for a distance of 3½ miles, and upon it occurred sixteen curves of 604 feet, one of 633 feet, and one of 702 feet radius, for an aggregate length of 1¼ mile. The railway had been carried along the abrupt and rugged sides of the mountains, at an elevation of 300 feet above the valley, the rocks towering above to an altitude of nearly 1,000 feet. The works comprised two tunnels through porphyry, several heavy retaining walls, a number of high embankments, and a succession of deep rock excavations. At one point the line for one-half its width was in cutting 70 feet deep, while the remaining half was formed of embankment, the slope of which extended down the hill-side to about 250 feet below the rails. In the execution of this part of the line about 3,000 men were employed for two years, the greater part being miners, and a large quantity of gunpowder was used. The Maquis viaduct, the principal work of the kind upon the line, occurred on this incline, where the gradient was 1 in 46, and upon a curve of 604 feet radius. Its greatest height was 126 feet, and length 600 feet. The piers consisted of cast-iron columns, braced with wrought-iron, resting upon masonry. The superstructure comprised four plate-iron girders, each spanning openings of 100 feet, and one tubular girder having a span of 148 feet. The total weight of iron was about 750 tons, and the cost of the viaduct erected had amounted to about 40,000*l.*, or 66*l.* per lineal foot. The iron work was all obtained from England; Messrs. Kennard supplying the piers, and the Canada Works the tube and girders. Out of the total length of 12 miles of the Tabon incline, 6 1-10th miles were curved; and upon all the curves of less than 1,000 feet radius, it had been deemed prudent to lay down a guard rail on the inner side. The permanent was formed of fish jointed T rails, 84lb. to the yard, fastened to sleepers of two kinds of native timber.

The descent towards Santiago was effected, for the first 3½ miles, with an inclination of 1 in 80, to which succeeded a gradient of 1 in 183, as far as the deep and tortuous ravine called San Ramon, along which the line was carried for 4 miles, with gradients of 1 in 55, 1 in 60, 1 in 71, 1 in 75, and 1 in 100. At the eighty-second mile the country became more open. The line then passed Tiltil, Poolpaico, Lampa, and crossed the Batuco Lake at the ninety-sixth mile by means of an embankment, the slopes being protected by loose stones. Thence to Santiago, 114 miles distant from Valparaiso, the only works of importance were a cutting in basaltic rock at Renca, and a bridge over the Mapocho River at the entrance to the capital.

American engineers appeared to underrate the effect which curvature produced in retarding the passage of trains; while English authorities differed materially in their views upon the subject. As the author believed practical data were wanting, he had appended to the paper a list containing the lengths of every curve and straight line upon the Tabon incline, specifying the gradient in each case. Further, he had made a few imperfect experiments, to ascertain the resistances due to sharp curves to combination with steep gradients, the results of which might be taken at all events as approximations to the truth. They were tried with a dynamometer, similar to a spring balance in its form and arrangement, but of only sufficient power to allow of one loaded wagon, of a gross weight of 10 tons, being employed. According to these experiments, the particulars of which were given in detail, upon a straight line with a

gradient of 1 in 50 the resistances were 55lb. per ton of train, corresponding with those deduced by the ordinary mode of calculation; while upon the same gradient combined with curves of 600 feet radius, the resistances were augmented to 70lb. per ton of train. By the formula of Latrobe. the resistance due to this curvature was only 5.09lb. per ton of train. Professor Rankine's gave 12.8lb. per ton of load. These experiments appeared to show that, upon a curve of 1,000 feet radius, the resistance was double that upon a straight line; and upon a curve of 600 feet radius, it was equal to the gravity on an inclined plane of 1 in 150. Approximately, the resistance due to the curvature might be found, either by dividing the number of lbs. in a ton by 0.244 of the radius of the curve, or by multiplying the deflection angle of the curve by 1.75, to give the resistance in lbs. per ton of train. It should be stated that the gauge of the line was 5 feet 6 inches, and that the proper super-elevation had been given to the outer rail on curves.

The plan employed upon the line was upon the European system, the engines and most of the rolling stock having been obtained from England. The engines at present in use, the dimensions of which were given, were of two classes, ordinary six-wheeled passenger and goods engines, four wheels being coupled; but special engines had been ordered for the Tabon incline.

Mr. Matner, the locomotive superintendent, had adapted the engines, at a trifling expense, to burn exclusively native coal, by which an economy in the cost and consumption of fuel of about 30 per cent. had been effected. Observations as to the duty of the engines, on curves of 600 feet radii, showed that at a velocity of 10 miles an hour, upon inclines of 1 in 44, ordinary passenger engines could convey a gross weight of train equal to double their own weight; upon inclines of 1 in 55, similar engines would take up rather more than two and a half times their own weight; and upon a gradient of 1 in 50, a goods engine had drawn up four times its own weight. The application of a jet of hot water upon the flanges of the leading wheels of the engines had so facilitated their passage round sharp curves that bogie trucks were unnecessary, provided sufficient play was allowed to the trailing wheels; while the resistance was diminished and the tyres were not so rapidly destroyed. Similarly, the application of moisture to the rails from the tender in passing round abrupt curves upon steep gradients, the rails for the engine remaining dry, sensibly reduced the resistance due to curvature; and by the same means the break blocks in descending inclines could be prevented from igniting.

The communication was accompanied by a series of photographic views, showing some of the more important works, and by complete plans and sections of the entire line, the cost of which had amounted to about 20,000*l.* per mile, inclusive of rolling stock.

Destruction of Property by Fire from Locomotive.

The case of Hooksett against the Concord Railroad, was an action upon the statute, to recover damages for the burning of a highway bridge over the Merrimac river, in said town of Hooksett.

For the purpose of settling the questions of law, it was agreed that on or about the 1st of October, 1857, an engine of the defendant corporation, attached to the regular freight train, passing over the road of the corporation, and through their bridge over said river, in Hooksett, about midnight, fire from the engine communicated with the railroad bridge, and set the same on fire, and it was consumed; and in burning, the fire therefrom communicated with the highway bridge of the plaintiffs, which was three and a half rods distant from the railroad bridge, and set the same on fire, and it was thereby consumed.

EASTMAN, J.—This action is founded upon section 8, chapter 142, of the revised statutes of New Hampshire, which is as follows: "Every railroad corporation shall be liable for all damages which shall accrue to any person or property within this State by fire or steam from any locomotive or other engine on such road."

The next section of the same chapter provides that "Every such corporation shall have an insurable interest in all property situated on the line of such road, and exposed to damage as aforesaid, and may effect insurance thereon for the benefit of such corporation."

These provisions relieve the court from any consideration of the question of negligence by the defendants, so that we are only called upon to give a construction to the statute as applicable to the facts stated.

The extraordinary use of the element of fire, by which the property of individuals situated along the lines of railroads becomes endangered beyond the usual and ordinary hazard to which it is exposed, no doubt caused the legislature to interfere, and impose the liability which is fixed by the statute.

By this exposure an increased risk of loss of property is caused. This risk must be borne by some one; and if the property is insured a large premium must be paid. Upon whom shall this risk fall and this burden rest? Upon the owners of the property, or upon the corporations who make this extraordinary use of the fire? Such was probably the question before the legislature; and we think it was their intention to place the responsibility and burden upon the corporations. We think also that it was their intention to give the owners a complete indemnity for the loss of all property that might reasonably be said to be exposed to the danger.

If, as contended by the defendants, the liability attaches only when the property is destroyed by fire directly communicated from the locomotive, and that it is only for the loss of such property as shall be thus consumed, that the corporation are liable, then all buildings, however near to those to which the fire is communicated from the locomotive, unless they are attached to and made a part of them, would not come within the operation of the statute.

That there are many buildings thus situated along the lines of the various railways in this State is probably the case, and the legislature could hardly have intended to exclude such property from protection. If such had been their intention, it would seem singular that they should not use language more exact and appropriate to express it. In drafting such an act the question would very naturally suggest itself. To what extent do we intend this liability to go? Is it to be general, or confined to such property only as shall be destroyed by the proximate, direct and immediate communication of the fire from the engine? If they had intended the latter, we think they would have so expressed it; and instead of saying, as the act now does, "by fire from the engine," they would have said by fire *directly* from the engine.

Such has been the decision of the Supreme Court of Massachusetts upon a similar statute, in the case of Hart *vs.* the Western Railroad, 13 Met., 99; and in Maine the same doctrine has been acquiesced in by the case of Chapman *vs.* Atlantic and St. Lawrence Railway, 37 Maine, 92.

We are aware that this view of the question presents some serious difficulties, and cases might be supposed where the principle, if carried out to its fullest extent, would operate with great hardship upon the corporations.

This consideration did not escape the notice of the learned chief justice, in the case cited from Metcalf, but he seemed to think that the power given to the corporation to effect insurance on the property was indicative of the intention of the legislature to make the liability general.

That case did not call for a judicial determination of the extent to which the corporations shall be liable under the statute, neither does this. There a shop adjoining a railroad track, was destroyed by fire communicated by a locomotive, and while the shop was burning the wind blew sparks from it across a street, sixty feet, upon a house, and set it on fire; and the court held that the fire was communicated to the house by the locomotive, within the intention and meaning of the act, and that the corporation was liable for the damage.

In this case the plaintiffs bridge was about fifty-eight feet from that of the defendants. The fire that consumed the latter came from the defendants' engine, and in its progress reached the plaintiffs' bridge, and destroyed that; and we think that, within the intent and meaning of the statute, the loss was occasioned by fire from the defendants' locomotive, and that they are consequently liable for the damages.

Should a case arise under this statute requiring the Court to define the extent to which this liability shall go, perhaps it will be found to extend to such property only as can be said to be reasonably exposed to the danger; that the act must have a reasonable construction, and that consequently where buildings are situated at such a distance from the track as not to be exposed except in some violent gale of wind or other extraordinary circumstances, the loss might be held not to be within the spirit or intent of the act.

But we leave that question to be decided when it shall arise.

The present is not such a case. Our opinion is that upon the facts stated, the action can be sustained.

Cotton Growing in Asia Minor.

A Smyrna paper states that a cotton crop of 150,000 bales of 432 pounds each will be secured in Antolia this year, while the crop of last year was only 50,000 bales. The cost of raising this cotton is only £10 per bale, and it sells readily at £30 per bale, thus leaving a large profit. The same paper says the interior is becoming rich by this culture, and "we have no hesitation in saying that in a few years the staple of Turkey cotton will equal the American."

☞ An election of a President and twelve Directors for the Cross-cut Railroad Company has been ordered to be held at Corry on the 6th of July inst. This road is to be an extension of the Oil Creek Railroad, from Corry to near Westfield, on the Buffalo and Erie road. The stock has recently all been taken, and matters are in a fair way for its speedy construction. Of course, the object of the road is a more direct communication with the East, by the New York Central, from the oil regions.—*Jamestown Journal, July* 1.

Pittsburg Ft. Wayne & Chicago Railway.

The following shows the financial condition of the Pittsburg, Fort Wayne and Chicago Railway Company, April 30:

DEBTOR.

*Cost of Railway construction and equipment		$18,792,677 59
Cost of supplies on hand for current operat'ns	$926,028 92	
Amount due from other companies	207,906 09	
Miscellaneous assets	299,305 55	
Cash in hand	606,476 54	
		2,039,717 10
Interest on coupon bonds for four months		357,789 59
Transportation expenditures for 4 months, viz:		
For conducting trans.	$301,020 83	
For motive power	339,204 01	
For maintenance of way	247,210 34	
For maintenance of cars	103,361 66	
For general expenses	68,668 22	
		1,059,465 06
Surplus of earnings over expenditures for four months		542,659 04
Total		$22,792,308 38

* Included in the amount to cost of railway is $343,424 70 expenditures for construction and equipment of the railway for the four months.

CREDITOR.

By capital stock, viz;		
Full shares	$6,408,600 00	
Scrip certificates	13,891 08	
		6,422,491 09
By funded debt, viz:		
1st mortgage bonds	$5,250,000 00

Coal Oil in Colorado.

Specimens of petroleum have been obtained from coal oil wells at Canon City, Colorado Territory, which are said to be nearly as white as the oil taken from the Pennsylvania wells. The productiveness of the works is not precisely stated, but it is believed that enough oil will be got from the vicinity of Canon City to supply the demand of the entire territory.

Railroad Earnings--Weekly.

The earnings of the Racine and Mississippi and Northern Illinois Railroad for the week ending June 21, 1864, were:

	1864.	1863.
Passengers	$2,807 08	$2,146 12
Freight	11,816 07	6,715 04
Express	104 16	75 00
Mails	296 58	296 58
Total	$15,023 84	$9,232 74
Increase		$5,791 10

Receipts from January 1st to June 21:

1864	$248,193 33
1863	154,125 98
Increase	$94,067 35

The traffic of the Great Western Railroad for the week ending June 24, 1864, was as follows:

Passengers	$23,002 61
Freight and live stock	21,247 27
Mails and sundries	1,238 27
Total	$45,488 15
Corresponding week of 1863	44,393 92
Increase	$1,094 23

The earnings of the Chicago and Alton Railroad Company for the week ending June 30, were:

	1864.	1863.
Passengers	$15,005 34	$12,387 47
Freight	30,586 04	21,513 81
Sundries	1,486 20	1,549 06
Total	$47,027 58	$35,450 34
Increase 1864		$11,577 24

The earnings of the Chicago and Northwestern Railway for the 3d week in June, 1864, were:

Passengers	$26,950 68
Freight	83,114 17
Mail	1,884 37
Express	384 17
Total	$112,333 39
Corresponding week of previous year	75,937 35
Increase, 48 per cent	$36,396 04
First three weeks in June, 1864	$352,576 30
First three weeks in June, 1863	230,893 41
Increase, 52 per cent	$121,682 89

The earnings of the Milwaukee and Prairie du Chien Railroad for the 3d week in June, 1864, were

	$43,865 00
Corresponding week of previous year	20,844 00
Increase, 73 per cent	$23,021 00
The increase since Jan. 1, 1864	$320,074 00

The earnings of the Grand Trunk Railway for the week ending June 25, 1864, were:

Passengers	$31,362 94
Express freight, mails and sundries	2,500 00
Freight and live stock	63,724 81
Total	$97,587 75
Corresponding week, 1863	80,587 08
Increase	$17,000 67

The earnings of the Montreal and Champlain Railroad for the week ending June 25, 1864, were

	$5,261 23
Corresponding week of previous year	4,907 42
Increase	$353 81

☞ The Lake Superior and Mississippi Railroad Company have effected a contract for the grading and bridging of 30 miles of their road, or from St. Paul to Wyoming, in Chicago County, by the 1st of January next.

General Railroad Law of New York.

AN ACT to amend an act entitled "An act to authorize the formation of railroad corporations, and to regulate the same," passed April second, eighteen hundred and fifty.

Passed May 5, 1864; three-fifths being present.

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

SECTION 1. Subdivision five of section twenty-eight of the act entitled "An act to authorize the formation of railroad corporations, and to regulate the same," passed April second, eighteen hundred and fifty, is hereby amended by adding thereto the following: "Nor to authorize any such railroad company to construct its road upon and along any highway, without the order of the supreme court of the judicial district in which said highway is situated, made at a special term of said court, after at least ten days' notice in writing of the intention to make application for said order shall have been given to the commissioners of highways of the town in which said highway is situated."

§ 2. And when the railroad of any railroad corporation, shall be leased to any other railroad company, or to any person or persons, such lessees shall maintain fences on the sides of the roads so leased, of the height and strength of a division fence as required by law, with openings, or gates, or bars therein, at the farm crossings of such railroad, for the use of the proprietors of the lands adjoining such railroads, and shall also construct, where the same has not already been done, and hereafter maintain cattle guards at all road crossings suitable and sufficient to prevent horses, cattle, sheep and hogs from getting on to such railroad. And so long as such fences and cattle guards shall not be made, and when not in good repair, such lessees and their agents shall be liable for damages which shall be done by the agents or engineers of any such corporation to any cattle, horses, sheep or hogs thereon; and when such fences and guards shall have been duly made, and shall be kept in good repair, such lessee shall not be liable for any such damages, unless negligently or willfully done. A sufficient post and wire fence of requisite height, shall be deemed a lawful fence, within the provisions of this section; but no lessees of a railroad corporation shall be required to fence the sides of said roads, except when such fence is necessary to prevent horses, cattle, sheep, and hogs from getting on to the track of the railroad, from the lands adjoining the same.

§ 3. Every railroad company whose line of road shall exceed forty continuous miles in length, shall, for the better comfort of passengers, provide in each passenger car a suitable receptacle for water, with a cup or drinking utensil placed upon or near such receptacle, and shall keep the said receptacle while said car is in use, constantly supplied with cool water; and any company failing to obey the provisions of this section, shall for each offense of omission as aforesaid, forfeit as a penalty the sum of twenty-five dollars, one-half of said penalty to be paid to the informer, and the remaining one-half to the overseer of the poor of the county in which judgment shall have been recovered. (And any railroad company whose main route of road does not exceed fifteen miles, may elect seven of its stockholders as a board of directors to manage its affairs, at any annual election after the passage of this act.)

§ 4. Section sixteen of the act entitled "An act to authorize the formation of railroad corporations, and to regulate the same," passed April second, eighteen hundred and fifty, is hereby amended so as to read as follows:

§ 16. The commissioners shall take and subscribe the oath prescribed by the twelfth article of the constitution. Any of them may issue subpœnas and administer oaths to witnesses; a majority of them may adjourn the proceedings before them from time to time, in their discretion. Whenever they meet, except by the appointment of the court or pursuant to adjournment, they shall cause reasonable notice of such meetings to be given to the parties interested, or their agent or attorney. They shall view the premises described in the petitio'u

and hear the proofs and allegations of the parties, and reduce the testimony taken by them, if any, to writing, and after the testimony in each case is closed, they, or a majority of them, all being present, shall, without any unnecessary delay, and before proceeding to the examination of any other claim, ascertain and determine the compensation which ought justly to be made by the company to the owners or persons interested in the real estate appraised by them; and in fixing the amount of such compensation, said commissioners shall not make any allowance or deduction on account of any real or supposed benefits which the parties interested may derive, from the construction of the proposed improvement connected with such road, for which such real estate may be taken. They, or a majority of them, shall also determine what sum ought to be paid to the general or special guardian or committee of an infant, idiot, or person of unsound mind, or to an attorney appointed by the court to attend to the interests of any unknown owner or party in interest, not personally served with notice of the proceedings, and who has not appeared, for costs, expenses and counsel fees. The said commissioners shall make a report of their proceedings to the supreme court, with the minutes of the testimony taken by them, if any; and they shall each be entitled to five dollars for services and expenses for every day they are actually engaged in the performance of their duties, to be paid by the company, except where the owners or persons interested in the real estate fail to have awarded them more than the amount of compensation offered them by the company before the appointment of commissioners, then to be paid by the said owners or persons interested, or if not paid by them, to be paid by the company and deducted from the amount awarded.

§ 5. Section forty-seven of chapter one hundred and forty of the laws of eighteen hundred and fifty, is hereby amended so as to read as follows:

§ 47. If any corporation formed under this act, shall not, within five years after its articles of association are filed and recorded in the office of the secretary of state, begin the construction of its road, and expend thereon ten per cent on the amount of its capital, or shall not finish its road and put it in operation in seven years from the time of filing its articles of association, as aforesaid, its corporate existence and powers shall cease. The extention of time shall apply to all corporations whose articles of association have been filed within five years before the passage of this act.

§ 6. This act shall take effect immediately.

☞ We understand that important changes are to be made in the management of the Hudson River and Harlem Railroads. The two corporations have become so closely allied by recent changes in the Directorship that trains over the Harlem are to start from the Hudson River depot at East Albany, instead of at the Boston depot as heretofore. Changes of tracks are being made to effect this object, and the plan is to be perfected in a few days. It is also understood that the trains now run over the Hudson River road are to be divided with the Harlem, and tickets over both routes sold at the same office. Through trains will also be run over the Harlem to Troy.

☞ Ground was broken on the Lake Superior and St. Paul Railroad on the 24th ult. The grading of the Central Railroad from Faribault to Owattanna has been put under contract.

☞ The Auditor of the New York Canal Department is now paying the canal awards of 1862, with interest up to the 10th of May last.

☞ A large Union Depot is to be erected at Corry, by the three railroads at that point: the Atlantic & Great Western, Philadelphia & Erie and Oil Creek Roads.

The National Finances.

The communication of the Ex-Secretary of the Treasury, Hon. S. P. Chase, which he sent to the Committee on Ways and Means, on the 29th of June, says:

The aggregate revenue from all sources, for the year closing with the 30th ult., reached $242,000,000.

The expenses, including two months' pay of the army, due July 1, were $880,000,000.

The amount in excess of the revenue is therefore $640,000,000.

Taking the highest amount estimated, and assuming that the miscellaneous receipts will reach $35,000,000, the whole amount of revenue for the next year cannot be set down at more than $318,000,000.

The expenditures are likely to reach eight hundred and fifty millions, and four hundred and fifty millions is to be raised by loans.

The loan bill provides for only four hundred millions, and that is the largest sum which, in the judgment of Mr. Chase, can be reasonably attempted.

There remains then eighty-two millions to be provided for, and all considerations of public interest seemed to him to require imperatively that they be raised by an increase of revenue.

He therefore proposed to raise the deficiency, believing that the changes proposed by him would produce in the difference between the rate on incomes by the old and new bill, added to the tax of the current year, $1,500,000; tax on leaf tobacco, $1,000,000; increase of tax on smoking and chewing tobacco, $6,000,000; increase of tax on malt liquors, $4,000,000; tax on dealers' sales, $5,000,000; tax on spirits on hand, $5,000,000; add the amount not increased, but brought from the next with the current year, $2,000,000; making an aggregate of an actual virtual increase of $85,000,000.

AND

BITUMINOUS COALS

of all kinds.

QUINTARD & WARD,

11 Pine street, N. Y.

CAST STEEL.

MANUFACTURED BY

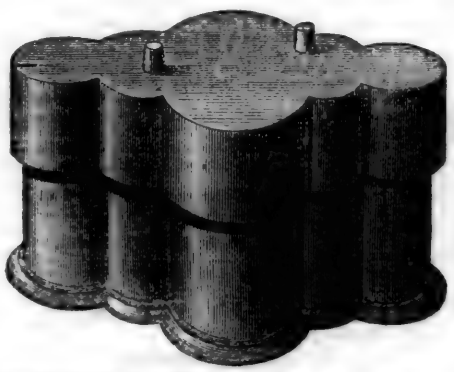
NAYLOR, VICKERS & CO., SHEFFIELD, ENGLAND.

CAST STEEL TYRES WITHOUT WELD,

Reversible Crossings and Frogs, Disc Wheels, Pistons and Piston Rods without weld, Crank and Straight

AXLES, AND EVERY DESCRIPTION OF STEEL FOR RAILWAY PURPOSES.

STEEL CROSSINGS have been in use more than three years with very little perceptible wear, in places where the ordinary ones had to be replaced every four months. They have been estimated to be good for ten years in the worst places.



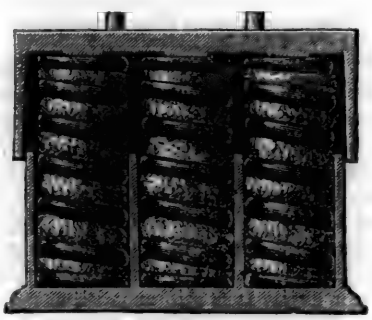
THE "VICKERS" TYRES are in constant and extensive use on almost all the Railways in Great Britain, and also on many roads in other parts of Europe. Their chief advantages are:—1. Their Durability: they will outlast any Iron Tyre without being turned, and for this reason are cheaper than Iron Tyres (free of cost). 2. Their Safety: being without a weld they are not liable to break, and Steel is proved to be a stronger and tougher metal than any other. 3. Their Uniformity: they do not wear in flat places nor "hammate." 4. They are not injuriously affected by frost, and are guarantied to stand the severest climate.

STEEL AXLES will be found economical, because they may with safety be made much lighter than those of Iron. They will wear longer and "smoother," and will consume much less oil; nor are they liable to granulate from constant use.

For CIRCULARS, GIVING FULL PARTICULARS AND TESTIMONIALS, PRICES, etc., apply to **NAYLOR & CO.,**

421 Commerce street, Philadelphia; 99 John street, New York; 80 State street, Boston.

UNION CAR SPRING
MANUFACTURING COMPANY.



Office, 132 Broadway,

MANUFACTORY,

286 and 288 SEVENTH AVENUE,

NEW YORK.

CHARLES BUTLER,
President.

THOMAS BOND,
Treasurer.

JOHN HALDEMAN,
Superintendent.

MANUFACTURED solely by the "UNION CAR SPRING MANUFACTURING COMPANY."

This Spring is made by placing Steel Spiral Springs packed with wool in the inside only, in a casting with cylindrical apertures or cells just large enough to receive the filled spirals, with a cap or cover fitting over and outside the casting.

Size and capacity can be varied so as to give any amount of elasticity, or, any amount of carrying capacity.

These Springs have been examined by many of the leading railroad experts of the country and in every instance with unqualified approval.

Springs that were rudely made before our manufactory was in operation are running with a satisfactory success on important roads. A set of Freight Springs imperfectly made and tempered were placed by the Penn. Central under their heaviest Freight Locomotive tender on the mountain division of their road, and gave entire satisfaction. They placed another set on one of their Freight Cars, which with its load made a total weight of 32,000 pounds and still left a motion of half an inch.

Most Railroad experts agree in the opinion that they have no spring which meets their wants. One spring which has great softness, has almost as much lateral motion as vertical; is rigid in cold weather, and short lived. Another spring which has life, has so much rigidity as to wear the roadway and rolling stock as much or even more than the twisting which follows the combination of an excessive lateral and vertical motion. Springs of other combinations must be made rigid in order to preserve their component parts.

We believe we have succeeded in avoiding these objections and can offer a spring, which while it is elastic, will have great range of motion, with a direct vertical action, and durability.

Wool is one of the most indestructible of elastic substances, and has an elasticity which cannot be entirely exhausted with any weight which can be placed on a car, and yet, the back-bone of the Spring is the Steel Spirals.

The impossibility of exhausting with any usual load the column of wool in the spiral, prevents the Spirals coming home, and bringing steel against steel, which by causing crystallization, destroys the steel. The wool is packed in the coils by a powerful press, or it would be of no service.

Our springs are light in weight and easy of adaptation, as they can be placed where any other spring can be placed, and besides, they have that which is only acquired elsewhere by placing two or more springs together, viz: breadth of base.

We ask, when it is possible, an inspection of our works, as we feel convinced that an examination there will prove the superior merit of our Springs, and the perfection of our process.

We ask that you shall order one set, at least, and judge for yourself by personal test, and if you have bolsters under your tenders, make the test there, as it is the most severe.

The excellence of our Spring, its ease of adaptation, its meeting the great want expressed by railroad men that their freight cars should be carried by elastic springs both to save roadway, rolling stock, and *to carry freight in nearly as good order as it can be carried by water*, together with the *saving* in motive power by drawing a *lively* load instead of a *dead* load, will commend our Spring to your attention.

The Grand Trunk of Canada, and Buffalo and Lake Huron Railways.

Two important meetings were held in London, England, on the 9th of June last, one a special meeting of the shareholders of the Grand Trunk Railway of Canada, and the other of the Buffalo and Lake Huron Railway Company, to consider the proposed arrangement of working these two companies together so far as to divide the expense of management, and the profits of the business. The history of the Grand Trunk has been recently very fully given in a work called "Eighty Years Progress," by Thomas C. Keefer, Civil Engineer, which is written in a very depreciating tone, and treats this work as an entire failure, as being badly conceived, expensively constructed, and almost fraudulently sustained by a system of borrowing under very false pretences. It is not our business or wish to enter into discussions which properly belong to another country, and in no way our own system of railway construction. But we can certainly recognize the grandeur of the design, the magnitude of the line itself, its interesting connections, its utility to the Canadas as a whole, if not so remunerating as was hoped by the stockholders. It is charged by Mr. Keefer "that the system under which the road was constructed was a vicious and illegitimate one, the order of things being reversed from that in well regulated corporate proceedings. In the case of the Grand Trunk the contractors assumed the risk of floating off the shares and bonds on their own terms, with a Board of Directors and an Engineer and Solicitor of their own selection, (deriving their fees and salary through them,) to carry them through those all-important preliminary stages when the future shareholders are irrevocably bound, and in too many instances have their interests sacrificed to those of the contractor. And there was the additional evil of a political element. The contractors wielded a gigantic scheme which traversed almost every county in the province, virtually controlled the Government and the Legislature while the expenditure continued." As regards the construction, he also asserts that while "it was the interest of the company, that in a level country the road should be raised so high over the vallies and so deep in the hills as was prudent in order to diminish the gradients and therefore the cost of working, and that the stations should be as near the centre business of the towns as possible, particularly in places on or near competing navigation; it was on the other hand the interest of the contractors to keep the road as near the surface everywhere as the contract permitted, no matter how much it might be smothered in winter and flooded in spring, how undulating it was, or how frequent and severe the gradients became; and to place the stations where land was cheapest, or so as to purchase political support thereby, or obtain a speculation in building lots. It is in vain that magnificent tubular bridges and way stations of stone are pointed to as evidences of superiority when the very backbone of the railway, the track on which its receipts are to be earned is defective in location and construction."

Of the Buffalo and Lake Huron, the same writer in the same work speaks more favorably. This was originally a work to connect Buffalo and Brantford, which had been passed by and "left out in the cold" by the Great Western, and was intended to secure for Buffalo the traffic of the beautiful and fertile peninsula of which Brantford may be considered the chief and the most prosperous town. Its track is pronounced admirable, and its equipment in stations and rolling stock "splendid," and Mr. Keefer asserts that it "deserves a better traffic."

Yet difficulties have constantly attended both these companies, and though their traffic has regularly increased from year to year, yet they have as regularly required assistance from home. The great want of the Buffalo and Lake Huron has been understood to be a terminus on Lake Ontario like that it has on Lake Huron. This has been attempted to be made in several forms, the last of which is a railway from Erie to Niagara on the Canadian side. But finally it is about to assume more of the character of a trunk line by the arrangement to which those remarks have been intended to be introductory. The practical amalgamation of it and the Grand Trunk, at least so far as management and income can be united, is at length to take place, and the circumstances and views under which the unison is to be effected are made known by the reports of the two meetings now before us. Mr. Watkin, the chairman of the meeting of the proprietors of the Grand Trunk stated that "the arrangement they had come to with the Buffalo and Lake Huron was similar to that which they had made with the Montreal and Champlain, to work the two lines for the benefit of each and of both together. This agreement was working satisfactorily. The Buffalo and Lake Huron extended from Fort Erie, opposite the city of Buffalo, to Paris, 83 miles; from the latter place to Stratford, 38 miles; and from Stratford to Goderich harbor, 45 miles; making together 161 miles. The length of the Grand Trunk was 1,090 miles, making together 1,251 miles. The capitals and liabilities of the two companies were to be kept perfectly distinct from each other. It was the traffic and working of the two lines that was the subject of agreement. The Buffalo were to receive 13 per cent. of the net receipts of the whole for the first year, and that percentage was to be increased gradually to 16½ per cent. in the sixth year, and to continue at that rate in subsequent years. In 1863 the net produce of the Grand Trunk amounted to £289,901, and that of the Buffalo and Lake Huron to £30,612. But in the case of the Buffalo there were a number of deductions from the net profit of the last half year from loss on working of steam, compensation

to the general manager, whose engagement had been terminated, loss in the permanent way contract and on the store of fuel, amounting in the whole to nearly £5,000, which would bring the net profit up to £35,612. Adding the net profits together, and giving the Buffalo 13 per cent. of the whole, would involve a charge of £41,316, so that at the first blush there would appear to be a loss to this company of £5,704. But in making the arrangement they must consider the economy of a single management. In addition to this the New York Central was ready to work with them in the most friendly way and to make arrangements with them which would effect a further saving. But in a matter of this kind they must look beyond the present bearing of the arrangement to its effect upon the permanence, soundness, and influence of the undertaking. The Buffalo was too small to develop its resources, and there was an amount of money absolutely lost which could be picked up for the benefit of both companies if they worked the line jointly. The president of the New York and Erie had agreed that his company and the New York Central should issue tickets, or book through to all parts of the company's line in the direction of Detroit. The present charges for haulage between Fort Erie and the American lines in Buffalo would be reduced, and this reduction would go in addition to the £6,000 he had mentioned. They had made those arrangements, not so much for present advantage as for the future. Part of the Buffalo would be made suitable for carrying a through traffic, which it could not get as an independent company. The steamboat service to Sarnia and other ports of the Grand Trunk would be made available for the Buffalo line without additional expense, and the increased traffic would compensate the steamers. The Buffalo would get 110 miles of haulage instead of 45 miles, at present sending the traffic on to Montreal by water. The Grand Trunk in respect of this traffic would have it pass over 420 miles instead of over 212 miles as at present. They would see what an amount of traffic could be picked up by the two companies working together, instead of being lost as at present. The Buffalo stock of engines was larger than was required for their traffic, and therefore part of it would be made available for the Grand Trunk, and thus save the expenditure of so much capital. In the past year they had paid the Buffalo £1,000 for mileage of cars, which would be saved under the proposed system of fusion. There was always in these Canadian lines the light and inefficiently constructed permanent way of the country, but the part of the Buffalo between Goderich and Stratford was, perhaps, a piece of the best constructed line in Canada. One great inducement in entering into this arrangement had been the almost certainty that, instead of the traffic having to be taken across the Niagara river from Erie to Detroit, Canadian and American capital would be immediately applied to the construction of a bridge connecting the whole of the north and east. Under these circumstances a meeting was held at Buffalo, and the stock for the bridge was subscribed and divided amongst the interests concerned, one-third to the New York and Erie, one-third to the New York Central, and one-third to the Buffalo. The estimated cost was £100,000, towards which the New York and Erie would subscribe one-third, the New York Central one-third, and the Buffalo and other parties one-third, making up the full subscription. Under the agreement the Buffalo would have to raise £75,000 capital to subscribe towards the bridge at Buffalo, and to lay down a third rail on their line to suit the American gauge for the through traffic between one part of the United States and the other. He could not say what traffic they would have from that source, but it would tend greatly to strengthen their position. This would have a bearing on the Reciprocity Treaty between the United States and Canada, and from opinions expressed by public men, both in Canada and the States, it was evident that it would be for the advantage of all concerned to renew it. The agreement also provided for the optional purchase by this company of the Buffalo and Lake Huron stock at an agreed price, and the arrangement was to be for 21 years, but an application would be made to the Parliament to make it permanent. With the concurrence of the municipality of Montreal, a bill had been introduced for enabling the municipality to raise £10,000 they were to contribute to the extension of this railway to the left of the St. Lawrence, and docks and quays at Montreal, and that bill had passed through many of its stages in the Canadian Parliament, and would, it was hoped, receive assent if the Parliament lasted the usual time. With regard to the Intercolonial, a deputation waited upon the Colonial Minister on the subject, who told them that he considered the British Government would be bound, as soon as the colonial Government acted in the matter, to introduce a measure for an imperial guarantee into the British Houses of Parliament. He congratulated the meeting on the steady and continual increase of the traffic. From 1st of January to the date of the last return the increase had been £44,815, or 13 per cent. over the corresponding period of last year. The traffic for five of the latter weeks amounted to £100,000, against £79,625 in the corresponding period of 1863, showing an increase of 26 per cent. The working expenses had been made up to the 16th of April last, and the net receipts up to that date showed an increase of £20,000 over those of the same period of last year. He thought the shareholders would agree with him that the management of their affairs had been successful. He concluded by moving a formal resolution approving the agreement between the two companies, and authorizing the directors to affix the seal of the company thereto, subject to any alterations that might be agreed upon."

Mr. Thomas Short the chairman of the meeting of the shareholders of the Buffalo and Lake Huron, also advocated the plan of the Union. From his very extended remarks we have only space for the following summary. The traffic for the last half year exhibits a satisfactory increase of £12,547, the greater portion of which has been derived from the through passenger traffic and through traffic of goods, obtained as we imagine principally from the lines of propellers which connect Goderich with the American towns on Lake Michigan. The working expenses during the same period were considerably increased, owing in part to the severity of the weather, the outlay for repairs and the charges for haulage by the New York Central.

The whole of this last item will be saved by the construction of the bridge over the Niagara River at Buffalo. It is said that the Canadians have a controlling majority in the Direction of the bridge company. The interests of the Grand Trunk and the Buffalo and Lake Huron are now to be united, and a large development of their value is anticipated. The division of profits is to be 16⅔ per cent. to the Grand Trunk, and 13 to the Buffalo and Lake Huron in the manner already stated. The other arrangements between the companies are as follows: The last named company is to furnish £75,000 to the cost of the bridge, and the construction of a third line of rails, and besides this there is to be raised about £36,000 interest for the last 18 months due and unpaid to the bondholders. The Grand Trunk has also the option of purchasing the Buffalo and Lake Huron within six years, assuming all its debts and liabilities, paying the bondholders and preferred shareholders in full, and taking the ordinary shares of the company at £11 for 20 paid in.

The method of raising the amounts more immediately required were discussed at some length. A proprietor inquired as to this part of the subject as follows: "How it was proposed to meet the current interest on the bonds as well as the arrears? Had the board any plan of capitalizing them or otherwise? Looking to the terms of the agreement with the Grand Trunk, taking out the figures with reference to this company, he found that the interest upon the debentures and the 7 per cent. preference stock required a sum of £66,700 per annum, the half of which would be £33,350. Taking the earnings of the Grand Trunk from the last accounts, he found them to be £477,839, and their expenses to £312,110, leaving a balance of £165,729. Looking at the accounts of this company, he found the takings to amount to £59,904, of which £44,600 was absorbed by renewals and expenditure, leaving a balance of only £15,223. Putting these two sums together, they had a total of £180,952, 13 per cent. on which would amount to £23,528. That would never meet the half year's interest, which amounted to £33,350, but was some £10,000 short of the required sum for that purpose."

To this the Chairman replied, that a comprehensive scheme of finance remained to be adjusted, and that the present agreement must be primarily sanctioned by the Canadian Parliament, admitting, however, that at present as to the proposition to raise £160,000, "they had no means of raising it, as they considered the shareholders were literally pumped dry."

Various interesting remarks were made as to the amounts probably to be received under the arrangement, but as they were purely speculative they are not of enough practical importance at this time to be given at length. The 13 per cent. would the last year have produced £47,000, of which £37,500 would have fully satisfied the bondholders. The weekly earnings of the two companies were estimated for the future at £23,000 until the bridge was constructed, and after that £25,000, and after deducting 60 per cent. for working expenses it was calculated that the Buffalo and Lake Huron would receive £69,000 as its annual proportion.

The report was unanimously adopted, and the agreement with the Grand Trunk accepted, the

financial scheme left for future consideration, and he meeting adjourned.

We have no doubt that the union of the two companies with the construction of the international bridge, is a sound proceedure. If our friends in England would but understand themselves and us, they could see that the commercial ties between the United States and Canada are every day being strengthened, and that the success of the loyal States is the commercial success of Canada, and so blended are our mutual interests, that the ruin of the North would be the ruin of Canada. Of this we have not the least doubt, and any one who has the Canadian Railway lines in his eye will see at a glance, that without a flourishing North and West, the traffic through Canada by railway and the lakes would speedily vanish.

Canada is loaded with debt, its increase though comparatively large, is not enough to free it from its financial difficulties for years to come, while on the American side we see cities like Chicago and Milwaukee, good customers for the Canadians, gaining a population in 20 years, and owning ships and steamers, which all the other cities together in the Canadas have not acquired up to this time since the days of Cartier and Champlain.

Lehigh Coal and Navigation Company.

The shipments of coal by canal for the years ending December 31, 1862 and 1863, were as follows:

	1862.	1863.
At Mauch Chunk	219,792	458,939
At East Mauch Chunk and Penn Haven	129,414	240,618
At Rockport	20,298	.....
At White Haven	26,725	.....
Total tons	396,227	699,557

No shipments were made in 1863 from the upper ports, the navigation having been suspended on account of the damages by freshets in the preceding June. To obviate such drawbacks in the future the company are constructing a railroad between Penn Haven, White Haven and Mauch Chunk, over which the coal will be shipped to the latter place.

The product of the company's mines for the two years was as follows:

Mined on company's account—	1862.	1863.
From Panther Creek and Summit Mines	189,458	380,302
Mined under leases from Co.—		
From East Lehigh Mine	13,861	30,387
From Room Run Mines	29,002	80,166
From Tamaqua Mine	9,394	25,816
From old heaps	.....	588
Total tons	241,715	517,259

The distribution of the coal carried on the canal was follows:

	1862.	1863.
Consumed on the line of the canal	72,594	114,164
Passed into the Morris Canal at Easton	106,431	208,396
Passed into the Del. Div. Canal.	217,201	876,996

The coal that passed into the Delaware Division Canal divided itself thus:

Consumed along the line	13,400	24,419
Entered the Del. & Rar. Canal.	97,410	196,559
Reached tide water at Bristol	106,392	156,017

The total amount of freights of all kinds carried on the canal is shown in the following table:

	Ascending.	Descending.	Total.
1862	108,586	443,232	551,818
1863	122,521	739,162	861,683
Incr. 1863	13,935	295,930	309,865

The gross earnings of the two years were derived from the following sources:

	1862.	1863.
Rents and sales of real estate	$26,159 12	$25,880 48
Coal sold, including mine rents	89,111 62	759,679 61
Tolls on canal	165,457 19	346,728 89
Tolls and transportation on railroad	.....	20,405 17
Profit on State loans, etc.	26,619 51	.....
Total earnings	$307,347 45	$1,152,694 15

The expenses for the same years are thus described:

State tax on capital	$7,439 85	$7,439 85
Balance of int. acc't	116,047 27	121,670 09
Total expenses	$123,487 12	$129,109 94
Net earnings	$183,860 33	$1,023,584 21
Bal. from former years	3,724,838 14	3,176,109 69
	$3,908,698 47	$4,199,693 90
Which is charged with repairs, etc., rendered necessary by the great freshet of '62.	$583,791 78	$229,056 72
And dividends on st'k	148,797 00	148,797 00
	$732,588 78	$377,853 72
Balance to profit and loss carried to next year	$3,176,109 69	$3,821,840 18

The following exhibits the financial condition of the company at the end of the two past years:

	1862.	1863.
Capital stock	$2,479,950 00	$2,479,950 00
Funded debt	2,788,181 92	2,786,681 92
Floating debt	725,180 81	453,293 02
Unpaid dividends	8,631 20	8,621 98
Arrears of interest	55,696 35	53,123 34
	$6,057,640 28	$5,781,670 26
Profit and loss	3,176,109 69	3,821,840 18
Total liabilities	$9,233,749 97	$9,603,510 44
Canal and river improvements	$4,455,000 00	$4,455,000 00
Lehigh & Susq. R. R.	1,380,000 00	1,389,988 37
Real estate, mine railroads, improvem'ts, wharves, etc	1,619,365 68	1,729,851 91
Movable effects, d'bts due, bills, bonds, etc	900,841 19	1,235,526 28
Contingent fund: cost of investments	795,647 37	680,372 02
Cash on hand	82,895 73	112,771 86
Total assets	$9,233,749 97	$9,603,510 44

Chargeable against the balance standing to the credit of profit and loss, there have been issued certificates of 36,060 "scrip shares," which when converted will add to the capital stock account $1,803,000—which under a resolution of the board dated 27th April, 1864, is to be exchanged immediately for full stock.

The "contingent fund" up to the 30th April, 1864, had been reduced to $236,890, part of the securities belonging to it having been taken out and placed in the hands of trustees to constitute a fund specially pledged for the redemption at maturity of the outstanding loan, payable in 1870.

Chicago and Northwestern Railway.

We announced some days since that the Chicago and Northwestern, and the Galena and Chicago Union Railways had consolidated and therefore the two had become one company, retaining the name of the Northwestern road. A rumor had been current for some time previous to the annual meeting that such an arrangement would be then perfected; but the thing was so unusual, and the interests to be adjusted so large and varied, that our railway and business public gave it scarcely any credence. The annual meeting of the Galena Company, however, revealed the fact that a large majority of its stock was in the hands of Hon. William B. Ogden, the President of the Northwestern, and his friends, a new set of officers were appointed; in a few days the consolidation was effected and the name of the Galena and Chicago Union Railroad will hereafter be known only in the records of the past. A large majority of the stockholders of both the old companies were in favor of the project—indeed we believe it was, in fact, unanimous, as nobody objected, and more than three-fourths of the stock of the old companies have already been exchanged for the consolidated stock of the new company.

The advantages which it is claimed, and we believe generally conceded, will result from this latest development of the consummate skill and far-reaching business sagacity of our fellow-citizen, Hon. Wm. B. Ogden, are many, only a few of which we need stop here to notice. In the first place both roads can be operated with much greater economy, as but one set of officers will need to be employed, thereby reducing largely the expenses of management. If a pressure of business occurs on one line, extra trains can readily be transferred from one to the other, and the rolling stock of the company can therefore be made more effective, and to earn a much larger percentage upon its cost. If, for instance, the crops are very heavy on the Dixon Air Line and light above Janesville, or *vice versa*, the interests of both the road and the public will be promoted by transferring an extra number of freight trains to the place where their services are needed.

A matter of more importance to the stockholders is the fact that ruinous competition will be entirely avoided. Such was their location and mutual relations to each other, that competition was constantly reducing the price of passage and freight below the actual cost at which the roads could do the business. It may be said that the public will lose what the roads will gain by an increase of prices at competing points; but unless the new company adopt extortionate rates, the charge is a fallacy, for however it may affect individuals if economically managed, it is the real interest of the public that all great thoroughfares like railways should pay a fair dividend upon their cost. Each of the old companies will also be prevented from building competing lines and extensions, and the whole energies of their consolidated strength can be directed to reaching those points which form the natural northern and western termini of the road.

Three great points, as will be noticed by reference to the map, remain to be reached—Marquette, and perhaps also some place in the copper districts of Lake Superior; St. Paul, Minnesota; and Omaha, on the Missouri. With the prospective early commencement of the great Central Pacific Railway, Omaha is at present the more important of the three, and besides there is now less road to build to give the company the control of the large trade of the Platte Valley. During the present year the line is to be finished to Boonesboro, on the Des Moines, leaving, if we mistake not, considerably less than one hundred and fifty miles of road to build to reach Omaha. The best interests of the company, of the city, and in fact of the country, require that this most important line should be completed before the close of the year eighteen hundred and sixty-five.

With so wealthy and so powerful a company, the time of its reaching St. Paul and Lake Superior need not be delayed many years. Eighteen

hundred and seventy ought to see them fully completed. Thirty miles of the Pacific Railway northwest of St. Paul are completed and in operation, and as much more will be added during the present season. The sooner the Northwestern makes a connection with this road the better. The line from Little Bay du Noquet north, to connect at the iron mines with the road south from Marquette will be finished by the first of September, leaving only the link on the west side of Green Bay to complete the connection with Lake Superior.

The company now has 609 miles of completed road, and the leased roads add 220 miles more, making in all 829 miles virtually belonging to the company. The rapid development of the country through which the different lines of this road run will very soon make it, if in fact it is not already, one of the richest and most powerful companies in the nation. Under the able and efficient management of its present officers, Omaha, St. Paul and Marquette, will soon be reached, and the Northwestern Railway will realize for its owners and for our city, results far beyond what its most sanguine friends have ever anticipated.—*Chicago Tribune.*

Cleveland and Toledo Railroad.

The earnings and expenses of this road for the fiscal years ending April 30, 1863 and 1864, have been as follows:

Earnings:	1863.	1864.
From passengers....	$564,536 82	$784,059 41
" freight, mail, &c.	797,000 44	907,206 42
	$1,361,537 26	$1,691,265 83
Expenses, viz:

Balance.....		$247,523 12

—Which balance is equal to a a dividend of 5.3 per cent on the present capital of the Company, and has been appropriated as follows:

Redemption of bonded debt.....	$99,605 00
157 freight cars built by the Co...	85,418 12
5 New locomotives bought and constructed.....	62,500 00
	$247,523 12

The earnings for the year ending April 30, 1864, show an increase over those of 1862-3 of $329,728 57; with an increase in expenses, including interest, taxes, rents, etc., of $189,534 81; making the increase in net income, $140,193 76.

The capital stock of the company has been increased during the year $1,128,000 by the conversion of the outstanding convertible bonds into stock, and the bonds have been cancelled, making the present amount of capital stock $4,654,800.

The bonded debt has been reduced during the year: by conversion, $1,128,000; by payments from earnings, $99,605—total amount retired and cancelled, $1,227,605.

The following is a comparative statement of the bonded indebtedness of the company as given in their reports for the last and preceding years:

	1863.	1864.
T., N. & C. 1st mort. bonds.....due Aug. 1, 1863....	$439,000	$9,000
" " 2d " " .....due Aug. 1, 1863....	176,500	.....
C. T. Income bonds of 1853.....due Sept. 1, 1863....	66,150	250
" " 1854.....due July 1, 1864....	288,000	280,000
" Dividend bonds.....due Ap'l 1, 1865....	126,410	123,560
" Certificates.....due Ap'l 1, 1865....	2,805	2,180
Junction 1st m. 1st dividend b'ds..due Ap'l 1, 1867....	284,000	244,000
C. & T. Income bonds of 1857....due Sept. 1, 1870....	25,000	6,000
Junction 1st m. 2d div. bonds.....due Dec. 1, 1872....	164,000	161,000
C. & T. sinking fund bonds.....due July 1, 1885....	2,677,000	1,802,000
Less redemption funds.....	$4,248,865 581,270	$2,638,990 194,000
Total bonded debt.....	$3,667,595	$2,439,990
Capital stock.....	3,526,800	4,654,800
Total Stock and bonded debt.....	$7,194,395	$7,094,790
In hands of Sinking Fund Commissioners.....		276,575
Outstanding stock and bonds.....		$6,818,215

Of the foregoing amounts there is due on the first day of July, 1864, the sum of $286,000, of which sum $194,000 is provided for, and the balance can be paid from the present Earnings on hand, or by a further sale of Sinking Fund Bonds, $439,000 of which remain in the hands of the Treasurer unissued, applicable to the payment of maturing Bonds.

The Construction Account of the Company was closed on the 30th day of April, 1861, and was then $6,697,178 48, and has remained at that sum without any material addition for subsequent improvements, and the *Income* Account of the Company was closed and balanced on the 30th day of April, 1860, and has since accumulated during four years, after paying all expenses, contingencies, interest and dividends, to the sum of $786,639 48; which sum is represented by an increase of the property of the company, by assets in the hands of the Sinking Fund Commissioners, payment of liabilities and cash on hand as follows, partially estimated, viz:

Floating Debt which existed in 1861, paid in full.....	$286,081 62
Cash advanced to Sinking Fund Commissioners.....	112,083 50
280 Freight and Platform Cars added to the equipment.....	147,597 53
5 new Locomotives, bought and constructed.....	62,500 00
Paid on the Bonded Debt.....	97,442 50
Cash and Accounts.....	80,934 33
	$786,639 48

This amount of earnings has accumulated during the last four years, and would have been applicable to Dividends to Stockholders had it not been necessary to appropriate it to the foregoing purposes, but is so much additional value to the company's property.

At the last annual meeting of the Stockholders of this Company, a resolution was adopted approving an agreement of May 8, 1863, consolidating the Earnings of this Company with the Cleveland, Columbus and Cincinnati, the Cleveland and Erie and the Buffalo and Erie Railroad Companies, which agreement was duly executed by the two former companies, including this, and forwarded to the Buffalo and Erie Company for their execution and interchange; but for reasons alledged by that company, that two sections were added to the contract, in which they had not concurred, they did not ratify and return the agreement for exchange with this and the other companies. On the 39th day of September last, the Directors of this company adopted the following resolution, viz: "That unless the agreement as executed by this Company shall be ratified by each of the other Companies by the 15th day of October next, this Board will consider the proposed consolidation as abandoned, and will not, therefore, regard the same." A copy of which resolution was sent to the Buffalo and Erie Railroad Company, under the certificate of the Secretary of this Company, without eliciting any reply, and consequently this Company is exonerated from said agreement of consolidation, unless the Stockholders at this meeting should take further action in the premises.

The contract with the Atlantic and Great Western Railroad, approved at the last annual meeting of the Stockholders of this Company, for a mutual and reciprocal interchange of business at Cleveland, went into effect on the opening of that Company's Road to Cleveland, and has proved a mutual advantage to the two Companies, and particular this during the Winter months, in affording an additional outlet for the traffic of this Company from Cleveland Eastward, when the other Roads East of Cleveland, and at Dunkirk and Buffalo, were blocked up with the Eastward bound freights. As this connection was not made till about September last, the full benefit of this additional outlet is not apparent in the past year's traffic of this Company.

The Sandusky, Mansfield and Newark Railroad Company having changed the gauge of its Road from 5 feet 4 inches to 4 feet 9½ inches during the month of March last, being now the same gauge of the road of this company, with a view of connecting its business at Monroeville with the Road of this Company, for the purpose of opening a route from Chicago and Toledo, in the West, and Baltimore and Washington in the East, for through traffic, by running cars without change of freight from Chicago to Bellair on the Ohio River, thus passing over 53 miles of this Company's Road and affording an outlet to this Company for traffic seeking those points. The route has not been open a sufficient length of time to be fully developed, still a considerable additional business not heretofore tributary to this Company passes over this line. The Directors of this Company in July last passed a resolution offering reciprocal business relations to this line for Baltimore and Washington traffic, both ways, in case the Sandusky, Mansfield and Newark Company would change the gauge of its Road and adapt its cars so as to run over the Road of this Company, and this having now been done, I would recommend that a fair and equitable agreement be entered into with that Company on the basis of the resolution then adopted.

The equipment of the road consists of 87 locomotives; 30 passenger, 8 emigrant, 12 baggage, 4 mail, 419 box and stock, 87 rack, 130 platform, and 8 boarding cars.

The number of miles run have been as follows:

	1862-'3.	1863-'4.
Locomotives.....	668,371	786,262
Passenger cars.....	1,139,259	1,591,208
Freight cars.....	6,145,262	6,170,944

The number of passengers carried Eastward was 224,672, of which 82,062 were through and 142,609, way; do., carried Westward, 239,676, of

which 93,180 were through and 146,546 way—total passengers carried 464,848, of which 175,193 were through and 289,155 way; eqivalent number of passengers carried one mile, 28,498,362, equal to 254,450 through; number of passengers carried in 1862-'63, 323,859, increase 140,489; increase in mileage of passengers, 7,848,084.

Tons of freight transported Eastward, 284,791, of which 187,019 were through and 97,772 way; Westward, 147,626, of which 92,725 were through and 44,901 way—total tons transported 432,417, of which 279,744 were through, and 152,673 way. Equivalent number of tons carried one mile, 37,-644,347, equal to 336,110 through. Tons carried in 1862-'3, 383,803, increase 48,614, Increase of mileage of freight, 2,133,876.

Of the amount expended for road repairs, $56,-916 65 were for the line between Cleveland and Grafton on the C., C. & C. R. R., leaving $137,-029 84 as properly chargeable to this road. There have been placed in the track during the year 820 tons of new iron, 37,000 new cross-ties and 14,500 new chairs, with a sufficient quantity of new spike; also 1,700 tons of rails were taken up and repaired.

GENERAL BALANCE SHEET.

Construction—cost of road to date	$6,699,373 33
Union passenger depot at Cleveland	18,572 95
Equipment	693,257 50
Materials on hand	226,120 47
Real Estate	41,564 86
Stocks and bonds of other Co's	55,025 00
Bills receivable	36,891 04
Cash and cash items	136,462 81
Due company on military and other accounts	22,598 06
Sundry book accounts not available	4,350 70
Sinking fund	172,790 89
	$8,107,007 61
Capital stock	$4,654,800 00
Bonded debt	2,439,990 00
Construction fund, balance	1,928 60
Iron taken from Northern division, and charged roadmaster's dep't	115,600 00
Bills payable	4,989 20
Unpaid approved bills	8,884 82

	$8,107,007 61

President.—JOHN GARDINER.

Directors.—John Gardiner, Henry Keep, D. N. Barney, A. H. Barney, E. T. H. Gibson, James Mason, T. P. Handy, T. H. Hoag, S. M. Young.

Superintendent.—L. D. RUCKER.

Treasurer.—H. C. LUCE.

Oil Creek Railroad.

An important railroad meeting was recently held at Erie City. Thos. A. Scott of the Pennsylvania, Dean Richmond of the New York Central, and Dr. Streater of the Oil Creek Road, were present. It was decided to sell the latter to the two former companies. This will change the Oil Creek to the narrow gauge, and connect the oil region directly with Philadelphia and New York; the connection with the former being via the Philadelphia and Erie, and the latter via the Lake Shore and New York Central. This prevents the building of the contemplated road from Irvine to Titusville and Oil City, as was proposed by the Philadelphia and Erie, and will give to Philadelphia and Pennsylvania a more controlling interest in the oil trade than they have before enjoyed.

Interest and Dividends.

The Erie Railway Company has declared a semi-annual dividend of 3½ per cent on the Preferred and 4 per cent upon the common stock.

The Marietta and Cincinnati railroad company have declared a cash dividend of 3 per cent on the first preference shares, and a stock dividend of 3 per cent on the second preference shares, in shares of the same class—both payable August 10th, to holders on 1st July, at the office of the Farmers Loan and Trust Co.

The Delaware and Hudson Canal Co. have declared a dividend of ten per cent, free of Government tax, payable on and after Monday, August 1st, at the office of the Company, No. 29 William st., corner of Exchange Place.

The Minehill and Schuylkill Haven Railroad Company have declared a semi-annual dividend of $1 85 per share, clear of State and United States tax, payable on the 21st inst.

The Cleveland, Columbus and Cincinnati railroad company have declared a Cash Dividend of five per cent, and an extra cash dividend of three per cent, both payable at the usual place on and after August 1st, free of Government tax.

The Little Schuylkill Railroad and Coal Company a semi-annual dividend of three per cent, payable on the 18th inst., free of tax.

The Beaver Meadow Railroad Company a dividend of seven and a half per cent, payable July 11.

The Williamsport and Elmira Railroad Company a semi-annual dividend of three and a half per cent.

The Lehigh Valley Railroad a cash dividend of two and one half per cent, and a stock dividend of forty-one per cent, which also participates in the cash dividend.

The Central Railroad, of New Jersey, will pay, 15th inst., a quarterly dividend of two and a half per cent.

The Norwich and Worcester railroad company have declared a dividend of four per cent payable July 21st. The New York, Providence and Boston 3 per cent. New Bedford and Taunton 3 per cent. Connecticut River, 3 per cent; Cape Cod, $2 net; Berkshire, 1¾ per cent; Pittsfield and North Adams, 3 per cent.

The Franklin Coal Co. have declared a quarterly dividend of 6 per cent. The Honeybrook Coal Co., a bi-monthly dividend of 3 per cent. The Henry Clay Coal Co., $5 per share. The Central Petroleum Co., 1 per cent. for June. The Allegheny & Pittsburgh Oil Co., 2 per cent. for June. The Union Petroleum Co., 2 per cent. for June. The Consolidated Petroleum Co., 1¼ per cent. for June. The Petroleum Oil Co., 1¼ per cent. for June. The McElheney Oil Co., 2 per cent. for June. The Noble & Delamater Petroleum Co., 10 per cent., for June. The Sussex Oil Co., 2 per cent. for June. The Briggs Gold Co., 1 per cent. for June. The New Jersey Zinc Co., a semi-annual dividend of 4 per cent. on common and preferred stock, payable August 1st.

☞ The New York and Harlem Railroad Company's second mortgage bonds ($1,000,00), due August 1, 1864, will be paid at the office of the Company on the date of maturity, and the interest will cease on that day.

Railroad Earnings—Monthly.

The earnings of the Erie Railway for the month of June, 1864, were $1,021,975 61
Corresponding month of previous year 770,147 99

Increase $251,827 62
January to July 1864 ..... $6,147,255 00
" " 1863 ..... 5,209,073 00

Increase $938,182 00

The earnings of the Milwaukee and Prairie du Chien Railroad for the month of June, 1864, were $212,226 00
Corresponding month of previous year 111,260 00

Increase (over 90 per cent) $100,966 00

The increase since Jan. 1, 1864, is $250,905—over 70 per cent.

The traffic of the Cincinnati and Chicago Air-Line Railroad for the month of June was:

	1864.	1863.
Freight	$24,256 02	$17,621 91
Passengers	27,681 38	17,140 56
Mail, express & sundries	5,052 00	3,294 96
	$56,989 40	$38,057 43
Increase		$18,931 97

The traffic receipts of the European and North American Railroad for June, 1863 and 1864, were:

	1864.	1863.
Passengers	$6,300 41	$5,206 59
Freight	5,998 93	4,607 36
Mails and Sundries	1,170 70	1,098 67
Total	$13,470 04	$10,912 62
Increase		$2,557 42

☞ The survey of the Douglas Valley route for the Western Railway Extension is being prosecuted vigorously by the party under Mr. G. Burpee, the indefatigable engineer. Already they have completed a thorough survey a distance of about twenty-five miles. A location has been secured which will give easy grades, reduce the cost of construction materially, and overcome obstacles hitherto deemed seriously disadvantageous. So far the advocates of the Douglas Valley have in the survey everything to encourage them. The survey of this, the most difficult section of the route, proves conclusively the practicability of the proposed undertaking, and shows that its cost will be such as to warrant capitalists in taking part in the movement.—*St. John News.*

☞ A despatch from St. Paul of the 18th ult., states that a large quanity of iron has arrived for the Minnesota Central Railroad. The bridges across the Mississippi for this road are progressing well—one at St. Paul and one at Fort Snelling leading to Minneapolis.

Albany and Susquehanna Railroad.

The statement put forth by the *Schoharie Republican*, in regard to changes made in the officers of this road, are, in every instance, with the exception of one, untrue. The President, E. P. Prentice, did resign, but his resignation, as Director, was not accepted, but laid upon the table. Mr. Wentz, Chief Engineer, has not been removed; nor is it in contemplation to remove J. M. Foster, the Station Agent at Schoharie. Daniel Drew has not been elected a Director, and, in fact, no changes have been made in any important office, either on the road or in the direction or management of it.—*Albany Journal.*

The Pacific Railroad.

The indefatigable Perham succeeded in getting through Congress his bill for a Northern Pacific railroad, and it has been signed by the President. The company will be organized in Boston, and the first meeting will be held about the 1st of September.—*Boston Journal.*

American Railroad Journal.

Saturday, July 16, 1864.

Stock Exchange and Money Market.

That condition or form of things which we have usually called the Money Market of New York, is at present so changed in all respects, that a regular report of it is impossible. It is a history of its spasms, rather than of its operations, for the usual laws of commerce are now daily violated almost with impunity, and in a great many instances with success, at least of a temporary character. And like a great ship in a storm with sails all loose and flying, rigging torn and tangled, the crew running about in confusion, the anchor dragged, the colors at the mainmost torn, and the signal of distress set dismally in the shrouds, the great commercial emporium is now herself buffeting the seas of a financial storm such as this country never before witnessed. The freight of treasure, and the bills of credit, and the valuable merchandize which she carries, are tossed about like corks with the violence of the motion, and no one can tell what part of it will come safely into the hands of the owners, if it escapes the engulfing waves.

There can scarcely be called a Money Market therefore at this moment. If money is paper the market is well supplied; if it is gold, there is a great scarcity. For some purposes, such as the paying of debts, or the purchase of certain kinds of property, as lands, farms, houses which may be bought all over the country at nearly the same prices with legal tender, as they could have been bought for before the war, this legal tender is just as good as gold, and is a favorite currency with the people everywhere, even with those who assail its issue : but when we come to the necessaries of life, when we want tea, coffee, sugar, foreign goods, and when we buy our meats and vegetables, we find that paper does not buy one-half, or even one-quarter as much as it did before. To add to the confusion and uncertainty, it has become apparent that more paper is yet to be issued before this war can be closed, and no one can tell to what extent. No one can tell whether the struggle is to be a long one, or which party is to experience first the exhaustion which a long and bloody contest produces. In this view we are leaving out all patriotic considerations, stifling all the emotions which rise in the breast of every loyal citizen, at the bare idea that the contest can be possibly ended in any other than one way, and regarding the whole subject from a financial point of view, the inexorable necessity which overrides the grandest sentiments, the fairest hopes, the noblest policy of nations as well as of men.

And we are precisely at the point of our financial troubles, that no one can tell whether we are to emerge with renewed strength and courage, or to sink beneath the waves of insolvency. One of the worst features of the hour is the division on fundamental principles at the North. The North is no longer a unit, but a large and active party here, is as much engaged in destroying the Union, (and for what real reason it is beyond our power to understand,) as the men in arms against it at the South. This circumstance not only makes the military blows of the North less severe, but underlies the Money Market and Stock Exchange, and gives it its worst features. To make a correct report of it at this juncture, therefore, is simply impossible. The capture of Washington on the one side, or the capture of Richmond on the other, would change its whole character and totally derange the present quotations.

Gold has played its usual grotesque part during the past week. The repeal of the gold bill worked exactly contrary to the prediction. A rise followed and continues. As compared with paper, is has changed its value 20, 30, 40 per cent. almost in a day, and if it is the standard of values, it has been a very elastic one. If on the other hand it is non-elastic and inflexible, then there has been a singular rise in the value of paper on several occasions recently, and we see no reason why with returning coolness, it may not reach near its former comparative value. There is a remarkable fact about the gold market at this moment. Foreign exchange if paid for in gold is actually below par. The rates on Tuesday for coin were as low as 107¼, which is below the real par of exchange. So that but for other causes which we have not

time to enlarge upon, the singular spectacle would be presented of specie coming back to this country instead of going from it. The truth is that the elements of our strength if properly handled by high political and administrative ability, would be great enough at any one moment of war and confusion to overcome all our difficulties. The wealth and resources and industry of this country are more than doubling every ten years, and they are easily got at, and the people themselves are liberal and disposed to give up freely where they have confidence in their rulers, and believe in their integrity and truth. *But not [without*; and this is our danger at the North at this very moment. The administration has not the confidence of even its own party, and this will more and more develop itself from day to day.

The arrival of Mr. Fessenden in this city has been the signal for new anxieties and speculations of all kinds. He has held several interviews with the representatives of the banks, who are understood to be exactly ten gentlemen, one from each of the following banks of the city, National, Metropolitan, Mechanics, Merchants, American Exchange, America, Shoe and Leather, New York and the Republic. These ten gentlemen come forward therefore to take charge as far as they can of the financial interests of the nation, to discuss its future policy, and advise with the new Secretary. They have one very certain advantage on their side. They have the money to lend, and money is power. To what extent beyond the strength of their position is the value of their opinions is not so clear. The whole thing in our judgment lies in a nutshell. The local banks of the country want the Government currency to be withdrawn and their own substituted. They will loan their own bills, checks and certificates to any extent to the Government for bonds at six per cent., and on these bonds issue more bills, and lend more money, just as long as the arrangement can be carried out, taking care, however, not to give any premium for said stocks, but to get them as much under par as possible. The banks will run the machine of Government, and help Mr. Fessenden to any amount if he will use their irredeemable money, and submit to be shaved on it when he pays it out at points remote from those of the issue. If Mr. Fessenden will pay out the irredeemable bank issues of the North, which are neither paid in coin or legal tender issues, and may never be paid, the banks will trade their issues dollar for dollar with six per cent. interest added for the Government securities dollar for dollar or less.

The Shoe and Leather for example, or any other, will generously put its bills on a par with the bonds of the United States of America, guaranteed by the whole wealth and resources of 23 millions of people, including all those of these very liberal banks. And for so doing will only charge 6 per cent. for the use of the said irredeemable bills, which far out of the States where they are issued, will not if the war lasts much longer, probably pass at all. This is the whole question to-day, as between the Treasury and the banks. Whether legal tenders shall give place to local bank paper? Whether the people are willing to pay 6 per cent. for the use of bank paper not redeemable at present in any shape whatever, and whether they are willing to pay this high price for a substituted, private and local credit instead of using their own?

We know we are touching a very ticklish point, but there is nothing like looking our dangers bravely in the face. This gold question, and this currency question, and this legal tender question, are dealt with too much after the manner of the old school men, who theorise and dogmatise as if the world stood still from generation to generation. On the contrary it moves.

The following letter from Alex. B. Johnson, Esq., of Utica, whose writings, great wealth, long and successful business career, have made him an authority in finance and political economy, takes a bold and original view of these subjects. It was addressed to a gentleman in Washington in high position, just before the close of the Session, and not in time to have any effect on Congress. It will be pronounced heterodox by our New York bankers, heretical and profane; but there are about it marks of profound truth and wisdom. We assure our readers it will be found most startling to those who have only skimmed the subject of taxation, gold, and currency. It goes to the bottom of the most important questions of the day.

UTICA, July 2, 1864.

Dear Sir: The newspapers say that additional taxes are desired by some persons who possess influence in such a matter. I have written, and reflected more, and longer, on financial questions than any other man known to me; and as I hold for permanent investment about $90,000 of United States securities, I possess some interest in the objects for which taxation is usually urged. When the Government's income is sufficient to pay all ordinary expenses and the interest on the public debt, any further taxation will only embarrass the productive industry of the country, add to the already great difficulty of subsistence by individuals, and diminish the motive for investment in Government securities, by taxing the income derived therefrom. If existing taxes are anything like in amount what is alleged, they are already greatly and perniciously in excess of the proper objects therefor, as above explained. To conduct wars by the creation of a National Debt, is one of the great improvements of modern times, while to return, even in part, to the old system of conducting wars by taxation, is analogous to abandoning steam, and returning to spinning-wheels and hand weaving. Nothing, also, is more fallacious than to suppose taxation can diminish the price of gold any more than it can diminish the price of butter; both must depend for price on the demand and the supply, for gold is no longer money but merchandise, and with its rise and fall paper money has nothing to do; and our sensitiveness on that subject is an error of the understanding. Exports and Imports alone are affected in price by the price in gold, and they would be still more enhanced in price if we had no gold to export. The high price of imports is consequent to an insufficiency of the means of payment therefor, and that insufficiency causes the high price of all exportable articles—gold with the rest; and not more with gold than with any other exportable article. I should have added that the premium paid for gold is only an exponent of the loss on all other exportable articles—for gold would not be exported at its present price if any other article could be exported more profitably. Could we prohibit the exportation of gold, all other exportable articles would rise in price, instead of becoming lower, unless we could at the same time prohibit all imports; and even that would produce another principle which would inflate prices by means of a scarcity. In our sensativeness about the price of gold, we forget that it is no longer money; and that our proper course is to leave gold, like any other article of merchandise, to the laws of commerce (which are beyond the power of legislation), and to limit legislation to what is within our power. In this connection, the financial policy of Government is *very simple*. Abandoning all interest-bearing legal tenders (which are worse than a gratuitous waste of the money paid for interest), issue only the original greenbacks (legal tenders without interest), and issue them to any extent made requisite by the wants of the Government; and at the same time permit the holders of them to fund them, as they shall desire, in a 6 per cent. interest-bearing stock—the interest payable half yearly in coin, and the principal redeemable in coin also, at the pleasure of the Government, after a given time—say three years, more or less, as shall be deemed best. I suggested such a stock to Mr. Secretary Chase in the early part of last month, and he seemed to think favorably of it; but he wrote me that my letter arrived after he had arranged to advertise for the $75,000,000 of the 6 per cent. loan of 1881. I proposed a loan redeemable after three years as less likely to disturb existing investments in the bonds of '81 and the 5.20s. The 10-40 5 per cent. bonds I never approved, deeming the interest an undue advantage taken of the existing plethora of money. Should the Government withdraw all its legal tenders, the whole result would be a substitution therefore of irredeemable bank notes and bank deposits—a worse species of money for a better; or if the measure should diminish the volume of money, the only effect thereof would be to make the procurement of Government loans more difficult and more expensive.

Respectfully yours,

(Signed) A. B. JOHNSON.

The practical effect of this policy would be that the Government would issue legal tenders to meet its wants, without borrowing or taxing more than the exigency required, and absorb them in an open loan at 6 per cent., interest and principal payable in gold, which would be equivalent actually to a redemption of the legal tenders in gold. This currency and no other, these National securities and no other kind, it is believed on Mr. Johnson's plan would be adequate to every emergency of the country, and fully preserve its credit to the end. It is another remarkable circumstance that legal tender money is scarce; that the Banks can not redeem their paper in it when called upon for redemption; that it is being hoarded; and that it is often selling at a premium in various parts of the country, as well as in New York. Why such a currency should be cried down and destroyed, passes our understanding.

Another remarkable circumstance in the money market just now is its stringency. Money of any kind is dear, and those who are carrying produce, or provisions, or petroleum, or anything else of a speculative character, never saw a tighter time for money than now. Most of these large operators are likely to fail not only for want of further

aid to carry out their gigantic schemes, but from having over done the market by their own cupidity. Railway shares and bonds have maintained themselves wonderfully amidst all this turmoil and confusion. Cash sales pressed on the street have produced a decline to some extent, as will be perceived from our quotations, but nothing whatever compared with the great article of articles; the grand master of values and properties; the divine product worshipped by bankers and bullionists, which, as compared with flour, or land, or labor, or even exchauge, tumbles up and down 20 or 30 per cent. in a day.

Railway property we hold now to be the very best kind of property which men can hold. It has real intrinsic value irrespective of all opinions; it is money in transit daily and hourly from the pockets of the people into the pockets of the companies. The Government securities stand uncommonly well. The registered bonds of 1867 quote as high as 115, and those of 1881 at 104¼, which is better than could be expected amid all this derangement in the market, and this invasion by the enemy up to the gates of the Capitol.

The balance in the Sub-Treasury on Tuesday was $23,169,188.

The exports for the week were large, being of the value of $4,394,000. It is supposed they will continue to increase, as large amounts of foreign goods, for which we have been exporting specie, will have to be re-shipped to cover cost.

The value of foreign goods imported into the port of Boston for the week ending July 8th, was $335,533, against $413,024 for the corresponding week in 1863. The exports for the week were $374,749 85, against $301,954 66 for the corresponding week in 1863.

While we are lamenting over the large balance of trade piling up against us, the merchants of England are very happy because they have the same thing to encounter. During the year 1863, the total amount of exports from the United Kingdom was £195,974,773; while the total of imports for the same year was £248,980,942. In other words, the balance of trade against the United Kingdom in 1863 was £63,006,168, or about $315,030,845! And not a word of complaint, not a cry of alarm, not a look of despondency. On the contrary, England is declared to be unusually prosperous. Is the balance of trade one thing in England, and another thing in the United States?

The war in Europe has recommenced. What part England is to take will depend on the struggle now going on between the Whigs and Tories for the ascendancy in the Government. The truth is, the wise men of England are opposed to war. They have had enough of it. They have had enough of taxation and war abuses.

On the other hand, the men who are out of office are ready to have war or anything else, if they can only sieze the reins of power and enjoy the sweets of office

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Illinois coupon bonds, 1865, 95; Indiana 2½ per cents, 68; North Carolina 6s, 60; Michigan 6s, 1878, 102; American Gold, 269; Sixth Avenue R. R., 118; N. Y. and New Haven, 151@156; Norwich and Worcester, 114; Atlantic and Great Western, 1st mort., (Ohio div.) 100; McGregor Western 1st mort., 85⅛; Marietta and Cincinnati 1st mort., 106; Milwaukee and St. Paul 1st mort., 100; Peninsula 1st mort., 98; Central Coal, 60; Nicaragua Transit, 7; Mariposa 1st mort., 93; Bucks Co. Lead, ⅞; Copake Iron, 6¼; Quartz Hill Gold, 12¾; Bank of State of New York, 110; Bank of America, 132; Metropolitan Bank, 114; Union Bank, 115; Bank of Commerce, 106; Am. Ex. Bank, 118.

Philadelphia.—Allegheny Co. 5s, 81; Pittsburg 5s, 79; Elmira Chattle 5s, 78; Maple Shade Oil, 11; McClintock Oil, 4½; Dalzell Oil, 5¾; McIlheny Oil, 4¾; Densmore Oil, 4¾; Mineral Oil, 1¾; Phila. and Oil Creek, 1⅛; Oil Creek, 5⅞; Feeder Dam, 1; Keystone Zinc, 2; Clinton Coal, ⅞; Fulton Coal, 8; Locust Mountain, 74; New Creek, 1; Hazleton Coal, 80; N. ☞ A railroad is contemplated from Ellenville, on the line of the Delaware and Hudson Canal, to the Erie Railway. *The North Pennsylvanian* learns that over one hundred thousand has been subscribed to the proposed stock, and there is much prospect of its being built.

The Tax Bill.

THE NEW RATES OF TAXATION—THE BILL AS FINALLY PASSED BY CONGRESS.

The following is a summary of the provisions of the amended tax bill, as agreed upon by the Congressional Committee of Conference and passed by the Senate and House:

TABLE I.

Auction sales—in gross amount—¼ of 1 per cent.
Bankers—using capital not exceeding $50,000, for each license—$100.
Bankers—when using capital exceeding $50,000, for each additional $1,000 in excess of $50,000—$2.
Barytes—sulphate of, per 100 pounds—12 cents.
Beer—lager beer, ale, porter and similar fermented liquors, per barrel, if not more than 31 gallons, $1.
Benzine—refined, produced by the distillation of coal, asphaltum, shale, peat, petroleum or rock oil, per gallon, 20 cents.
Benzole—refined, produced by the distillation of coal, asphaltum, peat, shale, petroleum or rock oil, per gallon, 20 cents.
Bicarbonate of sodas, per pound, 5 mills.
Bill heads and printed cards, 5 per cent.
Boots and shoes—5 per cent.
Brass—3 per cent.
Brass, rolled—3 per cent.
Bricks—3 per cent.
Candles—5 per cent.
Candy—sugar valued at not exceeding 20 cents per pound, 2 cents.
Candy—exceeding 20 and not exceeding 40 cents per pound, 4 cents.
Candy—exceeding 40 cents per pound, or sold otherwise than by the pound, 10 per cent.
Caps—5 per cent.
Cassia—ground, and all imitations, per pound, 1 cent.
Cement—Roman or water, 3 per cent.
Chemical productions—all uncompounded not otherwise provided for, 5 per cent.
Chocolate—prepared, per pound, 1½ cents.
Cigarettes made of tobacco, enclosed in a paper wrapper valued at not over $7 per hundred packages, each containing not more than twenty-five cigarettes, $1 per hundred packages.
Cigarettes made wholly of tobacco, and also on cigars known as cheroots, or short sixes, valued in each case at not over $6 per thousand, $3 per thousand.
Cigars, valued at over $6, and not over $15 per thousand, $8 per thousand.
Cigars, valued at over $15 and not over $30 per thousand, $15 per thousand.
Cigars, valued at over $30 per thousand and not over $45, $25 per thousand.
Cigars at $45 dollars per thousand, $40 per thousand, and the valuation of cigars herein mentioned shall in all cases be the value of the cigars exclusive of the tax.
Clocks and timepieces, and clock movements—when sold without being cased, 5 per cent.
Cloths—and all textile and knitted and felted fabrics of cotton, wool or other material, before the same has been dyed, printed, or bleached, and all cloth painted, enamelled, shirred, tarred, varnished, or oiled, 5 per cent.
Clothing made to order—in excess over $600, three per cent.
Clothing—ready made, 5 per cent.
Cloves—ground and all imitations, per pound, 1 cent.
Clove Stems—ground and all imitations, per pound, 1 cent.
Coal—mineral, except pea coal and dust coal, per ton, 3 cents.
Coal Tar—produced in the manufacture of illuminating gas, and the products of the redistillation of the coal tar thus produced, exempt.
Cocoa—prepared, per pound, 1½ cents.
Coffee—ground, and all ground substances for coffee, or preparations of which coffee forms a part, per pound, 1 cent.
Coffee—unground substitutes for, per pound, 1 ct.
Confectionery—sugar, valued at not exceeding twenty cents per pound, per pound, 2 cents.
Confectionery, exceeding 20 cents, and not exceeding 40 cents, 4 cents.
Confectionery, exceeding 40 cents per pound, or sold otherwise than by the pound, 10 per cent.
Copper, ingots, pigs or bars, 3 per cent.
Copper, rolled, 3 per cent.
Cotton, upon which no duty has been levied, collected or paid, which is not exempted by law, per pound, 2 cents.
Diamonds, (see precious stones,) 5 per cent.
Drawing Tiles, 3 per cent.
Emeralds, (see precious stones,) 5 per cent.
Engravers, productions of, 5 per cent.
Essential oils of all descriptions, 5 per cent.
Fish and shell-fish in cans, kegs or air-tight packages, 5 per cent.
Fruits, preserved, 5 per cent.
Furniture and other articles made of wood, sold in rough or unfinished state, 5 per cent.
Furs of all descriptions, when made up or manufactured, 5 per cent.
Gas, illuminating, made of coal, wholly or in part, or of any other material, when the product shall not be above 500,000 cubic feet per month per 1,000 cubic feet, 20 cents.
Gas, illuminating, when the product shall be above 500,000 and not above 5,000,000 cubic feet per month per 1,000 cubic feet, 25 cents.
Gas, illuminating, when the product shall be above 5,000,000 cubic feet per month, per 1,000 cubic feet, 30 cents.
Gold leaf, per pack, containing not more than 20 books, of 25 leaves each, 18 cents.
Gold, produced from quartz mines, from beds of rivers, from the earth, or in any other manner, 3 per cent.
Ginger, ground, and all imitations, per lb., 1 cent.
Glue and gelatine of all descriptions, in the solid state, per lb., 1 cent.
Glue and cement, made wholly or in part of glue, to be sold in a liquid state, per gallon, 40 cents.
Grave stones, 5 per cent.
Gunpowder, and all explosive substances made for mining, blasting, artillery or sporting purposes, when valued above 20 cents per lb., and not exceeding 30 cents per lb., 1½ cents.
Gunpowder, and all explosive substances made for mining, blasting, artillery or sporting purposes, when valued at above 30 cents per lb., 8 cents.
Hats and bonnets, 5 per cent.
Hulls, as launched, of ships, barks, brigs, schooners, sloops, sailboats, steamboats, canal boats, and all other vessels and water craft, not including engines or rigging, hereafter built, made or constructed, 2½ per cent.
Hollowware, per ton, $3.
Iron, pig, per ton, $1.
Iron blooms, slabs or loops, whether made in forges or bloomeries, per ton, $1 50.
Iron, railroad, per ton, $3.
Iron, railroad, rerolled, per ton, $1 50.
Iron all advanced beyond blooms, slabs or loops, and not advanced beyond bars or rods, and band hoops or sheet iron not thinner than No. 18, wire gauge, per ton, $3.
Iron plate, not less than one-eighth of an inch thick, per ton, $3.
Iron band, hoop and sheet thinner than No. 18, wire gauge, per ton, $3 50.
Iron plate, less than one-eighth of an inch in thickness, per ton, $3 50.
Iron nails, cut and wrought, spikes and horseshoe nails when wrought by hand, per ton, $3 50.
Iron castings used for bridges or other permanent structures, per ton, $2.
Iron castings exceeding ten pounds in weight for each casting, not otherwise provided for, per ton, $3.
Iron rivets, exceeding one-quarter inch in diameter, per ton. $4.
Iron nuts, less than two ounces each in weight, per ton, $4.
Iron bolts, not less than four ounces in weight, per ton, $4.
Jewelry, (see precious stones,) 5 per cent.
Lead, white, per 100 pounds, 35 cents.
Lead pipes, 3 per cent.
Lead sheet, 3 per cent.
Lead, ingots, pigs or bars, 3 per cent.
Leather, patent, enameled and japanned leather and skins of every description, 5 per cent.
Leather, oil dressed, and deer skins dressed or smoked, 5 per cent.
Leather of all descriptions, tanned or partially tanned in the rough, 5 per cent.
Leather curried or finished, 5 per cent.
Lithographers, productions of, 5 per cent.
Manufacturers of cotton, wool, silk, worsted, flax, hemp, jute, india-rubber, gutta-percha, wood, willow, glass, pottery-ware, leather, paper, iron, steel, lead, copper, zinc, brass, gold, silver, horn, ivory, bone, bristle, wholly or in part, or of any other material not otherwise provided for, 5 per cent.
Manufactures increased in value by being polished, painted, varnished, &c., &c., on the increased value, 5 per cent.
Marble, gravestones and other monumental stones, whether with or without inscription, 5 per cent.
Masts, spars, ship or vessel blocks, 2 per cent.
Meats, preserved, 5 per cent.
Melado, 5 per cent.
Mineral coals, except pea coal and dust coal, per ton, 5 cents.
Mineral water, from springs, etc., each bottle containing not more than a quart, 1 cent.
Mineral water, containing more than one quart, 1 cent.
Mineral water, artificial, 10 per cent.
Mustard, ground, and all imitations, per pound, 1 cent.
Molasses, produced directly from sugar-cane juice, 5 per cent.
Molasses, syrup of, produced directly from sugar-cane juice, 5 per cent.
Molasses, concentrated, produced directly from sugar-cane juice, 5 per cent.
Naptha, refined, produced by the distillation of coal, asphaltum, shale, peat, petroleum or rock oils, &c., per gallon, 20 cents.
Oil, illuminating, produced by the distillation of coal, asphaltum, shale, peat, petroleum or rock oils, and all other bituminous substances used for a like purpose, per gallon, 20 cents.
Oil, lard, per gallon, 5 cents.
Oil, mustard seed, per gallon, 5 cents.
Oil, all animal and vegetable, not exempted or otherwise provided for, per gallon, 5 cents.
Oxide of zinc, per one hundred pounds, 35 cents.
Paints as below, 5 per cent.
Painter's colors, dry or ground, in oil or in paste, or with water, not otherwise provided for, 5 per cent.
Parasols, 5 per cent.
Paper of all descriptions, including pasteboard, binder's board and tarred paper for roofing and and other purposes, 3 per cent.
Pepper, ground, and all imitations, per pound, 1 cent.
Pickles, 5 per cent.
Pins, solid head or other, 5 per cent.
Precious stones, 5 per cent.
Precious stones, on which duties have been paid, when set or reset, pay tax only on value of setting.
Pimento, ground, and all imitations, per lb., 1 ct.
Preserved fruits, 5 per cent.
Printed books, magazines, pamphlets, reviews and all other similar printed publications, except newspapers, 5 per cent.
Printers' colors, dry or ground, in oil or in paste, or with water not otherwise provided for, 5 per cent.
Printed billheads, cards and circulars, 5 per cent.
Quicksilver, produced in any manner, 3 per cent.
Repairs of engines, cars, carriages or other articles, when such repairs increase the value of the article repaired, 10 per cent. or over, on such increased value, 3 per cent.
Saleratus, per pound, 5 mills.
Sail tents, shades, awnings and bags made of cotton, flax or hemp, 5 per cent.

Salt, per 100 pounds, 6 cents.
Screws, commonly called wood screws, 5 per cent.
Shot, 3 per cent.
Silver, produced from quartz mines, from beds of rivers, from the earth, or in any other manner, 3 per cent.
Slate, when dressed, hewn or finished, 3 per cent.
Soap, fancy, scented, cream, transparent, and all descriptions of toilet and shaving soap, per pound, 5 cents.
Soap, soft, 5 per cent.
Soap, castile, value not above 5 cents per pound, 2 mills.
Soap, castile, value above 5 cents, 1 cent.
Soap, palm oil, same as Castile.
Soap, erasive, same as Castile.
Soap, all other decriptions, white or colored except soft soap and soap otherwise provided for, valued not above 5 cents per pound, per pound, 2 mills.
Soap, all other descriptions, valued above 5 cents per pound, 1 cent.
Soda water, &c., 10 per cent.
Spars and ships or vessels' blocks, 2 per cent.
Spelter, 3 per cent.
Spirits, distilled and sold, or removed for consumption or sale, if first proof, from July 1, 1864, per gallon, $1 50; from February 1, 1865, $2 per gallon.
Spirits, distilled and sold, or removed for consumption or sale, on and after July 1, 1864, to January 1, 1865, per gallon, $1.
Spirits distilled and sold, or removed for consumption or sale, on and after January 1, 1865, per gallon, $1 25.
Starch made of potatoes, per pound, 2 mills.
Starch made of corn or wheat, per pound, 3 mills.
Starch made of rice or any other materials per pound, 1 cent.
Steam engines, including locomotives and marine engines, 3 per cent.
Steel, in ingots, bars, sheet or wire, not less than quarter of an inch thick, valued at 7 cents per pound or less, per ton, $5.
Steel, in ingots, bars, sheets or wire, not less than quarter of an inch thick, valued above 7 cents per pound, and not above 11 cents per pound, per ton, $10.
Steel in ingots, bars, sheet or wire, not less than quarter of an inch thick, valued at above 11 cents per pound, per ton, $12 50.
Stone, freestone, sandstone, marble and building stone of any other description, when dressed, hewn or finished, 3 per cent.
Stereotypers, all productions of, 5 per cent.
Stover, per ton, $3.
Skins, goat, kid, sheep, horse, hog or dog, tanned or dressed, in the rough, 5 per cent.
Skins, goat, kid, sheep, horse, hog or dog, curried or finished, 5 per cent.
Skins, when previously assessed in the rough, and upon which duties have been actually paid, shall be assessed on the increased value only when curried or finished.
Sugar, brown or muscovado, not above No. 15 Dutch standard in color, produced directly from the sugar-cane, and not from sorghum or imphee, other than those produced by the refiner, per pound, 1 cent.
Sugar, brown or muscovado, clarified or refined above No. 15 Dutch standard in color, produced directly from the sugar-cane, and not from sorghum or imphee, per pound, 2 cents.
Sugar, refiners on gross amount of sales of, including all the products of their manufactories or refineries, 1½ per cent.
Sugar candy, valued at not above 20 cents per pound, 2 cents.
Sugar candy, exceeding 20 and not exceeding 40 cents per pound, 4 cents.
Sugar candy, exceeding 40 cents per pound, or sold otherwise than by the pound, 10 per cent.
Sulphate of barytes, per 100 pounds, 12 cents.
Tobacco, cavendish, plug, twist and all other kinds of manufactured tobacco not herein provided for, from which the stem has been taken out in whole or in part, or which is sweetened, 35 cents per pound.
Tobacco, smoking tobacco manufactured with all the stem in, the leaf not having been butted or stripped from the stem, and on refuse tobacco, known as fine-cut shorts, 25 cents per pound.
Tobacco, smoking tobacco, not mixed and without stems, 15 cents per pound.
Tobacco, fine-cut chewing, whether manufactured or loose, or in bulk, 35 cents per pound.
Tobacco snuff and snuff flour, manufactured of tobacco ground damp, or dry, pickled, scented, or otherwise, per pound, 35 cents.
Tobacco, fine cut, manufactured, to be sold or delivered loose, in bulk, or in packages, papers, wrappers, or boxes, per pound, 35 cents.
Turpentine, spirits of, per gallon, 20 cents.
Umbrellas, 5 per cent.
Varnish or Japan, made wholly or in part of gum copal, or other gums or substances, 5 per cent.
Vegetables preserved, 5 per cent.
White lead, per 100 pounds, 35 cents.
Wine made of grapes, per gallon, 5 cents.
Wines, all other, and liquors known as wine, or produced by being rectified and mixed with other spirits, or into which any matter whatever may be infused, to be sold as wine, not otherwise provided for, per gallon, 25 cents.
Yellow sheathing metal, in rods or sheets, 3 per cent.
Zinc, oxide of, per 100 pounds, 35 cents.

TABLE II.—*License Taxes.*

Apothecaries—$10.
Architects and Civil Engineers—$10.
Auctioneers—$20.
Bankers—using capital not exceeding $500,000, $100.
Bankers—exceeding $50,000, for every additional $1,000 in excess of $50,000, $2.
Brewers—$50.
Bowling alleys—for each alley, $5.
Billiard rooms—for each table, $5.
Brokers—employing capital not exceeding $50,000, $50.
Brokers, Pawn—using capital not exceeding $50,000, $50.
Brokers, Pawn—exceeding $50,000, for each additional $1,000, $2.
Brokers, Land Warrant—$25.
Brokers, Cattle—10.
Brokers, Produce—$10.
Brokers, Custom House—$10.
Builders and Contractors—$25.
Butchers—$10.
Circuses—$50.
Coal Oil Distillers—$50.
Confectioners—$10.
Conveyances—$10.
Claim Agents—$10.
Distillers—$50.
Distillers of apples and peaches, distilling less than 150 bbls. per year, $12 50.
Eating Houses—$10.
General Business—for which no other licence is required, $10.
Gift Enterprises, Proprietors of, $50.
Gas Fitters, $10.
Horse Dealers, $10.
Hotels, inns and taverns, when the rent shall be $200 or less, $10.
Hotels, inns and taverns, when the rent shall exceed $200, for any additional $100 or fractional part in excess of $200, $5.
Intelligence Office Keepers, $10.
Insurance Agents, $10.
Insurance Agents, Foreign, $50.
Jugglers, $20.
Lawyers $10.
Livery Stable Keepers, $10.
Lottery Ticket Dealers, $100.
Manufacturers, $10.
Miners, $10.
Patent Right dealers, $10.
Peddlers with more than two horses, $20.
Peddlers with two horses, $15.
Peddlers with one horse, $10.
Peddlers travelinn on foot, $5.
Photographers, $10.
Plumbers, $10.
Physicians, Surgeons and Dentists, $10.
Real Estate Agents, $10.
Rectifiers, for each 500 barrels, $25.
Retail Dealers, $10.
Retail Dealers in liquors, $20.
Stallions and Jacks, $10.
Tallow Chandlers and Soapmakers, $10.
Theatres, $100.
Tobacconists, $10.
Wholesale dealers whose annual sales do not exceed $50,000, $25.
Wholesale dealers whose sales exceed $50,000, for every additional $1,000 in excess of $50,000, $4.

International Bridge Company.

We learn that the permanent organization of both the Canadian and New York Companies has been completed. The same gentlemen compose the Board of Directors on either side. They are: Geo. Palmer, E. G. Spaulding, F. P. Stevens, Richard Bullymore, Buffalo; C. J. Bridges, Joseph Hickson, Montreal; Allen Cleghorn, David Christie, Brantford; and Adam Brown, Hamilton. It is said measures are to be taken immediately for the survey of the river at various points, to obtain the information and estimates necessary for a proper location of the bridge, and that so soon as this is done the three months' notice of its location required by the charter will be published, and its construction proceeded with without delay.

☞ Surveys have been made for a railroad from Sloatsburg Station, on the Erie Railroad, about thirty-five miles from Jersey City, the line to run west for about five or six miles, to reach the Old Sterling Works, with a branch of two or three miles to extend to the Ringwood Mines, in New Jersey. The stock has been taken, and the work of building is to begin in a few days.

Marquette and Ontonagon Railroad.

The work on the first ten miles of this road is advancing rapidly, and the road for that distance will be ready for the cars some time before the close of the season. The rails have been laid some three miles from the junction with the Bay de Noquet and Marquette Road, and Mr. Hurley, the contractor, says he is bound to have it to the new furnace, a distance of about six miles, by next Wednesday. He has some tough blasting to do before he reaches that point, and if he completes the work during the next week, he will be entitled to great credit for his energy.

The completion of the ten miles of road contracted, which will be accomplished in August, or by the 1st of September, places the noted St. Clair Iron Mountain in direct railroad connection with this place.

We understand also that exploring parties are in the woods examining the ground to determine the most feasible route from the St. Clair Mountain to Lake Michigamme. It is designed to be ready to push on the road, for that point, as soon as it reaches the terminus of the present surveyed line, St. Clair Mountain.—*Lake Superior News and Journal, June 17th.*

Canadian Ship Canal.

A committee of the Canadian Parliament have reported in favor of the practicability and expediency of a ship canal between the Georgian Bay and Lake Ontario, by way of Lake Simcoe. They say that the work is demanded on National and Provincial grounds, and will be important as an adjunct to the commerce of Canada and the Great West, while the engineering difficulties are by no means insurmountable.

Mr. Reuban Manley, Jr., of the firm of Leonard & Manley, has been admitted to membership of the Stock Exchange.

Railroad Earnings--Weekly.

The earnings of the Marietta and Cincinnati Railroad for the 4th week of June, were:

	1864.	1863.
Passengers	$9,731 44	$7,322 17
Freight	15,314 84	6,127 38
Mail, express & telegraph	1,191 11	825 94
Total	$26,237 39	$14,275 49
This month to date	$75,055 16	$40,706 50
Total since Jan. 1	$457,402 96	$292,859 03

The earnings of the Michigan Southern and Northern Indiana Railroad for the 1st week of July, 1864, were $64,064 00
Corresponding week of previous year.. 46,936 00

Increase $17,128 00

The earnings of the Chicago and Rock Island Railroad for the first week in July, 1864, were $47,302 00
Corresponding week of previous year.. 46,105 00

Increase $1,197 00

The earnings of the Michigan Central Railroad for the first week in July, 1864, were.. $60,642 28
Corresponding week of previous year.. 43,870 64

Increase $16,771 64

The earnings of the Chicago and Alton Railroad Company for the week ending June 7, were:

	1864.	1863.
Passengers	$20,708 32	$13,386 38
Freight	24,153 12	21,138 89
Sundries	1,300 96	1,263 60
Total	$46,162 40	$35,788 87
Increase 1864		$10,373 53

The earnings of the Racine and Mississippi and Northern Illinois Railroad for the week ending June 30, 1864, were:

	1864.	1863.
Passengers	$3,951 05	$2,126 07
Freight	14,749 39	9,213 73
Express	104 16	75 00
Mails	296 58	296 58
Total	$20,101 18	$11,711 38
Increase		$8,389 80

Receipts from January 1st to June 30:

1864	$268,294 51
1863	165,837 36
Increase	$102,457 15

The earnings of the Grand Trunk Railway for the week ending July 2, 1864, were:

Passengers	$35,959 13
Express freight, mails and sundries	2,500 00
Freight and live stock	57,960 32
Total	$96,419 45
Corresponding week, 1863	76,734 42
Increase	$19,685 03

The earnings of the Montreal and Champlain Railroad for the week ending July 2, 1864, were $5,364 94
Corresponding week of previous year.. 5,050 86

Increase $314 08

The traffic of the Great Western Railroad for the week ending July 1, 1864, was as follows:

Passengers	$22,899 01
Freight and live stock	19,221 26
Mails and sundries	1,214 76
Total	$43,335 03
Corresponding week of 1863	44,385 18
Decrease	$1,050 15

Damages Caused by Embankment for Railroad Track.---Injury to Water Power.

In the case of Goodrich against Eastern Railroad, the plaintiff sought to recover upon defendants' agreement to pay certain damages for filling with an embankment the plaintiff's mill pond on the northerly side line of the defendants' bridge. By consent of parties the action was referred to a commissioner to ascertain if the plaintiff should recover anything, if so the damages to be settled by a jury. The commissioner reported in favor of the plaintiff and, his report having been approved by the court, the case went to trial before a jury pursuant to the agreement of the parties. At the trial, the plaintiff having called and examined upon the question of damages only one of the witnesses who had given testimony before the commissioner, the defendant introduced a witness for the purpose of changing the result of the report of the commissioner. The court excluded the evidence. Testimony upon both sides was introduced on the question of damages.

There was evidence tending to show that upon full tides the plaintiffs, if not stopped by the owners of the pond, could run their mill the whole time of the ebb of the tide, and until it turned, and that the plaintiffs used said water power from half to two-thirds of the time; and there was no evidence that the plaintiffs had ever been requested to stop more than twice according to the tenor of the deed to Bowles, since the embankment was made. The plaintiffs had the title of Bowles. There was evidence tending to show that the slope of said embankment, north of the northerly side line of the defendants' bridge, occupied a space equal only to one fifteenth of the whole embankment, but there was conflicting testimony on that point. The defendants requested the court to instruct the jury that if the owners of the pond, who claim under Emery and others since the conveyance to the defendants, allowed the plaintiffs to use water power after the stone appears, equivalent to their share of what is displaced by the embankment and slope, that that fact is to be considered in connection with the claim for damages; and also, that if the plaintiffs have so conducted as to induce the defendants to suppose that the Portsmouth and Concord Railroad were authorized to receive payment for said embankment and slope, and under that belief the defendants paid the Portsmouth and Concord Railroad, such payment bars the action; which the court declined to do. There was no evidence in regard to the plaintiffs' conduct alluded to in the last instructions desired, except such as appear in this case.

The court instructed the jury that they might first inquire whether the plaintiffs had suffered any *actual* damage by reason of the cause complained of, and if not, or if such damages as they had thus sustained had been paid and satisfied before suit was brought, (as the defendants contended they had been), then their verdict should be for the defendants. But if they found that the plaintiffs had sustained actual damages from that cause which had not been paid, or in any way satisfied, their verdict would be for the plaintiffs, for the amount of such damages; and that as the cause of such damages was permanent, they might find for the plaintiffs for all damages they had sustained or would sustain by reason of said slope, so far as it was outside of the north side line of the defendants' bridge. To which instructions there was no objection.

The jury returned a verdict for the plaintiffs, for the sum of $352.08, which verdict the defendants moved the court to set aside for supposed error in the ruling of the court in rejecting the written statements, and for not instructing the jury as requested by them.

Eastman, J. When this case was before us on a former occasion, it was held that the embankment made by the defendants was such modification of the bridge as was intended by the parties in the release of damages from the plaintiffs in 1863; that the defendants having proceeded to make the embankment upon the understanding expressed in the proviso that the plaintiffs were not to be prejudiced in their claim for further damages occasioned by it, the plaintiffs could maintain the action for compensation on account of the damages; that the saving and excepting clause in the release from the plaintiffs to the Portsmouth and Concord Railroad was not such an exception or reservation as preserved to the plaintiffs their right of action for the damages occasioned by the embankment upon the premises released to the Portsmouth and Concord Railroad, but that the right of action remained to them for the actual damages occasioned by the running out of the embankment beyond the northerly side line of the bridge. Sawyer, J; in closing the opinion of the court delivered in the case, says: For any diminution of the capacity of the pond by the material placed in it beyond this boundary—the northerly side line of the bridge—in making the embankment, and occasioning actual damages to the plaintiffs by imparing the use of their mill, the defendants are liable. This is to be determined upon an inquiry into the damages by the jury, or by an auditor, as provided in the case transferred.

That decision was made upon a commissioner's report of the facts, the case having been sent here upon the following agreement of the parties, viz.: "That if the court shall be of the opinion that the action can be maintained upon the facts reported by the commissioner, the damages shall be assessed by a jury or an auditor, but if otherwise, the plaintiffs shall become nonsuit."

By the act of 1852, authorizing the appointment of commissioners in civil actions, it is provided that when a report is made by a commissioner, the court shall render such judgement as is warranted by the facts reported unless either of the parties shall at the term at which the report is made, elect to try the case by a jury, Comp. Stat. ch. 181, sec. 33. The statute would seem to be imperative that the election shall be made at the term at which the report comes in. In this respect it differs from the provisions in regard to a trial after an auditor's report. In these provisions no time is fixed in which an election shall be made. Rev. Stat., ch. 180, sec. 5.

In view of the statute, and the effect that should be given to the decision of the court, which was made upon the agreement of the parties, we think that the court below were right in holding that the commissioner's report was not then open to contradiction. The deeds had been examined and a construction put upon them, and the law of the case had been settled, and there was nothing left to be done but for the damages to be assessed according to the agreement. The court had decided that, for the actual damages caused by that portion of

the embankment which was north of the northerly side line of the bridge, the defendants were liable; and what those damages were was the only question open for trial before the jury.

The remaining questions in the case arise upon the refusal of the court to instruct the jury as requested by defendants. No exceptions were taken to the instructions that were given, and if the defendants had desired further instructions, they should have called for them. Failing to do it, the verdict cannot be disturbed because they were not given. Moore vs. Ross, 11 N. H. 547, Leach vs. Woods, 14 Pick. 461.

The instructions asked for, arising out of the facts connected with the deed from Emery and others, were properly refused. The plaintiffs had no connection with that title, and no rights growing out of it which they could enforce. So far as their legal rights were concerned, the matter was *res inter alias*, and no defence to their claim. They had no power to compel the continuance of any benefits which they received through that title, and we think that the other instruction asked for was also properly declined. Before the court can be required to give particular instructions there must be evidence relevant and pertinent, upon which to found them. This instruction, asked for by the defendants, went upon the ground that the conduct of the plaintiffs, in receiving the three hundred dollars, was such as to be a fraud upon the defendants. But we do not discover any evidence of fraud in the facts reported. This three hundred dollars was received by the plaintiffs for what was done under the bridge, within the limits of their deed, and not for the embankment beyond the northerly side line of the bridge. They gave no power to extend the embankment into the pond beyond that line, and the case does not find that they knew that it was to be so extended. It was not their deed that gave "the right of sloping, by bank wall or otherwise, the northern side of the embankment into the mill pond," but the subsequent deeds to the defendants from the Portsmouth and Concord Railroad, and from Emery and others.

The verdict, compared with the amounts received for other rights conveyed by the plaintiffs, would seem to be disprotionately large; but we cannot find in the case any ground for setting it aside, and judgment upon it must consequently be ordered.

Judgment on the verdict.

Grand Rapids and Indiana Railroad.

A letter from Hon. F. W. Kellogg, of a recent date, to the President of the company, states that the land grant has been extended down to Fort Wayne; which, with the old grant, makes about 1,200,000 acres—and gives 60 sections on the construction of any continuous ten miles of the road. This new bill makes Fort Wayne, Sturgis and Grand Rapids points on the line of the grant. This amount of lands added to the work already done, and the proposed township and individual bonds being given in aid of the construction of the road, would seem to be enough to secure its construction at no distant day.—*Kalamazoo (Mich.) Gazette, June 30.*

☞ Another railroad, extending from Athens in Green county, opposite the city of Hudson, to Schenectady and Saratoga Springs, is about to be constructed. The capital of the company is about $1,500,000, and contracts are now in progress to acquire the right of way. As soon as this is done, the work of construction will begin. The purpose is to have cars on the track in 1865.

San Jose Railroad.

The formal opening of this road from San Francisco to San Jose took place on the 4th of June. The return trip, fifty miles, was made in 1¼ hours. The entire length of the road is 50 miles, divided into seven sections. There are 26 side tracks, making a total length of 16,555 feet. There are 37 switches; 75 bridges, making a total length of 3,199 feet; 29 stone cattle-guards; 55 wooden cattle-guards; 33 stone culverts; 26 open stone drains; 7 water tanks; 100 planked railroad crossings; 2 turn-tables; and one Y, for turning, at Redwood City. The freight going toward San Francisco consists of bricks, wood, wool, quicksilver, hay, grain, cattle, hogs, sheep, poultry, butter, cheese, fruit, milk, charcoal, shingles, fence-posts, lumber, etc. The freight going toward San Jose consists of general merchandise for that city and the lower country.

RECEIPTS OF ROAD:

Oct., 1863....	$4,183 45	Feb., 1864..	$22,966 24

Solid Emery Vulcanite.

WE are now manufacturing wheels of this remarkable substance for cutting, grinding and polishing metals, that will outwear hundreds of the kind commonly used, and will do a much greater amount of work in the same time, and more efficiently. All interested can see them in operation at our warehouse, or circulars describing them will be furnished by mail.

NEW YORK BELTING AND PACKING Co.,
Nos. 37 and 38 Park Row, New York.

MACHINE BELTING,

STEAM PACKING, ENGINE HOSE.

THE superiority of these articles, manufactured of vulcanized rubber, is established. Every belt will be warranted superior to leather, at one-third less price. The Steam Packing is made in every variety, and warranted to stand 300 degs. of heat. The Hose never needs oiling, and is warranted to stand any required pressure; together with all varieties of rubber adapted to mechanical purposes. Directions, prices, etc., can be obtained by mail or otherwise at our warehouse.

Chicago & Great Eastern Railway Company,

SEVEN PER CENT

FIRST MORTGAGE BONDS.

The subscribers now offer for sale the remainder of the issue of SEVEN PER CENT. FIRST MORTGAGE BONDS of the CHICAGO AND GREAT EASTERN RAILWAY COMPANY, appropriated to the construction of their road from Chicago to La Crosse, Indiana.

The rails have all been purchased for the completion of the entire line, much below the present market value, and are now going forward to Chicago. The work is rapidly progressing and the Company expect to open the road for traffic early the ensuring Fall, forming a new and very short trunk line from Chicago to the Eastern markets.

The interest payable during construction has been provided, and is now on deposit with the Bankers of the Company. Apply to

OFFICE OF THE ILLINOIS CENTRAL RAILROAD CO.,
NEW YORK, June 14, 1864.

IN ACCORDANCE with a resolution of the Board of Directors of the Illinois Central Railroad Company, notice is hereby given to the holders of the canceled bonds scrip to present their certificates at the office of the Company, No. 21 Nassau-st., for conversion into the scrip stock of the company. L. A. CATLIN, Secretary.

OFFICE OF THE ILLINOIS CENTRAL RAILROAD CO.,
NEW YORK, June 14, 1864.

DIVIDEND NOTICE.—The Board of Directors of the Illinois Central Railroad Company have this day declared a DIVIDEND OF FOUR PER CENT. free from Government tax, on the stock and canceled bonds scrip of the company, payable on the 1st of August next, to parties whose names are registered as the holders on the books of the company at the close of business on the 15th day of July next, and that the transfer books close of that day and open on the 3d day of August

7t-25 THOMAS E. WALKER, Treasurer.

BAIRD'S PATENT Incrustation Preventer,

AND REMOVER

FOR STEAM BOILERS,

In either Salt or Fresh Water. No invention connected with Steam Power combines so many advantages as this. The economy in fuel alone, from its use, repays the cost of the preventive. Certificates from Engineers and owners of Steam-Boilers, at sea and on shore, can be seen at the office of JAS. F. LEVIN,
23 Central Wharf, Boston.

MERRITT & WALCOTT, 60 Courtlandt Street, New York. 29 Front Levee, New Orleans.

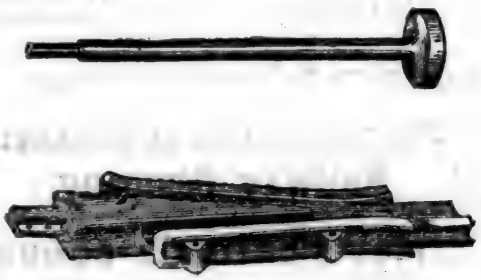
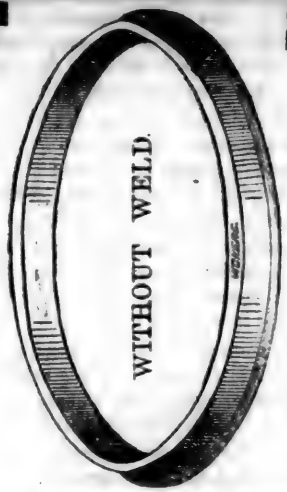
COAL.

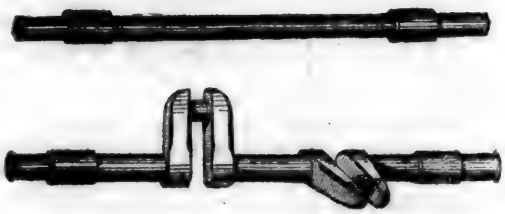
ANTHRACITE



AND



BITUMINOUS COALS



of all kinds.

QUINTARD & WARD,
11 Pine street, N. Y.

CAST STEEL.

MANUFACTURED BY

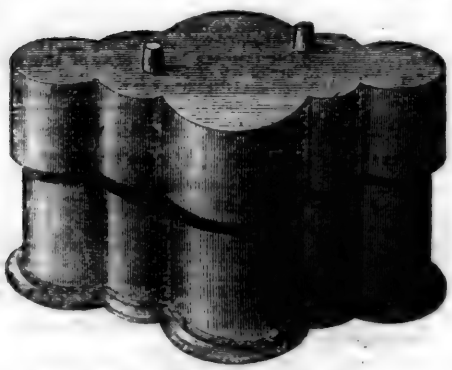
NAYLOR, VICKERS & CO., SHEFFIELD, ENGLAND.

CAST STEEL TYRES WITHOUT WELD,

Reversible Crossings and Frogs, Disc Wheels, Pistons and Piston Rods without weld, Crank and Straight

AXLES, AND EVERY DESCRIPTION OF STEEL FOR RAILWAY PURPOSES.

STEEL CROSSINGS have been in use more than three years with very little perceptible wear, in places where the ordinary ones had to be replaced every four months. They have been estimated to be good for ten years in the worst places.



THE "VICKERS" TYRES are in constant and extensive use on almost all the Railways in Great Britain, and also on many roads in other parts of Europe. Their chief advantages are:—1. Their Durability: they will outlast any Iron Tyre without being turned, and for this reason are cheaper than Iron Tyres (free of cost). 2. Their Safety: being without a weld they are not liable to break, and Steel is proved to be a stronger and tougher metal than any other. 3. Their Uniformity: they do not wear in flat places nor "laminate." 4. They are not injuriously affected by frost, and are guaranteed to stand the severest climate.

STEEL AXLES will be found economical, because they may with safety be made much lighter than those of Iron. They will wear longer and "smoother," and will consume much less oil; nor are they liable to granulate from constant use.

For CIRCULARS, GIVING FULL PARTICULARS AND TESTIMONIALS, PRICES, etc., apply to **NAYLOR & CO.,**

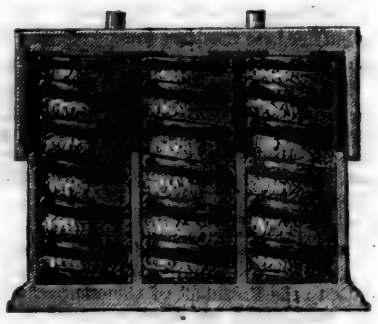
UNION CAR SPRING
MANUFACTURING COMPANY.



Office, 132 Broadway,

MANUFACTORY,

286 and 288 SEVENTH AVENUE,

NEW YORK.

CHARLES BUTLER,
President.

THOMAS BOND,
Treasurer.

JOHN HALDEMAN,
Superintendent.

MANUFACTURED solely by the "UNION CAR SPRING MANUFACTURING COMPANY."

This Spring is made by placing Steel Spiral Springs packed with wool in the inside only, in a casting with cylindrical apertures or cells just large enough to receive the filled spirals, with a cap or cover fitting over and outside the casting.

Size and capacity can be varied so as to give any amount of elasticity, or, any amount of carrying capacity.

These Springs have been examined by many of the leading railroad experts of the country and in every instance with unqualified approval.

Springs that were rudely made before our manufactory was in operation are running with a satisfactory success on important roads. A set of Freight Springs imperfectly made and tempered were placed by the Penn. Central under their heaviest Freight Locomotive tender on the mountain division of their road, and gave entire satisfaction. They placed another set on one of their Freight Cars, which with its load made a total weight of 32,000 pounds and still left a motion of half an inch.

Most Railroad experts agree in the opinion that they have no spring which meets their wants. One spring which has great softness, has almost as much lateral motion as vertical; is rigid in cold weather, and short lived. Another spring which has life, has so much rigidity as to wear the roadway and rolling stock as much or even more than the twisting which follows the combination of an excessive lateral and vertical motion. Springs of other combinations must be made rigid in order to preserve their component parts.

We believe we have succeeded in avoiding these objections and can offer a spring, which while it is elastic, will have great range of motion, with a direct vertical action, and durability.

Wool is one of the most indestructible of elastic substances, and has an elasticity which cannot be entirely exhausted with any weight which can be placed on a car, and yet, the back-bone of the Spring is the Steel Spirals.

The impossibility of exhausting with any usual load the column of wool in the spiral, prevents the Spirals coming home, and bringing steel against steel, which by causing crystallization, destroys the steel. The wool is packed in the coils by a powerful press, or it would be of no service.

Our springs are light in weight and easy of adaptation, as they can be placed where any other spring can be placed, and besides, they have that which is only acquired elsewhere by placing two or more springs together, viz: breadth of base.

We ask, when it is possible, an inspection of our works, as we feel convinced that an examination there will prove the superior merit of our Springs, and the perfection of our process.

We ask that you shall order one set, at least, and judge for yourself by personal test, and if you have bolsters under your tenders, make the test there, as it is the most severe.

The excellence of our Spring, its ease of adaptation, its meeting the great want expressed by railroad men that their freight cars should be carried by elastic springs both to save roadway, rolling stock, and *to carry freight in nearly as good order as it can be carried by water*, together with the *saving* in motive power by drawing a *lively* load instead of a *dead* load, will commend our Spring to your attention.

American Railroad Journal.

New York, Saturday, July 23, 1864.

The Amended Pacific Railroad Act.

The original act under which the Union Pacific Railroad Company was constituted, being approved the 1st of July, 1862, was followed up by a memorable meeting of the corporators at Chicago in the month of September following, and in their unanimous conviction that the work itself was not only one of the grandest design, but likely to be remunerative as an investment to those who should undertake to give it their pecuniary assistance. From that day indeed it was no longer doubtful that the work was to be constructed. Subscriptions were duly opened at many "of the principal cities of the United States," and the requisite number of shares were sought to be secured at the places selected. The Press urged the subscription with great unanimity, but the attempt was a failure. It was believed that the committee in charge, for reasons best known to themselves, were inactive in the performance of their duties. Combinations got up at secret meetings to assume the charter also failed, and the whole affair came very near falling into entire ruin by the lapse of the time to which its organization was limited, when the vigor, capital and influence of a single person in the city of New York, placed the work on its feet, and from that moment it walked on its way with renewed vitality. This person arranged with his associates whom he selected from prominent and influential classes, to make the necessary subscription in time to save the charter, and had also prepared himself by minute preliminary examinations and surveys, to give intelligent opinions not only upon the subject of cost, but of routes and connections.

It was however soon found out there were practical defects in the original act of a character to hinder the progress of the scheme, some of which had been pointed out at Chicago, such as the par amount of shares, which was so large as to prevent any general diffusion of the stock out of the circles of large capital. The aid to be given by the Government, and the form and extent were not sufficiently clear and satisfactory, and indeed it was evident that in many particulars it was necessary to amend the bill, before the work could be counted on as a finality. After considerable difficulty and delay, as well as opposition, the amended act which we publish elsewhere in full, was passed at the last moment of the session, and the Union Pacific Railroad now stands upon a firm and lasting basis, and its friends have secured for themselves the equally lasting gratitude we trust, from the people of the country, for their perseverance in sustaining this magnificent project, one the advantage of which the most sanguine calculation can not yet overestimate. If hundreds of thousands of wagons, even now crowd the plains, and hundreds of thousands of cattle are driven across for their subsistence, if thousands of tons of shipping and millions of passengers throng the sea route between the Atlantic and Pacific Oceans, if the ships of Europe filled with scores of thousands of tons of merchandize, are compelled to pass three quarters round the globe to reach the sea which washes our Californian Coast, what will be the traffic, what will be the earnings, what the enormous influence which the Union Pacific Railroad will command, when all this wonderous intercourse can be carried on over its rails in the usual time of four or five days only.

The first section of the amended act reduces the shares in amount from one thousand dollars to one hundred dollars, and increases the number of shares from one hundred thousand to one million. The qualification of Directors is correspondingly altered from the ownership of five shares to fifty shares, and the limit to subscriptions by each person prescribed in the original act to $200.000 is very properly repealed. It is a pity there is so often displayed in Congress such a petty distrust of capital, even when it is actually sought for by these very detractors to carry on the great work of the country. The repeal of the pernicious words in the first section of the act was not only wise but a necessity, if the road was ever to be made.

The second section of the amended act provides for keeping open books for subscription to the capital stock of the Company, of one hundred millions of dollars, two millions or thereabouts being as yet only obtained. The books are to be kept open until the amount is subscribed, and as there are to be calls assessed at intervals of six months of five dollars per share, whoever subscribes to the stock at any time hereafter can only do so, by paying up as much as others before him have paid. The shares are to be personal property and transferable at the proper offices of the Company.

The third section provides that the Company and all other companies named in the act, (there being in fact auxiliaries and parts of the great whole) may enter upon, purchase, take and hold any lands and premises necessary and proper for the working of said road, of the width of 100 feet on each side of the centre line, unless in cases of excavation or embankment (where no limit is prescribed). They may also take any lands or premises for any kind of railroad structures, and may cut, remove and use trees or other materials beyond the 100 feet from the centre, that might by falling obstruct the road. The remainder of the section proscribes the technicalities of the proceedings to vest the ownership of the lands taken where the parties cannot agree as to the value.

Section fourth makes a material and a magnificent change in favor of the Company. Instead of the five alternate sections of land per mile on each side of the road within ten miles distance, the present act gives ten alternate sections per mile within twenty miles on each side, an enormous difference of area as may be easily seen by calculation. The section also provides that coal and iron lands shall not in this case be deemed mineral lands, which in the original act were reserved, but which now will belong to the Company, but the

lands so granted as aforesaid are not to include or impair any pre-emption, homestead, mining or agricultural claims, duly existing under the pre-emption laws, and established by the Land Officer. These are the principal points secured by this section.

By the fifth section the time for designating the general route of the railroad, filing the map &c., is extended one year from the time fixed in Section 7 of the original act, which was two years from the passage of that act. Twenty five miles of road must be completed by the Central Pacific Railroad Company in each year thereafter, and the whole of its road to the State line in four years, and only one half the compensation which may be earned by that Company from the Government, is to be applied to the payment of the bonds issued by the Government to the Central Pacific. By this operation one-half the compensation is retained by the company from other necessary purposes instead of being absorbed by the bonds.

The sixth section recognizes the appointment of three commissioners for each and every road, with modifications, particularly in relation to the California Company, by which its transactions with the General Government are to be performed at and with the United States Surveyor General's office in California.

The seventh section repeals section 17 of the original act so far as relates to the reservation of the bonds per mile to the extent of 25 per cent. per mile, and the failure of any one Company is not to work any forfeiture to any other.

The eighth section provides for the expedition of the work between the Eastern base of the Rocky Mountains, and the Western base of the Sierra Nevada that two-thirds of the bonds may be issued for every 20 miles completed, to two-thirds of the value of the work done. No such bonds however to issue to the Union Pacific Railroad Company for work done west of Salt Lake City under this section, more than 300 miles in advance of the completed continuous line of said road from the point of beginning to the 100th parallel.

Section nine gives the right of establishing ferries over the Missouri and other rivers, and bridges, the latter with suitable draws if over navigable streams. It also gives the privilege to any company named in the act to make its connection from the Missouri river with the Union Pacific, at any desirable point beyond the 100th parallel. This gives some advantage to the lines which come in from the North or South by a hypothenuse line, but they are not to get any more bonds or sections than if their lines stopped short at the original initial point, the 100th degree.

Section ten is the one which most completely changes the character of the original act. This permits the Union Pacific Railroad and the Central Pacific Road, on the completion of any section to issue their first mortgage bonds on their railroads and telegraph lines to an amount not exceeding those of the United States, and of even tenor, rate, maturity and character of interest, and these as a lien are to be prior to the bonds of the United States. If any of the companies entitled to United States bonds have already issued any of their own bonds they are to be deducted from the amount of those to be issued as first mortgage bonds, and those issued by the Gov.

The eleventh section defines the route and duty of the Leavenworth, Pawnee and Western Railroad Company, now known as the Union Pacific Eastern division. Over this line all the materials and supplies for the Grand Trunk westward from the 100th parallel must pass. It becomes an important link at once, and many towns near it have wished to be its Eastern terminus. Lawsuits, Chancery suits, articles in the newspapers, politics and every other element of discord have been used to control the management and construction of this road. This section is considered to be a settler of all difficulties, but to interpret it at this time would require a long and separate article. Our readers must examine it for themselves.

The twelfth section fixes the number of Directors at 15 and gives the President the power of appointing five for the Government. One of them is to be on each standing committee and one on each special committee. These Government directors have important duties assigned them and a great responsibility. They are to be paid their travelling expenses and reasonable compensation if the Board of Directors please. This last arrangement makes these virtually the agents of the Directors rather than of the Government. It is to be hoped the President will select eminent and experienced men for the places.

Section thirteen fixes the next election for the first Wednesday of October next at New York.

Section fourteen secures the working of the various lines so far as the public and the Government are concerned, as a continuity of transportation, and conformity as to regulations.

Section fifteen provides for the union and consolidation of any two or more companies and points out how these may be effected, and the consequences to any consolidated Company if it does not perform its contracts to the other. It also permits the Central Pacific Railroad Company, to extend its line 150 miles Eastward beyond the State line, if the line of the Pacific Union shall not have been so far extended at that time.

Section sixteen relates to the Sioux City branch, and the 17th to the Burlington and Missouri, which is authorized to extend its branch from the point where it strikes the Missouri river south of the mouth of the Platte, to some point not further west than the 100th meridian, so as to connect with the main trunk of the Union, or that part of it which runs from Omaha westward.

The eighteenth section grants sections and bonds to the last named Company, and the 19th section prescribes the conditions of the issue. The last section retains the right of amendment and repeal.

The effect of this legislation is that the road has an immense addition of capital, the bonds of the Government standing second to those of the company in their lien, while the first are marketable from their priority, and both good. Thus the borrowed capital will be amply sufficient for the construction of the road. The immense grant of the lands gives to the shareholders a vast and improving property which in all human probability will when opened to improvement be worth as much as the road itself.

We therefore see nothing in the way to prevent its early construction.

Railroad Earnings--Monthly.

The approximate earnings of the Pittsburg, Ft. Wayne and Chicago Railway Company during the month of June, compared with the same period last year, were as follows, viz:

	1864.	1863.
Freight	$325,736 89	$246,520 86
Passengers	173,297 21	129,921 07
Express matter	5,200 00	2,600 00
Mails	7,825 00	7,825 00
Rent of railway	7,083 34	7,083 34
Miscellaneous	1,800 11	1,894 71
Total	$520,942 55	$395,844 98
Increase		$125,191 17
En'gs fr. Jan. 1 to June 30	$2,971,760 84	$2,451,888 81

Increase for June, 31 per cent.; average increase to June 30, 21 per cent.

The earnings of the Chicago and Northwestern Railroad for the month of June, were:

Passengers	$126,206 03
Freight	383,972 56
Mail	5,621 44
Express	5,254 66
Total	$521,054 71
Same period last year	359,888 39
Increase of 44 per cent.	$161,166 41

The earnings of the Housatonic Railroad for June, 1864, were $31,588 61
Corresponding month of previous year. 23,595 56

Increase $7,993 05

New York and New Haven Railroad.

The income of this company for the years ending March 31, 1863 and 1864, have been as follows:

	1863.	1864.
From passengers	$801,754 18	$1,134,899 28
From freight	166,614 78	214,354 02
From mails, expresses, extra baggage and interest on loans	68,068 81	75,519 06
	$1,036,437 77	$1,424,772 31
Expenses, viz:		
Transportation exp	$222,802 91	$318,614 23
Repairs of road, etc	109,535 84	54,417 59
" equipment	137,069 61	151,690 46
Fuel, oil and waste	83,880 62	136,188 20
Haulage by horse power	29,552 60	43,399 50
	$582,841 58	$704,309 98
Leaving as earnings on transportation	$454,096 19	$720,462 33

The resources of the year, and the disposition of the same, have been as follows, viz:

RESOURCES.

Cash on hand April 1st, 1863	$242,015 84
Increase of accounts payable	80,330 55
Earnings on transportation	720,462 33
	$1,042,808 72

PAYMENTS.

Coupons for the year	$129,120 00
Loss operating "canal road,"	9,908 47
Dividends during the year	376,560 00
Increase of "materials" on hand	131,832 05
New car house	11,860 86
New engine house, (in part)	157 75
Equipment for 2 new engines, (less one sold,) 1 passenger and 45 freight cars	52,384 49
Wharf at New Haven, (less engine house charged off)	475 00
Cash on hand, April 1st, 1864	330,410 10
	$1,042,808 72

Of the four dividends of three per cent. each, paid during the past fiscal year ending on March 31st, 1864, the first was met from the profits o[f]

the year preceding, as referred to in the report of May last, and amounted to $90,000; the three remaining dividends, amounting to $286,560, were chargeable to the profits of the year just past, and one other dividend of three per cent., amounting to $107,865, has been declared since the date above mentioned, from the last year's profits, and is now in process of payment.

The result of the year's business, as by itself, is as follows, viz:

Earnings		$1,424,772 31
Expenses		704,309 98
		$720,462 33
Coupons for the year	$129,120 00	
Canal road loss	9,908 47	
		139,028 47
Leaving applicable for dividends		$581,433 86

As compared with the year preceding, there has been an increase in the receipts to the extent of about 37½ per cent., while the expenses have increased but about 21 per cent.

The present board, at an early day after its organization, in a spirit of conciliation and compromise, commenced considering the propriety of a settlement of the spurious stock fraudulently issued by Robert Schuyler, and thus, if possible, to withdraw the company from a litigation which had already existed some ten years with a prospect of many years further continuance; and therefore, with a single eye to the best interests of all parties, this most important subject was carefully examined into until the 24th day of October last, when, at a special meeting of the board, the following resolution was unanimously adopted, viz:

Resolved, That for the sole purpose of settling and compromising the claims against this company, and not admitting any legal liability thereon, this board is ready to accept the terms proposed in the communications before it, viz: to issue and exchange one new share of its stock for two of the spurious shares held by any owner thereof in good faith and without notice or fault, to be received in full settlement thereof and of all claims of every kind connected therewith, and for the moneys paid or advanced thereon and for any supposed negligence or breach of duty; and to increase the capital stock of the company, not exceeding one million of dollars, for that purpose, provided these terms shall be agreed to, in writing, by the holders and owners of such claims, on or before the 16th day of November next."

Under the above resolution, 11,921 shares of the fraudulent issue have been settled up to the time of closing the stock books for the purpose of the annual meeting, and the capital stock of the company has been increased accordingly. Appended to this report will be found a list of those with whom settlements have been made. The residue of the spurious shares still outstanding, although of considerable amount, are held by a comparatively small number of persons, and a portion of them are still in litigation. Since the 16th day of November, a number of the holders of the spurious stock have applied to the board for permission to come in under the terms of the resolution, waiving past dividends, and settlements in pursuance of such applications are still being made.

We have erected, during the year, at New Haven, a fire-proof building, 30 by 620 feet, at a cost of about $12,000, which is answering a most valuable purpose for the protection of our passenger cars from the weather and fire when not in use. We are also building at Stamford an engine house and turn-table, at a cost of $2,500, both of which have long been needed at that place. We have now on hand 1,500 tons new iron, to be placed on the track the present season; the old rail to give place for this iron will then be on hand for disposal or re-rolling for next year, as may be deemed for the interest of the company.

The number of miles run by passenger trains during the year was 465,617; by freight trains, 104,808; by service trains, 485—total, 570,410. Number of passengers carried, 1,455,155; do., carried one mile, 53,660,428. Tons of freight moved, 94,726; do., moved one mile, 5,589,174. Of the passengers carried, 1,051,672 were local, and 399,483 to and from other roads; 688,400 were passengers over Harlem road; 286,680 commutters over do.; and 476,075 passengers beyond do. Of the freight moved, 40,856 tons were local, and 53,870 tons to and from other roads.

The equipment consists of 29 locomotives; 75 passenger, 16 baggage and mail, and 389 freight cars—of which 6 locomotives, 6 passenger, 3 baggage and mail, and about 200 freight cars are used to operate the Canal road.

The cost of fuel for running the trains the past year has been $116,873 36, or about 20½ cents per mile, against 14½ cents for the preceding year. Tons of coal used, 10,729; cords of wood, 1,017; cords of kindlings, 1,030.

The number of miles run by engines on the Canal road was 101,842. Tons of coal used, 1,118; cords of wood, 1,681; cords of kindlings, 156.

The earnings of the Canal road were $167,453 22; and the expenses, $177,361 69—loss $9,908 47.

Condensed Balance Sheet.

Railroad; including the franchise, right of way, grading, masonry, bridging, fencing, superstructure, iron, station houses, shops, fixtures, furniture, machinery, engineering, agencies, interest, discount on bonds, &c. &c.		$4,656,426 45
Equipment; locomotives, cars, &c.		764,877 34

Bonds; secured by mortgage, due Oct. 1st, 1870, with interest coupons of 6 per cent., payable on the first days of April and October in each year		1,088,000 00
Profit and loss; being the surplus of earnings not paid out in dividends, (but of which $486,809 45 has been expended for additional second track, new bridges, depots, and equipments, retiring bonds, &c.)		827,869 08
Accounts payable; being coupons due April 1st, 1864, March pay rolls, and balances due other roads, &c		211,697 69
		$6,612,366 77

Officers chosen May 21, 1863:

President.—Geo. B. Carhart.

Directors.—George B. Carhart, George N. Miller, Abraham R. Van Nest, James J. Roosevelt, Wilson G. Hunt, John Bradley, E. C. Scranton, John W. Leeds, Jonathan Godfrey.

Superintendent.—James H. Hoyt.

Treasurer.—William Bement.

Secretary.—E. S. Abernethy.

☞ The following is a statement of the amount received for duties on imports at the port of Portland for the past seven years:—1858, $240,677 20; 1859, $284,411 35; 1860, $255,276 95; 1861, $199,240 70; 1862, $593,656 99; 1863, $637,045 45; 1864, $342,491 86.

Illinois Central Railroad.

The owners of the Cancelled Bonds Scrip issued by this Company, are requested to present the same for conversion into Scrip Stock. Certificates will be issued for Scrip Shares with $90 paid.

The Transfer Books will be closed on the 15th July.

The dividend declared payable 1st August, will be paid to parties in whose names the shares are registered; it will be paid on each class of stock held, to such party in one payment, without subdivision; the owners of the stock will find it more convenient to have it registered in their own names.

The Company will prepay the Bonds due 1st March, next, ($257,000) if presented prior to 1st September, with accrued interest and one per cent. premium.

There are $33,000 of Bonds due February 20th, 1868, for these the company will pay five per cent premium.

The annexed is a tabular statement of business the first half of this year, compared with that of 1863.

New York Canals.

The quantity of Flour, Wheat, Corn and Barley, left at Tide-water from the commencement of navigation to the 30th of June, inclusive, during the years 1863 and 1864, was as follows:

	Flour, bl.	Wheat, bu.	Corn, bu.	Bar'ly bu.
1863	402,100	5,635,800	6,814,100	55,700
1864	224,100	5,625,300	1,737,100	137,100
Dec.	178,000	10,500	5,077,000	In. 81,100

By reducing the wheat to flour, the quantity of the latter left at tide-water this year, shows a deficiency of 180,100 bbls flour.

The following comparative table shows the quantity of some of the principal articles of produce left at tide-water from the commencement of navigation, to and including the 30th of June, in the years indicated:

	1862, Canal open'd. May 1.	1863, May 1.	1864. April 30.
Flour, bbls	387,800	402,100	224,100
Wheat, bush	7,543,000	5,635,800	5,625,300
Corn, bush	3,979,900	6,814,100	1,737,100
Barley, bush	862,500	55,700	137,000
Oats, bush	1,125,500	2,839,600	2,646,900
Rye, bush	291,200	91,200	64,500
Beef, bbls	10,400	7,700	5,000
Pork, bbls	123,800	319,000	45,200
Bacon, lbs	4,774,600	3,002,800	559,300
Butter, lbs	62,900	38,400	23,600
Lard, lbs	4,182,300	16,270,400	694,300
Cheese, lbs	369,500	340,400	41,200
Wool, lbs	39,700	10,900	29,200

The Tax Bill.

Continued from Page 701.

TABLE III.—*Stamp Duties.*

Agreement or contract other than those specified in this schedule, any appraisement of value or damage, or for any other purpose; for every sheet or piece of paper upon which either of the same shall be written, five cents.

Agreement or contract other than those specified in this schedule, if more than one agreement be written on the sheet of paper, for each, five cents.

Bank check, draft or order for the payment of money, two cents.

Bill of exchange, (inland), draft or order for the payment of any sum of money, not exceeding one-hundred dollars, otherwise than at sight or on demand, or on any promissory note, (except bank notes issued for circulation, and checks made and intended to be forthwith presented, and which shall be presented to a bank or banker for payment; or any memorandum, check, receipt, or other written or printed evidence of an amount of money to be paid on demand or at a time designated, for a sum not exceeding one hundred dollars, five cents.

Bill of exchange, for every additional one hundred, or fractional part in excess of one hundred dollars, 5 cents.

Bills of exchange (foreign), drawn in but payable out of the United States, if drawn singly or otherwise than in a set of three or more, same as inland bills of exchange.

Bill of exchange (foreign), drawn in sets of three or more, for every bill of each set, where the sum made payable shall not exceed $100, or the equivalent thereof, in any foreign currency in which such bills may be expressed, 2 cents.

Bill of exchange (foreign), for every additional $100, or frrctional part thereof in excess of $100, 2 cents.

Bill of lading or receipt, other than charter party, for any goods, &c., exported to a foreign port, 10 cents.

Bill of sale by which any ship or vessel, or any part thereof, shall be conveyed, where the consideration shall not exceed $500, 25 cents.

Bill of sale exceeding $500, and not exceeding $1000, 50 cents.

Bill of sale exceeding $1,000, for every additional amount of $1,000, or fractional part thereof, 50 cents.

Bonds of indemnity, where the penalty is $1,000 or less, 50 cents.

Bonds of indemnity, where the penalty exceeds $1,000 for every additional $1,000, or fractional part in excess of $1,000, 25 cents.

Bond of any description, other than such as may be required in legal proceedings, or used in connection with mortgage deeds, and such as are not otherwise charged, 25 cents.

Certificate of stock, $25 cents.

Certificate of profits of an incorporated company for a sum not less than $10 nor more than $50, 10 cents.

Certificate of profits exceeding $50, 25 cents.

Certificate of damage, 25 cents.

Certificate of report, if for a sum not exceeding $100, 2 cents.

Certificate for a sum exceeding $100, 5 cents

Certificate of any other description, 5 cents.

Charter Party if the tonnage does not exceed $150 tons, $1.

Charter exceeding 150 tons and not exceeding 300 tons, $3.

Charter exceeding 300 tons and not exceeding 600 tons, $5.

Charter exceeding 600 tons, $10.

Contract, issued by brokers, &c., $10.

Conveyance, when the value exceeds $150 and does not exceed $500, 50 cents.

Conveyance exceeding $500 and not exceeding $1,000, $1.

Conveyance exceeding $1,000 and not exceeding $2,500, $2.

Conveyance exceeding $2,500 and not exceeding $5,000, $5.

Conveyance exceeding $5,000 and not exceeding $10,000, $10.

Conveyance exceeding $10,000 but not exceeding $20,000, $20.

Conveyance for every additional $10,000, or fractional part in excess of $20,000, $20.

Entry, Custom-house, for consumption or warehousing not exceeding $100, 25 cents.

Entry, Custom-house, exceeding $100 and not exceeding $500, 50 cents.

Entry, Custom-house, exceeding $500, $1.

Entry, Withdrawal, 50 cents.

Insurance, Life, when the amount insured shall not exceed $1,000 25 cents.

Insurance exceeding $1,000 and not exceeding $5,000, 50 cents.

Insurance, exceeding $5,000, $1.

Insurance, (Marine or inland), each policy, 25 cents.

Lease, where the rent is $300 or less, 50 cents.

Lease, where the rent exceeds $300, for each additional $200 or fraction in excess of $300, 50 cents.

Manifest, if the tonnage does not exceed 300 tons $1.

Manifest exceeding 300 tons and not exceeding $600, $1.

Manifest, exceeding 600 tons, $5.

Mortgage, or any personal bond given as security for the payment of any definite sum of money exceeding $100 and not exceeding $500, 50 cents.

Mortgage exceeding $500 and not exceeding $1,000, $1.

Mortgage exceeding $1,000 and not exceeding $2,500, $2.

Mortgage exceeding $2,500 and not exceeding $5,000, $5.

Mortgage exceeding $5,000 and not exceeding $10,000, $10.

Mortgage exceeding $10,000 and not exceeding $20,000, $15.

Mortgage for every additional $10,000 or fraction in excess of $20,000, $10.

Passage Tickets to foreign ports not exceeding $30, 50 cents.

Power of Attorney for sale of stock, &c., &c., 25 cents.

Power of Attorney or proxy for voting, 10 cents.

Power of Attorney to collect rents, 25 cents.

Power of Attorney to sell real estate, $1.

Probate of Will or Letters of Admistration, where the estate does not exceed the value of $2,000, $1.

Probate of Will or Letters of Administration exceeding $2,000, for every additional $1,000, or fractional part in excess of $2,000, 60 cents.

Protest, 25 cents.

Receipts for the payment of any sum of money, or for the payment of any debt due, not being for satisfaction of any mortgage or judgment, or decree of a court, and a receipt for the delivery of any property, 2 cents.

Warehouse receipts for any goods, merchandise, stored, &c., 25 cents.

Legal documents, writs, or other original process by which any suit is commenced in any court of record, either law or equity, 50 cents.

Medicines, &c., retail price not exceeding 35 cents, 1 cent.

Medicines, exceeding 25 cents, and not exceeding 50 cents, 2 cents.

Medicines, exceeding 50 cents, and not exceeding 75 cents, 3 cents.

Medicines, exceeding 75 cents and not exceeding $4, 4 cents.

Medicines, exceeding $1, for each 50 cents or fractional part above $1, 2 cents.

Pefumery and cosmetics same as above.

Friction Matches, where the retail price of a package containing 144 matches or less, shall not exceed 5 cents, 1 cent.

Friction Matches, where the price exceeds 5 cents, for each additional 5 cents or fraction, 1 cent.

Photographs, ambrotypes, daguerreotypes, &c., &c., or each picture, when the retail price shall not exceed 25 cents, 2 cents.

Photographs, exceeding 25 cents, and not exceeding 50 cents, 3 cents.

Photographs exceeding 50 cents, and not exceeding $1, 5 cents.

Photographs, exceeding $1, for each additional dollar or fraction, 5 cents.

Playing Cards, valued at over 18 cents per pack, 2 cents.

Playing Cards, exceeding 18 cents, and not exceeding 25 cents, 3 cents.

Playing Cards, exceeding 25 cents, and not exceeding 50 cents, 5 cents.

Playing Cards exceeding 50 cents, and not exceeding $1, 10 cents.

Playing Cards exceeding $1, for each additional 50 cents in excess of $1, 5 cents.

Validity of Assessment.--Statute Limitations.--Compensation for Injuries to Land.

In the case of the Great Falls and Conway Railroad Company against Capp, the facts were these. On the first day of October, 1856, the directors of the Great Falls and Conway Railroad assessed upon each of the shares of the capital stock of the corporation the sum of sixty dollars to pay the debts of the same.

The shares had been previously assessed for one hundred dollars each, and the assessment made on said first day of October was in addition to that sum.

George W. Capp, the deceased, was the owner of eleven shares of the stock, so that the assessment against him amounted to six hundred and sixty dollars. This claim was presented to the Commissioner on his estate, and allowed. From that allowance an appeal was taken by the administrator, and the action entered at the trial term of the court; and the question whether the assessment was legal and binding upon the stockholders was reserved and assigned to the determination of the whole court.

EASTMAN, J.—The Great Falls and Conway Railroad was chartered in June, 1844. In the third section of the charter it is provided, among other things, that the directors shall make such equal assessments from time to time on all the shares in said corporation, as they may deem expedient and necessary in the execution and progress of the work, and direct the same to be paid to the Treasurer of the corporation; provided, however, that no assessments shall be laid upon any share in said corporation of a greater amount than one hundred dollars in the whole on such share; and if a greater amount of money shall be necessary to complete said road, it shall be raised by creating new shares, giving the stockholders in said corporation the right to take said stock in proportion to the stock by them respectively owned in said corporation.

Various acts have from time to time been passed by the Legislature in regard to this road, since the charter was granted, but in none do we find any power to assess the stockholders beyond that which is given in the charter.

Bonds have been issued, and the road mortgaged to secure their payment, and the Legislature have declared those bonds valid; but with this exception, no power has been given or way provided by special act for the payment of the debts of the corporation.

No assessments can be made upon the stockholders of a road beyond what the charter provides for, or the law applicable to the subject authorizes; and all assessments assumed to be made, which do not come within such authority, are invalid.

The assessments spoken of in Chapter 146, section 3, of the Revised Statutes, must be under-

stood to mean such as may be made according to the provisions of the charter and within its limitations.

They are, moreover, to be made by the stockholders at a meeting called for the purpose of providing means for the payment of a specific debt, after demand upon the officers or stockholders.

The statutes point out the way in which, in certain contingencies, the debts of the corporation are to be collected, and who are liable for the same; and those provisions, together with the common law remedy for the collection of debts, furnish all the legal remedies to which the creditors can successfully resort.

The creation of means by the corporation with which to pay the debt is a different matter, and those means cannot be created except under the power given by the charter and the general laws therewith, or by some special law, such as an act to issue bonds and mortgage the road.

If a limitation is fixed beyond which the shares cannot be assessed, and upon the faith of that limitation the stock has been subscribed for, no legal assessments can be made beyond it.

And such is this case.

The charter limits the amount beyond which the directors can make no assessments, and there is no law controlling the charter in that respect.

These assessments, then, being over and above the amount fixed by the charter, were invalid.

The decision of the Commissioner, in allowing them as a claim against the estate was erroneous, and there should be judgment for the defendant.

In the recent English case of Cameron against The Charing Cross Railway Company the question involved was one of considerable importance to railway companies, and also to persons having property in the neighborhood of railway works. The circumstances were these:—The plaintiff was a baker and confectioner, in Duke street, Adelphi, his shop being in the line of thoroughfare which led from the Strand across the Hungerford market to Whitehall, and during the construction of the Charing Cross station the thoroughfare across Hungerford was stopped. When the work was completed the thoroughfare was continued under the station. The plaintiff claimed compensation upon the ground that his business had been seriously injured by the traffic having been stopped, and called upon the company to issue their warrant to have the amount of compensation assessed. The company declined to do this, and the present action was consequently brought to recover £300, at which plaintiff estimated his loss when he sent in his claim. At the trial before the Lord Chief Justice a verdict was entered for the plaintiff, subject to the opinion of the full court upon two questions of law. Afterwards the company obtained a rule calling upon the plaintiff to show cause why a non-suit should not be entered, because the plaintiff had no claim under the Lands Clauses Consolidation Act, as the statute only gave a title to compensation where lands were injuriously affected. There was another point in reference to the form of the notice. The statute said that the claimant, in his notice to the company, should state the nature of his interest; and the present plaintiff had in his notice stated that he was the "occupier," whilst in fact he had a lease for 21 years. This description of the interest, it was contended, was not a compliance with the statute.

The plaintiff appeared to show cause against the rule.

The Lord Chief Justice Erle was of opinion that the rule for a non-suit must be discharged. The first question brought before the court by the railway company was a very substantial one; and it was to be hoped that the tribunal which would hereafter have to decide it would lay down and define the boundary within which a party claiming damages in consequence of the construction of a railway must limit his claim. It had been already decided by the Exchequer Chamber that if the party were so injured that he could maintain an action at law against the railway company for stopping up a public thoroughfare, he might also claim compensation in this form; but the defendants' counsel had contended that in the present case what was complained of was more a personal injury than an injury to real property. The court decided against the company upon this point, because two courts of competent jurisdiction had already given decisions upon the point, and it was not within the province of this court to say whether the other two were right or wrong in their judgments. As to the point whether the plaintiff had sufficiently described the nature of his interest in the property when he stated that he was the occupier, and upon this point he had entertained considerable doubt, but he had at length come to the conclusion that he could not non-suit the plaintiff upon this ground. Whilst saying this, however, he must add that the statement in the notice of the interest of the plaintiff was the barest that could possibly be allowed to pass.

Rule discharged.

☞ The total amount of the Public debt of the United States on the 12th inst. was $1,795,033,569 24, of which $864,169,819 67 bears interest in coin; $400,330,010 21 in currency; $370,170 09 on which interest has ceased, and $530,223,669 37 bearing no interest. The unpaid requisitions are stated at $88,567,000, and the amount in the Treasury at $12,114,508 73.

Railroad Earnings--Weekly.

The earnings of the Milwaukee and Prairie du Chien Railroad for the 1st week in July, 1864, were $33,240 00
Corresponding week of previous year.. 18,359 00

Increase, 75½ per cent..... $14,881 00

The increase since Jan. 1, 1864, is $365,869—71 per cent.

The earnings of the Chicago and Alton Railroad Company for the week ending June 15, were:

	1864.	1863.
Passengers	$21,332 36	$12,910 16
Freight	33,519 91	26,513 33
Sundries	1,548 90	1,324 60
Total	$56,401 17	$40,748 09
Increase 1864		$15,653 08

The earnings of the Grand Trunk Railway for the week ending July 9, 1864, were:

Passengers	$33,557 33
Express freight, mails and sundries	2,500 00
Freight and live stock	51,922 58
Total	$87,979 91
Corresponding week, 1863	75,017 12
Increase	$12,962 79

The earnings of the Michigan Central Railroad for the 2d week in July, 1864, were ... $58,297 82
Corresponding week of previous year.. 43,191 81

Increase $15,106 51

The earnings of the Michigan Southern and Northern Indiana Railroad for the 2d week of July, 1864, were $56,563 00
Corresponding week of previous year.. 41,644 00

Increase $14,919 00

The earnings of the Chicago and Rock Island Railroad for the second week in July, 1864, were $48,253 00
Corresponding week of previous year.. 33,303 00

Increase $14,950 00

The earnings of the St. Louis, Alton and Terre Haute Railroad for the week ending July 7:

1864	$31,216 42
1863	22,766 20
Increase in 1864	$8,450 22

The earnings of the Racine and Mississippi and Northern Illinois Railroad for the week ending July 7, 1864, were:

	1864.	1863.
Passengers	$3,773 40	$2,873 87
Freight	9,350 13	4,905 47
Express	104 16	75 00
Mails	296 58	296 58
Total	$13,524 27	$8,150 92
Increase		$5,373 32

Receipts from January 1st to July 7:

1864	$281,818 78
1863	173,988 28
Increase	$107,830 50

The earnings of the Chicago and Northwestern Railway for the week ending July 7:

Passengers	$34,860 77
Freight	71,247 54
Mail	1,405 36
Express	1,313 67
Total	$108,827 34
Corresponding week of previous year.	75,899 11
Increase, 43⅜ per cent	$32,928 23

The earnings of the Marietta and Cincinnati Railroad for the week ending July, 7:

	1864.	1863.
Passengers	$7,478 53	$4,027 67
Freight	11,747 60	3,723 70
Mail, express & telegraph	1,189 58	885 00
Total	$20,415 71	$8,636 37
This month to date	$20,415 71	$8,636 37
Total since Jan. 1	$477,818 67	$301,495 40

The earnings of the Montreal and Champlain Railroad for the week ending July 9, 1864, were $6,177 22
Corresponding week of previous year.. 4,865 08

Increase $1,312 14

The Detroit and Milwaukee Railroad traffic for the week ending July 14, 1864, was ... $21,983 51
Corresponding week of previous year.. 15,082 93

Increase $6,900 58

The traffic of the Great Western Railroad for the week ending July 8, 1864, was as follows:

Passengers	$22,393 26
Freight and live stock	19,209 36
Mails and sundries	1,452 62
Total	$44,055 24
Corresponding week of 1863	39,918 31
Increase	$4,136 93

American Railroad Journal.

Saturday, July 23, 1864.

Stock Exchange and Money Market.

The return of Mr. Fessenden, the Secretary of the Treasury, to Washington, after a sojourn in this city somewhat protracted for a Cabinet officer, exploded most of the rumors which had previously existed with regard to his plans of operation. He did not get a cent from the Banks, for they had not a cent of money to lend him, after all their magnificent offers; but he got information; he saw what kind of Bankers he had to deal with in New York, what was the extent of their ability, what the strength of their judgment, what the value of their opinions, and what was the real condition of the institutions they represented. Mr. Fessenden, therefore, went back to his office after taking the measure of the New York operators, and no doubt will be able to fit them with precision. This whole negotiation presents a ludicrous aspect, when regarded with any attention.

Mr. Chase's measures were generally clamored against by the Bankers; for when he borrowed their money, and paid interest for it, he generally drew it and paid it out. This with these lenders was a high crime and misdemeanor, and while they could not deny his right to take the money after he had borrowed it, (for this would be rather too absurd a proposition to deny,) they could always talk with feeling of the necessity of not disturbing the market. This disturbance of the market the New York Banks never cared about when their own safety or interest was concerned. They could inflate, and they could contract, and stop specie payments whenever they found it their interest to do so, without the least particle of anxiety for the market. And when they have given any particular indulgence to their customers it has usually been from some other motive than sympathy. The fear of loss has been very often the secret of extensions, renewals, or extraordinary generosity. Whenever we hear then of any display of liberality on their part we know there is a good reason for it, and we have all along approved of the independent operations of the Treasury as preferable to an alliance with the local Banks. During the last months of Mr. Buchanan's helpless administration, the Bankers of this city generously loaned the Treasury a few millions temporarily at twelve per cent, double what it had been paying before, and no doubt they would like to repeat the process.

The offer to lend the Government on this occasion fifty millions was all of a piece with the rest. After issuing their propositions with all the formality of protocols, going so far it is said, as to print them for fear of being misunderstood by Mr. Fessenden, as well as to secure careful perusal in the Bank parlors, they no doubt contemplated nothing else but an acceptance of their views. These were in effect to place themselves with their State charters, on a footing with the National Banks with National charters; to secure a full share of the public monies in deposit, and fifty millions of six per cent Government bonds interest payable in gold, and equivalent to 18 per cent. at present prices in paper, on which they could obtain in a short time from the Controller of the State, the very bills they were to lend the Government. This was the magnanimous and patriotic offer of the banks as it would appear to the eye. But they had no money to lend. They would have to get the Government bonds before they could give the money. So they proposed to give credits on their books, and to honor checks with certificates that they were good, but which they could not pay in lawful money, leaving the unlucky holders to get along with them as well as they might. This was the great offer of the Banks, and this would have been the result. The Secretary with his usual frankness unfolded his plans, which simply were to get money in the best way he could. He agreed to draw for the loan, if effected, in such a way as not to disturb the market, which really meant not to disturb the banks. To a certain extent he would consider them as depositories as long as they were paying over the money, but he could not place other public funds there, nor make their money receivable peremptorily for debts due the Government, for this would be a violation of law, and if there is one public officer who respects the law more

than another, it is Mr. Fessenden. But he informed them that if he issued his bonds, he wanted money for them, such money as would pass everywhere at par, pay debts as certainly as gold, and be acceptable to the soldiers, seamen, and public creditors. The Banks, as it very soon appeared, had no such money to lend. They had some specie, but in trifling amount, but no other lawful money. Mr. Fessenden would take legal tenders, but they had none of these in amount, and have not had for some time past. Nor are the Banks in Boston or Philadelphia any better off in this respect. They cannot to-day pay their circulation and their deposits, in the lawful money of the Country, and yet they claim to be rich and prosperous and to be able to lend money to the Government. Mr. Fessenden saw they had no money to lend; he found they were inflating the market with discounts on the deposited capital of their customers, the very customers to whom they could not return their money in legal tender; that they were carrying the paper of speculators on a large scale in every sort of staple article necessary to the public; but he saw no money. He, therefore, returned to Washington with some new ideas of New York Finance, and how banks could do business and lend money, without really having any.

It is therefore understood that Mr. Fessenden will make an appeal to the people as his predecessor did, for what he wants, and not being in any great straits at present will mature his plans somewhat at his leisure. Will he issue bonds to get bank paper for them which he cannot use, and indeed no one wants. No, he will require legal tenders or National Bank notes. This will therefore exclude the associated banks from participating in the loan and making the profit on it, for they have no legal tenders, and they will not receive on deposit the bills of the National Banks. So that Mr. Fessenden's loan will be and must be taken popularly, and this is the very best thing which can happen to him.

But it has been suggested that a simpler and more direct, as well as a more philosophical arrangement should be made by the Secretary of the Treasury: that is, instead of borrowing any more money of the banks or the people, he should issue his own legal tenders, taking care however to have constantly open to the public a corresponding amount of gold paying stocks, in which the holders could fund them at any time they chose without going through the formalities of time and place, as subscriptions are now taken. This principle was set forth and ably vindicated in last week's JOURNAL, in a letter from A. B. Johnson, Esq., of Utica, to an influential party in Washington. This gentleman is a banker not only, but a political economist of a high order. Since then, it has been reasserted, to an extreme however, as we think, by S. M. Stilwell, Esq., of this city. And their views may be sustained by the present and most unanswerable logic: Thus—

The war cannot be now carried on except by the aid of large issues of paper money. The Government should use the currency next best possible to gold, now no longer money, but a commodity like diamonds or other precious stones.

The very best paper it can use is its own, for it comes next to gold in its office, power, universality of circulation, and in its being positively and finally redeemable in gold, meanwhile paying interest in gold, the very best security in all respects that paper money, or even gold can buy.

When therefore the Government can issue and use such money, it is not only a folly but a fault to force any other kind upon its creditors, and thus to pay interest for the use of a kind of paper currency called bank notes which nobody likes, nobody wants, and is positively at the present time irredeemable in anything.

Beyond all question this would be the solution of the financial difficulties of the Treasury and the Government but for one thing, the danger of inflation, and the further rise in prices, injurious both to the Government and to ordinary consumers. To prevent this we would append to the plans of Messrs. Johnson and Stilwell, this restriction, that the legal tenders so issued should not be legal tenders after one year from the date of issue, but should then be convertible into 6 per cent. stock, if funded within a reasonable period.

In this way the Government would have all the money it wanted without coming into the market at all, and would be taking in this very money for stock, and contracting by dollar for dollar as it went along. Simplicity in finance is a great object, and this arrangement would be as near perfection as possible. Every dollar issued would be funded in the course of one year after issue, while in the meantime the functions of a true money would have been performed by it, and the Government would have saved a year's interest. Any other money the Government borrows will be just as much an inflation as its own. In this respect there is no difference. While on the one hand as long as the local banks have the control of the currency as they have had heretofore, expansion is not only likely to continue, but to increase, to the injury of all the great interests of the country. On the other hand, Government currency is fixed by laws known and understood by the people whose money it is, and for whom alone it is issued, and can procure for its holders if in excess at any time, solid redemption and security in public engagements realizable in the precious metals, and the universal standard of value. No bank currency can do this, if there be any obstruction in the usual paths of finance, a panic or a suspension.

What favors this particular view is the fact that legal tender money is becoming very scarce. This is attributed by many attentive observers to the partiality which the people everywhere entertain for it. Bills so convenient, so universally current and acceptable, never before circulated in this country, and no doubt they are hoarded to a very considerable extent. Certain it is that they are disappearing, and the local bank notes are reappearing. A twenty dollar greenback can now scarcely be changed at any shop or market for smaller denominations of its kind. It would seem to be in accordance therefore with the public sentiment, if paper must be issued in some form, that the Government should use its own.

It is well enough to observe here, that the banks defeated in their attempts on Mr. Fessenden, now announce their falling back into a position which though called defensive, is in reality extremely aggressive. They now "give out and pretend," as the lawyers used to say in their old bills in chancery, that if Mr. Fessenden offers loans with a limit to the price, they will put their Governments in the market, which will so reduce the quotations as to defeat his purpose. And the reason given is, that otherwise their deposits will be reduced in amount. In other words, if they cannot hold their millions of deposits for which they pay no interest, and use them to discount with, or speculate upon as the case may be, they will protect this convenient fund by depreciating the value of Government securities!! We see of what stuff these banks are made.

The gold market has the last week lost the dignity it possessed when it was bought and sold on sound financial principles. Instead of the article being sold for the real purposes of commerce, and for the honorable adjustment of foreign balances, it is now the fancy stock of crack-brained speculators. It is not even as respectable as petroleum, or whiskey, for these have a legitimate and intrinsic value, and may be counted upon as reliable in the market for certain purposes. But gold has become the mere tool of speculation, and changes its color every hour of the day, and its comparative value every minute; we say comparative, in reference to flour or cotton, or any other great staple, or to the labor which produces them. Its fluctuations therefore are frequently ten or fifteen per cent. in a morning, and its whole fall from its greatest rise a few weeks since, has been between 40 and 50 per cent. with a downward tendency. For be it remembered that foreign exchange has been sold within two weeks below the par in coin, that is is to say at 107½, and also that the shipments of coin as we might infer from this circumstance, have fallen off also very largely. At present they are inconsiderable, and as our export trade is increasing by the reshipment of foreign goods, which on arrival here are found not to pay, we find in this, another reason for the fluctuation or rather the decline in gold. We may therefore expect to hear that the gold speculation will end in the complete ruin of a large number of those who are engaged in it, just as certain as the ruin of those who have expecting to raise pork to $50 a barrel, or those whose enormous stocks of molasses and sugar now filling the bonded warehouses may expect in vain to get 300 per cent. profit on those commodities. Fair profits are one thing, but forestalling and sordid avarice are others. Where the laws of commerce have a fair opportunity of expressing themselves through ordinary transactions, they always work justice. Where one unlawful combination to raise prices succeeds, a hundred fail. It is like blockade running or lottery ticket investments. Some may make a hit now and then, but nearly all the rest are sure to be unsuccessful.

Another curious fact in the market is the steadiness with which a rise in various kinds of necessaries is demanded, and the unsteadiness of any reduction when gold falls. Many articles of prime necessity are now held at 2 and 300 per cent. advance of the price of gold, and enormous quantities are stored and kept in reserve to increase the demand, and compel consumers to pay the enormous advance in prices. But as we have said before, this will come to an end. We are not cut off from foreign or domestic supplies as the people in the confederate States are, and the Government

pays its interest regularly in gold, and the confederates pay in nothing. Besides our commerce is large, with China even now it is increasing, and when the ocean is cleared of three piratical vessels our flag will be seen as often as it was before the war.

The stock market is not so active as it has been. Government securities are steady and in demand, the registered sales within the previous week being many hundreds of thousands of dollars. Railway bonds are steady and inquired for.

Tne exports from New York are on the increase having run up to $7,889,920, against $2,281,885, the same week last year.

The Boston imports for the week ending July 15, were $747,110, against $638,776 for the corresponding week in 1863. The exports were $245,541, against $169,711 in 1863.

The total value of foreign exports from the port of Baltimore were $139,879.

On Tuesday last the balance at the Sub-Treasury was $18,922,547.

The gold shipment from San Francisco this year to the 17th of June amounts to $27,835,100, against $21,529,046 for the corresponding time in 1863. Excess this year, $6,306,060.

And this is in the face of an exceedingly dry season, and the real want of water at many of the mines. We are informed by a gentlemen just arrived from San Francisco and largely interested in mines, that the number of these now worked is all of 10,000, and that a large part of California is at this moment undeveloped in this respect. He makes the assertion that in 1874 the products of California alone in the precious metals will be $300,000,000 per annum.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Indiana War Loan, 99; Indiana 5s, 86; Tennessee 5s, 48; Louisiana 6s, 72; North Carolina 6s, 58¾; Kentucky 6s, 105; Marietta and Cincinnati 1st mort., 106; Hannibal and St. Joseph Land Grant, 101½; Atlantic and Great Western, 1st mort., (Ohio div.) 100; Pitts., Ft. ☞ The ill health of H. M. Humphrey has caused him to resign his position as Cashier of the Ninth National Bank, Mr. John T. Hill, who succeeds him, is a gentleman of good experience in Banking in the Park Bank and elsewhere. The business of the Ninth is very large.

☞ Mr. I. R. Tupper has been appointed Commercial Agent for the New York Central Railroad Company at New York, and may be found at their office, No. 239 Broadway.

☞ Petitions are circulating in Minnesota asking of the Governor to call an extra session of the Legislature to bestow the land granted to the Lake Superior and St. Paul Railroad, funds having been offered to complete the entire road as soon as possible.

☞ The French Metrical System is now in use in Italy, Spain, Portugal, the Low Countries, Belgium, Greece, Colombia, and the Grisons, Valais, and Tessin, Cantons of Switzerland.

☞ The Prussian Government is engaged in preliminary surveys for a canal between the Baltic and the North Sea. The route known as the Brunsbuttel, Rendsburg and Eckenpoerde will probably be selected, as the engineer's report gives it the preference.

Railroad Freight Tariff.

The Presidents of nearly all the leading railroads leading from this point to the West were in council at the St. Nicholas Hotel on the 14th. William H. Clement, Esq., of the Little Miami and Columbus and Xenia Railroad, presided. The principal business was a revision of the freight tariff, and reclassifying goods. A resolution was adopted in favor of advancing the rate of Western freights *twenty per cent.*, after which the Convention adjourned *sine die*. The new arrangement will probably go into effect about the first of August.

Ogdensburg and Lake Champlain R. R.

A hearing was had, on the 12th inst., at Plattsburg, N. Y., before the general term of the Supreme Court, on the petition of this corporation that the court would direct the Trustees of the Second Mortgage Bonds to make a surrender of the property to them. It appeared that a strict construction of the statute made it necessary that the order of notice should proceed from this court at its general term, and not from the District Court, as was done in this case. The parties were therefore directed to file their petition, and give notice to all parties interested to appear at the next term of the court to be held in October. The prospects of this road were never better than at the present time. Its rolling stock, and that of the whole line

from Ogdensburg to Boston, is taxed to its utmost capacity, to do the business that is offered.—*Transcript.*

New Jersey (Paterson) Locomotives.

The United States Government, having taken possession of upwards of five hundred miles of railroad in Tennessee and Georgia, which roads were found to be very deficient in locomotives, as well as other rolling stock, contracts were made last spring with several builders to furnish a hundred or more first-class engines for use on said roads. The three locomotive shops in this city, viz: Rogers & Co., Danforth & Cook, and the New Jersey Locomotive Works—contracted for thirty-six of these locomotives, all of which were to be finished by the 15th of July. The first locomotive for Government was turned out on the 29th of April, the second on May 2d, and the whole number is now completed. Of these Rogers & Co. built 15, Danforth & Cook 12, and the New Jersey Locomotive Works 9. Besides finishing this contract for government, the Paterson shops have also completed six locomotives for other parties, making forty-two of these powerful engines in about two months, equal to almost one a day, counting actual working time.—*Paterson Register.*

Interest and Dividends.

The Erie railway company have declared a semi-annual dividend of 3½ per cent (payable less the government tax of 5 per cent) on the preferred stock. Also a dividend of 4 per cent on the common stock, free of government tax—both payable at the Treasurer's office in this city on 3d of August. The books were closed on the 19th inst., to be re-opened on the 5th prox.

The New York Central Railroad will pay, August 20, a twenty-second semi-annual dividend of 4 per cent, free of tax. The books close 30th inst., to re-open August 24.

The Lehigh and Luzerne Railroad Company a semi-annual dividend of six per cent, payable on the 18th inst.

The New Jersey Railroad and Transportation Company will pay, 1st August, a semi-annual dividend of 5 per cent, free of tax.

The Philadelphia and Trenton Railroad Company, will pay a semi-annual dividend of five per cent, clear of all taxes, from the profits of the company, on and after the 21st inst.

The Delaware and Raritan Canal and Camden and Amboy Railroad Company will pay, July 21st, 5 per cent, free of government tax.

The Morris Canal Company announces a semi-annual dividend of five per cent on the preferred shares, and a dividend of five per cent on the consolidated stock, free of government tax; payable on the 2d of August next at the office of the company in Jersey City.

The Dubuque and Sioux City Railroad Company will pay 1st August a scrip dividend of 3½ per cent on the preferred stock.

The Pittsburg, Fort Wayne and Chicago Railroad Company have declared a dividend of 2½ per cent on the shares of the original Capital Stock of this Company, payable (free of Government Tax) on and after the 5th of August, at the office of the Company in Pittsburg, and at the Transfer Agency, Winslow, Lanier & Co., No. 52 Wall street, New York, to the Stockholders, as registered at the respective offices. The transfer books were closed on the 20th inst., to be reopened on the 5th prox.

The Pittsburg, Fort Wayne and Chicago Railroad Company has declared a dividend of 3½ per cent on the 8d mortgage bonds for the half year ending June 80, payable on the 6th of August.

☞ The revenue collected at the port of Halifax, N. S., for the six months ending 30th June was $357,044, being $71,171 in excess of the amount collected for the same period last year.

Pacific Railroad Act.

AN ACT.

To amend an act entitled "An act to aid in the construction of a railroad and telegraph line from the Missouri to the Pacific Ocean, and to secure to the government the use of the same for postal, military, and other purposes," approved July one, eighteen hundred and sixty-two.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the capital stock of the company entitled the Union Pacific Railroad Company, authorized by the act of which this act is amendatory, shall be in shares of one hundred dollars, instead of one thousand dollars, each; that the number of shares shall be one million, instead of one hundred thousand; and that the number of shares which any person shall hold to entitle him to serve as a director in said company (except the five directors to be appointed by government) shall be fifty shares instead of five shares; and that every subscriber to said capital stock for each share of one thousand dollars heretofore subscribed shall be entitled to a certificate for ten shares of one hundred dollars each: and that the following words in section first of said act: "which shall be subscribed for and held not more than two hundred shares by any one person," be, and the same are hereby repealed.

SEC. 2. *And be it further enacted*, That the Union Pacific Railroad Company shall cause books to be kept open to receive subscriptions to the capital stock of said company (until the entire capital of one hundred millions of dollars shall be subscribed,) at the general office of said company in the city of New York, and in each of the cities of Boston, Philadelphia, Baltimore, Chicago, Cincinnati, and St. Louis, at such places as may be designated by the President of the United States, and in such other localities as may be directed by him. No subscription for said stock shall be deemed valid unless the subscriber therefor shall, at the time of subscribing, pay or remit to the treasurer of the company an amount per share subscribed by him equal to the amount per share previously paid by the then existing stockholders. The said company shall make assessments upon its stockholders of not less than five dollars per share, and at intervals of not exceeding six months from and after the passage of this act, until the par value of all shares subscribed shall be fully paid: and money only shall be receivable for any such assessment, or as equivalents for any portion of the capital stock hereinbefore authorized. The capital stock of said company shall not be increased beyond the actual cost of said road. And the stock of the company shall be deemed personal property, and shall be transferable on the books of the company, at the general office of said company in the city of New York, or at such other transfer office as the company may establish.

SEC. 3. *And be it further enacted*, That the Union Pacific Railroad Company, and all other companies provided for in this act and the act to which this is an amendment be, and hereby are, empowered to enter upon, purchase, take, and hold any lands or premises that may be necessary and proper for the construction and working of said road, not exceeding in width one hundred feet on each side of its centre line, unless a greater width be required for the purpose of excavation or embankment; and also any lands or premises that may be necessary and proper for turnouts, standing places for cars, depots, station houses, or any other structures required in the construction and operating of said road. And each of said companies shall have the right to cut and remove trees or other materials that might, by falling, encumber its road bed, though standing or being more than one hundred feet therefrom. And in case the owner or claimant of such lands or premises and such company can not agree as to the damages, the amount shall be determined by the appraisal of three disinterested commissioners, who may be appointed upon application by any party to any judge of a court of record in any of the Territories in which the lands or premises to be taken lie; and said commissioners in their assessments of damages, shall appraise such premises at what would have been the value thereof if the road had not been built; and upon return into court of such appraisement, and upon the payment to the clerk thereof of the amount so awarded by the commissioners for the use and benefit of the owner thereof, said premises shall be deemed to be taken by said company, which shall thereby acquire full title to the same for the purposes aforesaid. And either party, feeling aggrieved by said assessment, may, within thirty days, file an appeal therefrom, and demand a jury of twelve men to estimate the damage sustained; but such appeal shall not interfere with the rights of said company to enter upon the premises taken, or to do any act necessary in the construction of its road. And said party appealing shall give bonds, with sufficient surety or sureties, for the payment of costs that may arise upon such appeal. And in case the party appealing does not obtain a more favorable verdict, such party shall pay the whole cost incurred by the appellee, as well as its own. And the payment into court, for the use of the owner or claimant, of a sum equal to that finally awarded, shall be held to vest in said company the title of said land, and the right to use and occupy the same for the construction, maintaining, and operating of the road of said company. And in case any of the lands to be taken as aforesaid shall be held by any person residing without the territory or subject to any legal disability, the court may appoint a proper person, who shall give bonds, with sufficient surety or sureties, for the faithful execution of his trust, and who may represent in court the person disqualified or absent aforesaid, when the same proceedings shall be had in reference to the appraisement of the premises to be taken, and with the same effect as have been already described. And the title of the company to the land taken by virtue of this act shall not be affected nor impaired by reason of any failure by any guardian to discharge faithfully his trust. And in case it shall be necessary for either of the said companies to enter upon lands which are unoccupied, and of which there is no apparent owner or claimant, it may proceed to take and use the same for the purpose of its said railroad, and may institute proceedings in manner described for the purpose of ascertaining the value of and acquiring a title to the same; and the court may determine the kind of notice to be served on such owner or owners, and may in its discretion appoint an agent or guardian to represent such owner or owners in case of his or their incapacity or non-appearance. But in case no claimant shall appear within six years from the time of the opening of said road across any land, all claim to damages against said company shall be barred. It shall be competent for the legal guardian of any infant, or any other person under guardianship, to agree with the proper company as to damages sustained by reason of the taking of any lands of any such person under disability, as aforesaid, for the use as aforesaid; and upon such agreement being made, and approved by the court having supervision of the official acts of said guardian, the said guardian shall have full power to make and execute a conveyance thereof to the said company, which shall vest the title thereto in the said company.

SEC. 4. *And be it further enacted*, That section three of said act be hereby amended by striking out the word "five," where the same occurs in said section, and by inserting in lieu thereof the word "ten;" and by striking out the word "ten," where the same occurs in said section, and by inserting in lieu thereof the word "twenty." And section seven of said act is hereby amended by striking out the word "fifteen," where the same

occurs in said section, and inserting in lieu thereof the word "twenty-five." And the term "mineral land," wherever the same occurs in this act, and the act to which this is an amendment, shall not be construed to include coal and iron lands. And any lands granted by this act, or the act to which this is an amendment, shall not defeat or impair any pre-emption, homestead, swamp land, or other lawful claim, nor include any government reservation of mineral lands, or the improvements of every bona-fide settler, or any lands returned and denominated as mineral lands, and the timber necessary to support his said improvements as a miner or agriculturist, to be ascertained under such rules as have been or may be established by the commissioner of the general land office in conformity with the provisions of the pre-emption law: *Provided*, That the quantity thus exempted by the operation of this act, to which this is an amendment, shall not exceed 160 acres for each settler who claims as an agriculturist; and such amount for each settler who claims as a miner as the said commissioner may establish by general regulations; *Provided, also*, That the phrase that where the same shall contain timber, the timber thereon is hereby granted to said company, in the proviso to said Section 3, shall not apply to the timber being or growing on any land further than ten miles from the centre line of any one of said roads or branches mentioned in said act or in this act. And all lands shall be excluded from the operation of this act, and the act to which this is an amendment, which were located under the provisions of an act entitled "An act donating lands to the several States and Territories which may provide colleges for the benefit of agriculture and the mechanic arts," approved July second, eighteen hundred and sixty-two, and notice thereof given in the proper land office.

SEC. 5. *And be it further enacted*, That the time for designating the general route of said railroad, and of filing the map of the same, and the time for the completion of that part of the railroads required by the terms of said act of each company, be, and the same is hereby, extended one year from the time in said act designated; and that the Central Pacific Railroad Company of California shall be required to complete twenty-five miles of their said road in each year thereafter, and the whole to the State line within four years, and that only one half of the compensation for services rendered for the government by said companies shall be required to be applied to the payment of the bonds issued by the government in aid of the construction of said roads.

SEC. 6. *And be it further enacted*, That the proviso to section four of said act is hereby modified as follows, to wit: And the President of the United States is hereby authorized, at any time after the passage of this act, to appoint for each and every of said roads, three commissioners, as provided for in the act to which this act is amendatory; and the verified statement of the president of the California Company, required by said section four, shall be filed in the office of the United States surveyor general for the State of California, instead of being presented to the President of the United States: and the said surveyor general shall thereupon notify the said commissioners of the filing of such statement, and the said commissioners shall thereupon proceed to examine the portion of said railroad and telegraph line so completed, and make their report thereon to the President of the United States, as provided by the act to which this is amendatory. And such statement may be filed, and such railroad and telegraph line be examined and reported on by the said commissioners, and the requisite amount of bonds may be issued, and the lands appertaining thereto may be set apart, located, entered, and patented, as provided in this act and the act to which this is amendatory, upon the construction by said railroad company of California of any portion of not less than twenty consecutive miles of their said railroad and telegraph line, upon the certificate of said commissioners that such portion is completed as required by the act of which this is amendatory. And section ten of the act of which this is amendatory is hereby amended by inserting after the words "United States," in the last clause, the words "and States intervening."

SEC. 7. *And be it further enacted*, That so much of section seventeen of said act as provides for a reservation by the government of a portion of the bonds to be issued to aid in the construction of the said railroads is hereby repealed. And the failure of any one company to comply fully with the conditions and requirements of this act, and the act to which this is amendatory, shall not work a forfeiture of the rights, privileges, or franchises of any other company or companies that shall have complied with the same.

SEC. 8. *And be it further enacted*, That for the purpose of facilitating the work on said railroad, and of enabling the said company as early as practicable to commence the grading of said railroad in the region of the mountains, between the eastern base of the Rocky Mountains and the western base of the Sierra Nevada Mountains, so that the same may be finally completed within the time required by law, it is hereby provided that whenever the chief engineer of the said company, and said commissioners, shall certify that a certain proportion of the work required to prepare the road for the superstructure on any such section of twenty miles is done (which said certificate shall be duly verified,) the Secretary of the Treasury is hereby authorized and required, upon the delivery of such certificate, to issue to said company a proportion of said bonds, not exceeding two-thirds of the amount of bonds authorized to be issued under the provisions of the act, to aid in the construction of such section of twenty miles, nor in any case exceeding two-thirds of the value of the work done. The remaining one-third to remain until the said section is fully completed and certified by the commissioners appointed by the President, according to the terms and provisions of the said act. And no bonds shall issue to the Union Pacific Railroad Company for work done west of Salt Lake City under this section, more than three hundred miles in advance of the completed continuous line of said railroad from the point of beginning on the one hundredth meridian of longitude.

SEC. 9. *And be it further enacted*, That to enable any one of said corporations to make convenient and necessary connexions with other roads, it is hereby authorized to establish and maintain all necessary ferries upon and across the Missouri River and other rivers which its road may pass in its course; and authority is hereby given said corporation to construct bridges over said Missouri River and all other rivers for the convenience of said road: *Provided*, That any bridge or bridges it may construct over the Missouri River or any other navigable river on the line of said road shall be constructed with suitable and proper draws for the passage of steamboats, and shall be built, kept, and maintained, at the expense of said company, in such manner as not to impair the usefulness of said rivers for navigation to any greater extent than such structures of the most approved character necessarily do. And provided further, that any company authorized by this act to construct its road and telegraph line from the Missouri River to the initial point aforesaid, may construct its road and telegraph line so as to connect with the Union Pacific Railroad at any point westwardly of such initial point, in case such company shall deem such westward connection more practicable or desirable; and in aid of the construction of so much of its road and telegraph line, as shall so be a departure from the route hereinbefore provided for its road, such company shall be entitled to all the benefits, and be subject to all the conditions and restrictions of this act: Provided further, however, that the bonds of the United States shall not be issued to such company for a greater amount than is hereinbefore provided if the same had united with the Union Pacific Railroad on the 100th degree of longitude. Nor shall such company be entitled to receive any greater amount of alternate sections of public lands than are also herein provided.

SEC. 10. *And be it further enacted*, That section five of said act be so modified and amended that the Union Pacific Railroad Company, the Central Pacific Railroad Company, and any other company authorized to participate in the construction of said road, may, on the completion of each section of said road as provided in this act, and the act to which this act is an amendment, issue their first mortgage bonds on their respective railroads and telegraph lines to an amount not exceeding the amount of the bonds of the United States, and of even tenor and date, time of maturity, rate and character of interest with the bonds authorized to be issued to said railroad companies respectively. And the lien of the United States bonds shall be subordinate to that of the bonds of any or either of said companies hereby authorized to be issued on their respective roads, property, and equipments, except as to the provision of the sixth section of the act to which this act is an amendment, relating to the transmission of dispatches, and the transportation of mails, troops, and munitions of war, supplies, and public stores, for the Government of the United States. And said section is further amended by striking out the word "forty," and inserting in lieu thereof the words, "on each and every section of not less than twenty." That if any of the railroad companies entitled to bonds of the United States, or to issue their first mortgage bonds herein provided for, has at the time of the approval of this act issued or shall thereafter issue any of its own bonds or securities in such form and manner as in law and equity to entitle the same to priority or preference of payment to the said guaranteed bonds, or said first mortgage bonds, the amount of such corporate bonds outstanding and unsatisfied, or uncancelled, shall be deducted from the amount of such government and first mortgage bonds to which the company may be entitled to receive and issue, and such an amount only of such government bonds and such first mortgage bonds shall be granted or permitted as, added to such outstanding, unsatisfied, or uncancelled bonds of the company, shall make up the whole amount per mile to which the company would otherwise have been entitled. And provided further, that before any bonds shall be so given by the United States, the company claiming them shall present to the Secretary of the Treasury, an affidavit of the president and secretary of the company, to be sworn to before the judge of a court of record, setting forth whether said company has issued any such bonds or securities, and if so, particularly describing the same, and such other evidence as the Secretary may require, so as to enable him to make the deduction herein required, and such affidavit shall then be filed and deposited in the office of the Secretary of the Interior; and any person swearing falsely to any such affidavit shall be deemed guilty of perjury, and on conviction thereof shall be punished as aforesaid; Provided, also, that no land granted by this act shall be conveyed to any party or parties, and no bonds shall be issued to any company or companies, party or parties, on account of any road or part thereof, made prior to the passage of the act to which this act is an amendment, or made subsequent thereto, under the provisions of any act or acts other than this act and the act amended by this act.

SEC. 11. *And be it further enacted*, That the Leavenworth, Pawnee, and Western Railroad Company, now known as the Union Pacific Railway Company, Eastern Division, shall build the railroad from the mouth of Kansas River, by the way of Leavenworth, or if that be not deemed the best route, then the said company shall, within two years, build a railroad from the said city of Leavenworth to unite with the main stem at or near the city of Lawrence; but to aid in the construction of said branch the said company shall not be entitled to any bonds. And if the Union Pacific Railroad Company shall not be proceeding in good faith to build the said railroad through the territories, when the Leavenworth, Pawnee, and Western Railroad Company, now known as the Union Pacific Railway Company, Eastern

Division, shall have completed their road to the 100th degree of longitude, then the last named company may proceed to make said road westward until it meets and connects with the Central Pacific Railroad Company on the same line. And the said railroad from the mouth of Kansas River to the 100th meridian of longitude shall be made by the way of Lawrence and Topeka, or on the bank of the Kansas River opposite said towns: *Provided*, That no bonds shall be issued or land certified by the United States to any person or company for the construction of any part of the main trunk line of said railroad west of the 100th meridian of longitude and east of the Rocky Mountains until said road shall be completed from or near Omaha, on the Missouri River, to the said 100th meridian.

SEC. 12. *And be it further enacted*, That at and after the next election of directors the number of directors to be elected by the stockholders shall be fifteen; and the number of directors to be appointed by the President shall be five; and the President shall appoint three additional directors to serve until the next regular election, and thereafter five directors. At least one of said government directors shall be placed on each of the standing committees of said company, and at least one on every special committee that may be appointed. The government directors shall, from time to time, report to the Secretary of the Interior, in answer to any inquiries he may make of them, touching the condition, management, and progress of the work, and shall communicate to the Secretary of the Interior, at any time, such information as should be in the possession of the department. They shall, as often as may be necessary to a full knowledge of the condition and management of the line, visit all portions of the line of road, whether built or surveyed; and while absent from home, attending to their duties as directors, shall be paid their actual traveling expenses, and be allowed and paid such reasonable compensation for their time actually employed as the board of directors may decide.

SEC. 13. *And be it further enacted*, That the next election of directors of said railroad shall be held on the first Wednesday of October at the office of said company in the city of New York, between the hours of 10 o'clock A. M. and 4 o'clock P. M. of said day, and all subsequent regular elections shall be held annually thereafter at the same place; and the directors shall hold their office for one year and until their successors are qualified.

SEC. 14. *And be it further enacted*, That the several companies authorized to construct the aforesaid roads are hereby required to operate and use said roads and telegraph for all purpose of communication, travel, and transportation so far as the public and the Government are concerned, as one continuous line, and in such operation and use to afford and secure to each other equal advantages and facilities as to rates, time, and transportation, without any discrimination of any kind in favor of the road or business of any or either of said companies, or adverse to the road or business of any or either of the others. And it shall not be lawful for the proprietors of any line of telegraph authorized by this act, or the act amended by this act, to refuse or fail to convey for all persons requiring the transmission of news and messages of like character on pain of forfeiture to the person injured for each offense the sum of one hundred dollrrs, and such other damage as he may have suffered on account of said refusal or forfeiture, to be sued for and recovered in any court of the United States or any State or Territory, of competent jurisdiction.

SEC. 15. *And be it further enacted*, That any two or more of the companies authorized to participate in the benefits of this act are hereby authorized at any time to unite and consolidate their organizations, as the same may or shall be, upon such terms and conditions, and in such manner as they may agree upon, and as shall not be incompatible with this act or the laws of the State or States in which the roads of such companies may be, and to assume and adopt such corporate name and style as they may agree upon, with a capital stock not to exceed the actual cost of the roads so to be consolidated, and shall file a copy of such consolidation in the Department of the Interior: and thereupon such organization, so formed and consolidated, shall succeed to possess and be entitled to receive from the government of the United States all and singular the grants, benefits, immunities, guarantees, acts, and things to be done and performed, and be subject to the same terms, conditions, restrictions, and requirements which said companies, respectively, at the time of such consolidation, are or may be entitled or subject to under this act, in place and substitution of said companies so consolidated, respectively. And all other provisions of this act, so far as applicable, relating or in any manner appertaining to the companies so consolidated, or either thereof, shall apply and be of force as to such consolidated organization. And in case, upon the completion of such consolidated organization of the roads or either of them, of the companies so consolidated, any other of the road or roads of either of the other companies authorized as aforesaid (and forming, or intended or necessary to form a portion of a continuous line from each of the several points on the Missouri River, hereinbefore designated, to the Pacific coast), shall not have constructed the number of miles of its road within the time herein required, such consolidated organization is hereby authorized to continue the construction of its road and telegraph in the general direction and route in which such incomplete and unconstructed road is hereinbefore authorized to be built, until such continuation of the road of such consolidated organization shall reach the constructed road and telegraph of said other company, and at such point to connect and unite therewith; and for and in aid thereof the said consolidated organization may do and perform, in reference to such portion of road and telegraph as shall be in continuation of its constructed road and telegraph, and to the construction and equipment thereof, all and singular the several acts and things hereinbefore provided, authorized, or granted to be done by the company hereinbefore authorized to construct and equip the same, and shall be entitled to similar and like grants, benefits, immunities, guarantees, acts, and things to be done and performed by the government of the United States, by the President of the United States, by the Secretaries of the Treasury and Interior, and by commissioners, in reference to such company, and to such portion of the road hereinbefore authorized to be constructed by it, and upon the like and similar terms and conditions, so far as the same are applicable thereto. And said consolidated company shall pay to said defaulting company the value, to be estimated by competent engineers, of all the work done and material furnished by said defaulting company, which may be adopted and used by said consolidated company in the progress of the work under the provisions of this section: *Provided, nevertheless*, That said defaulting company may at any time before receiving pay for its said work and material, as hereinbefore provided, on its own election, pay said consolidated company the value of the work done and materials furnished by said consolidated company, to be estimated by competent engineers, necessary for and used in the construction of the road of said defaulting company, and resume the control of its said road; and all the rights, benefits, and privileges which shall be acquired, possessed, or exercised, pursuant to this section, shall be to that extent an abatement of the rights, benefits, and privileges hereinbefore granted to such other company. And in case any company authorized thereto shall not enter into such consolidated organization, such company, upon the completion of its road as hereinbefore provided, shall be entitled to, and is hereby authorized to continue and extend the same under the circumstances, and in accordance with the provisions of this section, and to have all the benefits thereof, as fully and completely as are herein provided touching such consolidated organization. And in case more than one such consolidated organization shall be made, pursuant to this act, the terms and conditions of this act, hereinbefore recited as to one, shall apply in like manner, force, and effect to the other: *Provided, however*, That rights and interests at any time acquired by one such consolidated organization shall not be impaired by another thereof. It is further provided that, should the Central Pacific Railroad Company of California complete their line to the eastern line of the State of California before the line of the Unoin Pacific Railroad Company shall have been extended westward so as to meet the line of said first-named company, said first-named company may extend their line of road eastward one hundred and fifty miles, on the established route, so as to meet and connect with the line of the Union Pacific road, complying in all respects with the provisions and restrictions of this act as to said Union Pacific road, and upon doing so shall enjoy all the right, privileges, and benefits conferred by this act on said Union Pacific Railroad Company.

SEC. 16. *And be it further enacted*, That so much of section fourteen of said act as relates to a branch from Sioux City, be, and the same is hereby, amended, so as to read as follows: That whenever a line of railroad shall be completed through the States of Iowa or Minnesota to Sioux City, such company now organized, or as may hereafter be organized under the laws of Iowa, Minnesota, Dakota, or Nebraska, as the President of the United States, by its request, may designate or approve for that purpose, shall construct and operate a line of railroad and telegraph from Sioux City, upon the most direct and practicable route, to such a point on, and so as to connect with, the Iowa branch of the Union Pacific Railroad from Omaha, or the Union Pacific Railroad, as such company may select, and on the same terms and conditions as are provided in this act and the act to which this is an amendment, for the construction of said Union Pacific Railroad and telegraph line and branches; and said company shall complete the same at the rate of fifty miles per year: *Provided*, That said Union Pacific Railroad Company shall, and is hereby, released from the construction of said branch. And said company constructing said branch shall not be entitled to receive in bonds an amount larger than the said Union Pacific Railroad Company would be entitled to receive if it had constructed the branch under this act and the act to which this an amendment; but said company shall be entitled to receive alternate sections of land ten miles in width on each side of the same along the whole length of said branch: *And provided, further*, That if a railroad should not be completed to Sioux City across Iowa or Minnesota within eighteen months from the date of this act, then said company designated by the President, as aforesaid, may commence, continue, and complete the construction of said branch as contemplated by the provisions of this act: *Provided, however*, That if the said company so designated by the President as aforesaid shall not complete the said branch from Sioux City to the Pacific railroad within ten years from the passage of this act, then and in that case all of the railroad which shall have been constructed by said company shall be forfeited to and become the property of the United States.

SEC. 17. *And be it further enacted*, That the Burlington and Missouri River Railroad Company, a corporation organized under and by virtue of the laws of the State of Iowa, be, and hereby is, authorized to extend its road through the Territory of Nebraska from the point where it strikes the Missouri River south of the mouth of the Platte River to some point not further west than the one hundredth meridian of west longitude, so as to connect by the most practicable route with the main trunk of the Union Pacific Railroad, or that part of it which runs from Omaha to the said one hundredth meridian of west longitude. And for the purpose of enabling said Burlington and Missouri River Railroad Company to construct that portion of their road herein authorized, the right of way through the public lands is hereby granted to said company for the construction of said road; and the right,

power, and authority is hereby given to said company to take from the public lands adjacent to the line of said road, earth, stone, timber and other materials for the construction thereof. Said right of way is granted to said company to the extent of two hundred feet, where it may pass over the public lands, including all necessary grounds for stations, buildings, workshops, depots, machine-shops, switches, side-tracks, turntables, and water stations. And the United States shall extinguish as rapidly as may be consistent with the public policy and the welfare of the said Indians, the Indian titles to all lands falling under the operation of this section, and required for the said right of way, and grant of land herein made.

SEC. 18. *And be it further enacted*, That for the purpose of aiding in the construction of said road, there be, and hereby is, granted to the said Burlington and Missouri River Railroad Company alternate sections of public lands (excepting mineral lands as provided in this act), designated by odd numbers, to the amount of ten alternate sections per mile on each side of said road on the line thereof, and not sold, reserved, or otherwise disposed of by the United States, and to which a pre-emption or homestead claim may not have attached at the time the line of said road is definitely fixed: *Provided*, That said company shall accept this grant within one year from the passage of this act, by filing such acceptance with the Secretary of the Interior, and shall also establish the line of said road and file a map thereof with the Secretary of the Interior within one year of the date of said acceptance, when the said Secretary shall withdraw the lands embraced in this grant from market. *Provided*, That the government bonds shall be issued to the said Burlington and Missouri Railroad Company to aid in the construction of said extension of its road; *And provided, further*, That said extension shall be completed within the period of ten years from the passage of this act. *And be it further enacted*, That before any land granted by this act shall be conveyed to any company or party entitled thereto under this act, there shall first be paid into the Treasury of the United States the cost of surveying, selecting, and conveying the same by the said company or party interested as the title shall be required by said company, which amount shall, without any further approriation, stand to the credit of the proper account to be used by the commissioner of the General Land Office for the prosecution of the survey of the public lands along the line of said roads, and so from year to year until the whole shall be completed, as provided under the provisions of this act.

SEC. 19. *And be it further enacted*, That whenever said Burlington and Missouri River Railroad Company shall have completed twenty consecutive miles of the road mentioned in the foregoing section, in the manner provided for other roads mentioned in this act and the act to which this is an amendment, the President of the United States shall appoint three commissioners to examine and report to him in relation thereto. And if it shall appear to him that twenty miles of said road have been completed as required by this act, then upon certificates of said commissioners to that effect, patents shall issue conveying the right and title to said lands to said company on each side of said road, as far as the same is completed, to the amount aforesaid; and such examination, report, and conveyance by patents shall continue from time to time in like manner until said road shall have been completed. And the President shall appoint said commissioners to fill vacancies in said commission, as provided in relation to the other roads mentioned in the act to which this is an amendment. And the said company shall be entitled to all the privileges and immunities granted to the Hannibal and Saint Joseph Railroad Company by the said last mentioned act, so far as the same may be applicable.

SEC. 20. *And be it further enacted*, That Congress may at any time alter, amend, or repeal this act.

APPROVED July 2, 1864.

DIVIDEND.

Metropolitan Insurance Co.

108 Broadway.

NEW YORK, July 12.

NOTICE is hereby given that the Board of Directors of this Company, having made all the reservation of surplus required by the second section of an Act of the Legislature of New York, passed at the last session thereof, entitled an Act to amend an "Act to provide for the Incorporation of Fire Insurance Companies, passed July 25th, 1853, in regard to the investment of their capital and surplus profits," which reservations amount to the sum of $241,916 91, have this day declared a semi-annual Dividend of FIVE PER CENT. on the Capital Stock, free of Government Tax, payable on demand.

1t 30 J. C. GOODRIDGE, Secretary.

THE NEW YORK CENTRAL RAILROAD COMPANY,
TREASURER'S OFFICE, ALBANY, July 18, 1864.

TWENTY-SECOND SEMI-ANNUAL DIVIDEND.—The Directors of this Company have declared a Semi-Annual Dividend of Four per Cent. on the capital stock thereof, free of the United States Income Tax, payable on the 20th day of August next.

Dividends in New York will be paid at the office of DUNCAN, SHERMAN & CO.; in Boston, at the office of J. E. THAYER & BROTHER; in Albany, at the ALBANY CITY BANK.

The transfer books will be closed at the close of business on Saturday, the Thirtieth day of July instant, and be reopened on the morning of Wednesday, the twenty-fourth day of August next.

5t-30 JOHN V. L. PRUYN, Treasurer.

OFFICE OF THE PITTSBURG, FORT WAYNE AND CHICAGO RAILWAY COMPANY, PITTSBURG, July 14.

DIVIDEND.—The Board of Directors of this Company have THIS DAY declared a DIVIDEND of 2½ PER CENT. on the Shares of the original Capital Stock this Company, payable (free of Government Tax) on and after the 5th of August proximo, at the office of the Company in this city, and at the Transfer Agency, WINSLOW, LANIER & CO., No. 52 Wall street, New York, to the Stockholders, as registered at the respective offices. The Transfer Books of the Company will close on the 20th of July inst., at 2 o'clock P. M., and remain closed until the 5th day of August thereafter.

By order of the Board,

2t-30 W. B. BARNES, Secretary.

THE ERIE RAILWAY COMPANY,
No. 187 WEST ST., NEW YORK, July 14, 1864.

DIVIDEND.—The Directors of this Company have THIS DAY declared a Dividend out of the earnings of the road for six months ending 30th June of THREE AND ONE-HALF PER CENT. (payable less the Government tax of 5 per cent.) on the PREFERRED STOCK.

Also a Dividend of FOUR PER CENT. on the COMMON CAPITAL STOCK, free of Government tax;

Both payable at the Treasurer's office, Erie Place, on Wednesday, the third day of August next, to the registered holders of stock at the closing of the books.

The transfer books of both Preferred and Common Stock will be closed on the afternoon of Tuesday, the 19th inst., and be re-opened on the 5th day of August.

2t-30 HORATIO N. OTIS, Secretary.

OFFICE OF THE ILLINOIS CENTRAL RAILROAD CO.,
NEW YORK, June 14, 1864

IN ACCORDANCE with a resolution of the Board of Directors of the Illinois Central Railroad Company, notice is hereby given to the holders of the canceled bonds scrip to present their certificates at the office of the Company, No. 21 Nassau-st., for conversion into the scrip stock of the company. L. A. CATLIN, Secretary.

OFFICE OF THE PITTSBURG, FORT WAYNE AND CHICAGO RAILWAY CO., PITTSBURG, July 14, 1864

DIVIDEND.—The Board of Directors of this Company, at a meeting held this day, adopted the following preamble and resolution:

Whereas, The half yearly interest or dividend on the 3d mortgage bonds of this Company accrued on the 1st day of July inst., but not payable by the terms of contract until the 1st day of October next, and

Whereas, The net earnings of the Railway and the financial condition of the Company fully justifies the declaration and payment of a half yearly dividend on these bonds at the same time with the dividend on the Capital Stock, therefore,

Resolved, That a dividend of THREE AND ONE-HALF PER CENT. be declared on said Third Mortgage Bonds for the half-year ending June 30, ult., the same to be paid on and after the 5th day of August next, at the office of Winslow, Lanier & Co., 52 Wall street, New York, to the persons registered as holders thereof at 2 o'clock P. M. on the 20th day of July inst. The Transfer Books of the Company for said bonds to be closed on that day, and remain closed until the 5th day of August thereafter. *Provided*, That such payment in advance of that which is called for by the contract, shall not be taken as a precedent for the future action of the Company.

By order of the Board,

W. H. BARNES, Secretary.

OFFICE OF THE ILLINOIS CENTRAL RAILROAD CO.,
NEW YORK, June 14, 1864.

DIVIDEND NOTICE.—The Board of Directors of the Illinois Central Railroad Company have this day declared a DIVIDEND OF FOUR PER CENT. free from Government tax, on the stock and canceled bonds scrip of the company, payable on the 1st of August next, to parties whose names are registered as the holders on the books of the company at the close of business on the 15th day of July next, and that the transfer books close of that day and open on the 3d day of August

DUNBAR'S PATENT ANTI-FRICTION STEAM

PISTON PACKING,

SAVES 5 TO 20 PER CENT. OF FUEL.

Applied to NEW and OLD Engines,

By Hamilton E. Towle,

ENGINEER,

78 CEDAR ST, NEW YORK.

Solid Emery Vulcanite.

WE are now manufacturing wheels of this remarkable substance for cutting, grinding and polishing metals, that will outwear hundreds of the kind commonly used, and will do a much greater amount of work in the same time, and more efficiently. All interested can see them in operation at our warehouse, or circulars describing them will be furnished by mail.

NEW YORK BELTING AND PACKING Co.,
Nos. 37 and 38 Park Row, New York.

MACHINE BELTING,

STEAM PACKING, ENGINE HOSE.

THE superiority of these articles, manufactured of vulcanized rubber, is established. Every belt will be warranted superior to leather, at one-third less price. The Steam Packing is made in every variety, and warranted to stand 300 degs. of heat. The Hose never needs oiling, and is warranted to stand any required pressure; together with all varieties of rubber adapted to mechanical purposes. Directions, prices, etc., can be obtained by mail or otherwise at our warehouse.

CAST STEEL.

MANUFACTURED BY

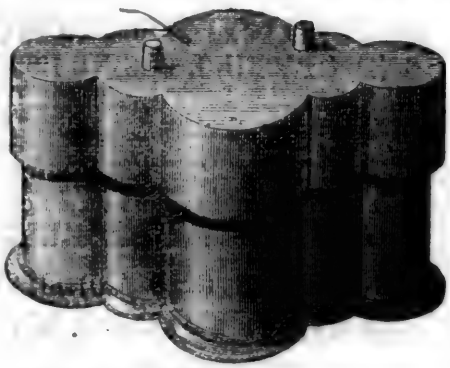
NAYLOR, VICKERS & CO., SHEFFIELD, ENGLAND.

CAST STEEL TYRES WITHOUT WELD,

Reversible Crossings and Frogs, Disc Wheels, Pistons and Piston Rods without weld, Crank and Straight

AXLES, AND EVERY DESCRIPTION OF STEEL FOR RAILWAY PURPOSES.

STEEL CROSSINGS have been in use more than three years with very little perceptible wear, in places where the ordinary ones had to be replaced every four months. They have been estimated to be good for ten years in the worst places.



THE "VICKERS" TYRES are in constant and extensive use on almost all the Railways in Great Britain, and also on many roads in other parts of Europe. Their chief advantages are:—1. Their Durability: they will outlast any Iron Tyre without being turned, and for this reason are cheaper than Iron Tyres (free of cost). 2. Their Safety: being without a weld they are not liable to break, and Steel is proved to be a stronger and tougher metal than any other. 3. Their Uniformity: they do not wear in flat places nor "laminate." 4. They are not injuriously affected by frost, and are guaranteed to stand the severest climate.

STEEL AXLES will be found economical, because they may with safety be made much lighter than those of Iron. They will wear longer and "smoother," and will consume much less oil; nor are they liable to granulate from constant use.

For CIRCULARS, GIVING FULL PARTICULARS AND TESTIMONIALS, PRICES, etc., apply to **NAYLOR & CO.,**

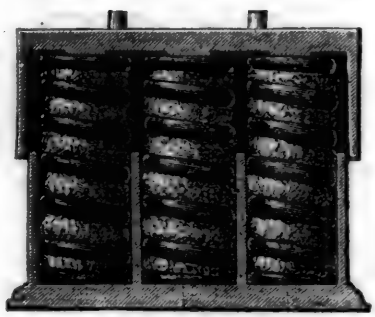
UNION CAR SPRING
MANUFACTURING COMPANY.



Office, 132 Broadway,

MANUFACTORY,

286 and 288 SEVENTH AVENUE,

NEW YORK.

CHARLES BUTLER,
President.

THOMAS BOND,
Treasurer.

JOHN HALDEMAN,
Superintendent.

MANUFACTURED solely by the "UNION CAR SPRING MANUFACTURING COMPANY."

This Spring is made by placing Steel Spiral Springs packed with wool in the inside only, in a casting with cylindrical apertures or cells just large enough to receive the filled spirals, with a cap or cover fitting over and outside the casting.

Size and capacity can be varied so as to give any amount of elasticity, or, any amount of carrying capacity.

These Springs have been examined by many of the leading railroad experts of the country and in every instance with unqualified approval.

Springs that were rudely made before our manufactory was in operation are running with a satisfactory success on important roads. A set of Freight Springs imperfectly made and tempered were placed by the Penn. Central under their heaviest Freight Locomotive tender on the mountain division of their road, and gave entire satisfaction. They placed another set on one of their Freight Cars, which with its load made a total weight of 32,000 pounds and still left a motion of half an inch.

Most Railroad experts agree in the opinion that they have no spring which meets their wants. One spring which has great softness, has almost as much lateral motion as vertical; is rigid in cold weather, and short lived. Another spring which has life, has so much rigidity as to wear the roadway and rolling stock as much or even more than the twisting which follows the combination of an excessive lateral and vertical motion. Springs of other combinations must be made rigid in order to preserve their component parts.

We believe we have succeeded in avoiding these objections and can offer a spring, which while it is elastic, will have great range of motion, with a direct vertical action, and durability.

Wool is one of the most indestructible of elastic substances, and has an elasticity which cannot be entirely exhausted with any weight which can be placed on a car, and yet, the back-bone of the Spring is the Steel Spirals.

The impossibility of exhausting with any usual load the column of wool in the spiral, prevents the Spirals coming home, and bringing steel against steel, which by causing crystallization, destroys the steel. The wool is packed in the coils by a powerful press, or it would be of no service.

Our springs are light in weight and easy of adaptation, as they can be placed where any other spring can be placed, and besides, they have that which is only acquired elsewhere by placing two or more springs together, viz: breadth of base.

We ask, when it is possible, an inspection of our works, as we feel convinced that an examination there will prove the superior merit of our Springs, and the perfection of our process.

We ask that you shall order one set, at least, and judge for yourself by personal test, and if you have bolsters under your tenders, make the test there, as it is the most severe.

The excellence of our Spring, its ease of adaptation, its meeting the great want expressed by railroad men that their freight cars should be carried by elastic springs both to save roadway, rolling stock, and *to carry freight in nearly as good order as it can be carried by water*, together with the *saving* in motive power by drawing a *lively* load instead of a *dead* load, will commend our Spring to your attention.

Railroads as Affecting Individual Happiness.

In treating of the economic effects of railroads, we are in the habit of regarding them chiefly in respect to their aggregate extent and value. Thus we are amazed and gratified to perceive how by their means this great country is bound together, how its enormous products are swiftly conveyed from the interior to the sea board, how many millions of persons are transported safely upon them, and how rapidly population collects at their termini and intermediate commercial stations. When we come to reduce some of these facts to figures, we find that in 1860, these railroads were in the total 30,793 miles in length, though in 1850 but 8,589 miles long, and that the cost is $1,151,-560, when in 1850 the amount then expended was but $296,660.

We also perceive the inducements they have offered to emigration, and the settlement of the Western States and territories, and how by their means there has been a distribution of the necessities of life, of the staples of the agricultural and pastoral regions on the one hand, and of the useful products brought from distant countries by sea on the other.

But there is another and a very pleasing view of their influence upon private and personal interests, their social effects, and their tendency to unite us as individuals, in our opinions, and conduct, and to strengthen our mutual confidence. By their contributions to our enjoyments and the preservation of health, in the procurement of rational and cheap pleasures, and the subjugation of local prejudices, their influence is as unbounded as it is salutary.

Let us for a moment contemplate the subject in this light.

Thus we perceive that the pain of separation of families, which in the order of things is unavoidable, is greatly mitigated by the facilities afforded by railroads. A few hours, or at most a few days give sufficient time for the reunion of the separated, and there is no more common or more pleasing spectacle than a railroad train crowded with men, women and children, who are about to perform the pious duty of joining their distant relatives. The two latter classes are able to make long journeys in perfect safety. The conductors are generally very superior persons, of kindly feelings, and disposed to bestow every necessary attention. The baggage of travelers, which on British and continents roads are a source of infinite trouble and anxiety and great expense, and in constant danger of loss, is with our system of management perfectly secure. After it is delivered at the depot and checked, it need no longer be thought of. Whether destined to Saratoga, or Chicago, or St. Louis, it is all the same, and sure to be ready for delivery to its owner. In this particular our railroad management is in advance of any other in the world. In London for example, the confusion at a depot or station is vexatious in the extreme, and travelers are continually exposed to the tricks of cabmen, or the rapacity of thieves. Our system of checks, the owner always receiving a metallic token with the same numbers upon it that are appended to the baggage, is a guarantee of its safety, as it is never delivered up except upon the presentation of the duplicate issued at the depot or station.

In addition to this, there are well known companies called Baggage Expresses, who send their agents through the trains before their arrival at their destination, and who if desired by any passenger, will receive these tokens or checks from them, and agree to deliver the baggage which they designate at any place required, immediately after the arrival of the trains, for the moderate charge of 25 or 30 cents. Some of these express companies furnish large and convenient coaches which carry travelers to their residences or hotels on their arrival at the terminus for the moderate sum of fifty cents. Thus the impositions of cabmen and hackmen, notorious wherever else they are found, are entirely obviated. So too the principal hotels are in the practice of sending their own vehicles to the depots and stations with similar purpose, and by these convenient arrangements, traveling on American railroads is relieved from its usual and greatest annoyances.

The ready access to populous cities and towns, and the intermediate villages is not the only benefit conferred on the traveling public by our railway system, but it ministers also to their comfort, health and pleasure. Every popular place of resort, all our salubrious mineral springs, our watering places, our beautiful ocean beaches, and our grand mountain scenery can be reached by our railroads. It is the profitable business of some of our largest publishers, to furnish guide books to these places. The Appletons, a wealthy New York house dispose of thousands of their railway feuilletons monthly, containing routes, time tables, fares and maps, so that one has an itinerary always at hand, and may know to a minute when he will arrive at his destination, and what it will cost to get there. Particular trains are arranged for the accommodation of those who desire to visit these attractive points. He who wishes to reach Saratoga from New York has but to enter the car and remain there. He need not leave his seat if he chooses till he arrives. The Franconia Mountains with their magnificent peaks, gorges and waterfalls, are penetrated by the railroads which wind along the valley of the Connecticut. Long Branch is also visitable by means of the rails. So are Nahant, in Massachusetts, and famous beaches further north in New Hampshire. Cape May is connected with Philadelphia by rails. The great lakes are also approached in the same way, and the smaller and very beautiful sheets of water in our own State and New England, in a few instances only, requiring a change to ordinary vehicles. Lakes Cayuga, Seneca, Lakes George, Champlain, and in Vermont, the magnificent Memphremagog, and whole groups of lesser waters all through New England are easily accessible to

travelers by rail. Here under serene skies, amidst admirable scenery of the most curious and striking character, with the freshest and most nourishing food, the tired residents of the crowded cities renew their health and spirits, and learn more and more to prize the country of their birth. Here frank and cordial interchanges of opinions and views take place, false opinions are corrected, new friendships formed, and manners and habits improved by the adoption of the best examples.

Our railways are also schoolmasters abroad, not merely by the conveyance of news from the press, but by the dissemination of books and magazines on a large scale, and their distribution throughout the country, in the large cities and towns. One may find at Chicago or St. Louis in a few hours after publication, the choicest works that emanate from the Atlantic press. The Americans are a reading as well as a talking people. Everybody here reads, and we may safely assert that we know more of the history, geography, and governments of foreign countries than the mass of people which reside in them. We have three times as many newspapers as England has, and a great number of papers specially devoted to agriculture. All these go over the railroads in millions of sheets annually, and to receive them the people look as anxiously for the train that brings them, as for the merchandize which fills the freight cars.

The beneficial change of climate for invalids is also readily obtained by the same means. In the depths of winter a tropical climate can be reached in three days; in the heats of summer a cool atmosphere may be attained as easily. The refreshing breezes of the sea side, or the invigorating tonic of the mountain air are alike at our command.

The collection of these groups of travelers from different localities and States leads also to polite intercourse, free exchange of sentiments, often sincere and lasting friendships, and the enlargement of ordinary views. When the Southern States foolishly separated themselves from their friends of the North and ceased to travel over our railroads, they deprived themselves of very great advantages.

We hope the day is not far distant when acknowledging their great error we may see them again on our railways, making their way to the lakes, the mountains and the Spas where they were always welcome and always hospitably received.

It is therefore evidently perceptible, if we give the subject any reflection, that our railroads are powerful agents in improving our social condition and enlarging our individual happiness, contributing to our mental and physical health, and doing a large work of which directors, superintendents, etc., but little think.

Milwaukee and St. Paul Railway.

We understand the work on the link between Columbus and Portage, is progressing satisfactorily. This portion of the line will be completed next month.

The work on the line from the Mississippi Junction to this city, is also being pursued as rapidly possible. We observe that most of the heaviest grading is done, and the whole willl be completed as early as the 1st of October.

This Company is also putting in new stone piers, and culverts on the Watertown division, preparatory to making it the main through line, when the connecting links are completed.—*Mil. Wis.*

Boston and Worcester Railroad.

The gross income from operations of this road for the years ending November 30, 1862 and 1863, have been as follows:

	1862.	1863.

	$515,825 72	$714,296 29
Net income	$490,304 10	$488,357 76
Deduct dividend, 9 per cent, including government tax on same		417,525 77
Surplus from income undivided		$70,831 99

The number of miles run by passenger trains has been 363,251; by freight trains, 205,354; by other trains, 4,909—total miles run 573,514—an increase over the previous year of 6,397 miles. The number of passengers carried in the cars has been 1,689,505; do. carried one mile, 29,425,029. do. carried one mile to and from other roads, 11,064,909. Tons of merchandise carried, 413,731; do. carried one mile, 16,090,305; do. carried one mile to and from other roads, 12,894,244. Increase in passengers carried, 183,309; increase in passengers carried one mile, 4,882,874. Increase in tons of merchandise carried, 31,377; increase in merchandise carried one mile, 1,213,555.

The year has been one of success in the business and operations of the road. Both the receipts and expenses have been larger than in any previous year; and the former, compared with the largest (1856) in the history of the road, show a gain of $193,781 90; and over last year of $196,524 23. This increase has been: on the joint business, $121,040 46; on other business, $75,509 77. Of the total receipts, $570,597 29 was on the joint business, and $632,056 76 on other business. The report says:

We have spared no efforts or expense to meet the increased demands of the public; not a passenger or ton of freight has been delayed by this Corporation for want of transportation. To prevent it, our freight houses were kept open day and night for the reception and delivery of freight; Cars delivered to us at Worcester late in the afternoon, were transported to Boston, unloaded and delivered back to the Western Railroad at Worcester early the next day.

We have completed our Passenger House in Boston, supplied it with a steam-boiler and apparatus for heating, and furnished it throughout, at an expense of $22,971 23. We have also built a substantial Car Repair Shop, at a cost (not including land) of $16,090 69.

We have purchased in Boston four estates, bounded on Orange Street, containing 5215 square feet of land, for the extension of the Car Repair Shops, at a cost of $21,000; also 4326 square feet, bounded on Albany Street, contiguous to the Passenger Depot, at a cost of $15,300; and 16,895 square feet, at the junction of the Boston and Providence Railroad, in conjunction with that Corporation, at a cost of $10,137.

We have added to our Stock of Merchandise Cars 48 new ones; also to the New York Line our proportion of 4 Passenger Cars and 1 Baggage Car.

We have sold two wood-burning Locomotive Engines, which had long been in use, for $11,000, and substituted two new and substantial coal-burners at a cost of 24,750.

We have put down 1182 tons of new and 465 tons of repaired rails, and 45,076 new chestnut sleepers. Over 900 tons are of the double-headed English pattern, so that when one side is worn out the other can be used. Our track is more used than any other of equal length in the country, and as we have a superior road-bed, our object has been to use the best rail. Whether this is the best, or will warrant the increased cost, is a question that can only be decided by experience.

Balances due other roads and individuals	247,921 35	479,880 11
Leaving a surplus of		$471,008 92

The Grand Junction Bonds ($100,000) still remaining, as last year, of uncertain value, are not included in the above assets.

At the last annual meeting a memorial was presented from a respectable number of stockholders, in favor of a union with the Western Railroad, and a committee was appointed, by a vote of a majority of the stock represented, to consult with a similar committee of that Corporation, and if the two committees should agree upon the expediency and principle of a union, they were "authorized to secure the necessary legislation." The committees agreed upon these subjects, and applied for such legislation; but failing to obtain it, your committee requested the Directors to call a meeting of this Corporation to consider the subject. Their communication, bearing date October 20, 1863, was sent with the call for a meeting to each stockholder, and a meeting was accordingly held on the 18th day of November last, at which 10,956 shares were represented. By a majority vote the report of the committee, so far as it related to the expediency of a union, was adopted, "provided that the terms of union and the act of consolidation, before it takes effect, shall beconsidered and adopted at a stockholders' meeting." It was also voted that the committee might postpone the consideration of such terms until legislation authorizing a union should be obtained; and the officers of the Corporation were directed to petition the General Court for an act of consolidation, and to cooperate with the committee in procuring it. The Directors, in conformity with this vote, have given due notice of a petition to the legislature for an act authorizing a union, which has recently been presented to the Senate, and awaits their action. We are unable to inform you what the terms formerly agreed upon were. As stated in the communication of the committee, they are no longer binding. In the action which the Directors have taken as above stated in favor of a consolidation of this and the Western Railroad, they have acted in conformity with their instruction by the vote before mentioned.

but they do not thereby intend to indicate their personal views or opinions upon the subject.

We are happy to say that all matters in dispute between this and the Western Railroad Corporation have been amicably settled, and the spirit which dictated their settlement is the best guarantee of a good understanding in the future. The joint receipts are now divided under an award of referees, dating from June 1, 1862. By the terms of the submission the award continues until the expiration of three months' notice from either party to the other of its intention to terminate it, and all questions arising under the award are to be determined by the same referees; so that a ready mode of settling all future disputes, should any arise, is thus provided.

We are gratified to be able to repeat the language of our last Report, that much credit is due to the Superintendent, to the heads of departments and the men under their charge, for their untiring efforts in the discharge of their various duties.

The equipment of the road consists of 30 locomotives; 45 8-wheel and 1 4-wheel passenger cars, also 2-5 of 4 on steamboat train and 44-224 of 26 on land and route trains; 9 8-wheel baggage cars —also 2-5 of 2 on steamboat and 44-234 of 9 on land route trains; 308 8-wheel and 10 4-wheel freight, and 48 4-wheel gravel cars.

BALANCE SHEET, NOV. 30, 1863.

Construction Main Road	$3,708,911 05

Superintendent.—E. B. PHILLIPS.

Treasurer.—HORACE WILLIAMS.

The McGregor Western Railroad.

A recent traveler who has been over that part of the McGregor Western Railroad which is in operation, gives a very interesting account of it. The eastern terminus is opposite Prairie du Chien in the town across the river, named McGregor after its founders, two enterprising Scotch gentlemen, one of whom Jas. McGregor, Jr., a native of New York is still living. The line penetrates a section of country literally covered with grain, in fields of boundless extent hitherto without adequate means to reach the nearest points of delivery on Lake Michigan. It is finished to Luana, 20 miles from McGregor, and is already paying expenses. The projected Northern and Western terminus is to be Austin in Minnesota, 120 miles distant, and the iron is purchased for the whole distance and is on the way.

The main line of the road diverges at Postville or Castalia, and will thence run on the forty-third parallel of latitude through the entire State of Iowa. The company have now under contract 80 miles of road, which is to be completed by the first of January next, and on this road five hundred men are now employed. The people of Decorah have subscribed forty thousand dollars, and a branch of the road will be run to that point.

The officers of the road are George Greene, Esq., President; H. H. Boody, Esq., Vice President and Treasurer; H. B. Whitehouse, Secretary. The Superintendent is Mr. William Greene, brother of the President. The road commences where the Milwaukee and Prairie du Chien Railroad ends, and runs into one of the largest wheat fields in the world, and soon a bridge across the Mississippi, will make it a continuous railroad from Milwaukee to the heart of, if not through Minnesota.

The difficulties of construction for the first fifteen miles were very great.

For miles the road runs its serpentine course through the mountain gorges. Out of the rocky-terraced and steep hill sides, covered with a rich growth of small trees, huge rocks, streaked with deep green moss, in other places stark and bare, jut out from amidst the vegetation. At the base of the hills a good growth of fair sized timber, with small brooks of clear water gurgling through the bottoms, in which fish are said to be abundant, is the kind of rugged landscape scenery through which the road for the first few miles struggles hard to reach the rich prairies beyond. The line is one of steep ascent, for at least fifteen miles; in some parts, it is said, from seventy to eighty feet to the mile, and in one or two places it exceeds that grade. The only possible route for a track lay alongside or through the winding or zigzag gullies, over and into which, in many places, the rocky hills projected. These rocks in one or two places are of soft stone, but are mostly of a very hard, flinty character, and as frequently cuts had to be made through solid rock of this hard kind—so hard it could, only with the greatest difficulty be drilled—and these deep cuts occur at almost every mile until the gorges are passed, some idea may be formed of the amount of labor required, and of the corresponding expense of the work. Many of these cuts are from thirty to forty, and one is said to be upwards of sixty feet. The rock in the last mentioned one is of the flinty kind, with dashes of brilliant white quartz, like hieroglyphics in pearl, and as it was a clear day, with bright sunshine, the brief reflection of the sun's rays on the sparkling quartz, in the rocky hillsides, heightened by the other fine scenery, appeared like the entrance to some fairy land.

Five miles from McGregor is Noble Station—as yet quite a new place, with but two or three houses. At a place called Giard, the foundation, race, &c., are being dug for a flourishing mill, and a woolen factory is also to be built. On the track a few miles out from McGregor is a water tank, self-supplied from a spring high up on a hill side, the water being conducted by pipes to the tank, over the top of which it flows continually.

It is only as the cars emerge from among the rocks, dells and flats, that the object sought by the construction of this railroad is manifest. All at once the train mounts the edge of a prairie, when a view than which nothing can look more beautiful presents itself; and as the cars proceed, the question as to whether the road will pay is at once set at rest. The track literally runs through a wheat field, on a prairie not merely a mile or two, but at least twenty miles across.

At Luana for 15 miles in every direction the prairies are in wheat and the crops look well. Its friends consider the road one of the most important and promising in the Northwest, and the people of Milwaukee expect from it an immense increase of business.

Damages for Causing Death.--Proof of Negligence.--Waiver of Damage.

The case of the North Pennsylvania Railroad Company against Robinson on appeal to the Supreme Court of Pennsylvania, contains some points of much interest. An action was brought against the company by the five children of one Matthew Robinson, to recover damages for negligence in causing his death. It appears that the deceased was run over by a coal car belonging to the company, while it was being roped into a private yard in Front street, Philadelphia. The car was unhitched from the horses, as they arrived at the switch or turnout leading from the main track into the coal yard, and was then impelled by its own impetus into the coal yard across the side track. The deceased was struck by the car as he was passing along the side track, where the track leading into the yard crosses it. In submitting the case to the jury, Judge Hare charged as follows:

1. If the jury believes there was any negligence on the part of the deceased, the plaintiffs are not entitled to recover.

2. If a warning was given, it would be evidence of negligence on the part of the deceased; if the warning was such as to convey a knowledge of the state of the case, and the danger to be incurred, and he went on with the knowledge so derived, or from any other source, as to convey knowledge of his situation, it is a bar to the action.

3. The defendants had the right of way over the siding into the coal yard with their cars, using proper precautions to avoid injury to passers-by; and that if the jury believe all proper precautions were used by the defendants or their agents, the plaintiffs are not entitled to recover.

4. That damages must be compensations only, and that the jury are not entitled to allow any for the suffering of deceased, or the feeling of the surviving members of the family.

5. That to entitle the plaintiffs to recover, they must show a pecuniary loss to have been suffered by them, arising from the death of their father.

6. That the amount received by the plaintiffs from the estate of their father exceeded the amount which they received by way of support from him during his lifetime; the plaintiffs are not entitled to recover.

The learned judge further instructed the jury that if they found for the plaintiffs, they could not assess more damages than the one plaintiff had suffered, it being conceded that but one had suffered actual pecuniary damage.

Under these instructions there was a verdict and judgment for plaintiffs' for $1,500; whereupon the defendants sued out a writ of error, and assigned for error the answers given to certain refusals to charge as proposed, and because no action in tort can be sustained by joint plaintiffs, except where a joint damage has been sustained.

THOMPSON, J.—The right of action and the

parties entitled to it, result entirely from the provisions of the recent statutes, viz.; one of the 15th April 1851, § 19, and the other, 26th April 1855, §1. The former gives the right of action, and the latter defines who may sue.

Liability for such a cause was unknown to the common law, at least in modern times.

We must therefore look to the Statute to guide us as to who are entitled to the remedy. It seems to me that this is clearly defined in the last named act.

The husband may sue for the loss of the wife, the wife for the husband, and the children for the parents. 9 Casey, 318.

The children have instituted this suit, and this the statute allows. Although the question is raised by the plaintiffs in error as to the right of all the children to join in the suit, yet I cannot see how they have any concern in the matter.

It is enough for them that the children are the parties, for if they recover jointly, they never can again recover. Secondly. It cannot be error if all join, where the recovery is for the benefit of all.

The apparent incongruity with the rule, in ordinary cases of tort must not control the terms of the Statute, which could undoubtedly give the remedy in a joint or several form, and has given it in the former.

The recovery is for the benefit of all the children, for the statute provides that the money so recovered shall be distributed in the same proportion amongst them, as in the case of the estate of an intestate.

This answers the objection made, that none may recover but such of the children as are *injured* by the death. The law gives it to them all in equal proportions, and if we are careful to remember that the value of the life lost, to be estimated by a pecuniary standard is what is to be recovered for, we shall fall into no such error as in supposing that none but those who can show some actual damage, are entitled to recover.

If such were to be the rule, we should have the indecent spectacle of an investigation whether the loss of a parent or child was or was not in fact an advantage rather than a loss; for certainly, if none be allowed to recover but such as are able to show a pecuniary loss, the defendants would, with great apparent reason at least, be entitled to claim the right to prove the contrary, and to show per adventure, that, by the death, the party suing may have succeeded to an estate, or, on the other hand, had been relieved from the burthen of maintenance. In case of the death of aged persons, or helpless infants, we might expect in the application of such a rule, to have the point discussed whether the death was an actual loss or gain. The law means not to open the door to anything so shocking. It treats the value of the life lost as a species of property, and gives, where children sue, to them in the same proportions as the personal estate of an intestate is distributed. This is what the act says and means, and hence the propriety of joining all the children as plaintiffs Fewer than the whole number might maintain suits, it is presumed, where any have released, but that case in not before us.

These views we think sufficiently answer the second, third and fourth assignments of error.

As to the first, we think the learned judge treated the point in a manner that the argument and authorities of the plaintiff in error show to have been correct, viz: that negligence, in its application to the case, was a mixed question of law and fact; and refusing the instruction prayed, stating the legal consequences of negligence, and leaving the jury to apply the law to the facts.

We see no error in this.

We are not called on to review the instructions of the court in reference to the assessment of the damages in this case, said to be in favor of one of the plaintiffs only.

As the judgment stands before us, it is in favor of all the plaintiffs and this is right.

Judgment affirmed.

Interest and Dividends.

Coupons due August 1, 1864, from Preferred Sinking Fund Bonds, General First Mortgage Bonds, Appleton Extension Bonds and Green Bay Extension Bonds of the Chicago and Northwestern Railway Company and from First Mortgage Bonds of the Galena and Chicago Union Railroad Company will be paid on and after that date, on presentation at the office of the company No. 8 Wall st.

The coupons of the Evansville and Crawfordsville Railroad Company, due on the 1st of August, will be paid at the office of the Farmers' Loan and Trust Co., 56 Wall st.

The Milwaukee and Prairie du Chien Railway Co. have declared a half yearly dividend of 4 per cent on the First Preferred Stock and 3½ per cent on the Second Preferred Stock, subject to Government tax, payable August 1, at the office of the company, No. 48 Exchange Place.

The Long Island Railroad Company have declared a quarterly dividend of 2 per cent, free from Government tax, payable August 1, at the Bank of North America, New York.

The Worcester and Nashua railroad company have declared a dividend of $2½ per share.

The interest on the first (and only) Mortgage Bonds of the Marietta and Ciucinnati R. R. Company due on the 1st of August will be paid at the office of Winslow, Lanier & Co., 52 Wall st.

A dividend of three dollars per share, free from government tax, has been declared on the capital stock of the New York and New Haven Railroad Company, payable on the 15th of August.

The Toledo and Wabash road will pay the interest on its first mortgage bonds 1st August.

The West Philadelphia Passenger Railway Company (Market street), have declared a dividend of five per cent., clear of taxes.

The Fifth and Sixth street Passenger Railrway Company a dividend of three per cent., clear of all taxes.

The Seventeenth and Nineteenth street Passenger Railway Company a semi-annual dividend of sixty cents per share, free of all taxes.

The Spruce and Pine street Railway Company a dividend of $1 50 per share, clear of taxes.

The Girard College Passenger Railway Company a dividend of $1 per share, clear of taxes.

The Green and Coates street Passenger Railway a dividend of one dollar and fifty cents per share, subject to United States tax.

The Fairmount and Arch street Passenger Railway Company a dividend of fifty cents per share, payable on and after 1st of August, 1864.

The Brooklyn City Railroad will pay 1st of August a dividend of three and a-half per cent.

The Baltimore City Passenger Railway a dividend of 75 cents per share, clear of United States taxes.

The Pewabic Mining Company a dividend of $7 per share, payable August 1. This dividend is payable from the profits of the business of six months ending July 1.

The Franklin Mining Company a dividend of $5 per share, payable on the 2d August to stockholders of 30th July.

The Pittsburg and Boston Mining Company a dividend of $8 per share.

The Maple Shade Oil Company a dividend of four per cent. for the month of July, payable on the 30th inst.

The Organic Oil Company a dividend of one per cent., out of the earnings of the last three months, equal to five per cent. on the subscription price of the stock.

The Perry Oil Company a dividend of two per cent., out of the earnings of the month of June, clear of tax.

The Diamond Coal Company a dividend of three per cent.

The American Coal Company will pay 10th August a dividend of 4 per cent.

The New York and Nevada Gold and Silver Mill and Mining Company will pay on the 1st August a quarterly dividend in gold of four per cent.

Railroad Earnings--Monthly.

The earnings of the Toledo and Wabash Railroad Company for the month of June, 1864, were $156,337 72
Corresponding month of previous year 152,584 67

Increase $3,753 05

The earnings of the St. Louis, Alton and Terre Haute Railroad for June, 1864, were.. $155,730 51
March, 1863 ..... 123,948 76

Increase $31,781 75

Louisville and Frankfort and Lexington and Frankfort Railroads.

The receipts from the joint operations of these roads during the fiscal years ending June 30, 1862 and 1863, have been as follows:

	1862.	1863.
From passengers	$119,412 26	$141,807 05
" governm't troops.	22,026 75	59,325 27
" freight	87,155 80	94,892 56
" government stores	10,621 31	7,006 04
" mails	8,998 80	8,790 25
" express	6,627 79	6,711 17
" telegraph	857 79	1,400 86
" miscellaneous	2,537 75	2,295 73
	$258,237 25	$322,228 93

The expenditures during the past year were:

Repairs of road	$35,550 41	
" locomotives	15,206 05	
" cars	14,042 85	
" bridges	651 59	
" rails	2,607 53	
" buildings, etc.	7,875 43	
Fuel	16,420 34	
Wages	86,955 49	
Renewal of bridges, etc.	39,467 73	
All other expenses	19,994 48	
		188,271 90
Balance net profit		$133.957 03
The increase in gross earnings was		$63,991 68
With an increase in expenses of		19,249 70
Making the increase in net earnings		$44,741 98

The gross and net earnings and expenses of the joint roads for the past four years have been as follows:

	Gross Earnings.	Operating Expenses.	Net Earnings.
1860	$390,377	$211,234	$179,143
1861	354,855	212,907	141,948
1862	258,237	169,022	89,215
1863	322,229	188,272	133,957

Lexington and Frankfort Railroad.

The proportion of gross and net earnings and expenses applicable to this road is as follows:

	1862.	1863.
Gross earnings	$78,985 37	$99,320 33
Operating expenses	52,191 09	45,965 01
Net receipts	$26,794 28	$53,355 32
The increase in gross earnings was	$20,334 96	
With a decrease in expenses of	6,226 08	
Making the increase in net earnings	$26,561 04	

The receipts from all sources during the year, including $8,362 37 from previous year, were $107,682 70; and the expenditures were:

Transportation expenses, as above	$45,965 01
Interest account	4,700 14
Taxes, insurance, etc	1,630 82
Dividend No. 15, 4 per cent	21,219 50
Sinking fund	8,000 00
Renewal and contingent fund	5,000 00
Balance to credit profit and loss	21,167 23
	$107,682 70

Twenty-four thousand dollars of the bonds of the company, maturing July, 1864, have been paid out of the resources of the sinking fund, and stock profits have been credited with the amount of the debt thus retired.

The following statement will show the cost, earnings, expenses and net earnings of this road for the years ending June 30—

	Cost.	Receipts.	Expenses.	Net.
1860	$642,702	$120,324	$66,051	$54,273
1861	643,421	108,944	65,677	43,267
1862	649,089	78,985	52,191	26,794
1863	650,250	99,320	45,965	53,355

Balance Sheet, July 1, 1863.

Capital stock	$514,573 07
Bonds due in 1874	25,000 00
" " 1869	70,000 00
" " 1864	11,000 00

The equipment of the entire line consists of 11 locomotives; 10 passenger, 5 baggage, 160 freight, stock and platform, and 65 construction ballast and hand cars. Total mileage of cars, 1,049,700. Miles run by locomotives, 181,633. Passengers carried eastward, 84,260; westward, 85,356—total, 169,616. Total mileage of passengers, 6,812,948. Tons of freight carried, 44,378; do carried one mile, 2,368,617.

Railroad Earnings—Weekly.

The earnings of the Marietta and Cincinnati Railroad for the 2nd week in July:

	1864.	1863.
Passengers	$7,523 37	$2,765 61
Freight	8,976 18	4,071 01
Mail, express & telegraph	1,189 58	885 00
Total	$17,689 13	$7,721 62
This month to date	$38,104 84	$16,357 99
Total since Jan. 1	$495,307 80	$309,217 02

The earnings of the Racine and Mississippi and Northern Illinois Railroad for the week ending July 14, 1864, were:

	1864.	1863.
Passengers	$2,501 52	$1,668 43
Freight	10,142 03	4,909 76
Express	104 16	75 00
Mails	296 58	296 58
Total	$13,044 29	$6,949 77
Increase	$6,094 52	
Receipts from January 1st to July 14:		
1864	$294,863 07	
1863	180,938 05	
Increase	$113,925 02	

The traffic of the Great Western Railroad for the week ending July 15, 1864, was as follows:

Passengers	$23 434 10
Freight and live stock	20,668 51
Mails and sundries	1,212 03
Total	$45,314 64
Corresponding week of 1863	41,553 19
Increase	$3,761 45

The earnings of the Grand Trunk Railway for the week ending July 16, 1864, were:

Passengers	$32,229 22
Express freight, mails and sundries	2,500 00
Freight and live stock	61,331 81
Total	$98,041 03
Corresponding week, 1863	78,214 92
Increase	$19,826 11

The earnings of the Milwaukee and Prairie du Chien Railroad for the 2d week in July, 1864, were | $33,311 00
Corresponding week of previous year | 17,815 00
Increase, 87 per cent | $15,496 00

The increase since Jan. 1, 1864, is $381,266—72 per cent.

The earnings of the Chicago and Northwestern Railway for the week ending July 14:

Passengers	$29,185 62
Freight &c.	95,119 35
Total	$124,304 97
Corresponding week of previous year	64,973 76
Increase, 91 per cent	$59,331 21

The earnings of the St. Louis, Alton and Terre Haute Railroad for the 1st week in July, were $31,216 42; do., 2d week in July, $30,691 00—Total, $61,907 42.

The earnings of the Michigan Central Railroad for the 3d week in July, 1864, were | $58,022 48
Corresponding week of previous year | 40,088 93
Increase | $17,933 55

The earnings of the Michigan Southern and Northern Indiana Railroad for the 3d week of July, 1864, were | $58,242 00
Corresponding week of previous year | 36,529 00
Increase | $21,713 00

The earnings of the Chicago and Rock Island Railroad for the third week in July, 1864, were | $51,000 00
Corresponding week of previous year | 30,000 00
Increase | $21,000 00

The Chicago and Alton Railroad earned for the third week in July, 1864, $57,600; 1863, $43,600—increase, $14,000. The earnings for the six months ending June 30, 1864, were $991,151 21; 1863, $793,643 63—increase, $199,507 58.

The Lehigh Canal Company's Railroad.

On the 8th of July work was commenced, in the vicinity of Easton, on the Lehigh Canal Company's Railroad. The new road, we are told, will cross the Lehigh river from the north to the south side, near the iron wagon bridge at Easton, whence it will be carried on a side cut in the rock cliff which is between the Lehigh Canal and Lehigh Valley Railroad, to and over the Delaware Division Canal and Delaware river to Phillipsburg, on the New Jersey shore.

Between Mauch Chunk and Penn Haven the Lehigh Canal Company are also constructing their railroad. It is now a "fixed fact" that the Lehigh Canal Company are in earnest, in the matter of a second railroad in the Lehigh Valley.—*U. S. R. R. and Mining Register.*

American Railroad Journal.

Saturday, July 30, 1864.

Stock Exchange and Money Market.

During the week ending the 23d inst., the associated banks of this city seemed earnest in repressing the previous inflation to which they had been such large contributors. Their loans were decreased $8,158,156, and their circulation $35,640, while their depositors withdrew from them $4,835,622, which in effect was a reduction of the fund used by these banks to lend upon to stock, produce, and gold speculators. The reshipment of foreign goods is also going on upon an immense scale; and this is a favorable circumstance, and the evidence of what is not so generally understood, that the foreign imports into New York have been for some time principally on foreign account, and unjustly charged to the greed of our own merchants. We have repeatedly alluded to the practice by both French and English manufacturers of sending their surplus products to the United States, where they are easily converted into money, and rapidly returned into the shape of gold. Nothing is more common abroad than to send the refuse of their workshops and looms to this country. After working off a full supply for the regular demand, quantities of second rate articles of the same pattern and appearance as those of the filled orders, are produced and sent here to go to our large auction houses, or to be bonded and withdrawn for sale whenever the market favors that operation. In this way our trade balances are swollen, the public mind is alarmed, our financiers are excited, and our economists worried with apprehension. In this way, too, the actual credit of the country is injured, and the American people are censured for their recklessness and extravagance. There is quite enough of these peculiarities, we admit, without the additional load put upon us by foreign importers and their agents. Seven and eight millions a week of reshipments would soon place the reported balance of trade on that side of the account where it justly belongs.

Gold has shown a marked decline for some weeks past. There is in truth but little demand for it; and those who confidently asserted it would go up to 300, have been disappointed, and if they have made that expectation the basis of their operations, must have been heavy losers. With the whole country against them, except the confederates and their Northern allies, they cannot expect much sympathy. The exports of specie have for the last two weeks been little, if any, in excess of the receipts. In the meantime Mr. Fessenden, much against his inclination, has got into his official harness. A short time since he urgently requested the presence of Mr. Cisco at Washington, but that gentleman has been prostrated by a sudden attack of disease, which for a few hours placed him in considerable danger, and was unable to respond. Recovering slowly, he has found it absolutely necessary to refuse remaining in office where he only staid at the most urgent personal request of Mr. Chase. His successor is Moses Taylor, Esq., a wealthy and respected merchant of this city, and of a political bias opposed to the party of Mr. Lincoln, as Mr. Cisco was. His selection, all things considered, is a remarkable circumstance, since he was not one of the three from whom Mr. Chase was peremptorily required by the President to make his choice, in conformity with the wishes of a New York Senator. It is also an indication that a particular influence, strong enough to unseat Mr. Chase, was not strong enough to dictate the succession. We give full credit therefore to the President for studying the public interest on this occasion at least. If Mr. Taylor accepts the appointment, which is yet doubtful, the public will be entirely satisfied, and be sure of the safety of the public funds, and the continued discreteness with which they will be managed in New York.

Mr. Fessenden has made his first move. He appeals to the people to take Treasury notes, payable three years from August 15th, bearing 7-30 interest, payable in currency, and convertible at the option of the holder at maturity into 5-20 bonds, bearing six per cent. interest in gold. The amount he is authorized to ask from the people in this form is two hundred millions, and there is eight times that amount in circulation or funded

in their hands, which the Government has issued in one shape or the other to carry on the war, and for which the holders have given consideration promptly in labor, service, and materials. The country is by no means impoverished, nor in want of a circulating medium. It will be therefore an easy task to furnish the amount required, and we trust it will be popularly subscribed.

It is objected by a cotemporary, whose monied articles are, however, not the work of an American, that Mr. Fessenden must not rely too much on appeals to the patriotism of the people, "which are of questionable utility at home, and are apt to be mistaken for signs of weakness abroad." No American would say this. It is the patriotism of the people which has thus far sustained the war, provided for its expenses, made the munificent donation known as the Sanitary contributions, and are willing to go further to save the country and its institutions.

He is but a shallow thinker, and a poor observer, who finds fault with the Secretary for appealing to a "sentiment" rather than "to the logic of facts." This sort of talk no doubt is very imposing, but the administration or the Cabinet Minister which is not in accord with the public sentiment will succeed neither in appeals to the people for men or money. Popular loans are the most successful of all loans, as has been tested in France of late years on several occasions. Those who dislike them are loan contractors and bankers, who by combination seek to obtain securities at their own price, and make the people afterwards pay them a profit on them.

It is the same class which has been trying to lend the Secretary of the Treasury fifty millions of irredeemable paper in return for United States bonds, interest and principal payable in gold; and now, through their commercial editors, over whom they exercise a known private influence, seek to lower the price at which Mr. Fessenden wishes to fill his subscriptions, so as to give a margin to speculation, and possibly get the control of the loan itself. Against all such financiers and financiering we protest. The whole of our system rests upon the fact that the country will be utterly ruined if the Union is severed, and that the States will fall apart in all directions; if the old ties are successfully broken by the rebellion, life and property will become wholly insecure, in consequence of the discord and continual severance of petty and quarrelsome States, headed by political adventurers and unprincipled men, of the same class which is at work even now.

This is precisely the contest which we are called on to wage, and for which Mr. Fessenden asks for more money. We do not consider this a five per cent., or a six per cent. question at all, nor inquire whether it is a 5-20, or a 10-40 that is put upon the market. But we only ask this question: shall this great and glorious fabric which has sheltered us so long, and which has been the home of the exile, and the asylum of the oppressed of all nations, this great temple in which we have worshipped Liberty with such genuine devotion, be razed to its foundations, crumbled into dust and swept from the globe under any false pretext whatever, political or financial? Whether dollars and cents in a man's pocket are more sacred than the country where he has gained them, the cause which has prospered him, and the institutions which have protected him. Let no one be deceived by these financial skirmishers; they mean mischief. If the country is to be saved it is by thoroughly appreciating its wants, and not by quoting Adam Smith's Wealth of Nations.

Money is again quite easy, but 7 per cent is readily paid for accommodation by borrowers.

A wholesome discrimination between ordinary business paper, and that of speculators in produce, provisions, sugars, teas and whiskeys is however observed. It is proper to state that purchasers of the 7-30s are allowed $2 50 on each $1,000 taken when they amount to the sum of $25,000. This inducement will create a large number of active agencies. When the coupons of 1881 bring 6 per cent premium, and those of 5-20s 7 and 8, there can be no doubt of the success of the new loan.

As there appears to be an unusual effort at this moment to procure peace at any price, by a certain clique of politicians, on the ground of exhaustion and waste of life, and the score of humanity which appears to exist only in one direction, not towards the innocent sufferers by by the war, but towards the guilty authors of it, we have thought it well to republish a curious and important calculation as to the strength of the opposing forces, and an estimate of their losses. After rigidly scrutinizing the figures, we believe the following, taken from the Boston *Journal* is perfectly reliable, and shows what the result must finally but inevitably be. The result is one which ensures the success of our financial policy, and is an explanation of the flutter in which certain parties are found:

"The census of 1860, with emigration and the annual increase of births, gives us a population of thirty-seven millions in the summer of 1864.

"Of this population four millions of whites and three millions of slaves exist in the rebel districts, and thirty millions of free men are to be found in the loyal districts. The contest is now between forces standing in the ratio of four to thirty, with three ready to aid the successful party.

"In comparing more closely the relative strength of the two districts, we find that one half of the whites are males, one half of the males are under sixteen, and half of the residue, from old age, youth, physical infirmity or sickness, unfit for service in the field. In this State we have never been able to bring more than ten per cent. of the people into the militia, and if we allow twelve per cent. for the capacity of the rebel districts, it is a liberal allowance. In the Southern districts which are still loyal or have been subdued, such as Missouri, Kentucky, Tennessee, Maryland and portions of other States, there is a white population of four millions, and it is a fair presumption that four per cent. of the population, or one third of the fighting men of these regions, have joined the rebel armies. We cannot allow more, as the rebel conscription has operated but little if any in those districts."

These premises seem indisputable. If we proceed to the estimate of the losses on both sides, the result is equally striking.

The war has been in progress for three years and an allowance of 30,000 a year for the excess of young men growing up over men becoming superannuated or dying by ordinary diseases is a very liberal allowance. Further, by the best information in our possession the rebels have lost in the last three years, down to the 6th of May last, by deaths in the field, camps and hospitals, by wounds and captures—and most of this is conceded—120,000 a year, or 360,000 men.

During the present campaign, since May 1st, Lee is understood to have lost 70,000 men, and Johnston, Magruder, Forrest and others at least 30,000 more.

The following table gives the result:

Rebel force at the outset, 12 per cent. of 4,000,000 whites	480,000
Four per cent. of 4,000,000 whites in Southern Districts loyal	160,000
Young men growing up in three years in excess of deaths	90,000
Whole number of men able to fight from the start	730,000
Rebel losses in three years to May 1, lost, in field and by sickness, at 120,000 a year.	360,000
Rebel losses, East and West, in the present campaign	100,000
Owners of plantations, artificers, drivers, refugees and men who will not or cannot fight, at least	195,000
	730,000
We thus have remaining, as the whole rebel force, either in the field or fit for service, and to be relied upon	195,000
From these we may deduct at least 5 per cent., or 10,000, for the sick in hospital.	10,000
And we have fighting men	185,000
Of these there are west of the Mississippi, at least	25,000
With Johnston	45,000
With Forrest and others	10,000
At Mobile and in the Carolinas	20,000
With Lee and on raids into Maryland	85,000
	185,000

To crush these we have at least 500,000 men, and if we deduct for furloughs and hospitals, 10 per cent., we have 450,000 men in the field, and of these we have in front of both Lee and Johnston at least twice the forces opposed to them, at least 300,000, the residue holding the Mississippi, the coasts of Carolina, and the communications and depots in the rear of our main armies.

For the last two months the Confederate losses in Virginia and Georgia have been in killed, wounded, deserted and missing at least 50,000, a month. The three millions of people who have held out so long, more through the weakness of our Government than for any other cause have not another man to sacrifice, or another dollar to spare. Nothing but treason at the North can prolong a contest so unequal in real resources. It is reduced to a moral and mathematical certainty that the cause of the Union must triumph, if the Government, during the remainder of its official term acts with even tolerable discretion and does not shut its eyes and ears to what is going on around it. So that the argument is a financial one of the most impressive character, and we bring it forward for consideration at a moment when a false and hollow cry for a truce is made wholly in the interest of rebellion.

In the meantime we have the gratifying information from the Treasury department that the Internal revenue is rapidly on the increase. That which produced the last year but five millions per month, is now producing one million per day. This source of increase is therefore expected to realize the present year, between three and four hundred millions of dollars, the largest and most cheerfully paid revenue the world ever saw, and this exclusive of the customs, one hundred and three millions more.

In addition to this we have to record the fact that in the face of the new loan of $200,000,000. Government securities are steadily advancing and are in fresh demand, and that the foreign orders from the continent continue to come in on a large

scale much to the discomfort of parties both in England and France, who attribute the demand to the influence of the German press, which has strong democratic tendencies everywhere. We venture to suggest that this JOURNAL which has a wide circulation among the foreign Banking houses, largely helps to diffuse confidence in our National securities and the National spirit.

The aggregate value of the exports of produce and merchandise exclusive of specie, from this port during the past week was $8,040,364, against $7,879,290 for the week previous.

It will be remembered that the exports of the previous week were over $7,000,000, and this is at the rate of between 30 and 40 millions per month, or more than three hundred millions a year, a suggestive fact, of great importance and likely to change all our foreign commercial relations.

The value of foreign goods imported into the port of Boston for the week ending July 22, was $237,218, against $529,000 for the corresponding week in 1863. The exports were $514,838, against $472,496 72 for the corresponding week in 1863.

The value of foreign exports from the port of Baltimore for last week was $298,683.

The balance in the Sub-Treasury on Tuesday was $15,758,908. Foreign Exchange is in some demand. Sterling being sold at 9¼ to ⅜ or about par in gold and francs at 5.13-16.

Railway shares have been quiet under the excitement of the Government operations, and the constant and irregular fluctuations of the gold market. But they are steady and on the rise, the holders being more than ever confident of their great value.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Indiana 5s, 86¼; do., War Loan, 99; Michigan 6s, 1878, 103; North Carolina 6s, 60; Illinois coupon bonds, 1877, 101; Louisiana 6s, 73; McGregor Western 1st mort., 86; Brooklyn City Water Loan, 115; Detroit, Maine and Toledo bonds, 107; Norwich and Worcester R. R., 112; Pitts., Ft. W. and Chi. scrip, 110; Central Coal, 64; Atlantic M. S. S. Co., 177½; Canada Copper, 3¼; Copake Iron, 7; Bucks Co. Lead, ¾; Metropolitan Gas, 125; Merchants' Bank, 108; Bank of Commerce, 105; Ocean Bank, 99; Metropolitan Bank, 115; Am. Ex. Bank, 115; Atlantic Bank, 95; Merchants Ex. Bank, 97.

Philadelphia.—Long Island 7s, 110; Allegheny Valley R. R. 7s, 104; Allegheny Co. coupon 5s, 82; Pittsburg coupon 5s, 79¼; Penna. War Loan 6s, 105½; North Penna. scrip, 96; Elmira chattel 5s, 77½; Rock Oil, 3½; Mineral Oil, 2¼; Organic Oil, 1; Dalzell Oil, 7¼; Densmore Oil, 3½; McElheny Oil, 7⅛; Union Petroleum, 2⅜; Cherry Run Petroleum, 5¼; Perry Oil, 5; Petroleum Cen. 3; McClintock Oil, 5¾; Egbert Oil, 3; Maple Shade Oil, 13; Excelsior, 1⅛; Noble and Delamater, 12½; Feeder Dam, 1; Olmstead Oil, 4½; Phila. and Oil Creek, 2; Venango, ¾; Fulton Coal, 8¼; Big Mountain, 7¾; N. Y. and Middle Coal Fields, 20; Kentucky Bank, 111; Farmers Bank of Kentucky, 105; Louisville Bank, 116; Farmers and Mech. Bank, 58½; Mechanics Bank, 28; Bank of North America, 155. The latest quotations are: City 6s, 104@104½; do., new, 106⅜@106¾; State 5s, 101@101½; do., coupon, 104¼@104⅛; do., 6s, W. L., 107@107½; Phila., Wil. and Balt., 74½; Reading, 67⅞@68; do., 6s, 1870, 110@111; do., 1886, 135@136½; Camden and Amboy, 163½@167; Pennsylvania R. R., 73@73¾; do., 1st mort., 125@126; do., 2d mort., 121@122; Little Schuylkill R. R., 45⅛@46½; Morris Canal, 97@98¼; do., pref., 135@135½; do., bonds, 116@121; do., 2d mort., 104¼@105; Wyoming Valley Canal, 89¾@90½; do., 6s, 105@105½; Susquehanna Canal, 19½@20½; do., 6s, 63@64; Sch. Nav., 29@30; do., pref., 38¼@39; do., 6s, 1882, 93@94; Union Canal bonds, 20@22; Delaware Div. Canal, 43@43⅛; do., bonds, 104@104½; Elmira and Williamsport, 34@37; do., pref., 51@51½; do., 7s, 1873, 113¼@113½; do., Chattle 10s, 77½@78; Beaver Meadow, 96@100; Long Island R. R., 47@48½; Lehigh Coal and Navigation, 84¾@85; North Pennsylvania, 81¼@82; do., 6s, 103½@104; do., 10s, 125@127; Philadelphia and Erie, 33@33¾; do., 6s, 112@113½; Minehill, 61@61¼; Catawissa, 19@21; do., pref., 39@40; Lehigh Valley, 130@134; do., bonds, 119@121½; Fifth and Sixth streets, (horse,) 61@64; do., 7s, 107@108; Second and Third, 73@74; do., 7s, 110; Race and Vine, 11@13; West Philadelphia, 69@72; Spruce and Pine, 40½@44; Green and Contes, 35@38; do., 7s, 110@110¼; Chestnut and Walnut, 60@61; Arch, 22@24; Thirteenth and Fifteenth, 33@35; Seventeenth and Nineteenth, 16; Girard College, 30½@31½; Tenth and Eleventh, 49@50; Norristown, 64¾@65⅛.

Boston.—Northern (Ogdensburg,) 1st mort., 104¾; do., 2d mort., 31¾; Eastern R. R. 6s, 1874, 108; Vermont Central 1st mort., 85; do., endorsed, 75½; do., 2d mort., 26; Rutland and Burlington 1st mort., 72; Essex R. R. 6s, 97; Certificates Miss. and Mo. River Air Line R. R. 8s, 6 per cent.; Maine 6s, 1877, 100; do., 1890, 101; Rhode Island 6s, 100½; New Hampshire 6s, 100; Mass. 5s, 1894, 115¼; Boston 5s, 125; Dorchester 5½s, 1874, 100; Bath 6s, 102¾; Old Colony and Newport R. R., 130; Bear Valley Coal and Summit Branch R. R., 24; Boston, Concord and Montreal R. R., new stock, 12½; Hannibal and St. Joseph, pref., 55; Boston, Hartford and Erie, 35; Boston and Lynn, horse, R. R., 106; Boston and New York Air Line, 9; Union Steamship Co., 153; Essex Co., 101¼; Boston Water Power Co., 41; Suffolk Coal, 95; Schuylkill Valley Coal, 3¼; Franklin Coal Co., 83½@90¼; Short Mt. Coal, 50; Cary Imp., 12½; Boston and Roxbury Mill, 53½; Merchants' Bank, 103; Shawmut Bank, 98¾; Bank of Commerce, 102¾; National Bank of the Republic, 101½; Hide and Leather Bank, 109¼. Market Bank, 75; Webster Bank, 103; Washington Bank, 100; Commercial Bank, Salem, 65; Salem Bank, Salem, 63¾; Continental Bank, 98½; Pawners Bank, 90½; Warren Bank, South Danvers, 95¼; Atlas Bank, 103; Acton Mining Co., 2; Albion Gold, 3⅝; Albany and Boston, 20; Bay State, 19¾; Black River, 27c.; Boston, 5½; Canada, 2½; Chebucto Gold, 55c.; Copper Falls, 35; Chester, 12c.; Concord, 4¾; Columbian, 8½; Dana, 3; Eagle River, 6; French Creek, 1; Gt. Western, 4¼; Huron, 34; Highland, 10; Humboldt, 10⅝; Hancock, 12½; Hanover, 3¼; Lake, 12c.; Manhattan, 10¾; Mesnard, 9½; Macomb, lead, 4; Native, 1¾; North Cliff, 6⅝; Ottawa, 45c.; Pontiac, 4⅞; Renfrew Gold, 1¼; Star, 6¾; Superior, 8¼; St. Clair, 8½.

Baltimore.—N. W. Va. 1st mort., 113; do., 3d mort., 40; Western Md. bonds, 87; City Passenger R. R., 22½; Bare Hill, 4.10; Md. Copper, 0.85; Atlantic Coal, 1.40; Santa Clara, 19½; Mineral Hill, 2.70; Springfield, 2.00; Am. Gas Coal, 2.50; Lake Chrome, 0.60; Bank of Commerce, 25; Bank of Baltimore, 102½; Marine Bank, 33; Union Bank, 72; Farmers' and Merchants' Bank, 41; Franklin Bank, 12½; Howard Bank, 10¼. The latest quotations are: Balt. and Ohio, 114½@115; do., 6s, 1867, 108@110; do., 1875, 114@117; do., 1880, 114½@115¼; do., 1885, 117@117; Northern Central, 55@58; do., bonds, 1885, 107@108; N. W. Va., 15@25; do., 1st mort., 113@116; do., 2d mort., 103; do., 3d mort., 37¼@40; do., guar., 113@115½; Marietta and Cincinnati 7s, 1891, 105@108¾; Central Ohio 2d mort., 101; do., 3d mort., 85; do., 4th mort., 55@63; do., income 1857–'60, 40@44; Western Md. bonds, 85¼@89; do., guar., 116; Maryland 5s, 95@100; do., 6s, coupon, 1870, 115; do., Ins., 110@115; do., 1890, 115; Baltimore 6s, 1870, 114@116; do., 1873, 105@107; do., 1875, 117@118; do., 1886, 117½@118; do., 1890, 115¼@117; do., coupon, 118; do., 5s, 1838–'70, 96@96; City Passenger R. R., 22@22¼; Canton Co., 34@36; Gardner, 75@1.00, Gas Coal, 2.15@2.40; Maryland, 0.85@0.90; North State, .10@.15; Rudisell, .65@.70; Silver Hill, .20@.30; Springfield, 1.50@2.00; George's Creek, 90@110; Santa Clara, 19½@21; Baltimore and Cuba Smelting and Mining, 220@225; Balt. and North Carolina, .20@.40; Balt. Chrome, 1.50@2.25; Bare Hill, 4.10@4.25; Atlantic Coal, 1.45@1.55; Mineral Hill 2.70@2.75; Baltimore Coal, 85; Lake Chrome, 55@60.

Chicago and Great Eastern Railway.

We understand that a large force is at work on this new and important Railway. The bridges and culverts are nearly all erected, and the materials for such as are not finished have been delivered on the line; about three quarters of the grading is completed, and twenty miles of the track are already laid. The Company expect to open the Road for traffic as early as the close of Lake navigation.

In addition to the large business between Chicago and Cincinnati and Louisville already secured to this route, it will open a new first class line from Chicago to Pittsburg, and will no doubt attract a large share of that business; also, via Wheeling to Baltimore and the Eastern cities.

We learn that the Baltimore and Ohio Railroad Co., as well as private parties in Baltimore, have made liberal subscriptions for the Company's Mortgage Bonds; that some very successful negotiations of these Bonds have been made in Europe, through the Company's Bankers, realizing a large per cent. over par; and that the prospects of the enterprize generally are very promising.

☞ We publish in another part of the JOURNAL the card of the brothers SKAATS, who have opened an office at No. 14 Pine street, where they propose to carry on the business of bankers and brokers. We understand that their capital and prompt and business habits ensure their customers more than the usual facilities of the street.

☞ GEO. T. NEWHALL, New Haven, Conn., has for sale six new first class flat cars, of the ordinary gauge.

The Tax Bill.

Continued from Page 708.

TABLE IV.—*Miscellaneous Taxes.*

Income tax over $600 and not exceeding $5,000, five per cent. Over $5,000 and not exceeding $10,000, seven and a half per cent. Over $10,000, ten per cent.

Brokers, for each sale not exceeding 100 shares of stock or less, when the par value is $100, 50 cents.

Brokers, exceeding 100, for every additional 100 shares, or fractional parts, at the rate of for each 100 shares, 50 cents.

Brokers, when the par value exceeds $100 per share, so much thereof as, at the par value, shall amount to a sum not exceeding $10,000, 50 cents.

Brokers, exceeding the sum of $10,000, for every additional $10,000 or fractional part, 50 cents.

Brokers, for each 100 shares of stock or less, when when the par value is $50, 25 cents.

Brokers, exceeding 100 shares, for every additional 100 shares or fraction, for each 100 shares, 25 cents.

Brokers, for each sale of gold and silver bullion, sterling exchange, uncurrent money, promissory notes, stocks, bonds or other securities, not exceeding $10,000, 50 cents.

Brokers exceeding $10,000, for every additional $10,000 or fraction, 25 cents.

Slaughtered cattle and calves, exceeding three months old, for sale, 20 cents per head.

Slaughtered cattle and calves under three months, 5 cents.

Slaughtered swine, when the number exceeds twenty in a year, per head, 10 cents.

Slaughtered sheep and lambs. 5 cents.

Railroads, steamboats, ferry boats and bridges, on gross receipts, 5 per cent.

Express companies, on gross receipts, 3 per cent.

Insurance companies, on gross receipts, 1 per cent.

Telegraph companies, on gross receipts, 5 per cent.

Banks, on the average amount of the deposits of money subject to payment by check or draft, each half year, ½ of 1 per cent.

Banks, on circulation above 90 per cent. two per cent.

Banks, on circulation less than 90 per cent. 1 per cent.

Banks, on capital, ½ of one per cent.

Lotteries, on gross receipts, 2 per cent.

Advertisements, 3 per cent.

Theatres, operas, circuses and museums, on gross receipts, 1 per cent.

Succession to Real Estate, where the successor shall be a lineal issue or lineal ancestor of the predecessor, on the value of the real estate, on each $100, $1.

Succession to Real Estate, where the successor shall be a brother or sister, or a descendant of a brother or a sister of the predecessor, upon the value, per $100, $2.

Succession to Real Estate, where the successor shall be a brother or sister of the father or mother, or the descendant of a brother or sister of the father or mother of the predecessor, per $100, $4.

Succession to Real Estate, where the successor shall be a brother or sister of the grandfather or grandmother, or a descendant of the brother or sister of the grandfather or grandmother of the predecessor, per $100, $5.

Succession to Real Estate, where the successor shall be in any other degree of collateral consanguinity to the predessor, or shall be a stranger in blood, per $100, $6.

☞ We learn that the work on the Brockville and Ottawa Railway line is making great progress between Almonte and Arnprior. The railway bridge over the Mississippi river, at Almonte, is almost completed, and the Pakenham and Arnprior bridges are also rapidly approaching completion.

Death of Nathaniel Marsh.

NATHANIEL MARSH, Esq., President of the Erie Railway Company, died at his residence at Clifton, Staten Island, on Monday, the 18th inst. This affliction will fall heavily on the company with whose interest and welfare he has been so long and so honorably connected, and of which he has been the guide and support through a series of troubles and financial disasters to which few other corporations have been subjected.

MR. MARSH was a native of Haverhill, Massachusetts, where he was born in the year 1812, and was consequently about 52 years of age. He was educated at Dartmouth College, from which he graduated with the first honors, and afterwards studied law. Having been admitted to the bar he removed to New York where he commenced the practice of his profession. Subsequently he was connected with the press, and also occupied the position of Assistant Postmaster at New York under Mr. Graham.

MR. MARSH retired from his official station in the post office in 1845, to take upon himself the office of Secretary of the New York and Erie Railroad Company. In this capacity he displayed a wonderful administrative power and financial acumen; and on the failure of that company his services were further called into requisition as Receiver, and when the company was re-organized, in 1859, he was elected its first President.

His administration, in which he was ably assisted by CHARLES MINOT, Esq., as Superintendent; has been a complete success. He has conducted its affairs from bankruptcy to the very pinacle of success. Its stock, which a few years ago sold heavily at a mere fraction of its nominal value, is now readily taken much above par, and is paying 8 per cent. dividends. Such a result is unprecedented, and undoubtedly attributable to the indomitable energy and financial ability of our lamented friend.

As a business man, MR. MARSH was able and faithful. He possessed a genial temperament, and was widely known and esteemed. His place will not be easily filled. It may be truly said of the deceased that he wore himself out in the service of the company.

☞ The Lawrence Railroad and Transportation Company, which is to operate under the laws of Pennsylvania and Ohio, was organized on the 23d of June. The object of the company is to construct a railroad from Mahoningtown, Pennsylvania, on the line of the Newcastle and Beaver Valley Railroad, to the terminus of the Cleveland and Mahoning Railroad, at Youngstown.

☞ The Produce Exchange brokers, in view of the internal revenue tax, have increased their rates of commission. On flour, provisions, and seeds, the commission is 2½ per cent., on whiskey 1½ per cent., on grain 1½ per cent.

☞ The ill health of H. M. Humphrey has caused him to resign his position as Cashier of the Ninth National Bank, Mr. John T. Hill, who succeeds him, is a gentleman of good experience in Banking in the Park Bank and elsewhere. The business of the Ninth is very large.

☞ The consolidation of the Beaver Meadow and Penn Haven and White Haven Railroad Companies with the Lehigh Valley Railroad Company is progressing in the forms of law.

Cape Cod Railroad.

At the annual meeting of this corporation held on the 14th inst., J. H. W. Page, Richard Borden, Alexander Baxter, M. S. Lincoln, N. S. Simpkins, Matthew Starbuck and Ephraim N. Winslow were elected Directors; and J. H. W. Page, President, and George Marston, Clerk. The receipts from all sources for the year ending May 1, 1864, have been $148,360 54 and the expenses during that period $62,973 42 leaving a net income, after the payment, of expenses, interest and excise, of $73,148 44. The net increase of the income during the past year compared with the previous one has been $21,110 90. The Company's assets are valued at $773,914, and the total debt $117,300 12.

Mississppi and Wabash Railroad.

Rumors have reached us for some months past, that efforts were being made to resuscitate this line of road, and these efforts would doubtless be successful. Two or three weeks since we received a letter from E. P. Buell, Esq., who resides at Warsaw, and has been for several years the Superintendent of the road, and running the trains between Carthage and Warsaw, stating that a responsible company had been negotiated with, which would complete the road, under the name of the Toledo, Peoria and Warsaw Railroad. That engineers were now on the line, surveying it; that the old stockholders of the road, whose subscriptions were still unpaid, including those whose subscriptions had been transferred to the Jacksonville and Savannah Railroad, would soon be called upon for the amounts they had subscribed; that the iron will be laid from Peoria to Canton, and also from Carthage to Bushnell, this fall, and that the line between Bushnell and Canton will be completed by the 1st of July, 1865.

The engineers have passed over the line, reaching here on Tuesday last. We now believe the road is a fixed fact. Wealthy railroad men have taken hold of the project, and they are those whose interests demand a connection with the Mississippi river.

The President of the road, Charles L. Frost, Esq., and E. P. Buell, Esq., were here on Thursday last. The President states that the work which has been done on the road is in an excellent state of preservation.

In closing his letter, Mr. Buell says: "If God spares my life you will see me on an engine passing through your city, on the Toledo, Peoria and Warsaw Railroad, 4th of July, 1865."—*Canton* (Ill.) *Ledger*, June 21.

Union Pacific Railroad Directors.

The President has appointed Jesse L. Williams, of Indiana, George Ashmun and Charles Sherman, of Ohio, as additional directors of the Union Pacific Railroad Company; and Governor Dennison, of Ohio, Wm. H. White, of Connecticut, and Leonard Sweet, of Illinois, as inspectors of the road, in accordance with the provisions of the Amended Act of Congress, Approved July 2, 1864.

☞ The survey of the Tomah and St. Croix Railroad commenced a few weeks ago, is being pushed rapidly forward. The survey began at Tomah.

Work on the Superior Railroad is progressing very finely. We recently rode over the line with one of the contractors and were surprised at the amount of grading already accomplished. The force is being continually increased, and the first twenty miles will be ready for the ties in a short time.—*Hudson* (Wis.) *Times*.

☞ The French Government is about to adopt the plan so popular with us in regard to that portion of its public securities called *Rentes*, that of affixing coupons payable to bearer, *au porteur*. These will circulate all through the Empire and pass as cash in the departments.

The New Tariff of 1864.

The following is a complete alphabetical list of all the rates of duty imposed by the new tariff on foreign goods imported:

Absynthe, per gallon	$2
Acetate of ammonia, per lb	70 cts.
Acetate of baryta, per lb	40 cts.
Acetate of iron, per lb	50 cts.
Acetate of strontia, per lb	50 cts.
Acetate of zinc, per lb	50 cts.
Acetate of lead, per lb	20 cts.
Acetate of lime	25 per ct.
Acetate of magnesia, per lb	50 cts.
Acetate of soda, per lb	50 cts.
Acetic acid, exceeding the specific gravity of 1,040, per lb	80 cts.
Do., not exceeding the specific gravity of 1,040, known as No. 8, per lb	25 cts.
Acetous acid, or concentrated vinegar, same as "Acetic Acid."	
Albumen	25 per ct.
Ale, in bottles, per gallon	35 cts.
Do., not in bottles, per gallon	20 cts.
Almonds, per lb	6 cts.
Do., shelled, per lb	10 cts.
Annatto seed	20 per ct.
Annatto, extract of	20 per ct.
Amylic alcohol, per gallon	$2
Anchovies, preserved in oil or otherwise	50 per ct.
Aniline, dyes, per lb	$1 and 35 per ct.
Antimony, crude	10 per ct.
Do., regulus of	10 per ct.
Arrack, per gallon	$2
Arrowroot	30 per ct.
Artificial and ornamental feathers and flowers, or parts thereof	50 per ct.
Asbestus	25 per ct.
Asphaltum	25 per ct.
Bagging, see "Cotton."	
Balmorals, and goods of similar description or used for like purposes, of wool, worsted, or any other material, per lb	24 cents and 35 per ct.
Barytes, all combinations of, with acids or water, per lb	3 cts.
Do., nitrate of	20 per ct.
Bay rum, per gallon	$1 50
Beads and bead ornaments	50 per ct.
Bedsides, see "Carpets."	
Beer, in bottles, per gallon	35 cts.
Beer, not in bottles, per gallon	20 cts.
Billiard chalk	50 per ct.
Blanc fixe, per lb	3 cts.
Blankets, wholly or in part of wool, value not exceeding 28 cents per lb., per lb	12 cents and 20 per ct.
Do., do., value above 28 cents and not exceeding 40 cents per lb., per lb	24 cents and 25 per ct.
Do., do., value above 40 cents per lb., per lb	24 cts. and 30 per ct.
Blue vitrol	25 per ct.
Bockings, per sq. yard	25 cts.
Bone or ivory drop black	25 per ct.
Bone dice, draughts, chessmen, chess balls and bagatelle balls	50 per ct.
Books, blank books, &c.	25 per ct.
Bottles, containing brandy, wines and liquors, each	2 cts.
Brandy, first proof, per gallon	$2 50
Brandy, none, under first proof, to pay less than 50 per ct.	
Brandy, no lower rate or amount of duty shall be levied than that fixed by law for first proof, but shall be increased in proportion for any greater strength than that of first proof.	
Brandies, &c., may be imported in bottles when the package shall contain not less than one dozen; and all bottles shall pay a separate duty each, when containing wines, brandies or other spirituous liquors	2 cts.
Brandy, imitations of, to pay highest rates of duty provided for the genuine article, and in no case less than, per gallon	$1
Brimstone, crude, per ton	$6
Do., in rolls or refined, per ton	$10
Bristles, per lb	15 cts.
Brushes, of all kinds	40 per ct.
Bunting	50 per ct.
Cables, tarred, per lb	3 cts.
Cameos, not set	10 per ct.
Candy, sugar, not colored, per lb	10 cts.
Canvass, for sails	30 per ct.
Carmine lake, dry or liquid	35 per ct.
Carmined indigo	20 per ct.
Carpets, Wilton, Saxony and Aubusson, Axminster, patent velvet, Tournay velvet and tapestry velvet, Brussels wrought by the Jacquard machine, and all medallion or whole carpets, valued at $1 25 or under per sq. yard, per sq. yard	70 cts.
Do., do., value over $1 25 per sq. yard per sq. yard	80 cts.
Do., none of the foregoing to pay less than	50 per ct.
Do., Brussels and tapestry Brussels, printed on the warp or otherwise, per sq. yard	50 cts.
Do., all treble ingrain, three ply, and worsted chain Venetian, per sq. yard	40 cts.
Do., yarn Venetian and two ply ingrain, per sq. yard	35 cts,
Carpet, hemp, or jute, per sq. yard	6½ cts.
Do., felt, and carpet printed, colored or otherwise, per sq. yard	25 cts.
Do., of wool, flax or cotton, or parts of either, or other material not otherwise specified	40 per ct.
Do., mats, rugs, screens, covers, hassocks, bedsides, and other portions of carpets, same as carpets of like character or description.	
Do., do., all other	45 per ct.
Cassia, per lb	20 cts.
Do., buds and ground, per lb	25 cts.
Castor beans or seeds, per bu. of 50 lbs.	60 cts.
Chalk, white, per ton	$10
Do., red	20 per ct.
Do., French	20 per ct.
Do., of all descriptions, not otherwise provided for	25 per ct.
Champagne, in bottles, shall not pay a less rate of duty than $6 per dozen bottles, each bottle containing not more than one quart and more than one pint, or $6 per two dozen bottles, each bottle containing not more than one pint.	
Charts	25 per ct.
Chicory root, per lb	4 cts.
Do., ground, burnt or prepared, per lb.	5 cts.
China ware, plain white, and not decorated in any manner	45 per ct.
China ware, gilded, ornamented or decorated in any manner	50 per ct.
Chloroform, per lb	$1
Cigars, of all kinds, value $15 or less per 1,000, per lb	75 cts. and 20 per ct.
Do., value over $15 and not over $30 per 1,000, per lb	$1 25 and 30 per ct.
Do., value over $30 and not over $45 per 1,000, per lb	$2 and 50 per ct.
Do., value over $45 per 1,000	$3 and 60 per ct.
Cigars, paper, same as above.	
Cigarettes, including wrappers, same as above.	
Cinnamon, per lb	80 cts.
Clay, unwrought, per ton	$5
Do., pipe, per ton	$5
Do., fire, per ton	$5
Cliffstone, per ton	$10
Cloth, lastings, mohair cloth, silk twist, or other manufacture of cloth, woven or made in patterns of such size, shape and form, or cut in such manner as to be fit for gloves, slippers, boots, bootees, gaiters and buttons, exclusively, not combined with India rubber	10 per ct.
Clothing, ready made, and wearing apparel wholly or in part of wool, made up by the tailor, seamstress or manufacturer, except hosiery, per lb	24 cts. and 40 per ct.
Cloves, per lb	20 cts.
Clove stems, per lb	10 cts.
Coal, bituminous, and shale, per ton of 28 bushels, 80 lbs. to the bushel	$1 25
Do., all others, per ton, as above	40 cts.
Coal, culm of	25 per ct.
Coal, illuminating oil, crude, per gallon	10 cts.
Cobalt	20 per ct.
Cobalt, oxide of	20 per ct.
Cocoa nuts	25 per ct.
Coir yarn, per lb	1½ ct.
Coke	25 per ct,
Colodion, per lb., fluid	$1
Cologne water, per gallon	$3 and 50 per ct.
Confectionery, not otherwise provided for, made wholly or in part of sugar, valued at 30 cents per lb., or less, per lb	15 cts.
Do., do., valued above 30 cents per lb., or when sold by the box, package, or otherwise than by the lb	50 per ct.
Copper, in pigs, bars, or ingots, per lb.	2½ cts.
Do., sheathing, in sheets 48 inches long and 14 inches wide, weighing from 14 to 34 ounces, per sq. foot, per lb	3½ cts.
Do., rods, bolts, nails, spikes, copper bottoms, in sheets or plates, called braziers' copper, and other sheets of copper not otherwise provided for	35 per ct.
Do., sulphate of	25 per ct.
Cordage, tarred, per lb	3 cts.
Do., untarred, Manila, per lb	2½ cts.
Do., all other, untarred, per lb	3½ cts.
Cordials, per gallon	$2
Cork, bark or wood, unmanufactured	30 per ct.
Corks, and cork bark manufactured	50 per ct.
Cottons—All manufactures of cotton (except jeans, denins, drillings, bed tickings, ginghams, plaids, cottonade, pantaloon stuff, and goods of like descriptions,) not bleached, colored, stained, painted or printed, and not exceeding one hundred threads to the square inch, counting the warp and filling, and exceeding in weight 5 ounces per sq. yard, per sq. yard	5 cts.
Do., if bleached, per sq. yard	5½ cts.
Do., if colored, stained, painted or printed, per sq. yard	5½ cts. and 10 per ct.
Do., on finer and lighter goods of like description, exceeding one hundred threads and not exceeding two hundred threads to the sq. inch, counting the warp and filling unbleached, per sq. yard	5 cts.
Do., if bleached, per sq. yard	5½ cts.
Do., if colored, stained, painted or printed, per sq. yard	5½ cts. and 20 per ct.
Do., on goods of like description, exceeding two hundred threads to the sq. inch, counting the warp and filling, unbleached, per sq. yard	5 cts.
Do., if bleached, per sq. yard	5½ cts.
Do., if colored, stained, painted or printed, per sq. yard	5½ cts. and 20 per ct.
Do., on all cotton, jeans, denins, drillings, bed tickings, ginghams, plaids, cottonades, pantaloon stuffs, and goods of like description, or for similar use, if unbleached and not exceeding 100 threads to the square inch, counting the warp and filling, and exceeding 5 oz. to the sq. yard, per sq. yard	6 cts.
Do., if bleached per sq. yard	6½ cts.
Do., if colored, stained, painted or printed, per sq. yard	6½ cts and 10 per ct.
Do., on finer and lighter goods of like description, exceeding 100 threads and not exceeding 200 threads to the sq. inch, counting the warp and filling, if unbleached, per sq. yard	6 cts.
Do., if bleached, per sq. yard	6½ cts.
Do., if colored, stained, painted or printed, per sq. yard	6½ cts, and 15 per ct,

Do., on goods of like description, exceeding 200 threads to the sq. inch, counting the warp and filling, if unbleached, per sq. yard.... 7 cts.
Do., if bleached per sq. yard.... 7½ cts.
Do., if colored, stained, painted or printed, per sq. yard....7½ cts. and 15 per ct.
[Provided, that upon all plain woven cotton goods, included or not included in the foregoing schedules, unbleached valued at over 16 cents per square yard, bleached valued at over 20 cents per square yard, colored valued at over 25 cents per square yard, and cotton jeans, denims and drillings unbleached, valued at over 20 cents per square yard, and all other cotton goods of every description, the value of which shall exceed 25 cents per yard, there shall be levied, collected and paid a duty of 35 per centum ad valorem.]
Do., no cotton goods having more than 200 threads to the sq. inch, counting the warp and filling, shall be admitted to a less rate of duty than is provided for goods which are of that number of threads.
Cotton, raw, per lb.... 2 cts.
Do., spool, per dozen spools, containing on each spool not exceeding 100 y'ds of thread....6 cts. and 30 per ct.
Do., do., exceeding 100 yards for every additional 100 yards of thread on each spool, or fractional part thereof, in excess of 100 yards....6 cts. and 30 per ct.
Do., shirts and drawers, woven or made on frames, and all cotton hosiery... 35 per ct.
Do., velvet.... 35 per ct.
Do., braids, insertings, lace, trimming, or bobbinet, and all other manufactures of cotton not otherwise provided for.... 35 per ct.
Cotton bagging, or other manufactures not otherwise provided for, suitable for the uses to which cotton bagging is applied, composed in whole or in part of hemp, jute, flax, or other material, value 10 cents or less per sq. yard, per lb.... 3 cts.
Do., value over 10 cents, per sq. yard, per lb.... 4 cts.
Covers, see "carpets."
Crocus colcotra.... 25 per ct.
Crockery ware, white, &c., same as "Earthenware."
Croton oil, per lb.... $1
Culm of coal.... 25 per ct.
Diamonds, when not set.... 10 per ct.
Drawers, of wool, per lb....20 cts. and 30 per ct.
Druggets, per sq. yard.... 25 cts.
Earthenware, white, glazed, edged, printed, painted, dipped or cream colored, composed of earthy or mineral substances, and not otherwise provided for.... 40 per ct.
Earthenware, brown.... 25 per ct.
Do., enamelled, white per lb.... 3 cts.
Engravings.... 25 per ct.
Ethers of all kinds, not otherwise provided for, fluid, per lb.... $1
Etherial preparations or extracts, fluid, per lb.... $1
Filberts, per lb.... 3 cts.
Feathers, ostrich, vulture, cock, and other ornamental feathers, crude or not dressed, colored or manufactured 25 per ct.
Do., when dressed, colored or manuf... 50 per ct.
Files, &c., see "steel."
Finishing powder.... 20 per ct.
Fire crackers, per box of 40 packs, not exceeding 80 to each pack, and in the same proportion for any greater number.... $1
Flannels, uncolored, value 30 cents or less per sq. yard, per lb..24 cts. and 30 per ct.
Do., value above 30 cents per sq. yard, and all flannels, colored, printed or plaided, not otherwise provided for, and flannels composed in part of cotton, per lb....24 cts. and 35 per ct.
Do., composed in part of silk.... 50 per ct.
Flax thread.... 40 per ct.
Flax yarn for carpet, same as linen yarn.
Flocks, per lb.... 3 cts.
French green.... 30 per ct.
Fruits, preserved in their own juice... 25 per ct.
Fruit juice.... 25 per ct.
Fuller's earth, per ton.... $3
Furs, hatters', not on the skin, & dressed furs on the skin.... 20 per ct.
Do., do., on the skin undressed.... 10 per ct.
Fusel oil, or amylic alcohol, per gallon. $2
Gallic acid, per lb.... $1 50
Galvanized iron or tin plate, per lb.... 2½ cts.
Gas retorts.... 25 per ct.
Gems, not set.... 10 per ct.
German silver, articles of, or of which German silver is a component.... 40 per ct.
Ginger, preserved or pickled.... 50 per ct.
Glass, cylinder and crown, polished, not exceeding 10 by 15 inches sq., per sq. foot.... 2½ cts.
Do., above that, and not exceeding 16 by 24 inches sq., per sq. foot.... 4 cts.
Do., above that, and not exceeding 24 by 30 inches sq., per sq. foot.... 6 cts.
Do., above that, and not exceeding 24 by 60 inches per sq. foot.... 20 cts.
Do., all above that, per sq. foot.... 40 cts.
Glass—On all unpolished cylinder, crown and common window glass, not exceeding 10 by 15 inches sq., per lb.. 1½ ct.
Do., above that, and not exceeding 16 by 24 inches sq., per lb.... 2 cts.
Do., above that, and not exceeding 24 by 30 inches sq., per lb.... 2½ cts.
Do., all above that, per lb.... 3 cts.
Do., on fluted, rolled, or rough plate glass, not including crown, cylinder, or common window glass, not exceeding 10 by 15 inches sq., per 100 sq. feet.... 75 cts.
Do., above that, and not exceeding 16 by 24 inches sq., per sq. foot.... 1 ct.
Do., above that, and not exceeding 24 by 30 inches sq., per sq. foot.... 1½ ct.
Do., all above that, per sq. foot.... 2 cts.
Provided, that all fluted, rolled, or rough plate glass, weighing over 100 pounds per 100 square feet, shall pay an additional duty on the excess at the same rates herein imposed.
Do., on all cast polished plate glass, unsilvered, not exceeding 10 by 15 inches sq., per sq. foot.... 3 cts.
Do., above that, and not exceeding 16 by 24 inches sq., per sq. foot.... 5 cts.
Do., above that, and not exceeding 24 by 30 inches sq., per sq. foot.... 8 cts.
Do., above that, and not exceeding 24 by 60 inches sq., per sq. foot.... 25 cts.
Do., all above that, per sq. foot.... 50 cts.
Do., on all cast polished plate glass, silvered or looking glass plates, not exceeding 10 by 15 inches sq., per sq. foot.... 4 cts.
Do., above that, and not exceeding 16 by 24 inches sq., per sq. foot.... 6 cts.
Do., above that, and not exceeding 24 by 30 inches sq., per sq. foot.... 10 cts.
Do., above that, and not exceeding 24 by 60 inches sq., per sq. foot.... 35 cts.
Do., all above that, per sq. foot.... 60 cts.
Provided, that no looking glass plate or glass plate, silvered, when framed, shall pay a less rate of duty than that imposed upon similar glass of like description not framed, but shall be liable to pay in addition thereto 35 per centum ad valorem upon such frames.
Do., Bohemian crystals for water paintings on glass or glasses, pebbles for spectacles, and all manufactures of, or of which glass shall be a component material, not otherwise provided for.... 40 per ct.
Do., bottles or jars filled with sweetmeats, preserves, &c.... 40 per ct.
Glass, plain and mould and press, not cut, engraved or painted.... 35 per ct.
Do., all articles of cut, engraved, painted, colored, printed, stained, silvered or gilded, not including plate glass silvered or looking glass plates.... 40 per ct.
Gloves, kid or other leather.... 50 per ct.
Gold, articles of, not otherwise provided for, or of which gold is a component 40 per ct.
Gold size and patent size.... 20 per ct.
Grass cloth.... 30 per ct.
Gunny cloth, gunny bags, valued at 10 cents or less per sq. yard, per lb.... 3 cts.
Do., over 10 cents, per sq. yard per lb. 4 cts.
Gunpowder and all explosive substances used for mining, blasting, artillery or sporting purposes, when valued at 20 cents or less per lb., per lb 6 cts. and 20 per ct.
Do., valued above 20 cents per lb., per lb....10 cts. and 20 per ct.
Gutta percha, manufactured.... 40 per ct.
Hassocks, see carpets.
Hats, woollen, per lb.....24 cts. and 35 per ct.
Hemp, all manufactures of, not otherwise provided for.... 30 per ct.
Hemp yarns, per lb.... 5 cts.
Honey, per gallon.... 20 cts.
Hoffman's anodyne, per lb.... 50 cts.
Hogs hair, per lb.... 1 ct.
Hosiery of wool, per lb....20 cts. and 30 per ct.
Illuminating oil, refined or produced from the distillation of coal, asphaltum, shale, peat, petroleum, or rock oil or other bituminous substances used for like purposes, per gallon... 30 cts.
Indian red.... 25 per ct.
Iron, band, scroll and hoop, from ½ to 6 inches in width, not thinner than ⅛ of an inch, per lb.... 1¼ ct.
Do., do., from ½ to 6 inches wide, under ⅛ of an inch in thickness, and not thinner than No. 20 wire gauge, pr lb. 1½ ct.
Do,. do., thinner than No. 20 wire gauge, per lb.... 1¾ ct.
Do., slit rods, per lb.... 1½ ct.
Do., all other descriptions of rolled or hammered not otherwise provided for, per lb.... 1¼ ct.
Do., locomotive tire, or parts thereof, per lb.... 3 cts.
Do., mill irons, and mill cranks of wrought iron, and wrought iron for ships, steam engines and locomotives, or parts thereof, weighing each 25 lbs. or more, per lb.... 2 cts.
Do., anvils, per lb.... 2½ cts.
Do., cables or cable chains, or parts, per lb.... 2½ cts.
Do., bar, rolled or hammered, comprising flats, not less than 1 inch or more than 6 inches wide, nor less than ⅜ of an inch or more than 2 inches thick, per lb.... 1 ct.
Do., rounds, not less than ¾ of an inch nor more than 2 inches in diameter, per lb.... 1 ct.
Do., squares, not less than ¾ of an inch nor more than 2 inches square, per lb. 1 ct.
Do., bar, rolled or hammered, comprising flats less than ¾ of an inch or more than 2 inches thick or less than 1 inch or more than 6 inches wide, per lb.... 1½ ct.
Do., rounds, less than ¾ of an inch or more than 2 inches in diameter, pr lb. 1½ ct.
Do., squares, less than ¾ of an inch or more than 2 inches sq., per lb.... 1½ ct.
Do., all in slabs, blooms, loops, or other forms, less finished than iron in bars, and more advanced than pig iron, except castings, shall be rated as iron in bars.
Iron—None of the above shall pay less than.... 35 per ct.
Do., imported in bars, for railroads and inclined planes, made to patterns and fitted to be laid down on such roads or planes without further manufacture, per 100 lbs.... 60 cts.
Do., boiler and other plate, not less than 3-16th of an inch in thickness, per lb. 1 ct.

Do., bright, coppered or tinned, drawn and finished, not more than ¼ of an inch in diameter, not less than No. 16 wire gauge, per 100 lbs....$2 and 15 per ct.

OFFICE OF THE ILLINOIS CENTRAL RAILROAD CO., NEW YORK, June 14, 1864

IN ACCORDANCE with a resolution of the Board of Directors of the Illinois Central Railroad Company, notice is hereby given to the holders of the canceled bonds scrip to present their certificates at the office of the Company, No. 21 Nassau-st., for conversion into the scrip stock of the company. L. A. CATLIN, Secretary.

BARD'S PATENT
Incrustation Preventer,
AND REMOVER
FOR STEAM BOILERS,

In either Salt or Fresh Water. No invention connected with Steam Power combines so many advantages as this. The economy in fuel alone, from its use, repays the cost of the preventive. Certificates from Engineers and owners of Steam Boilers, at sea and on shore, can be seen at the office of

JAS. F. LEVIN,
23 Central Wharf, Boston.

MERRITT & WALCOTT, 60 Courtlandt Street, New York. 29 Front Levee, New Orleans.

OFFICE OF THE PITTSBURG, FORT WAYNE AND CHICAGO RAILWAY CO., PITTSBURG, July 14, 1864.

DIVIDEND.—The Board of Directors of this Company, at a meeting held this day, adopted the following preamble and resolution:

Whereas, The half yearly interest or dividend on the 2d mortgage bonds of this Company accrued on the 1st day of July inst., but not payable by the terms of contract until the 1st day of October next, and

Whereas, The net earnings of the Railway and the financial condition of the Company fully justifies the declaration and payment of a half yearly dividend on these bonds at the same time with the dividend on the Capital Stock, therefore,

Resolved, That a dividend of THREE AND ONE-HALF PER CENT. be declared on said Third Mortgage Bonds for the half-year ending June 30, ult., the same to be paid on and after the 5th day of August next, at the office of Winslow, Lanier & Co., 52 Wall street, New York, to the persons registered as holders thereof at 2 o'clock P. M. on the 20th day of July inst. The Transfer Books of the Company for said bonds to be closed on that day, and remain closed until the 5th day of August thereafter. *Provided*, That such payment in advance of that which is called for by the contract shall not be taken as a precedent for the future action of the Company.

By order of the Board,
W. H. BARNES, Secretary.

OFFICE OF THE ILLINOIS CENTRAL RAILROAD CO., NEW YORK, June 14, 1864.

DIVIDEND NOTICE.—The Board of Directors of the Illinois Central Railroad Company have this day declared a DIVIDEND OF FOUR PER CENT. free from Government tax, on the stock and canceled bonds scrip of the company, payable on the 1st of August next, to parties whose names are registered as the holders on the books of the company at the close of business on the 15th day of July next, and that the transfer books close of that day and open on the 2d day of August

CAST STEEL.

MANUFACTURED BY

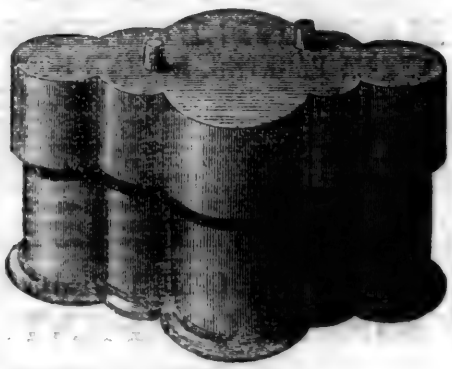
NAYLOR, VICKERS & CO., SHEFFIELD, ENGLAND.

CAST STEEL TYRES WITHOUT WELD,

Reversible Crossings and Frogs, Disc Wheels, Pistons and Piston Rods without weld, Crank and Straight

AXLES, AND EVERY DESCRIPTION OF STEEL FOR RAILWAY PURPOSES.

STEEL CROSSINGS have been in use more than three years with very little perceptible wear, in places where the ordinary ones had to be replaced every four months. They have been estimated to be good for ten years in the worst places.



THE "VICKERS" TYRES are in constant and extensive use on almost all the Railways in Great Britain, and also on many roads in other parts of Europe. Their chief advantages are:—1. Their Durability: they will outlast any Iron Tyre without being turned, and for this reason are cheaper than Iron Tyres (free of cost). 2. Their Safety: being without a weld they are not liable to break, and Steel is proved to be a stronger and tougher metal than any other. 3. Their Uniformity: they do not wear in flat places nor "laminate." 4. They are not injuriously affected by frost, and are guaranteed to stand the severest climate.

STEEL AXLES will be found economical, because they may with safety be made much lighter than those of Iron. They will wear longer and "smoother," and will consume much less oil; nor are they liable to granulate from constant use.

For CIRCULARS, GIVING FULL PARTICULARS AND TESTIMONIALS, PRICES, etc., apply to **NAYLOR & CO.,**

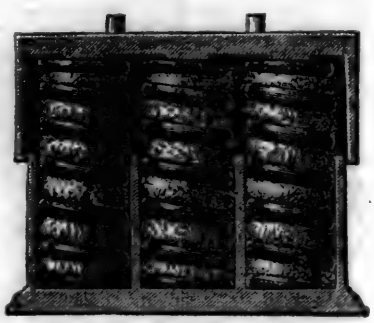
UNION CAR SPRING
MANUFACTURING COMPANY.



Office, 132 Broadway,

MANUFACTORY,

286 and 288 SEVENTH AVENUE,

NEW YORK.

CHARLES BUTLER,
President.

THOMAS BOND,
Treasurer.

JOHN HALDEMAN,
Superintendent.

MANUFACTURED solely by the "UNION CAR SPRING MANUFACTURING COMPANY."

This Spring is made by placing Steel Spiral Springs packed with wool in the inside only, in a casting with cylindrical apertures or cells just large enough to receive the filled spirals, with a cap or cover fitting over and outside the casting.

Size and capacity can be varied so as to give any amount of elasticity, or any amount of carrying capacity.

These Springs have been examined by many of the leading railroad experts of the country and in every instance with unqualified approval.

Springs that were rudely made before our manufactory was in operation are running with a satisfactory success on important roads. A set of Freight Springs imperfectly made and tempered were placed by the Penn. Central under their heaviest Freight Locomotive tender on the mountain division of their road, and gave entire satisfaction. They placed another set on one of their Freight Cars, which with its load made a total weight of 32,000 pounds and still left a motion of half an inch.

Most Railroad experts agree in the opinion that they have no spring which meets their wants. One spring which has great softness, has almost as much lateral motion as vertical; is rigid in cold weather, and short lived. Another spring which has life, has so much rigidity as to wear the roadway and rolling stock as much or even more than the twisting which follows the combination of an excessive lateral and vertical motion. Springs of other combinations must be made rigid in order to preserve their component parts.

We believe we have succeeded in avoiding these objections and can offer a spring, which while it is elastic, will have great range of motion, with a direct vertical action, and durability.

Wool is one of the most indestructible of elastic substances, and has an elasticity which cannot be entirely exhausted with any weight which can be placed on a car, and yet, the back-bone of the Spring is the Steel Spirals.

The impossibility of exhausting with any usual load the column of wool in the spiral, prevents the Spirals coming home, and bringing steel against steel, which by causing crystallization, destroys the steel. The wool is packed in the coils by a powerful press, or it would be of no service.

Our springs are light in weight and easy of adaptation, as they can be placed where any other spring can be placed, and besides, they have that which is only acquired elsewhere by placing two or more springs together, viz: breadth of base.

We ask, when it is possible, an inspection of our works, as we feel convinced that an examination there will prove the superior merit of our Springs, and the perfection of our process.

We ask that you shall order one set, at least, and judge for yourself by personal test, and if you have bolsters under your tenders, make the test there, as it is the most severe.

The excellence of our Spring, its ease of adaptation, its meeting the great want expressed by railroad men that their freight cars should be carried by elastic springs both to save roadway, rolling stock, and *to carry freight in every good order as it can be carried by water*, together with the *saving* in motive power by drawing a *lively* load instead of a *dead* load, will commend our Spring to your attention.

American Railroad Journal.

New York, Saturday, August 6, 1864.

Morris and Essex Railroad.

At the recent annual meeting of this company the following officers were elected: President, John F. Voorhees; Vice-Presidents, Peter Smith, David V. C. Grate, Charles S. Macknet, William W. Shippen; Secretary, William Vanderpool.

Two semi-annual dividends, three and a half per cent each, were paid during last year, in cash, amounting to $81,046. The financial statement for the year ending December 31, 1863, is as follows: Capital stock, $1,157,800; funded debt, $340,000; floating debt, $87,079 84; contingent fund, $264,746; total, $1,849,625 84.

The receipts from passengers were $175,087 11; from freight, $101,286 75; from Hoboken Land and Improvement Company, $9,217 70; from mails, rent and sundries $8,266 13; total $293,857 69. The operating expenses are $52,619 52, and the construction and equipment expenses $120,033 88.

Atlantic and Great Western Railway.

The important work, known under the above title, demands more than an ordinary notice. The first annual report of the companies conjointly engaged in its prosecution furnishes ample material for such a purpose, and from this we shall draw such information as may be pertinent to the subject in hand.

The Atlantic and Great Western Railway is composed of three distinct companies, incorporated severally under the laws of the States of New York, Pennsylvania and Ohio, viz: The New York Co. in May, 1859; the Penn. Co., in June 1857, and the Ohio Co. in June 1851. These corporations, while retaining their local organizations, however, have placed the control of the operating of the entire line under a central board of management, composed of two directors from each of the companies, and the engineer-in-chief. Thus many of the advantages and economies of a consolidation are attained, while to each company are secured its individual rights and profits.

The lines of the several companies are:

The At. & Gt. W. R. R. in New York.	48¼ miles.
The At. & Gt. W. R. R. in Penn.....	92¼ "
The At. & Gt. W. R. R. in Ohio.....	246 "
Total length of the conjoint lines...	387 "

The line extends from Salamanca, the point of connection with the Erie Railway, 415 miles west of New York, and stretches west and south-west to Dayton Ohio. From the latter city the Cincinnati, Hamilton and Dayton Railroad Company, in compliance with a contract made, has laid an extra rail on its line to Cincinnati, so as to furnish a track of the same gauge as the Atlantic and Great Western and connect it with the Ohio and Mississippi Railroad, thus affording an unbroken gauge of six feet from the city of New York to the city of St. Louis a distance of 1,202 miles.

In addition to the main line the Pennsylvania Company is constructing, and has partly completed its Eastern Coal Fields Branch and Extension from near Meadville to Oil City a distance of thirty-three miles.

And the companies in their conjoint capacity have constructed their Cleveland Branch from Leavittsburg to Lake Erie, 50 miles; and have leased for a term of 99 years from the 1st October 1863, the road of the Cleveland and Mahoning Railroad Company, 67 miles, with its Hubbard Branch, 11 miles.

When completed the main line and branches will stand as follows:

Main Line.....387	miles.
Eastern Coal Fields Branch—33.	
Western Coal Fields Branch 11—..... 44	"
Cleveland Branch..... 50	"
Mahoning Railroad (leased)..... 78	"
Making a total of.....559	"

The progress of the work has undergone numerous mutations. A very considerable amount of work was done in Ohio by Henry Doolittle, contractor, between the years 1853 and 1857. During the same years the Erie and New York City Railroad Company, expended some $300,000 on the construction of their line in New York, which work was by legislative authority, purchased by the Atlantic and Great Western Railway Company in New York.

Owing to the adverse condition of the times the work was suspended in the states of Pennsylvania and New York, until the Spring of 1859, when it was resumed in Pennsylvania; and in May 1860, when it was re-commenced in New York under contract made with Henry Doolittle, and W. S. Streator.

Under these contracts the New York division, and eleven miles of the road in Pennsylvania were in a great measure finished; when owing to the death of Mr. Doolittle, the surviving partner was released by the companies from the obligations of the contracts, and the Pennsylvania and Ohio divisions, re-contracted to James McHenry, Esq., of London, by whom the work has been carried forward with steady and persevering energy, until now a valuable commerce makes the line from the Mississippi to the Hudson the carrier of its rich and increasing freight and passenger business. To the indomitable will and determined effort of this gentleman, under the most adverse circumstances, as also to his remarkable financial talent, is the enterprise indebted for its success.

To appreciate the labors which the work imposed, it must be borne in mind that during its ealier stages it was prosecuted in the face of great financial embarrassments in this country, when American enterprises were generally in discredit abroad; and during the more recent period amid all the commotion of the gigantic rebellion owing to which labor has been difficult to obtain, and wages and materials have been greatly enhanced in price. Great praise must also be awarded to T. W. Kennard, Esq., engineer-in-chief, for the energetic prosecution of the work itself and for its final consummation.

The first report of the companies brings affairs down to the 31 December 1863, at which time 356 miles of railroad had been brought into operation.

The following is the record:

	miles.
1860, Sept. 15, opened from Salamanca to Jamestown	33
1861, May 27, opened from Jamest'wn to Corry	27
(Work suspended until May 1862.)	
1862, Nov. 10, opened from Corry to Meadville	41
1863, Jan. 1, opened from Meadville to Warren	59
" Mar. opened from Warren to Ravenna	24
" June 1, opened from Ravenna to Franklin	25
" July 1, opened from Franklin to Akron	16
" Nov. 10, opened from Leavittsburg to Cleveland	50
" Dec. 31, opened from Akron to Galion	81
Total Dec. 31, 1863	356
Mahoning Railroad and Branch leased	78
Total miles operated Dec. 31, 1863	434

The remaining portion of the line from Galion to Dayton was completed in July 1864, and about the same time the extra rail on the Cincinnati, Hamilton and Dayton line was laid down.

The main line has been ballasted through nearly its whole length and is in good running order. Considerable however has yet to be done at the western division between Galion and Dayton.

Commodious permanent structures have been built at Salamanca, Mill Village, Cleveland and Meadville. At the last two mentioned places dining arrangements have been perfected; and at Meadville has been built a first class hotel for the accommodation of those who wish to rest on the route.

At all other points convenient structures have been built, sufficient in most cases for the business of the road and comfort of passengers, until the same can be replaced by permanent buildings from the earnings of the several roads.

Repair shops have been built at Corry, as also temporary shops at Meadville for use until the completion of large and permanent structures now in process of construction at Meadville and Franklin Mills.

The Rolling Stock owned by the three companies on the 31 December 1863, consisted of 74 locomotives, 19 first class passenger cars, 14 baggage and mail cars and 1,370 freight cars—apportion among the several corporations as follows:

	—At. & Gt. W. R.R.— N. York.	Penna.	Ohio.	Mah. Div.
Locomotives	8	28	21	16
Passenger cars	6	4	3	7
Baggage and mail cars	2	2	3	7
Freight cars	140	406	414	410

All the stock upon the line is of superior quality, and so far as practicable of uniform pattern. Owing to the difficulty in contracting for engines and cars, arrangements had been made for the lease of the Jersey City Locomotive Works for the building of 100 engines, a large part of which it was anticipated would be placed upon the line before the close of the year 1864. It was also expected that within the same period the companies would own 2,500 freight cars from contracts made, and including those which should be built in their own shops.

The traffic of the railway line for the year ending 31 December 1863, was principally of local character. The Cleveland Branch indeed was scarcely finished at the close of the year, and no connection had been made at the western end of the line. The earnings therefore have been derived chiefly from local services. The earnings and expenses were as follows:

	Gross Earn'gs.	Expenses.	Profit.
New York Div. (year)	$339,222 67	$166,179 87	$173,042 80
Penna. Div. (8 mos.)	417,340 76	129,303 47	148,037 29
East'n C. R. Br. (3 mos.)	42,874 28	19,625 50	23,249 78
Ohio Div. (3 mos.)	184,599 68	75,671 91	78,927 97
Cleveland Br. (2 mos.)	26,173 50	12,736 64	13,457 86
Mahoning Div. (3 mos.)	142,374 37	58,891 51	83,482 86
Total	$1,012,585 50	$460,408 00	$553,177 56

The number of passengers carried on the whole line was 216,234, and the receipts therefrom as follows:

	Eastward.	Westward.	Total.
Through passengers.	13,181	13,458	26,639
Way "	92,737	96,848	189,585
Total "	105,918	110,303	216,224
Passenger receipts	$98,885	$106,009	$204,894

—which does not include passengers carried on account of contractors, and which are also excluded from previous statement of earnings.

The tonnage of freight carried over the road was as follows:

Classes.	Eastward.	Westward.	Total.
Prod'ts of forest	12,226 51	20,445 27	32,671 78
" animals	42,066 05	1,381 15	43,447 20
Vegetable food	39,082 68	4,302 39	43,385 07
Other agricult'ral products	1,626 09	1,954 19	3,580 28
Manufactures	99,410 27	67,817 30	167,227 57
Merchandize	8,703 53	24,579 75	33,283 28
Other articles	23,220 27	32,272 46	55,492 73
Petroleum	82,062 05	8,644 71	90,706 76
Total tonnage	308,397 45	161,397 22	469,794 67

The total number of miles run by freight trains was	196,471
The total number of miles run by passenger trains was	131,521
Total miles run	327,992
The average earnings per mile run were	$2.65 31
" expenses " "	1.31 26
Net profit per mile run	$1.34 05

The number of barrels of petroleum carried was 533,487, of which 482,628 were carried to the East, and 50,859 to the West. The stations from which shipped, and the number of barrels from each were as follows:

Stations.	Barrels.	Stations.	Barrels.
Jamestown	4,048	Shaw's landing	2,022
Ashville	581	Utica	3,229
Columbus	4,715	Franklin	115,032
Corry	385,229	Baconsburg	1,088
Union	4,382	Warren	123
Cambridge	253	Leavittsburg	104
Meadville	12,598	Cleveland	83

Taking into consideration the newness and incompleteness of the road; its limited amount of rolling stock, and its insufficient arrangements for interchange of business with other roads, the result of the year's operation cannot be viewed as otherwise than satisfactory. It is not unreasonable to assume therefore that where an unfinished road will earn sufficient in its first year to pay its way so far as general expenses and interest are concerned, that the same road with its connections complete and itself in good running order will earn a revenue beyond the demands for operating and the payment of interest, and be enabled to divide largely upon its stock. This the Atlantic and Great Western Railway will certainly do as soon as completed. For some short period, however, all surplus revenue will have to be used in construction and improvements, which will in the end enure to the real benefit of stockholders.

The local traffic which has thus proven so remunerative will probably equal that of any other line of equal extent in the United States.

Through its entire length the road traverses a country of great agricultural wealth, and its branches extend into the most valuable mineral regions south of the lakes, abounding in coal of superior quality, (for smelting and manufacture of iron,) iron ore, limestone, cement and fire-clay.

Its numerous connections with other railroads, open outlets for its local trade to every portion of the country. The Philadelphia and Erie, the Erie and Pittsburg, the Cleveland and Pittsburg, and the Pittsburg, Fort Wayne and Chicago Railroads afford direct communication with Philadelphia, Pittsburg, and Chicago, while its terminal connections at Salamanca, Cleveland and Dayton offer it the business of the seaboard at New York, the commerce of the lakes and the traffic of the valley of the Mississippi.

To fully appreciate the value of the future local trade of the line it is necessary to refer more particularly to its sources of supply. The main line, as stated, traverses a most fertile extent of country, affording a large transportation of agricultural and dairy products, and from which is drawn a large part of the supply of live stock for the eastern markets.

Its branches and connecting roads give, in addition to the traffic incident to agriculture, a large export of lumber, coal, iron, and other minerals.

The Oil Creek Railroad extends from Corry to the northern centre of the oil-producing district upon Oil Creek. This road, although not owned by the Atlantic and Great Western Companies, is nevertheless built of uniform gauge, and will, from the nature of location, be a source of permanent and valuable traffic. The Eastern Coal Fields Branch and Extension now completed to Franklin and being extended to Oil City, the southern centre of the oil district, will control the transportation of the petroleum produced on French Creek and the Alleghany River, in addition to its share of the Oil Creek product. For the more convenient transportation of the oil from the wells to the railroad, the Oil Creek Railroad Company, and the Atlantic and Great Western Railroad Companies are laying between the termini of their roads, iron pipes through which the petroleum will be forced from the tanks at the wells to the railroad termini by powerful steam pumps. It is estimated that by this means, if necessary, 10,000 barrels a day can be delivered to the roads at a cost greatly less than by the present means, thus reducing the cost of the petroleum to the consumer, and preventing the fluctuations in the amount transported from the effect of the seasons on the wagon roads. Although during the past year the Atlantic and Great Western Railway has carried the vast amount of 533,487 barrels, it has not transported one-third of the product of this wonderful region. Its limited number of cars has rendered it impossible to prevent a large accumulation at the wells, which has found its outlet by the Alleghany River from time to time when swollen by rains. The yield of the year 1864 will be greatly in excess of 1863, and it is expected that additional rolling stock will give a largely increased revenue from this traffic.

The Mahoning Division extending from Cleveland to Youngstown and Hubbard, developes a district abounding in coal of a superior quality

for the manufacture of iron. The coal is not only superior to any brought to the Cleveland market, but has a great advantage in proximity to the lake. Its adaptation for the manufacture of iron in its raw state, without coking, has induced the establishment of furnaces and iron mills throughout the district, which promises to become, at no distant time, the iron manufacturing centre of the country. The iron ore from Lake Superior even now affords a most valuable return freight from the lake. The average tonnage of coal and ore for 1860, -'61, -'62, was: coal 186,738 tons; ore, 52,462 tons, and iron for 1862, 25,024 tons. The earnings in 1862 were $375,209, and in 1863, $511,847.

A careful investigation shows that the present supply of coal for the lake commerce, (did the road possess the means of transportation,) would be more than 1,700 tons a day, or at the rate of 500,00 tons for the year. The ore required for iron manufacture will not fall short of 100,000 tons.

It is impossible almost to estimate the value and extent of this traffic which seems to be limited only by the means of transportation, and will without doubt keep pace with the most energetic measures for its development. Now in its infancy it foreshadows its future immensity. The Western Coal Field Branch will within the year 1864, connect the Pennsylvania Division with the Hubbard Branch and thus open up the coal lands of the Shenango, (which have hitherto sent their products to Erie,) to the Cleveland market, as also to the local demands on the Pennsylvania and New York, and the Oil Creek Railroads. A line has been located southward from the Mahoning Railroad through the lands of the Ohio Coal Company comprising, 22,000 acres of most valuable mineral territory, and also in Pennsylvania through the lands of the Mercer Coal Company, comprising over 47,000 acres of the most valuable coal lands of the western part of the State. It is evident that the vast resources of this region will yield to the line a lucrative and constantly increasing traffic for generations to come.

The demand for coal for steamers on the lakes, for railroad and manufacturing purposes, and for the supply of the cities and towns which encircle the lakes from each of which radiate railroad arteries into the interior, must far surpass all anticipations.

Thus far the success of the enterprise has been all that could have been anticipated by the most sanguine of its friends, yet its business has been very much limited by its insufficient accommodations and deficiency of rolling stock—obstacles which the year 1864 will in a great measure remove.

Its prosperity indeed must be a cause of congratulation to all who have contributed towards its construction. The additional elements of future valuable traffic not taken into estimate by its projectors—of petroleum, coal and iron—already so largely developed, leave no doubt that its vast local traffic as well as through business will prove most remunerative to the shareholders.

The following tabular statements exhibit in so far as practicable the business of the line, both in the aggregate and in the detail, and present likewise a general view of the condition of the capital account at the end of the year.

Statement of the Business of the Railroad.

	New York Division.	Penna. Division.	Eastern Coal Fields Br.	Ohio Division.	Cleveland Branch.	Mahoning Division.	Total of all lines.

The officers of the companies for 1864 are as follows:

CENTRAL BOARD—Wm. Reynolds, John Dick, J. J. Shylock, (Meadville, Pa.,) Marvin Kent, (Franklin Mills, O.,) W. S. Streator, (Cleveland, O.,) and H. F. Allen, (Jamestown, N. Y.) *Chairman:* Wm. Reynolds; *Sec. and Treas.:* J. M. Dick; and *Auditor:* J. C. Calhoun. Office—Meadville, Pa.

NEW YORK DIVISION—Wm. Reynolds, President, (Meadville, Pa.,) and W. A. Bradshaw, Secretary and Treasurer, (Jamestown, N. Y.) Office—Jamestown, N. Y.

PENNSYLVANIA DIVISION—Wm. Reynolds, President, (Meadville, Pa.;) T. W. Kennard, Vice President, (New York City;) and Wm. Thorp, Secretary and Treasurer, (Meadville, Pa.) Office—Meadville, Pa.

OHIO DIVISION—Marvin Kent, President, (Franklin Mills, O.; Joel W. Tyler, Secretary, (Warren, O.,) and W. H. Grout, Assistant Secretary. Office—Franklin Mills, Ohio.

Bombay, Baroda and Central India R. W.

The 17th half yearly general meeting of this company was held on the 17th of June, in London, Col. P. T. French, presiding. The lines of road constructing by the Company commence at Bombay, of which we have on a former occasion spoken sufficiently. Baroda is another of those great East India cities with more than a hundred thousand inhabitants, the capital of a Mahratta chieftain who divides or at least a few years ago divided, with the British Government, the largest portion of Guzzerat. The present Northern terminus is at Ahmedabad, on the river Saburmutte, the line passing through Baroda.

The company has applied for sanction to a short extension from their present northern terminus at Ahmedabad, for a distance of about 2½ miles to the other side of the Saburmuttee river to be made with guaranteed capital. This is important as being the key of the country beyond in the direction of Deesa. Surveys have been made of the line to Deesa, of short branches from this Company's main line to Pitlaud. Dakore, and Veerumgaum, and also from Baroda to Neemuch, in addition to the line to Indore. When these shall have been received, together with the terms the Government will be prepared to concede to such undertakings, the Directors will take the necessary steps for bringing them before the Proprietors and the public. As stated in former reports, these extensions will have to be made with a capital entirely distinct from that of the existing Company.

By recent advices from India it appears that a further expenditure for sidings, station buildings, and other works and appurtenances on the line from Ahmedabad to Bolsar, and from Bolsar to Grant-road, to the extent of about £400,000, will be required, irrespective of the completion to Colaba, the Bombay terminus works, and the permanent workshops and storehouses of the Company.

While it appears from the report that 185¼ miles are open for traffic yet there is still a limit of 125 miles to be fully completed before Bombay, the southern terminus and chief port is connected with the part which is finished; and though no addition has been made to the open line during the half year ending the 31st of December last, the traffic has increased as appears from the following figures:

Comparing the half-years ending the 31st Decembe, 1862 and 1863, the following results are shown:

	Average mileage of open line.	Train miles run.	Gross Receipts. From pass., &c.	From Merch. live stock, &c.	Total.
1863	185¼	95,965¼	£37,239	£25,293	£62,532
1862	153¼	61,871¼	25,310	14,265	39,575
Increase.	32	34,094¼	11,929	11,028	22,957

This increase is equal to £79 9s, 2d. per railway mile, of which £35 19s. 2d. is due to passengers, and £43 10s. to goods. The comparison is as follows:

Rec'pts pr. R.W. mile:	Pass. £ s. d.	Goods. £ s. d.	Total. £ s. d.
1863	201 0 5	136 10 8	337 11 1
1862	165 1 8	93 0 8	258 1 11
Increase..	35 19 2	43 10 0	79 9 2

The result per train mile, is not materially altered, being 13s. 0.38d. to December, 1863, and 12s. 9.51d. to December 1862. The following statement shows the number of passengers and weight of merchandise carried in the two half-years respectively:

	Dec. 31, 1862. No.	Dec. 31, 1863. No.	Increase. No.
Passengers:			
1st class	1,025	1,770	745
2d	5,043	6,716	1,673
3d	402,656	436,961	34,305
Total	408,624	445,447	35,723
Merchandise:	Tons.	Tons.	Tons.
Public	17,636	36,810	19,174
Raily. materials	11,449	42,638	1,189
Total	29,089	49,448	30,363

The Directors think it may be interesting to the Proprietors to institute a similar comparison between the receipts for the years 1862 and 1863. They can thus mark the growth of the traffic over a longer period. The following is the result shown by such a comparison:

	Average mileage of open line.	Train miles run.	Gross Receipts. From pass., &c. £	From merchandise, &c. £	Total. £
1863	184¼	199,975¼	75,026	50,859	125,885
1862	142¼	117,296¼	43,019	21,764	64,783
Inc.	41¼	82,679	32,007	29,095	61,102

It thus appears that although the addition to the open line was only 41¼ miles, the traffic receipts are very nearly doubled. The increase is equal to £229 8s. 2d. per railway mile, which was contributed by passengers and goods traffic in the following amounts, viz., £105 16s 9d. and £123 11s. 5d. respectively, as shown in the subjoined table:

Gross receipts per railway mile:

Yr. ending Dec. 31.	From passengers.	From goods.	Total.
1863	407 3 11	276 0 8	683 4 7
1862	301 7 2	152 9 3	458 16 5
Increase.	105 16 9	123 11 5	229 8 2

The receipts per train mile were—In the year 1863 12s. 7.08d., do. 1862 11s. 0.55d., increase 1s. 6.53d. The number of passengers and weight of goods carried in the years 1862 and 1863, were as follows:

Passengers.	1862.	1863.	Increase.
1st class	2,062	3,458	1,396
2d class	10,759	13,458	2,699
3d class	820,704	837,877	17,173
Total	833,525	854,793	21,268
Merchandise:	Tons.	Tons.	Tons.
Public	29,171	74,595	45,424
R. W. materials	25,827	24,574	Less 1,253
Total	54,998	90,169	44,171

The working expenses during the half years ending Dec. 31, 1862 and 1863, have been as follows:

Working expenses.	Per ct. on Dec. 31, 1.62. Amnt. recpts.	Per ct. on Dec. 31, 1863. Amnt. recps.
Locomotive charges	7,407 18.72	10,459 17.72
Coach'g & merch. chgs.	3,305 8.35	4,668 7.46
Maintnce. of perm. way	3,993 10.09	8,818 17.11
General expenses	2,610 6.59	4,613 7.38
	£17,316 43.75	£28,558 45.67

The net revenue for the half year ending 31st Dec. last, was £33,974 which compared with the previous half-year to same date, viz. £22,259, shows an increase of £11,715, or £38 4s. 7d. per mile of open line. The rolling stock is generally in a satisfactory condition, but in consideration of the additional traffic to be expected when the line is completed to Bombay, ten additional engines are contracted for to be delivered in the months of November and December next, and further additions are expected to become necessary not only of engines but cars and wagons. By arrangement with the Government the existing rates for third class passengers is to be continued, of a half-penny or one cent per mile.

The total amount received on capital account up to 31st December last, was £4,435,785 10 of which £177,141 10 was paid up the last half-year. The total amount of audited expenditure of capital in England and India, including stores and materials was to the same period, £4,208,626, of which the sum of £587,354 8s. 9d. was expended during the half-year. In addition to this the further amount of £371,160 6s. 10d. was expended on the works in India to the 31st Dec. last, though not yet brought into the account as it has not yet been finally audited by the Government. The original share capital of £500,000 with a government guarantee of 5 per cent has all been taken up, and the Directors have also raised money on inconvertible debentures at 7 years, at the rate of £4. 10s. per cent. per annum, the principal and interest being guaranteed by the Government.

It would appear that while the remaining link to Bombay is not entirely finished, and not yet open to traffic, yet that construction trains have been running over it, and the Governor of Bombay has been actually transported over the whole line, to within 3¼ miles of the southern terminus.

To this report the Chairman added the following general statements:

So far as they had gone it may be considered that their line was now practically open from end to end; at least, so far as the carriage of materials was concerned it had been open since the end of December last; but the length available for traffic had not been increased. In one of the tables they would perceive that with an addition of only forty-one miles in the length of the railway from 1862 to 1863, the gross receipts had doubled. In 1863 the total receipts had been £125,885 on 184¼ miles, while in 1862 it had been only £64,783 on 143 miles, showing an increase of £61,102, or nearly as much again. The gross receipts per railway mile were also very satisfactory, and showed the progress they had made in that respect. The net revenue for the half-year ending December had increased from £22,259 in the corresponding half of 1862 to £33,974 in the past half year. This might be considered correct in the absence of the Government audit. The railway stock numbered 3,102 vehicles. This included forty-eight upper story third-class carriages, which were found very compact and useful.

Any gentleman acquainted with the position of Bombay would see it was of the utmost importance to complete the line to that point, and be able to run their trains to the harbor. The extension mentioned in the report was one of the most important subjects, next after the entrance into Bombay. Those extensions would have to be made either by this Company or by a new. He might mention that in Guzzerat alone and down to Bolsar, the district was capable of employing 1,000 miles of railway before all the traffic of that extensive country could be secured to the railway.

The Chairman called attention to the interest accounts. They would see that the Company had paid out of revenue £90,980 of the sum advanced by the government on interest account up to June, 1863. The whole amount of the government advance in respect of interest was £673,011 to the 31st Dec. 1863, less £90,980 paid to the 30th June, 1863, leaving £582,031, and from which the net revenue for the half-year ending Dec. 31, will have to be deducted when the accounts have been audited by the government auditor. The amount of interest repaid out of profits was from receipts upon 184 miles, while the interest paid was on the whole sum expended on 310 miles, including 125 miles not yet opened for traffic. If they looked at the receipts and expenses per train mile, they would compare favorably with any other line in India. The £90,988 paid off, the interest was 18¼ per cent. of the whole advance.

It appears the Government is constructing country cross roads to connect with the line, and immense amounts of cotton were expected to be transported to it in consequence. The wealthy people along the line were taking great interest in the work, and one native Prince was having railway carriages constructed for his own particular use. There were also 30 miles of double track to be made North from Bombay. One day's delivery of freight would require depots covering seven acres, and for the accumulating freight, stores covering 28 acres; various improvements in the engines and trains had been adopted. The report was deemed highly satisfactory and the usual vote of thanks was passed.

Railroad Earnings--Weekly.

The earnings of the Marietta and Cincinnati Railroad for the 3d week in July:

	1864.	1863.
Passengers	$8,532 02	$2,359 58
Freight	10,042 67	923 60
Mail, express & telegraph	1,189 58	885 00
Total	$19,764 27	$4,168 18
This month to date	$57,869 11	$20,526 17
Total since Jan. 1	$515,272 07	$313,385 20

The earnings of the Racine and Mississippi and Northern Illinois Railroad for the week ending July 21, 1864, were:

	1864.	1863.
Passengers	$2,449 34	$2,105 27
Freight	8,853 41	3,644 94
Express	104 16	75 00
Mails	296 58	296 58
Total	$11,703 49	$6,121 79
Increase		$5,581 70

Receipts from January 1st to July 21:

1864	$306,566 56
1863	187,059 84
Increase	$119,506 72

The traffic of the Great Western Railroad for the week ending July 22, 1864, was as follows:

Passengers	$22,359 09
Freight and live stock	19,771 99
Mails and sundries	1,214 76
Total	$43,345 84
Corresponding week of 1863	39,547 69
Increase	$3,798 15

The earnings of the Grand Trunk Railway for the week ending July 23, 1864, were:

Passengers	$32,817 79
Express freight, mails and sundries	2,500 00
Freight and live stock	56,588 65
Total	$91,906 44
Corresponding week, 1863	74,374 10
Increase	$17,532 34

The earnings of the Milwaukee and Prairie du Chien Railroad for the 3d week in July, 1864, were $31,497 00
Corresponding week of previous year 16,242 00
Increase, 88 per cent $15,255 00

The increase since Jan. 1, 1864, is $396,521—72 per cent.

The earnings of the Chicago and Northwestern Railway for the week ending July 21:

Passengers	$27,388 44
Freight &c.	89,852 58
Total	$117,236 02
Corresponding week of previous year.	59,735 11
Increase, 96½ per cent	$57,500 91

The earnings of the Dubuque and Sioux City Railroad for the third week in July, 1864, were $6,629 87
Corresponding week in 1863 3,787 45
Increase $2,842 42

The earnings of the Chicago and Alton Railroad Company for the week ending July 23, were:

	1864.	1863.
Passengers	$18,601 51	$14,213 38
Freight	36,567 77	28,065 65
Sundries	2,475 20	1,374 61
Total	$57,644 48	$43,653 64
Increase 1864		$13,990 84

The earnings of the Montreal and Champlain Railroad for the week ending July 23, 1864, were $6,164 29
Corresponding week of previous year 5,414 12
Increase $750 17

Finances of Ohio.

From the Report of the Commissioners of the Sinking Fund, we learn that the total funded debt of the State Nov. 15, 1863, was $13,464,809 93

During the six months ending May 15, 1864, there has been redeemed:

Of foreign loan of 1860	$4,000 00	
Of dom'stic loan of 1863	121,930 00	
Of the Union loan of 1866	500 00	
		126,430 00
Outstanding May 15, 1864		$13,338,379 93

The existing funded debt of the State consists of the following loans:

FOREIGN DEBT.

Loan of 1860, 6 per cent. interest	$1,258,279 04
" 1865, 5 " "	1,015,000 00
" 1868, 6 " "	379,866 00
" 1870, 6 " "	2,183,531 93
" 1875, 6 " "	1,600,000 00
" 1881, 6 " "	4,095,309 47
" 1886, 6 " "	2,400,000 00
Total Foreign Debt	$12,931,986 44

DOMESTIC DEBT.

Stock of 1849, not bearing interest	$1,765 00	
National road bonds not bearing interest	60 36	
Miami Extension Canal loan of 1863, not bearing interest	123,855 00	
Union loan of 1866, not bearing interest	1,500 00	
Union loan of 1868, 6 per cent. interest	279,213 13	
		406,398 49
Total debt May 15, 1864		$13,338,379 93

The receipts into the Sinking Fund during the six months ending May 15, 1864, were:

Balance in Treasury, Nov. 15, 1863.	$274,317 61
From taxes—sinking fund	813,686 88
" —war loan fund	203,345 74
From school lands	74,191 34
From surplus revenue	29,489 25
From dividends, assets, etc	18,227 94
Total receipts	$1,413,208 76

And the disbursements were:

For interest on foreign debt	$383,243 15
For interest on domestic debt	6,478 00
For interest on school or trust funds	180,134 40
For interest on Union loan	23,958 83
For redemption of domestic debt	121,930 00
For redemption of Union loan	500 00
For sundry expenses	3,241 94
Total disbursements	$719,486 32
Balance in treasury	$693,722 44
Add balance in New York	21,986 45
Total amount of sinking fund on hand May 15, 1864	$715,708 89

It will be noticed in the redemption report given above, that $121,930 of the Miami Extension Canal Loan of 1863, has been surrendered to the State. The amount yet outstanding upon which interest ceased after May 1, 1864, is $128,155.

☞ The State of Pennsylvania paid its semi-annual interest on Monday, in currency, according to the provisions of an act of the Legislature to that effect.

American Railroad Journal.

Saturday, August 6, 1864.

Stock Exchange and Money Market.

The past week has been one of comparative quiet, the rampant spirit of speculation being checked by the intensely warm weather, and by a new condition of our foreign trade. This has taken an unexpected turn, quite favorable to the country; our exports rapidly increasing to seven and eight millions of dollars per week. Of these, the largest proportions were of our own products, though many foreign goods were re-exported to find a better market. This was commercially equivalent to just so much gold remitted, and exchange fell. So did gold for the same reason. The temporary reverse before Petersburg, however, more efficient in its influence on speculation than commercial laws, took it up again. Gold is no longer money in the real sense of the word. It is a commodity for which some men seem ready to give their country, and their souls if necessary. It does not circulate or exist in quantities sufficient to represent the transactions of a single commercial country of any extent at the present day, and it is shifting its locality every hour, as the fears, the wants, and even the caprices of men determine. It is therefore at present, so far as we are concerned, to be placed on the same footing as precious stones, and treated as such. It will be some time before it will jingle in our pockets as it once did, for all our financial operations are now made from another base.

The sooner we comprehend this fact, the better we shall be able to understand others.

It is the fashion to decry our paper money, we mean that of the Government particularly, in its relations to gold; but this is not correct, as will appear from a single example. If a legal tender dollar could obtain as much of any other article as a gold dollar did before the war, its value would be the same, and in respect to many articles the value of a paper dollar is not indicated by the price of gold. A very familiar example suggests itself at once. There are some articles which remain at a fixed price, and the number of dollars charged for them is very uniform. The ordinary silk hats worn by gentlemen were sold for five dollars, when paper was the same as gold, and the price is but little more now in legal tenders. The hat, then, according to the prevailing notion is really purchased at about one dollar and fifty cents in gold, as the paper dollar is only worth about 30 cents in gold. Does any one suppose that these hats ever were sold for $1 50, or $1 80, or ever will be again, and yet this is all they are worth according to the theory of the day. A large number of other articles which will readily suggest themselves to our readers may thus be reduced to their supposed cost and value in gold which will stand no such computation, and will hereafter cost as much in paper as they do now, at its depreciated value. This shows most clearly that the action of gold is not general even now. Its demand does not now carry up everything with it. Gold bonds, interest and principal payable in that commodity, do not bring in paper what the article itself in hand will produce. So that other considerations than the mere intrinsic character of the metal have their weight in gold transactions. If men would give the subject a little reflection it might save them much of the anxiety they now feel on a very trite subject, though little understood.

The truly great question of the times, is how much money will it cost to finish the war, and restore the Union and the nation to their once commanding position of honor and security. How is this to be raised, and what is the prospect of its repayment? Thus far about seventeen hundred millions of dollars have been expended to keep our territory whole, and our laws in force, and while the area, resources, numbers and money of the rebellious are contracted to a very narrow limit, so narrow that suffocation appears to be as probable a termination of the contest as any other, yet the desperation and suicidal efforts of the enemy will still demand on the part of the loyal States and people further grants of men and money. No such ferocity, no such brigandage, no such disregard for the usages of civilized nations has ever been encountered by a lawful Government as has been by ours. Such self-imposed infuriation, for so little cause was never before recorded in history. A revolt against a peaceful, liberal, tolerant, economical and happy Government, where the revolters actually held the power in their own hands, and had done so for sixty years, where their domestic institutions had in fact been protected even in their most degrading forms for the sake of peace, a revolt so shocking to the common sense and decency of mankind was never before undertaken. It is the question of finance as of patriotism, whether this attempt shall be put down, whether three or four millions of furious and unreasonable men shall destroy the institutions, business, nationality and repose of thirty millions.

This question has so far been answered triumphantly by the people themselves. We will not be destroyed by this rebellion. We will stand by the old flag and constitution. And though it has been our misfortune to have our political and military affairs conducted in so mysterious a manner as often to inspire the doubt of good faith on the part of some of our public men, the people at large have made no mistakes. They have seen right through the emergency, and have given

their aid without stint. That they will continue to do so no one can doubt, for they know the greatness of the inheritance they are defending, as well as the indestructible resources of the country, at their command.

We therefore predict that the calls from the Treasury Department will be met with the usual patriotic promptness. The subscriptions thus far average a million of dollars per day. And it is a great satisfaction to know that no real sacrifice is demanded of the people. They are in reality asked to return to the Government in the shape of a loan a portion of the very large sums which the Government has previously paid out to them. It is not an actual deprivation of one dollar of the capital or property of the people as it existed before the war. It is a call for some portion of the money expended since the war, some seventeen or eighteen hundred millions of dollars now afloat in one form or other. These loans of the Government are therefore no impoverishing drain upon the people, as in other countries they often are, but merely a sweeping up of their loose cash, funding it for them and paying them an interest for it, all referring to and founded on a final specie basis.

While these views operate with full force upon the American mind, we are glad to perceive the sensible view taken of our National securities by the continental capitalists. They, as well as our own people, understand perfectly well, that the cause for which the North is contending is worth all the money it costs, and they know many of them from actual inspection, that a National debt in America is a very different thing from a National debt in Europe. It has a broader base, covers more ground, more industry, a more rapidly increasing population, greater ingenuity, greater amount of education and practical knowledge, more generally diffused wealth, a more resolute and unconquerable spirit, and a greater future, than any Nation of Europe can pretend to.

They see in our decades of progress how enormously swift is our march in all material prosperity. Great, populous, commercial cities are seen to rise in a single brief generation, more prosperous than the majority of those of Europe of twelve centuries standing. They see how our western land pays its cost back to the purchaser every year that he tills it, and he observes that all our railways, canals and lake craft are not sufficient in power of transportation for the demand of production. He perceives that our present population, three millions at the close of the last century, is thirty-four millions now, and the increase of the National wealth 127 per cent. every ten years, and the half never reported to the officers charged with the inquiry.

When intelligent foreigners observe all this, particularly in Germany, Holland, and the free towns where commerce and finance are independent subjects, it is no wonder that our securities are especial favorites, and that orders come in with so much frequency, The American debt is the safest debt in the known world in all respects, and at present prices affords an opportunity to foreign investers, such as they never had before. However, therefore bad feeling, secret combination or bank influence may at present interfere with Mr. Fessenden's designs, he may feel pretty safe with a million a day from the internal revenue tax, and a third of a million a day from the customs, and a good credit for his stocks on the continent.

The arrival of the Secretary in the city has set the usual rumors afloat of his present intentions, with but little foundation for most of them. The subscriptions to the 7-30's are going on steadily and largely. It is reported that the balance of the 6s of 1881 are to be offered, but this is not certain.

In the meantime some of the very wise men who act as commercial editors in this city, and get their inspiration from friendly brokers with whom they occasionally make a hit, advise the Secretary to "buy his money," adding with great wisdom possibly, the sooner the Government adopts the plan the better for all concerned. Indeed! What kind of money do these wiseacres wish the Government to buy. Irredeemable bank paper, for which neither gold, nor legal tenders, nor even nickels can be obtained, bills of banks not known out of the cities and towns where they are made and totally worthless to pay an army or a navy at a few hundred miles distance from the place where they are issued. The Government is recommended to buy money, as this trash of the suspended banks is impudently styled, and pay 6 per ct. for the use of suspended rags, that will not pay a debt, or even taxes.

It is playing on the credulity of the public to talk in this manner, when it is well known that when the Secretary offered to take 50 millions of the Banks, they had no money to lend him, not even the much abused legal tenders, getting scarcer and scarcer every day.

So in the same absurd way other writers dress up their homilies with references to the Continental money, and of French assignats as furnishing illustrations of our own financial arrangements. While paper money inflates as we all know, we also know that funding it and paying interest on it, reduces it again to safe conditions.

Neither Continental money nor French assignets had any basis of commerce, taxation, or regular payment of interest, nor were the resources of their Countries at those periods what they are now. The introduction of steam alone, has made finance a new system in respect to its popular resources, and in short everything has changed monetarily, industrially and politically. It is about time to stop ringing these changes on these old bells which now jangle out of tune. They betray a profound ignorance of historical truths and parallels.

The Banks show a wholesome restriction in their loans, the reduction of the previous week having been as much as five millions. The Deposit line has increased by that amount. Seven per cent. is the ruling rate of interest, for whether paper money is or is not of value, the holders get the highest price they can for the use of it.

Government stocks declined under the rumors we have already alluded to. Railway shares have also a tendency that way, some however fluctuating more than others from special causes.

The balance of gold held by the Banks and the Sub-treasury on the 1st inst. was $31,843,916, being an increase since July 1st of $786,866.

The balance in the Sub-Treasury on the 1st of August was $16,007,880, and the gold and silver coin on hand was $10,798,020.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

Atlantic and Great Western Railway.

At the annual meeting of the Atlantic and Great Western Railway Co. of Ohio, held at Franklin Mills, on the 12th ult., the following gentlemen were elected direcctors: Marvin Kent, Ohio; T. W. Kennard, Samuel Wann, New York; Gaylord Church, Wm. Reynolds, Pennsylvania; William H. Upson, J. H. Chamberlin, Jacob Ribbet, John Sherman, Jacob Crall, S. S. P'Hommedieu, Joel W. Tyler, J. A. R. Rose, Ohio.

At a subsequent meeting of the directors, the following officers were chosen: President, Marvin Kent; Vice President, T. W. Kennard; Secretary, Joel W. Tyler; Treasurer, E. P. Brainerd; Assistant Secretary, W. H. Grant; Attorney, William H. Upson.

Northwestern Virginia Railway.

We have been informed that the Mayor and Commissioners of Finance of the city of Baltimore have closed the sale of the city's mortgaged interest in the Northwestern Virginia railroad company to the Baltimore and Ohio railroad company for the sum of $1,200,000, payable $200,000 in cash, $500,000 in sixty days, and $500,000 in eighty days. This is somewhat less than the original cost of the city's interest, but the corporation being a one-third owner of the stock of the Baltimore and Ohio railroad, secures by the sale a benefit in common with all the other stockholders. We have heard that a larger sum could have been obtained from other parties, but at a sacrifice of all other interests. The Mayor and Commissioners preferred the sale made, and have thereby protected the stock and bondholders, and creditors in the Northwestern Virginia railroad company, and secured to the city one-third of the benefits of the purchase. John W. Garrett, Esq., on the part of the Baltimore and Ohio Railroad, Senator Vanwinkle, of Western Virginia, on the part of the Northwestern Virginia Railroad Company, and Mayor Chapman, with the finance committee, on the part of the city of Baltimore, have been the negotiating parties. The Northwestern Virginia Railroad may now be regarded as a prolongation of the main stem of the Baltimore and Ohio Railroad, and the officers of the latter company are already at work putting that road in the very best condition for travel and traffic, both as regards the track and tunnels.

We understand that provision has already been made for a re-organization of said company—they to have all the advantages of the above purchase, and all holders of their stock and of their third unguaranteed mortgage, contractors' advance, and contractors' final estimate bonds, and all other creditors of that company, who will accept the same in full satisfaction of their respective claims, &c., will receive capital stock in said re-organized company to the amount of fifty per cent of the principal of their respective claims, and of the interest due thereon and remaining unpaid on the 1st of January, 1865. The $1,200,000 to be paid by the Baltimore and Ohio Railroad Company, as well as all bonds endorsed by them, and money advanced and to be advanced will be preferred stock, the balance common stock.

It is also stipulated that the construction of the bridge across the Ohio river, at Parkersburg, shall be pushed to completion at an early day. By this arrangement the Marietta and Cincinnati railroad will be greatly benefitted, as that road connects with the Northwestern Virginia railroad at the Ohio river.

☞ The aggregate value of the exports of produce and merchandise, exclusive of specie, from this port during the past week was $8,236,012, against $3,358,498 same week last year. The total value of the exports for the week previous was $8,040,364.

☞ The cash balance in the hands of the Assistant Treasurer of the United States in Boston, at the close of business July 30, was $8,959,502 99, a decrease of $591,942 01 as compared with the close of the previous week.

☞ The following will show the exports of specie from the port of New York for the week ending July 30, 1864, and since January 1st:

Total for the week	$401,812
Previously reported	30,612,893
Total since January 1, 1864	$31,014,205
Same time in 1863	$25,863,076
Same time in 1862	$25,074,186

☞ Mr. Cisco's resignation, as Assistant Treasurer of the United States at the Port of New York took effect on the 1st inst., and the responsible and arduous duties which he has performed for the past eleven years with honor to himself, and equal satisfaction to the Treasury department and to the financial community, are temporarily devolved on Mr. Jacob Russell, who has occupied positions of trust in the Sub-Treasury ever since its first formation in 1846. This appointment is regarded as the best arrangement that, under the circumstances, could have been made.

☞ In both branches of the Baltimore City Council, on the 1st inst., a resolution was adopted authorizing the city to institute suit against the Baltimore and Ohio Railroad Company for the recovery of $9,000 paid by the city to the Government on the interest of the $5,000,000 loan. It is alleged that instead of paying the regular interest, the railroad company paid only $291,000, reserving the balance as the Government tax.

☞ The total value of foreign goods imported into the port of Boston for the week ending July 29, was $948,257, against $491,485 for the corresponding week in 1863. The exports for the week ending July 29, were $682,555, against $172,209 80 for the corresponding week in 1863.

Michigan Southern and Northern Indiana Railroad.

A suit has been commenced in the Supreme Court, in this city, against the Michigan Southern and Northern Indiana Railroad Company, in behalf of the holders of the guaranteed stock of that corporation, who claim the sum of about two millions of dollars to be applied as fast as earned to paying up the arrears of dividends on that stock at the rate of ten per cent per annum. The guaranteed stock, amounting to three millions of dollars, was issued in 1857, and the company agreed to pay thereon an annual dividend of ten per cent. The plaintiffs aver that, with the exception of five per cent, which was paid in June, 1863, no dividend has been declared on said stock, and the present suit is brought to compel the company to redeem its pledge by paying up the back dividends.

☞ The Milwaukee and Prairie du Chien Railroad Co. paid their half-yearly dividend of 4 per cent on the First Preference Shares of the Road on the 1st inst. Into this Stock the mortgages of the Company are convertible for ten days after each half-yearly dividend. These mortgages bear only 7 per cent a year, and they are liable to be paid off at par by draft for the Sinking Fund on the 1st of October, and 1st of April, while the Preference Stock, into which they are convertible, command 18 and 20 per cent premium. Under such advantages the process of conversion is going on rapidly, and for the sufficient reason, that as the amount of Bonds outstanding is reduced, the chances of their being drawn for reimbursement at par are multiplied.

Death of Nathaniel Marsh.

Resolutions of the Board of Directors of the Erie Railway Company, passed July 26, 1864.

Whereas, the Vice-President has officially communicated to the Board the intelligence of the death of our late President, NATHANIEL MARSH, Esquire, therefore

Resolved, That in testimony of our appreciation of the great value of his services to this Company, and of our estimation of the excellence of his character, the following memorial be placed upon the Records of the Board, and a copy thereof be transmitted to the family of the deceased:

On the organization of the New York and Erie Railroad Company, under the Act of 1845, MR. MARSH, then a young man, first entered its employment as Secretary, and continued to hold this office until he was appointed Receiver. The success with which the construction and equipment of the road were steadily prosecuted, from 1845 to 1853, was partly due to his financial ability and the confidence reposed in him by the community. In August, 1859, he was selected by the Supreme Court to serve as the Receiver of the Corporation, pending the suits for the foreclosure of the mortgages. After a very successful administration as Receiver, during which he lent a hearty co-operation to the reorganization of the Company, he was unanimously elected the first President of the Erie Railway Company, and took charge of the line as such on the 1st day of January, 1862. He continued faithfully to perform his duties as President, though his health and strength were steadily failing, until he literally died at his work, as a candle goes out in the socket. During the five years of his administration, first as Receiver, and then as President, though the Common Stock of the Company was largely increased by conversions, yet its market value advanced from four dollars a share to a steadily maintained premium; the unsecured funded debt was changed into Preferred Stock; the floating debt was extinguished; the mortgage debt was reduced several millions of dollars; the traffic of the road was increased nearly threefold; the rolling stock was largely increased and improved; sixty miles of new line were added to the Western Division of the road; a long lease was taken of one hundred and fifty miles of road between Corning, Rochester and Buffalo; the Long Dock property was opened for use—thus giving our line independent termini at Buffalo, Rochester and New York; and by the construction of a few miles of road, the great business of the Pennsylvania Coal Company was secured. These facts are eloquent testimonials of the success of his administration; but they fail to convey an impression of the traits of character by which it was achieved. Of these we can speak from a long association with him. He was a prudent, sagacious man, of unquestioned probity, of uncommon energy, of faithful devotion to every interest placed in his charge, and of a judicial sense of justice, which made him ever ready to hear both sides of a question, and firm in maintaining himself when he had decided what to do. His indefatigable industry hesitated at no amount of details, his genial disposition and even temper turned casual business acquaintances into friends, his sound common sense instinctively probed the motives of those who approached him with designing purposes, and his rare tact gave him the power of being firm without making enemies. The Erie Railway Company was fortunate in having such a servant. His loss cannot easily be supplied. We who have been associated with him for so many years in friendly business intercourse, may well say that to us individually it can never be made good. We should do injustice to his memory should we omit also to say that in every sphere of life in which he moved the same traits of character that made him so valuable an officer to us, gave him a useful influence upon all with whom he came in contact. He was a good citizen, bountiful in his charities, a sympathizing neighbor, a faithful member of the Christian body with which he communed, and a kind and affectionate husband, father, and friend.

HORATIO N. OTIS, *Secretary.*

☞ Work on the Junction Railroad, Philadelphia, is progressing slowly. Considerable time will yet be required to complete it, as the tunnelling south of Market street has not yet been commenced. South of the point where the tunnel will begin, the road has been cut to the required depth, and the side walls of stone are now being constructed. Much delay has been occasioned by the difficulty in obtaining laborers.

☞ Ground has been broken near Greenough's pond, Yarmouth, Mass., for the construction of the Cape Cod Central Railroad.

The New Tariff of 1864.

The following is a complete alphabetical list of all the rates of duty imposed by the new tariff on foreign goods imported:

Continued from Page 751.

Iron over No. 16, and not over No. 25 wire gauge, per 100 lbs	$3 50 and 15 per ct.
Do., wire covered with silk, cotton, or other material, in addition to above rates, per lb	5 cts.
Do., smooth or polished sheet, by whatever name designated, per lb	3 cts.
Do., sheet iron, common or black, not thinner than No. 20 wire gauge, pr lb.	1¼ ct.
Do., thinner than No. 20, and not thinner than No. 25, per lb	1½ ct.
Do., thinner than No. 25 wire gauge, per lb	1¾ ct.
Do., steam, gas and water tubes and flues, of wrought iron, per lb	2½ cts.
Do., screws, commonly called wood screws, 2 inches or over in length, per lb	8 cts.
Do., less than 2 inches in length, per lb.	11 cts.
Do., screws other than wood screws	35 per ct.
Do., in pigs, per ton	$9
Do., vessels of cast iron, not otherwise provided, and on andirons, sadirons, tailors' and hatters' irons, per lb	1½ ct.
Do., stoves and stove plates, of cast iron, per lb	1½ ct.
Do., cast iron steam, gas and water pipe, per lb	1½ ct.
Do., cast butts and hinges, per lb	2½ ct.
Do., hollow ware, glazed or tinned, per lb	3½ ct.
Do., all other castings of, not otherwise provided for	30 per ct.
Do., all manufactures of, not otherwise provided for	35 per ct.
Do., old scrap, provided nothing shall be deemed old iron that has not been in actual use and fit only to be remanufactured, per ton	$8
Do., chains, trace chains, halter chains and fence chains, made of wire or rods, not less than ¼ of an inch in diameter, per lb	2½ cts.
Do., do., less than ¼ of an inch in diameter, and not under No. 9 wire gauge, per pound	3 cts.
Do., do., under No. 9	35 per ct.
Do., anchors, or parts thereof, per lb	2¼ cts.
Do., blacksmiths' hammers and sledges, axles, or parts thereof, and malleable iron, in castings, not otherwise provided for, per lb	2½ cts.
Do., wrought railroad chairs, per lb	2 cts.
Do., wrought nuts and washers, ready punched, per lb	2 cts.
Do., bed screws, per lb	2½ cts.
Do., wrought hinges, per lb	2½ cts.
Do., wrought board nails, spikes, rivets and bolts per lb	2½ cts.
Do., cut nails and spikes, per lb	1½ cts.
Do., horse shoe nails, per lb	5 cts.
Do., cut tacks, brads or sprigs, not exceeding 16 oz. to the 1,000, per 1,000	2½ cts.
Do., do., exceeding 16 ounces to the 1,000 per lb	3 cts.
Do., galvanized or coated with any metal by electric batteries, per lb	2½ cts.
Do., squares, marked on one side, per lb.	3 cts. and 30 per ct.
Do., do., all other per lb	6 cts. and 30 per ct.
Do., taggers	30 per ct.
Iron, acetate of, per lb	50 cts.
Istle, or Tampico fibre, per lb	1 ct.
Ivory or bone dice, draughts, chess men, chess balls, and bagatelle balls	50 per ct.
Jellies of all kinds	50 per ct.
Jute, all manufactures of, not otherwise provided for	30 per ct.
Jute yarns	25 per ct.
Kaoline, per ton	$5
Kid gloves	50 per ct.
Kirschenwasser, per gallon	$2
Knives, see "steel."	
Lastings, see "cloth."	
Lead, in pigs, per lb	2 cts.
Do., in bars, per lb	2 cts.
Do., old scrap, fit only to be remanufactured per lb	1½ ct.
Do., in sheets or pipes, per lb	2¾ cts.
Do., shot per lb	2¾ cts.
Do., ore, per lb	1½ ct.
Lead, white or red, dry or ground in oil, per lb	3 cts.
Do., acetate of, per lb	20 cts.
Lemons	25 per ct.
Lime, white, per lb	3 cts.
Liquorice root, per lb	2 cts.
Do. paste, per lb	10 cts.
Do. in rolls, per lb	10 cts.
Linens, brown and bleached, ducks, canvass, paddings, cotton bottoms, burlaps, diapers, crash, huckabucks, handkerchiefs, lawns or other manufactures of flax, jute or hemp, or of which flax, jute or hemp shall be the component material of chief value, not otherwise provided for, valued at 30 cents or less per square yard	35 per ct.
Do., do., valued above 30 cts. per square yard	40 per ct.
Do., yarns, for carpets, not exceeding No. 8 lea, and valued at 24 cts. or less per lb	30 per ct.
Do., do., valued above 24 cts. per lb	35 per ct.
Linen thread, twine and packthread, and all other manufactures of flax or of which flax shall be the component material of chief value, not otherwise provided for	40 per ct.
Liquors, spirituous, not otherwise enumerated	100 per ct.
Do. do., may be imported in bottles when the packages shall contain not less than one dozen, and all bottles shall pay a separate duty of, each	2 cts.
Liquors—No lower rate or amount of duty shall be levied on brandy, spirits, and other spirituous beverages, than that fixed by law for first proof, but shall be increased in proportion for any greater strength than first proof.	
Do., none under first proof to pay a less rate of duty than	50 per ct.
Liqueurs, of all kinds, per gallon	$2
Litharge, per lb	3 cts.
Mace, per lb	40 cts.
Maps	25 per ct.
Marble, white statuary brocaletta, sienna and verde antique, in block, rough or squared, per cubic foot	$1 and 25 per ct.
Do., veined, and all other not otherwise provided for, in block, rough or squared, per cubic foot	50 cts. and 20 per ct.
Mats, see "Carpets."	
Melado, per lb	2½ cts.
Mineral green	30 per ct.
Do., blue	30 per ct.
Mineral or medicinal waters, or waters from springs impregnated with minerals, for each bottle or jug containing not more than one quart	3 cts. & 25 per ct.
Do., containing more than one quart, for each additional quart or fraction	3 cts. and 25 per ct.
Mohair cloth, see "cloth."	

Molasses; from sugar cane, per gallon. 8 cts.
Do., concentrated, per lb 2½ cts.
Do., all syrups of sugar or sugar cane, cane juice, concentrated molasses or concentrated melado, entered under the name of molasses or any other name than syrup of sugar, or of sugar cane, cane juice, concentrated molasses or concentrated melado, shall be liable to forfeiture to the United States.
Morphine and its salts, per oz $2 50
Mosaics, not set 10 per ct.
Murexide 25 per ct.
Nickel 15 per ct.
Nitric ether, spirits of, per lb 50 cts.
Nutmegs, per lb. 50 cts.
Oil, croton, per lb. $1
Do., olive, in flasks or bottles, per gall. $1
Do., do. salad, per gallon $1
Do., castor, per gallon $1
Do., cloves, per lb. $6
Do., cognac or œnanthic ether, per oz. $4
Do., petroleum and coal illuminating, per gallon 10 cts.
Do., illuminating, refined or produced from the distillation of coal, asphaltum, shale, peat, petroleum or rock oil, or other bituminous substances used for like purposes, per gallon 30 cts.
Opium, per lb $2 50
Do., prepared for smoking, and the extract of. 100 per ct.
Oilcloths, for floors, stamped painted or printed, valued 50 cts. or less per square yard 30 per ct.
Oilcloths, valued over 50 cents per square yard, and all other except silk oilcloth 40 per ct.
Oranges 25 per ct.
Paddy, per lb. 1½ ct.
Palmleaf fans, each. 1 ct.
Pamphelets 25 per ct.
Parian ware, gilded, &c. 50 per ct.
Do., plain white. 45 per ct.
Paris white, per lb 1 ct.
Paris green. 30 per ct.
Pearls, not set 10 per ct.
Peanuts, or ground beans, per lb 1 ct.
Do., shelled, per lb 1½ ct.
Pentips and penholders, or parts thereof 35 per ct.
Pens, metallic, per gross. 10 cts. and 25 per ct.
Percussion caps. 40 per ct.
Petroleum, crude, per gallon 10 cts.
Pimento, per lb 15 cts.
Do., ground, per lb 18 cts.
Pepper, black, white and red or cayenne, per lb. 15 cts.
Do., ground, per lb 18 cts.
Perfumery, of which alcohol forms the principle ingredient, per gallon. $3 & 50 per ct.
Periodicals 25 per ct.
Philosophical apparatus and instruments imported for the use of any society incorporated for philosophical, literary or religious purposes, or for the encouragement of the fine arts, or for the use of, or by the order of any college, academy, school or seminary of learning in the United States 20 per ct.
Pine apples 25 per ct.
Pewter, old and fit only to be remanufactured, per lb. 2 cts.
Pipes, clay, common or white. 35 per ct.
Do., meerschaum, wood, porcelain, and all other tobacco smoking pipes, per gross. $1 50 and 75 per ct.
Do., cases, stems, mouthpieces and metallic mountings for pipes, and all parts of pipes or pipe fixtures, 75 per ct.
Platina, articles of, or of which platina is a component 40 per ct.
Plaintains 25 per ct.
Playing cards, costing not over 25 cts. per pack, per pack 25 cts.
Do., costing over 25 cts 35 cts.
Porcelain ware, gilded, ornamented or decorated in any manner, 60 per ct.
Do. plain white, not decorated in any manner 45 per ct.
Porcelain 40 per ct.
Porter, in bottles, per gallon. 35 cts.
Do., not in bottles, per gallon. 20 cts.
Precious stones, not set 10 per ct.
Prussian blue, dry or moist. 30 per ct.
Printed matter 25 per ct.
Pyroligenous acid, exceeding the specific gravity of 1,040 per lb 80 cts.
Do., not exceeding 1,040, known as No. 8, per lb 25 cts.
Pyrolignite of ammonia, per lb 70 cts.
Ratafia, and other similar spirituous beverages, not otherwise provided for, per gallon $2
Regulus of antimony 10 per ct.
Ribbons, silk 60 per ct.
Rice, cleaned, per lb. 2½ cts.
Do., uncleaned, per lb 2 cts.
Roman vitriol. 25 per ct.
Rubies not set. 10 per ct.
Rugs, see "Carpets."
Russia and other sheeting, of flax or hemp, brown and white 35 per ct.
Safflower, extract of 20 per ct.
Sail duck, or canvass for sails. 30 per ct.
Salt, in sacks, barrels or other packages, per 100 lbs. 24 cts.
Do., in bulk, per 100 lbs 18 cts.
Saltpetre, crude, per lb 2½ cts.
Santonine, per lb $5
Sardines. 50 per ct.
Satin white, per lb. 3 cts.
Saws, see "Steel."
Screens, see "Carpets."
Segars, see "Segars."
Screws of any other metal than iron and all other screws of iron, except wood screws. 35 per ct.
Do., wood, see "Wood screws."
Seines, per pound 6½ cts.
Shale, per ton (see coal) $1 25
Shawls, woollen (same as woollens).
Sheepskins, raw or unmanufactured, imported with the wool on, washed or unwashed 20 per ct.
Sheetings, of flax or hemp, brown or white 35 per ct.
Shirts, of wool, per lb. 20 cts. and 30 per ct.
Shoddy, per lb. 3 cts.
Shot, lead, per lb 2¾ cts.
Silk, spun, for filling in skeins or cops. 25 per ct.
Silk, in the gum, not advanced more than singles, tram, and thrown or organzine 35 per ct.
Do., floss. 35 per ct.
Do., all dress and piece of silk, or of which silk is the component material of chief value. 60 per ct.
Do., sewing, in the gum or purified 40 per ct.
Do., ribbons 60 per ct.
Do., velvets 60 per ct.
Do., do., or of which silk is the chief material 60 per ct.
Silk vestings, pongees, shawls, scarfs, mantillas, pelerines, handkerchiefs, veils, bonnets, hats, caps, turbans, chemisetts hose, mitts, aprons, stockings, gloves, suspenders, watch chains, webbing, braids, fringes, galloons, tassel fringes, lace cords and trimmings 60 per ct.
Do., all manufactures of, not otherwise provided for. 50 per ct.
Silver, articles of, or of which silver is a component 40 per ct.
Syrup of sugar cane juice, per lb 2½ cts.
Sisal grass, all manufactures of, not otherwise provided for. 30 per ct.
Size, gold and patent 20 per ct.
Skates, see "Steel."
Slates 40 per ct.
Slate pencils 40 per ct.
Slate chimney pieces 40 per ct.
Do., mantels. 40 per ct.
Do., slabs for tables 40 per ct.
Do., all manufactures of 40 per ct.
Smalt 20 per ct.
Snuff, manufactured of tobacco, ground, dry or damp, and pickled, scented or otherwise, of all descriptions, per lb. 50 cts.
Snuff, flour. Same as "Snuff."
Soap, fancy, perfumed, honey, transparent and all descriptions of toilet and shaving soap, per lb. 10 cts. and 25 per ct.
Do., all not otherwise provided for, per lb. 1 ct. and 30 per ct.
Spanish brown 25 per ct.
Spelter, in blocks or pigs, per lb 1¼ cts.
Spelter, in sheets, per lb 2¼ cts.
Spirits, see "Liquors."
Spirits other than brandy, manufactured or distilled from grain or other materials, first proof, per gallon $2
Spirits, imitations of, same as "Brandy."
Spirits of turpentine, per gallon 30 cts.
Starch, made of potatoes or corn, per lb 1 ct. and 20 per ct.
Do., made of rice or any other material, per lb 3 cts. and 20 per ct.
Steel, in ingots, bars, coils, sheets or wire, not less than one-quarter of an inch in diameter, valued at 7 cts. per lb., or less, per lb 2¼ cts.
Do., valued at above 7 cts. and not above 11 cts per lb., per lb. 3 cts.
Do., value above 11 cts. per lb., per lb 3½ cts. and 10 per ct.
Do., wire, less than one quarter of an inch in diameter and not less than No. 16 wire guage, per lb. 2½ cts. & 20 per ct.
Do., less or finer than No. 16, per lb 3 cts. and 20 per ct.
Do., in any form, not otherwise provided for 30 per ct.
Do., skates, costing 20 cts. or less pair, per pair. 8 cts.
Do., costing over 20 cts. per pair. 35 per ct.
Do., cross cut saws, per lineal foot 10 cts.
Do., mill, pit, and drag saws, not over 9 inches wide, per lineal foot 12½ cts.
Steel, handsaws, not over 24 inches in length, per dozen 75 cts. and 30 per ct.
Do., do., over 24 inches long, per dozen. $1 and 30 per ct.
Do., backsaws, not over 10 inches in length, per dozen 75 cts. and 30 per ct.
Do., do., over 10 inches long, pr doz. $1 & 30 per ct.
Do., files, file blanks, rasps and floats of all descriptions, not exceeding 10 inches in length, per lb. 10 cts. and 30 per ct.
Do., do., exceeding 10 inches in length, per lb. 6 cts. and 30 per ct.
Do., penknives, jackknives or pocket knives of all kinds. 50 per ct.
Do., needles, for knitting or sewing machines, per 1,000 $1 and 35 per ct.
Do., squares (not including iron squares marked on one side), per lb. 6 cts. & 30 per ct.
Do., all manufactures of, or of which steel shall be a component part, not otherwise provided for. 45 per ct.
Steel, all articles of, partially manufactured, or of which steel shall be a component part, not otherwise provided for, to pay the same as if wholly manufactured.
Stoneware, common 25 per ct.
Do., not ornamented. 25 per ct.
Stoneware, see "Earthenware," not otherwise provided for. 40 per ct.
Strychnine and its salts, per oz. $1 50
Strontia, acetate of, per lb 50 cts.
Sugar, not above No. 12, D. S. in color, per lb 3 cts.
Do., above No. 12 D. S., and not above No. 15 D. S., in color, per lb. 3½ cts.
Do., above No. 15, not stove dried, and not above No. 20 D. S., per lb 4 cts.
Do., refined in form of loaf, lump, crushed, powdered, pulverized or granulated, per lb. 5 cts.
Do., stove dried or other above No. 20, per lb 5 cts.
Do.—The standard by which the color

and grade of sugar are to be regulated shall be selected and furnished to the collectors of such ports of entry, as may be necessary, by the Secretary of the Treasury, from time to time and in such manner as he may deem expedient.	
Sugar candy, not colored, per lb	10 cts.
Sugars, see "Confectionery," after being refined, when tinctured, colored, or in any way adulterated, when valued at 30 cts. per lb. or less, per lb.	15 cts.
Sugar cane juice, syrup of, per lb	2½ cts.
Sulphate of copper	25 per ct.
Sulphur, flour of, per ton	$20 and 15 per ct.
Taggers iron	30 per ct.
Tampico fibre, per lb	1 ct.
Tannin, per lb	$2
